### A WOMAN'S MISERY.

Mrs. John LaRue, of 115 Paterson Avenue, Paterson, N. J., says: "I was troubled for about nine years, and what I suffered no one will ever know. I used about every known remedy that is said to be good for kidney complaint, but without deriving permanent relief. Often when alone in the house the back ache has been so bad that it brought tears to my eyes. The pain at times was so intense that I was compelled to give up my household duties and lie down. There were headaches, dizziness and blood rushing to my head to cause bleeding at the nose. My first box of Doan's Kidney Pills benefited me so much that I continued the treatment. The stinging pain in the small of my back, the rushes of blood to the head and other symptoms disappeared."

Doan's Kidney Pills for sale by all druggists. 50 cents per box. Foster-McMillan Co., Buffalo, N. Y.

No matter how good you are, somebody else is better—and is willing to acknowledge the fact.

For \$1.05 Money Order.  
The John A. Salzer Seed Co., La Crosse, Wis., mail postpaid 15 trees, consisting of Apples, Peaches, Plums, Cherries, Pears, Nectarines and Apricots, for a city or country garden, including the great Bismarck Apple, all hardy Wisconsin stock, are sent you free upon receipt of \$1.05.

AND FOR 10¢. AND THIS NOTICE you get sufficient seed of Celery, Carrot, Cabbage, Onion, Lettuce, Radish and Flower Seeds to furnish hundreds of choice flowers and lots of vegetables for a big family, together with our great plant and seed catalog. (A.C.L.)

### AGRICULTURAL.

Beets as Fodder.

The farmers of Germany have discovered that dried sugar beets make an excellent fodder, which may be used as a substitute for maize. The beets may be kept without difficulty if they are properly sacked and stored. This use of them will be likely to prevent any over-production of sugar. They will be turned into fodder whenever the price of sugar falls too low.

Rheumatism in Swine.

An unusual number of inquiries are made regarding a cure for rheumatism among swine, mainly with the summer dropped pigs. In the majority of cases this trouble is due to pigs that are either draughty or damp, perhaps both. This being the case, the first thing to do is to fix the pens, seeing to it that the floor is dry and kept so, and that the pigs have a heavy bedding of dry material every night. Then see that the water given them is clean, and that there are no direct draughts of air blowing over them at night. To relieve the attack, let the feed be of middlings and milk, for the pigs and the hogs also, with a half pint of fried blood meal divided equally for the three feeds daily and mixed in the feed. If other attacks follow, give five grains each of salol and quinine suspended in some vegetable, such as the half of a small potato.

A Vicious Tongue.

It is not always possible to have a two-horse wagon sufficiently light for long distance driving where it is best to use two horses. The illustration shows a tongue which may be easily fixed by a local blacksmith at small expense, for use on a light one-horse wagon. The illustration shows little description, the main points being to shape the pole made of tough lumber

ported by them to the markets of the world. Both eggs and poultry are preserved in cold storage and distributed to the people as the market warrants.

The farmer can produce a pound of chicken just as cheaply as he can a pound of beef, pork or mutton, and it always brings a better price. Why, then, not give this branch of our business more attention? With good laying stock eggs can be produced at a handsome profit. Instead of a farmer having twenty-five or thirty hens he ought to keep 200 or 300, or more, as his fancy and the size of his farm permits.—Colon J. Little, in Commercial Poultry.

Parasites of Clover.

A popular edition of Bulletin No. 70 has been issued by the experiment station of Iowa State College, on the subject of "Some Weeds of Iowa." It was prepared by Dr. L. H. Pommer, botanist of the station. The following section on the dodder will be found of interest, for this parasite weed is found in many parts of the country.

During the last few years, Dr. Pommer says, dodders have made their appearance upon clover in different sections of the country. Five species have been reported upon alfalfa and clover. Mr. Dewey states, from his experience, that the dodder is rarely found east of the Missouri River. No doubt, however, it occurs occasionally. Farmers should, therefore, be on their guard for this plant. It belongs to the same family as the common morning glory.

The dodders are leafless, except the small scales on the stems; herbs of yellowish color, with threadlike stems twining around the plants upon which they live. They pierce the bark with small and short rootlets, which are called suckers, or haustoria. The seeds are small, yet there is stored sufficient nourishment in them to give the embryo a start. The seed germinates in the soil and grows sufficiently in length to allow it to come in contact with the plant upon which it lives, when it immediately sends in its suckers, and thus becomes established upon the plant as though it was a part of the host.

The dodders contain no chlorophyll; the green coloring matter found in leaves, and hence cannot make plant food; that is, make starch out of raw material such as ordinary green leaves do, but must derive their nourishment entirely from the host upon which they live. Such plants are called parasites. The first and most important point is to obtain seed that is free from the dodder seed. It is best, therefore, to obtain the seed grown in the Mississippi Valley and the East. European seed should not under any consideration be purchased. There is likelihood of some danger from the East, some from the West. Clover seed grown in States south of Iowa is hardly suited for our conditions, and it is not likely that the Iowa farmer will purchase much of this seed.

Farmers cannot too emphatically be cautioned against sowing dodder infested clover seed. The ultimate loss caused by the dodder will greatly exceed the cost of cleaning the clover seed, and clean seed should be bought at any price.

The dodder may be exterminated when once established in the following way: First, by the herbicidal treatment. For this purpose a solution of copper sulphate in the following proportions will be found effective: One pound of copper sulphate to four gallons of water at the rate of fifty gallons to the acre. It is desirable to mow the patch if a small one, rake the material into a pile, allowing it to dry, and then burn. This should be watched carefully, for if the seed is formed young dodder plants will make their appearance upon the new growth of clover coming on. So it is best to follow the mowing by hoeing if the patch is a small one, and continuing this for several weeks until all danger of infection is passed. Dewey recommends keeping the soil stirred for about two inches, and that shallow cultivation is best since the seeds, if buried deeper cannot come to the surface and infect the clover plant.

Farm Notes.

There is very little profit in feeding an old cow grain to make good beef. Digestion is best accomplished when all other parts of the body are at rest. With dairy stock more than others, merit must be settled by actual test.

Other things being equal, the best offspring comes from mated animals.

Under all conditions young animals make the largest gain in proportion to food eaten.

It is the amount digested and assimilated and not the amount eaten that benefits the horse.

By propensity is meant the power of the animal to stamp his progeny with characteristics.

The time to sell a horse after he has been raised for market is whenever a good price is offered.

Manure, if properly managed, will always pay for the work of feeding and caring for the stock.

With all stock the profitable line of productiveness is to maintain good health with early maturity.

# CAUGHT BY THE GRIP.

## RELEASED BY PE-RU-NA.

"The world of medicine recognizes Grip as epidemic catarrh."—Medical Talk.

After Effects of La Grippe Eradicated by Pe-Ru-NA.

Mr. Fred Weinberger, Westerlo, Albany County, N. Y., writes: "Several years ago I had an attack of the awful Grippe which left my nerves in a prostrated condition. Then I had another attack of the grippe which left me worse again and I had three good physicians, but all in vain. I gave Pe-Ru-NA a trial. In a short time I was feeling better, and now I am as well as any one."—Mrs. Fred Weinberger.

Hon. James B. Guill, of Omaha.

Hon. James B. Guill is one of the oldest and most esteemed men of Omaha, Neb. He has done much to make it what it is, serving on public boards a number of times. He endorses Pe-Ru-NA in the following words:

"I am 68 years old, an hale and hearty man, and Pe-Ru-NA has helped me attain it. Two years ago I had the grippe, and was so crippled, that Pe-Ru-NA saved me."—J. B. Guill.

A Relative of Abraham Lincoln.

Mr. Silas W. Lincoln, who resides at 913 E. 13th St., N. W., Washington, D. C., has the honor of being third cousin to Abraham Lincoln. He writes:

"I had the grippe five times before using your medicine. Four times it was the use of Pe-Ru-NA, since which time I have not been troubled with that disease. I can now do as much work at my desk as I ever could in my life. I have gained more than ten pounds in weight."—S. S. Lincoln.

Pe-Ru-NA Not Only Cured La Grippe But Benefited the Whole System.

Miss Alice M. Drexler, 333 N. Bryant Ave., Minneapolis, Minn., writes:

"Last spring I suffered from the grippe and was partially cured, but the bad after effects remained through the summer, and somehow I did not get strong as I was before. One of my college friends who was visiting me asked me to try Pe-Ru-NA and I did so, and found it all and more than I had expected. It not only cured me of the catarrh, but restored me to perfect health, built up the entire system and brought a happy feeling of buoyancy which I had not known for years."—Alice M. Drexler.

An Actress' Testimonial.

Miss Jean Foghill, Greenwood Opera House, New York, writes: "I was afflicted with the Grippe. I was so weak that I could not sing. I tried the following:

"During the past winter of 1901 I suffered for several weeks from a severe attack of grippe, which left a serious and partial condition of the throat and head. Some one suggested Pe-Ru-NA. I had never heard of it, but I was so weak that I was forced to try it. I tried the remedy faithfully, and in a few weeks was exactly well as before."—Jean Foghill.

A Southern Judge Cured.

Judge Horatio J. Goss, Hartwood, Ga., writes:

"Some five or six years ago I had a very severe spell of grippe, which left me with a permanent catarrh. A trial was made of Pe-Ru-NA, which I did, and was immediately benefited and cured. The third bottle completed the cure."—H. J. Goss.

If you do not derive prompt and satisfactory results from the use of Pe-Ru-NA, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address: Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Hope and the Landlady.

That the thorns and thistles lining the way to success are not soon for gotten is instanced by a remark of Clyde Fitch to an applicant for a part in one of his productions.

"Well," said the young lady with a sigh of relief after having obtained a promise of a part in the play; "it is so pleasant to have something to live on besides hope—parts are scarce this fall."

"Yes replied Mr. Fitch, a reminiscence far away took in his eyes. "I lived on hopes for ten years and, with a smile, "so did my landlady."

Leap Year Episodes.

He—I wonder what makes Miss Ederleigh so awfully nervous?

She—Why, this is the first opportunity she has had in eight years.

### The Courage of Childhood.

The late George Francis Train loved children. The children of New York will miss him from Union Square, where in fine weather, he would play with them all day long.

"Citizen" Train used to tell of a little Union Square girl to whom he once gave a rich cake. She ate it and asked for another.

"I'd like to give you another," said the old man, "but it would make you sick."

"Give it to me, anyway," said the little girl. "At the dispensary I can get medicine for nothing."

### What Etiquette Prescribes.

Bill—Oh, yes, he's great on etiquette. Is that right?

"Sure. Why he was telling me only yesterday that if a man is smoking while walking down the street with a lady the cigar should always be in the side of the mouth farthest removed from the lady."

### A Circular Barn.

A circular barn has been completed by James Sears, whose farm is near Lapel, Ind. The walls, or rather wall of the barn are twenty-five feet high and sixty-five feet in diameter, the roof running to a cone. There is no such thing as a post or pillar in the barn. In order to prevent the weight of the roof from spreading the walls, Sears, who is a practical blacksmith, forged three heavy steel hoops, and with these he encircled the structure as a hand would be put around a big water tank. The barn is cyclone proof, for borax has no chance to get a hold on the structure. Inside a driveway runs round around. The stalls for horses and cattle are arranged in a circle, there is a big feeding room in the center, and a silo extends from the ground to the roof's cone. Mr. Sears claims that he can shelter more stock and slow away more feed in the barn than in the ordinary farm structure.

### Not Trees For Shade.

We plant out almost innumerable shade trees that yield us absolutely nothing besides their services as parasites in summer and perhaps as wind-break in winter. If nut-bearing trees were planted in their stead they would make as good a growth, serve the purposes of the others equally well and yield us a good supply of nuts at the same time. Nearly or quite all of our nut-bearing trees are hardy in the arid sections of our country. Hickory, walnut, chestnut, pecan and filbert—the most common kind of nuts we have—can be found to some extent all over this country, and with a little pains in planting such, and otherwise giving them due attention, could be made to grow almost anywhere. The principal reason for this not being done, says people have not thought of it. We have been accustomed to buying and setting out all kinds of fruit trees, but whenever we wanted a supply of nuts rather than them. No effort was made to grow them at home.

Along the walks and lanes in pastures, nut-bearing trees might be planted either in groves or strips, and used as wind-breaks for stock, or as a combination of shade, protection and fruit—the useful and the agreeable.

### Increase the Poultry.

The average farmer does not keep poultry enough. A little larger investment in poultry will increase the income of the farm and bring a profit that cannot be equalled by the same amount invested in any other line of farming. By this I do not mean that the farmer shall become a fancier or a poultry specialist, but I do mean that he usually neglects the faithful hen, and if he will post up on this branch of live stock husbandry and take as much pains with his hens as he does with his other live stock he can increase his profits with very little labor and money expended.

The poultry business now is a stable business. Just as much so as legs or cattle or the dairy. It used to be that you could scarcely sell poultry and eggs at certain seasons of the year, but that is not the case now. There is a market for all the poultry and eggs that can be produced, and at fair prices. The large packers have developed the poultry market just the same as they have the meat market, and our poultry and eggs are trans-

### ALFALFA AND CLOVER DODDERS.

ALFALFA AND CLOVER DODDERS.

ALFALFA AND CLOVER DODDERS.

### LA GRIPPE is epidemic catarrh.

It spares no class or nationality. The cultured and the ignorant, the aristocrat and the pauper, the masses and the classes are alike subject to the grippe. None are exempt—all are liable.

Have you the grip? Or, rather, has the grip got you? Grip is well named. The original French term, la grippe, has been shortened by the busy American to read "grip." Without intending to do so a new word has been coined that exactly describes the case. As if some hideous giant with

Nipped in the bud.

Mr. Gadabout—I've heard that the Newliveds, who always seemed to be living so happily, are going to break up housekeeping, and that she's going back to her mother's. What does that indicate?

Mr. Wise—(friend of the Newliveds) It indicates that some one is lying.

German Heavts.

Diseases of the heart have been on the increase in Germany in recent years, one person in every seven being afflicted. Influenza, alcoholism and excessive addition to bicycling and other sports are named by Dr. Steudel as the chief causes.

STATES OF OHIO, CITY OF TOLEDO, 1st.

LUCAS COUPLER.

FRANK J. CENESEY make oath that he is senior partner of the firm of F. J. CENESEY & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of CATARRH that cannot be cured by the use of HALL'S CATARRH CURE.

FRANK J. CENESEY, sworn to before me and subscribed in my presence this 15th day of December, 1901.

SEAL. A. V. GLEASON, Notary Public.

HALL'S CATARRH CURE is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free.

F. J. CENESEY & Co., Toledo, O. Sold by all Druggists 75¢.

Take Hall's Family Pills for constipation.

The United States now has three cities of more than a million inhabitants, but the fourth, St. Louis, has about 800,000.

Savings deposits in Chicago banks have passed the \$100,000,000 mark. In the past year they have increased more than \$22,000,000.

PITMAN FADELESS DYE color more goods, per package, than others.

The trouble about people who borrow is that they always pay it back.

Mrs. Hughson, of Chicago, whose letter follows, is another woman in high position who owes her health to the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—I suffered for several years with general weakness and bearing-down pains caused by womb trouble. My appetite was flimsy, and I would lie awake for hours, and could not sleep, until I seemed more weary in the morning than when I retired. After reading one of your advertisements I decided to try the merits of Lydia E. Pinkham's Vegetable Compound, and I am so glad I did. No one can describe the good it did me. I took three bottles faithfully, and besides building up my general health, it drove all disease and poison out of my body, and made me feel as spry and active as a young girl. Mrs. Pinkham's medicines are certainly all they are claimed to be."—Mrs. M. E. HUGHSON, 347 East Ohio St., Chicago, Ill.

Mrs. Pinkham Tells How Ordinary Tasks Produce Displacements.

Apparently trifling incidents in woman's daily life frequently produce displacements of the womb. A slip on the stairs, lifting during menstruation, standing at a counter, running a sewing machine, or attending to the most ordinary tasks may result in displacement, and a train of serious evils is started. The first indication of such trouble should be the signal for quick action. Don't let the condition become chronic through neglect or a mistaken idea that you can overcome it by exercise or leaving it alone.

More than a million women have regained health by the use of Lydia E. Pinkham's Vegetable Compound.

If the slightest trouble appears which you do not understand write to Mrs. Pinkham, at Lynn, Mass., for her advice, and a few timely words from her will show you the right thing to do. This advice costs you nothing, but it may mean life or happiness or both.

Mrs. Leah Stowell, 177 Wellington St., Kingston, Ont., writes:

"DEAR MRS. PINKHAM:—You are indeed a godsend to women, and if they all knew what you could do for them, there would be no need of their dragging out miserable lives in agony.

"I suffered for years with bearing-down pains, womb trouble, nervousness, and excruciating headache, but a few bottles of Lydia E. Pinkham's Vegetable Compound made life look new and promising to me. I am light and happy, and I do not know what sickness is, and I now enjoy the best of health."

Lydia E. Pinkham's Vegetable Compound can always be relied upon to restore health to women who thus suffer. It is a sovereign cure for the worst forms of female complaints—that bearing-down feeling, weak back, falling and displacement of the womb, inflammation of the ovaries, and all troubles of the uterus or womb. It dissolves and expels tumors from the early stage of development, and checks any tendency to cancerous humors. It sudden excitability, nervous prostration, and tones up the entire female system. Its record of cures is the greatest in the world, and should be relied upon with confidence.

\$5000 BOUNTY If we cannot positively produce the original letters and signatures of those mentioned, which we will do absolutely painlessly.

# SUFFERED A THOUSAND DEATHS

Physicians had done their best to cure James Wilkes, of Dillon, S. C., who had one of the most terrible cases of RHEUMATISM on record. They all failed until one doctor prescribed—

# Rheumacide

IT CURED HELPLESS CRIPPLE.

Mr. Wilkes writes the course of a long letter, dated August 18, 1902: "My legs were drawn back until my feet touched my hips. I was as helpless as a baby for nearly 12 months. The muscles of my arms and legs were hard and shriveled up. I suffered death many times over. Was treated by six different physicians in McDill, Dillon and Marion, but none of them could do me any good. Until Dr. J. P. King, of Dillon, told me to try RHEUMACIDE. I began to take it, and before the first bottle was used I began to get better. I used 54 bottles and was completely cured."

Dr. J. P. King confirms Mr. Wilkes' statement in every particular.
