Weak Hearts

Are due to indigestion. Ninety-nine of every one hundred people who have heart trouble can remember when it was simple indiges-tion. It is a scientific fact that all cases of heart disease, not organic, are not only transcable to, but are the direct result of indigestion. All food taken into the stormach which falls of perfect digestion ferments and swells the stormach, puffing it up against the heart. This interferes with the action of the heart, and in the course of time that delicate but vital organ becomes diseased. Mr. D.
