HAPPY WOMEN.

Wouldn't any woman be happy, After years of backache suffering, Days of misery, nights of unrest, The distress of urinary troubles, She finds relief and cure? No reason why any reader

Should suffer in the face of evidence Mrs. Almira A. Jackson, of East

Front St., Traverse City, Mich., says: "For twenty years I never knew what it

was to have good health. Every physician consulted said I had liver trouble. but their medicines did me no good. Just before I using Doan's Kidney

Pills I was almost paralyzed. I could hardly stand on my feet because of the numbress and lack of circulation. Had a knife been thrust into my kidneys the pain could not have been more intense. My sleep was disturbed by visions of distorted figures. The kidney secretions were annoyingly irregular, and I was tortured with thirst and always bloated. I used seven boxes of Doan's Kidney Pills. The bloating subsided until I weighed 100 pounds less, could sleep like a child and was relieved of the pain and the irregularity of the kidney action. My circulation is good and I feel better in every way."

A free trial of this great kidney medicine which cured Mrs. Jackson will be mailed on application to any part of the United States. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists; price 50 cents per box.

She Has Right to Damages.

What compensation can be made to a woman who, after being engaged for a quarter of a century, is finally jilted by the man who had won her maiden affections? The jury the other day assessed it at £650. Miss Eliza Dawes of Manchester, England, succ William Brown for breach of promise She is now forty-six and he is fifty two. She was a girl of eighteen when Brown won her heart and two years later they became engaged, Brown promising to wed her as soon as his mother died-an event which war shortly expected-but Mrs. Brown per sisted in living on until two years ago. Then the marriage was set for March, 1902. To Brown, however the idea of marriage seemed to have lost its charm, for suddenly he sailed for America, and there became en gaged to a young woman. So the first and faithful betrothed believed it her duty to institute proceedings against the fickle Brown, especially as she had during the twenty-six years refused four other offers of marriage.

club woman of Savannah, Ga., tells how she was entirely cured of ovarian troubles by the use of Lydia E. Pinkham's Vegetable Compound.

Compound.

DEAR MHS. PINEHAM:—I heartily recommend Lydia E. Pinkham's Vegetable Compound as a Uterine Tonic and Regulator. I suffered for four years with irregularities and Uterine troubles. No one but those who have experienced this dreadful agony can form any idea of the physical and mental misery those endure who are thus afflicted. Your Vegetable Compound cured me within three months. I was fully restored to health and strength, and now my three months. I was fully restored to health and strength, and now my periods are regular and painless. What a blessing it is to be able to obtain such a remedy when so many doctors fail to help you. Lydia E. Pinkham's Vegetable Compound is better than any doctor o: medicine I ever had. Very truly yours, Miss EASY WHITTAKER, 604 39th St., W.

Savannah, Ga." — 35000 ferfeit if original of above letter produced. The testimonials which we are constantly publishing from grateful women prove beyond a doubt power of Lydia E. Pinkhai... s Vegetable Compound to conquer female diseases. to conquer female diseases.

Weird Cold Weather Story. Oscar Wilte of Le Sueur, Minn., met with a most remarkable accident recently that very nearly cost him his life. With his rifle in hand he was at tempting to get within range of a caf

the water tank. Standing directly beneath the cat Wilte shot straight up at it, careless ly forgetting the fact that the tank was within range.

he desired to shoot, when the animal

ran up into the framework supporting

The bullet killed the cat and plerced the bottom of the tank, and is an instant the water, gushing out, sur rounded Mr. Wilte with a complete shower bath in a temperature of 3f

degrees below zero. Instantly his overshoes froze to the stone foundation on which he was standing, and, stooping to unbuckle them, he was chained by the spray, freezing in the terrible cold as fast as it fell into a helpless statue of ice, stiff and immovable as a stone. Only by his stooping posture, which kept his face free from the ice, was he

saved from suffocation. Soon the flow of the water was stopped by the sediment of the tank flowing into the bullet hole, and a little son of Mr. Wilte, who had seen the whole affair, ran for assistance, It was necessary to loosen the unfortunate man's feet with chisels, and when he had been carried into the house by three strong men the ice had to be broken from him with clubs.

He was badly frightened by the experience, but otherwise unharmed. The body of the cat was found frozen to his back.-Pioncer Press.

The Mud of Patagonia A scientist exploring Patagonia

"The impassability of Pata gonian mud is proverbial. You cannot walk through it and it takes a sturdy mule to carry you through More often than not it is caused by the burrowings of a tailless rat known as the tucu-tucu. Acres upon acres, amounting to square miles even-of otherwise sound and wholesome ground are undermined by this indefatigable little pest; he holds the country as nothing else holds it, until the advent of the sheep or cattle (which he hates) induces him to sh the scenes of his nightly labors."

Deafness Cannot Be Cured by local applications as they cannot reach the liseased portion of the ear. There is only one diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by catarrb, which is nothing but an inflamed condition of the nucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free. F. J. Chenky & Co., Toledo, O. Sold by Druggists, 75c.

### AGRICULTURAL.

Stick to Pure Breeds. One of the worst features of the poultry business, says Maine Farmer, has been the craze for something new, eading the breeders into a realm of liscontent where they are all the time ttempting something new. One of he worst mistakes is that of crossing oure breeds, because these breeds, as rule, have been built up through padence and energy for a particular line of work, and crosses are sure to injure ather than help. In fact, the meanest nongreis to be found are those which are the result of crossing two of our pest breeds. Better by far select the breed you like best and then stick to t, improving it, weeding out the inferior birds and breeding always from the best and selecting the malez from pirds that have descended from great producers. In this way we build up.

Coop For Hen and Chickens. A very cheap and simple roosting coop for hen and chickens is shown by this sketch. Take a plank one by weive, six feet long, saw in three pieces, two feet long, then saw one of them triangular; one of these and one of the others make one end, the front

ples, one at each corner so it can be taken off and scrubbed and cleaned I put the dimensions on the sketch. For ventilation bore six augur holes in each side.-A, W. Toberman. Hefner, O. T.

SHADE FOR STRAWBERRIES.

V. A. Clark and O. M. Taylor, of the New York Experiment Station Geneva, report results obtained in shading strawberries. With a thin cheesecloth yields were materially increased and sometimes even doubled, and with some varieties the yield was little affected or was even decreased. Using cheesecloth one commercial grade heavier, there was a heavy loss on every one of sixteen varieties tested. While the thinner cheesecloth, ripening was in some cases hastened by a day or two, but with the thicker one it was retarded about four days. The effect of shading on the berry itself was to increase it in weight about one sixth.

The good effects of shading the sirawberry are produced by conservation of soll moisture as a result of lessened evaporation and transpiration and by a slight increase in temperature of air and of soil. The greatest benefit is derived from the protection of the plants from wind. The injurious effects result from diminishing the does not appear to be of value comfective, and, where practicable, probably would be cheaper.

Feeding Morning Mash.

Sometimes experience upsets one's plans, which were thought about right, wonderfully and completely. For years the writer has advocated the moderate feeding of laving hens during the win ter: feeding them enough, of course, but feeding scanty rather than running the risk of overfeeding and thus shutting off the egg supply. A veteran poultryman who called at my farm a year ago, said that I did not feed sufficiently heavy of the morning mash. so this winter we started out to see if he was right, and found, to our astonishment, that he was,

We now give the laying hens enough of the warm mash in the morning so have been laying for many weeks. that they eat all they want before it gets cold. The remainder is then gath. ered up and an hour later heated and put in the troughs again, when the hens eat as ravenously of it as if they had had none an hour earlier. Result, more eggs than in the previous win ters from the same number of hens and pullets. In trying to figure out the cause of this change it was concluded that the hens were unable to take much of the sticky mass in their crops at first, but after a drink of water and an hour of rest they were in condition to take care of the balance really only getting in the two feeds the quantity necessary for one feed. and the equivalent of one good feed of grain. Try it the rest of the winter and see how it works with your poultry.-Indianapolis News,

Care of Cows.

In the feeding of dairy cows, two seasops are recognized by the average dairyman. These are the winter feeding season and the summer season. In the former case the animals are entirely dependent upon what grain and fodder are allotted to them, there being no opportunity for grazing afforded. The very opposite of this is true during the summer season, the animals being expected to hunt their own living, says Farmers' Tribune. The transition from one season to another frequently causes a falling off in the milk supply. This is particularly true in the fall, when the animals are left to shift for themselves after the nights come cold. The fact is lost sight of that a dairy animal is of a rather dellcate constitution, and on this account cannot withstand the hardships which the beef animal can bear.

It is a good plan to give cows shelter at night after the first of October. If they are put in the stable or in sheds and fed a small grain ration night and morning, together with a little fodder, they will liberally respond to such treatment at milking time. While the days remain warm they are as well off in the pasture, as there is no food better adapted for milk production than is grass. Grass is also economical, and for this reason one should endeaver to up for practice.

extend the grazing season just as long. as possible. If pastures are getting bare, it will generally pay to haul a little folder to the field. Never turn cows on frosted grass after having kept them in the stable during i

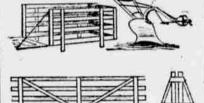

Improving the Orchard.

Orchard soils usually require large quantities of potash pertilizers. This applies especially to the peach, plum grape and small fruit tracts. The most convenient form of potash fertilizer is kainit, which may be used on ordinary soil at the rate of 500 pounds per acre, allowing a space of a couple of years or more between applications. Where the orchards or vineyards are small, wood ashes may be used in stead. The cowpea or soy bean is the best nitrogenous fertilizer where such is needed, but unless the trees show a tendency to make very little growth during the summer months, fertilizer of this kind should be used sparingly. The liberal application of nitrogenous manures causes a heavy growth of leaf and branch. This may prove a detriment instead of an advantage, since insect pests get in their most damaging work on the young and tender growth. Various diseases also often attack young trees that have been forced too rapidly, causing injury and sometimes death to the promising Barnyard manure will specimen. prove beneficial to worn out orchards, which, however, should be well pruned and cultivated to encourage them to take a new hold on life. Manure may be applied early in the spring, using about twenty loads to the acre and discing in, or it may be turned under with a stirring plow, and later the soil may be leveled with the harrow and planted to some small crop requiring cultivation. For this, potatoes, beans, peas or even cabbage may be utilized. The main object is to conserve the moisture and to hasten decomposition of organic matter in the soil.-C. " Barrett, in The Epitomist.

Farm Conveniences. The first two figures show conven-

iences originally sketched in the Farm Journal, which says of them: This crate should be about three feet

high and fitted with sidepieces extending below it that will just fit into the side irons of the wagon body. It can thus be set upon the wagon bed in an instant and will be found most useful in moving calves, sheep, pigs or other stock. It will fit on to a sled in the same way for winter use. It is also convenient when hauling loose material. If this is long the rear gate can be hinged to open at the side. The

slats should be of hard wood threequarters of an inch thick.

When there is plowing to be done close to fences or trees have your smith put extension rods on the plow and a clevis to hitch the team to, like the cut. The sketch was sent us by intensity of the light. The practice one of our readers in Kausas, and he says it works well for him. If the mercially; irrigation is far more ef- beam of the plow is adjustable to draft should of course, be adjusted before the rods are boited to the handles.

The lower figure shows two views of portable sheep fencing used at the Colorado experiment station. It is easy to move about and set up and very read ily made. Connecticut Farmer.

Poultry Notes Frosted combs will check egg production. Coat them with vaseline,

For heavy breathing or rattling in the throat we have found nothing better than a teaspoonful of glycerine, to which is added four drops of turpentine.

If you mean to purchase eggs for setting, start early. Eggs are not apt to hatch so well, nor are the chicks so strong, if obtained from hens that

To feed a duckling ten weeks will cost about five cents per pound. Labor, marketing, etc., will add as much more to the cost. The bird should weigh five pounds and sell for more than fifty cents to bring any profit. It is not a bad idea for a poultryman

to have padlocks on the egg crates. It serves to show an exclusiveness to customers who regularly expect firstclass articles, and then it's a proof that they have not been tampered with. The color of the newly hatched

chick does not always indicate what the mature plumage will be. Those who have bought eggs of pure bred stock should, therefore, not be hasty in passing judgment on the merits of the stock.

The cheapest way to rid a poultry house of all kinds of lice is to thoroughly scald with boiling water, with sufficient salt added to make a brine. Apply the remedy once a week for three weeks, using a pail and tin cup in applying it.

Rough, scaly shanks spoil the appearance of any fowl. The parasite that burrows under the natural scale and destroys it may be killed by coal oil. The oil should not be permitted to saturate the feathers of the thighs, or it may blister the skin and cause the feathers to come out. It is always best to mix the kerosene with sweet oil or a little lard.

When you see a fowl staggering around with its head thrown back on its shoulders, that means vertigo. Catch it, pour water slowly from a height of three feet on the back of its head for five minutes. Repeat the process in a little while, and pen it up without a bite for two days. You have been feeding too high, and it needs starvation for a day or two.

Returns of the receipts from shipping on the Suez Canal in January show an increase on the year from \$1,663,575 to

# NO APPETITE --- EMACIATED --- NERVOUS.

Many Women During the Spring Months Suffer From Extreme Lassitude, Loss of Appetite and Nervousness -- What They Need Is

## PE-RU-NA, THE GREAT TONIC

Miss Bertha M. Rush, 5435 Kincarde street, Pittsburg, Pa., Superintendent Junior Society of Methodist Protestant church, and leading soprano of the choir, writes: "Words cannot describe my thankfulness to you for Peruna. I was a sufferer from systemic catarrh for years and was in a very much run-down condition. I was extremely nervous, and had the most foolish fears over nothing. I was thin and emaciated.

emaciated.

"My physician advised me to leave this climate, but as it was not convenient to do so at this time, I took the advice of a friend to use a bottle of Peruna. I took it faithfully, and when the first bottle was gone I felt so much better that I bought six more and took them faithfully, after which I looked like a new woman.

"I gained in flesh, my appetite returned and all my old symptoms had disappeared. I am more than thankful to Peruna."

Miss Bertha M. Rush.

I AM TIRED.

#### Everybody is Tired--Spring Weather Does It-Every One Should Be Cautious.

Depression of the nervous system at the Depression of the nervous system at the approach of spring is the cause.

General lassitude, dull, heavy sensations, continual tired feeling, with irregular appetite, and sometimes loss of sleep. Peruna meets every indication and proves itself to be perfectly adapted to all their varied peculiarities. Peruna invigorates the system, rejuvenates the feelings, restores the normal appetite and produces regular sleep.

the normal appetite and produces regular sleep.

That tired feeling which is the natural result of the depressing effect of warm weather immediately after the invigorating cold of winter quietly disappears when Peruna is taken. Thousands are daily testifying to its priceless benefit.

Mrs. H. Kassatt, 1300 W. 13th street. Des Moines, Ia., writes: "I am happy to give my endorsement for your valuable medicine, Peruna, as I consider it a valuable medicine to take when the system is run down from overwork. About two years ago I felt that I must take a long rest, as I had been unable to work for over a month and could not regain my strength. I could not sleep at night and was in a very nerand could not regain my strength. I could not sleep at night and was in a very nervous, high strung condition. I decided to try what Peruna would do to build up my strength, and am pleased to say that I began to improve very shortly, and in less than two months I was able to take up my work, and felt hetter than I have for years. I take it now twice a year, and find that it keeps me in perfect health." Mrs. Kassatt was for over ten years the manager of a plant furnishing ladies' wear and employing hundreds of women.

#### Tired, Nervous Women.

There are thousands of them everywhere A few bottles of Peruna would do them untold benefit. As a tonic and nerve in-vigorator it has no equal. It builds up the nerves, it gives strength to the circulation and at once restores the appetite and di-gestion. No feeble woman should be with-
