Good Advice.

A lawyer gives this advice. Additions to rented premises, when made by the tenant, by all means should never be fastened with nails, but with screws. The reason for this lies in the fact that should he wish to move away and take with him the boards and other lumber composing the improvements he has made, he could simply take out the screws and take the planks. If he fastens them with nails however, he can remove nothing and the improvements become the landlord's property.
