WAS WASTING AWAY.

The following letter from Robert R. Watts, of Salem, Mo., is instructive. "I have been troubled with kidney disease for the last five years. I lost flesh and never felt well and doctored with leading physicians and tried all remedies suggested without relief. Finally I tried Foley's Kidney Cure and less than two bottles completely cured me and I am now sound and well." Sold at Trout's Drug Store.

A Shortage in School Teachers.

The city of Chicago is suffering from a scarcity of public school teachers. It needs 200 more teachers for the opening of the next school year than it as yet knows that it can get. The great increase in the number of occupations open to young women has checked their rush into the single business of school teaching. That is felt everywhere, but is particularly noticeable in Chicago.

The Normal School of Chicago, from which that city's school teachers were mainly recruited, formerly graduated classes averaging 350 members. This year only seventy-five young women were graduated. This is not enough, nor nearly enough, to supply the vacancies. The salaries paid school teachers in Chicago are good, as teachers' salaries go, but if they are not sufficiently attractive to secure an adequate number of teachers for their public schools the obvious and only alternative is to raise the pay. A first year teacher gets in Chicago \$550. This is \$80 more than an inexperienced teacher gets in Philadelphia, and about \$400 more than one gets in Fulton county, but it is not sufficient in Chicago and will have to be increased.

School teachers' salaries have for some years past showed a strong tendency upward. Women have secured almost a monopoly of the business of public school teaching, and their competition with each other for places has kept salaries down. Now that so many thousands of them are finding lucrative and suitable employment in other fields the supply of school teachers has begun to fall short of the demand, and to keep the schools supplied the pecuniary attraction of other callings will have to be met by better pay for school teaching, and that to about the limit of our ability will the minimum salary law accomplish in this county.

We Would Never Do It.

We would not think of selling you a regular 50c. shirt for 40c.; a 9c. muslin for 7c.; a 50c. corset for 40c.; nor 12c. dress goods for 8 and 9c., the yard, when this means that we are selling the goods at what they cost us if we didn't have a very good reason for so doing.

We mean to quit the store business and want to turn our entire stock into cash and know the quickest way to do so is to sell cheaper than any one else will or can. Thus in a great while a merchant will sell you an article at a cost of only one cent less than cost, but if he does he is going to get square on his other goods. We talk from actual experience.

We not only sell shirts and overalls cheaper than anybody else, but we will sell you anything and everything cheaper because we do not care for profit.

The careful housewife knows more about bargains than the average man and to them would we respectfully submit a few prices for comparison as a basis of prices on our entire stock.

Plain black satin 19 inches wide only 45c., per yard, and if you can beat it at 60c., per yard it is our treat. Lancaster gingham 6c., per yd., called 4 and 5c.; shirting 9 and 7c., white and red table cloth 22c., all worth 30c.; quality 2c. quality for 9c.; white goods 6, 8, and 10c., white duck 19 per yard, blue, scarlet, green and brown velvet 40c., per yard and worth 50c. Laces as low as 1c., per yd. Do not put off coming to see us. Remember we will not buy new goods to replace our present stock and something you want to-day may not be here a week hence.
