There were no developments until about twenty-one days had elapsed when the calf showed unmistakable symptoms of rabies, and in a few days died. A new potato worm, which is said to be in a fair way to annoy the farmers as much as the celebrated Colorado beetle, has made its appearance in different parts of the state. The worm is about an inch in length, of brown or blackish gray, with a hard yellow head, a dark saddle, and stripes longitudinally toward the tail. He bores into the stalk near the ground and works his way upward, the stalk falling over as he weakens it by his boring.

It is probably true that enough ingenuity to run most any business in the world is expended every year by the women who get up new dodges to raise money for the churches. A way down in Argentine they have hit on this: A leader represents the year and appoints twelve women to represent the months, who appoint four ladies each to represent a week, who in turn name seven children each for the days. The days, weeks, months and year must then each earn a dollar. The scheme puts the end less chain out of business.
