

COMMODORE NICHOLSON RECOMMENDS PE-RU-NA

COMMODORE Somerville Nicholson, of the United States Navy, in a letter from 187 R Street, Northwest, Washington, D. C., says:

"Your Peruna has been and is now used by so many of my friends and acquaintances as a sure cure for catarrh that I am convinced of its curative qualities and I unhesitatingly recommend it to all persons suffering from that complaint. Our army and our navy are the natural protection of our country. Peruna is the natural protection of the army and navy in the vicissitudes of climate and exposure. We have on file thousands of testimonials from prominent people in the army and navy. We can give our readers only a slight glimpse of the vast array of unsolicited endorsements Dr. Hartman is constantly receiving for his widely known and efficient remedy, Peruna. If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. S. J. Hartman, President of The Hartman Sanitarium, Columbus, Ohio, and he will be pleased to give you his valuable advice."

Had Corner in Graves. The Melbourne Women's hospital discovered lately that a local undertaker's ring had bought up nearly all the vacant plots in the general cemetery, and having put up its prices for funerals at another cemetery, which has only been opened a short time in order to divert trade to its own ground, was retailing its corner in graves at a handsome profit.

Prisoners Struck for Tobacco. A unique strike occurred at the house of correction at Rutland, Vt., when the prisoners refused to go to work without their chewing tobacco. On account of the storm the usual supply of tobacco was not delivered. The strikers lacked organization, and weakened when the officials explained what would happen if they did not return to work.

A Grimly Suggestive Group. The minister and the doctor were riding down town in a Lexington avenue car, and had arrived at Madison square when their friend the undertaker joined them. After riding with him two blocks the minister and doctor put the undertaker off the car, saying their appearance in trio looked too suggestive and would cause talk among their friends.

Frame from Historic Wood. Capt. C. A. Hoffnagle recently presented the Seth Warner chapter, Daughters of the American Revolution, at Vergennes, Vt., with a frame for its charter. The frame was made by Capt. Hoffnagle from wood taken from one of the boats of Arnold's fleet which was sunk in Arnold's bay, a few miles from Vergennes, Oct. 11, 1776.

WOMEN'S NEGLECT SUFFERING THE SURE PENALTY

Health Thus Lost is Restored by Lydia E. Pinkham's Vegetable Compound.

How many women do you know who are perfectly well and strong? We hear every day the same story over and over again. "I do not feel well; I am so tired all the time!"

Miss Kate McDonald

More than likely you speak the same words yourself, and no doubt you feel far from well. The cause may be easily traced to some derangement of the female organs which manifests itself in depression of spirits, reluctance to go anywhere or do anything, backache, bearing-down pains, flatulency, nervousness, sleeplessness, leucorrhoea. These symptoms are but warnings that there is danger ahead, and unless heeded a life of suffering or a serious operation is the inevitable result. The never-failing remedy for all these symptoms is Lydia E. Pinkham's Vegetable Compound.

Miss Kate McDonald, of Woodbridge, N. J., writes: Dear Mrs. Pinkham: "I think that a woman naturally delicate to me from trouble has meant so much to me that I cannot help from telling mine for the sake of other suffering women."

For a long time I suffered untold agony with a uterine trouble and irregularities, which made me a physical wreck, and no one thought I would recover, but Lydia E. Pinkham's Vegetable Compound has entirely cured me, and made me well and strong, and I feel it my duty to tell other suffering women what a splendid medicine it is.

If you are ill, do not hesitate to get a bottle of Lydia E. Pinkham's Vegetable Compound at once, and write to Mrs. Pinkham, Lynn, Mass., for special advice—it is free and always helpful.

FOR THE HOUSEWIFE

Liver and Bacon. Put the slices of bacon into a frying pan and cook slowly until they look crisp and some of the fat is fried out. Now add the liver cut one-half inch thick and fry until cooked through, because under-done liver is not a wholesome food. Serve on a warm platter garnished with the crisp slices of bacon.

Dried Green Pea Soup. Soak a cup of dried green peas over night. Drain and put into a saucepan with two quarts of cold water and cook slowly for one hour. Now add a teaspoon of salt and a bone from cold roast beef or from boiled ham and cook until the peas are soft and mushy. Strain, add a cup of thin cream and cook five minutes longer, adding salt and pepper as needed.

New Rochelle Doughnuts. Beat one cup of sugar and two eggs together until light. Add two cups of milk, a few gratings of nutmeg and six cups of flour to which three heaping teaspoons of baking powder have been added. This dough will be soft and must be fried in spoonfuls dropped into deep, hot fat. Do not make them large, and a dessertspoon is better for shaping them than a tablespoon.

Devonshire Cream. This cream must be raised where new milk can be secured. Put a large pan of fresh milk in a cool place for twenty-four hours, then set it over the fire to heat just to the boiling point but not to allow the milk to boil. Take the pan carefully from the range without disturbing the contents and set away in a cold place for ten hours, when the thick cream is ready for berries, fruit or cereal.

Cheese Sticks. Mix three rounding tablespoons of sifted pastry flour and three rounding tablespoons of grated cheese. Add a pinch of salt, a few dashes of red pepper and two gratings of nutmeg. Now mix with one tablespoon of milk, the same of melted butter and the yolk of one egg. Divide in halves, roll very thin and cut in narrow strips three inches long. Bake quarter of an hour and serve piled in log cabin fashion or in bunches.

Ox Tail Stew. Simmer the ox tails in water to cover for twenty minutes, then drain, add enough good stock to cover, also one onion and one carrot sliced, for each tail, and a pinch of sweet herbs. Simmer until the meat is ready to fall from the bones; then take up the meat and vegetables and make a sauce with a rounding tablespoon each of flour and butter to one and one-half cups of the liquid in the pan. Strain and pour over the meat. The liquid can be reduced at the last to enough for the sauce.

HOUSEHOLD HINTS

Clear boiling water poured through tea strainer will remove them. Salt fish are best and quickest freshened by soaking in sour milk.

Kerosene will soften boots and shoes that have been hardened by water. A glass of buttermilk taken the last thing at night will cure stomach troubles.

Fish may be scaled much easier by first dipping them into boiling water for a minute. A teaspoonful of sugar added to pancake batter will make the cakes a golden brown.

A teaspoonful of turpentine put into the boiler with white clothes will aid the whitening. Fresh meat, beginning to sour, will become sweet again if placed out of doors over night.

Wetting the hair occasionally in a solution of salt and water will keep it from falling out. Salt will cure new milk; hence, in preparing dishes containing milk, the salt should not be added until they are cooked.

A spoonful of raw oatmeal, moistened with water, taken on an empty stomach, will cure constipation, if persisted in for some time. To bring out the brilliancy of cut glass, ammonia should be placed in the water in which it is to be rinsed. All glass should be dried immediately, but not drained. A cloth dipped in ammonia and rubbed thoroughly on a coat collar will remove the greasy look. When the floor cloth gets really dirty, wash it with clean warm water, adding a little liquid ammonia. Change the water frequently, use a big soft cloth, wipe perfectly dry with a dry duster, as little pools of water left will rot the cloth.

There are 110,000,000 sheep and 28,000,000 cows in Argentina. In 1904 the exports of meat from the Argentine Republic succeeded in value \$22,000,000.

COMMERCIAL REVIEW.

R. G. Don & Co's Weekly Review of Trade says: Progress is more rapid in manufacture than in distribution, but this is largely due to the effect of unseasonable weather at some points and the unsettled feeling in the South, where the collapse of cotton prices has retarded collections and caused many cancellations. That production is maintained by mills and furnaces may be taken as evidence of confidence in the future.

Iron and steel plants lead in activity, with woollens the feature in textile fabrics. Settlement of the protracted labor struggle at Fall River is encouraging but the industrial atmosphere is disturbed elsewhere, although on the whole there is less than the customary idleness for this season. Prices of newly-opened lines of woollens are higher, as was to be expected in view of the position of the raw material, but consumption is not curtailed.

Similar strength in footwear has retarded business, buyers in the Boston market placing few contracts. Railway earnings for January thus far show a gain of 2.3 per cent. Foreign commerce is also better than a year ago.

Scarcely any alteration in quotations of iron and steel is the best possible guarantee of continued activity. Failures this week numbered 335 in the United States, against 458 last year, and 24 in Canada, compared with 33 a year ago.

Bradstreet's says: Wheat, including flour, exports for the week ending January 19 are 1,138,075 bushels, against 700,950 last week, 3,581,192 this week last year, 3,538,757 in 1902 and 3,639,479 in 1901. Corn exports for the week are 3,186,520 bushels, against 2,932,014 last week, 1,150,202 a year ago, 2,376,583 in 1902 and 179,520 in 1901.

MUCH IN LITTLE. There are 64 shops in Berlin in which nothing but horsefeed is sold. Barrie, at last accounts, has received more than \$450,000 from his plays. A total of \$24,000,000 passed through the London Clearing-house last year.

The number of students at the University of Germany this winter is within 28 of 40,000. It is predicted that by the year 2000 from 200 to 300 new foods will be at man's service.

The National Letter Carriers' Association will hold a week's convention at the Lewis and Clark Exposition, beginning September 8.

A Norwegian chemist predicts that the time will come when more alcohol will be made from sawdust than from potatoes.

The total exports into Nagasaki, Japan, were valued at \$6,304,257, a loss of \$68,405 from 1903; the imports amounted to \$8,986,216, an increase of \$2,815,958 over 1903. The net earnings of ships engaged in foreign trade shows a decrease of \$5,432 tons from the preceding year, or about 13 per cent.

A WOMAN'S MISERY.

Mrs. John LaRue, of 115 Paterson Avenue, Paterson, N. J., says: "I was troubled for about nine years, and what I suffered no one will ever know. I used about every known remedy until that I was told to try Doan's Kidney Pills. I had tried every other remedy, but without deriving permanent relief. Often when alone in the house the backache has been so bad that it brought tears to my eyes. The pain at times was so intense that I was compelled to give up my household duties and lie down. There were headaches, dizziness and blood rushing to my head to cause bleeding at the nose. The first box of Doan's Kidney Pills benefited me so much that I continued the treatment. The striking pain in the small of my back, the rushes of blood to the head and other symptoms disappeared."

Reported Meteoric Display. John M. Skiffeld, a clerk in the steamship office at Bath, Me., whose duties required him to rise shortly after midnight, reports that at 5 o'clock on a recent morning he was dazzled by a meteoric display in the northeast in the form of an object about the size of a barrel. It was straight up and down and illuminated the entire sky with a brilliant light, lasting several seconds. The same flash was reported by the officers and men on various craft along the coast.

American Flag High in Air. The coast artillery station at Fort Hunt, Va., on the Potomac, opposite Fort Washington, is to have a flagpole from the top of which the garrison flag can be seen for many miles. The new pole is about 125 feet long. It is in five sections, and is built up of piping held together by steel bands. The pole will stand on a high eminence at the fort, and the flag at top will wave to the breeze about 300 feet above the level of the river.

Immense Stone for Monument. The largest stone ever taken from an American quarry is a Maine product. It is in the form of a monolith 30 feet high, six feet square at the base and weighing 100 tons. The stone was floated by barge to Troy, N. Y., and then transported by rollers for two miles to the Oakwood cemetery, where it will be set up as a monument to the memory of Gen. Wool. When in place it will be a landmark for miles up and down the Hudson.

Dog No Match for Wildcat. A dog belonging to a man named Grey of Georgia Corner, Me., went out in search of foxes. The other day and ran on to a genuine loup-cervier. Mr. Grey heard the tumult in the woods ahead and rushing up to shoot the fox was surprised to see the dog prone on the ground in a very dilapidated shape with the big cat high up among the branches contemplating a fresh assault. He avenged the attack on the dog by slaying the cat.

Many Sheep From Colorado. One hundred thousand sheep will be prepared for the market this winter at the best-sugar factories in the vicinity of Eaton, Greeley, Windsor, Longmont, Fort Collins and Loveland, Col. The best pulp makes the best of feed for lambs.

Ignorance in Coal Region. A student of the population of the anthracite region of Pennsylvania reports that there are 630,000 people inhabiting that section, of which 430,000 are foreign born. Of this number over 50,000 cannot read or write.

A FELLOW FEELING. Why She Felt Lonely Towards the Drunkard. A great deal depends on the point of view. A good temperance woman was led, in a very peculiar way, to revise her somewhat harsh judgment of the poor devil who cannot resist his cups, and she is now the more charitable. She writes:

"For many years I was a great sufferer from asthma. Finally my health got so poor that I found I could not lie down, but walked the floor whilst others slept. I got so nervous I could not rest anywhere. Specialists told me I must give up the use of coffee—the main thing that I always thought gave me some relief. I consulted our family physician, and he, being a coffee fiend himself, told me to pay no attention to their advice. Coffee had such a charm for me that in passing a restaurant and getting a whiff of the fragrance I could not resist a cup. I felt very tender toward the drunkard who could not pass the saloon. Friends often urged me to try Postum. But I turned a deaf ear, saying 'That may do for people who work coffee is harmful, but not for me—coffee and I will never part.'"

"At last, however, I bought a package of Postum, although I was sure I could not drink it. I prepared it as directed, and served it for breakfast. Well, bitter as I was against it, I must say that never before had I tasted a more delicious cup of coffee! From that day to this (more than 2 years) I have never had a desire for the old coffee. My health soon returned; the asthma disappeared, I began to sleep well, and in a short time I gained 20 pounds in weight. 'One day I handed my physician the tablets he had prescribed for me, telling him I had no use for them. He stayed for dinner. When I passed him his coffee cup he remarked, 'I am glad to see you were sensible enough not to let yourself be persuaded that coffee was harmful. This is the best cup of coffee I ever drank,' he continued; 'the trouble is so few people know how to make good coffee.' When he got his second cup I told him he was drinking Postum. He was incredulous, but I convinced him, and now he uses nothing but Postum in his home, and has greatly improved in health.' Name given by Postum Co., Battle Creek, Mich.

Look in each package for the famous Little Book, 'The Road to Wellville.'"

ODD INCIDENT OF WRECK.

Collision of Such Force That Two Cars Are Made One. In the recent railroad accident on the Worcester, Nashua & Portland division of the Boston & Maine at East Barrington, N. H., when an extra freight train from Nashua crashed head-on into an extra freight from Portland that was waiting there to meet it, a Boston & Maine car on the train standing still disappeared and for hours the efforts of the railroad men to find it were unavailing.

The accident occurred a little after midnight. From that time until day light the railroad telegraph operators along the line from the scene of the wreck to Portland made the wires hot in their effort to trace the missing car, as it was thought that it might have got uncoupled and jumped from the train, or had been left at some station.

The mystery of the lost car was solved at dawn, when the car was found driven completely into a car of the Pennsylvania railroad. The cars had been telescoped in such a way that by lantern light they looked like one whole car, and had thus escaped notice.

The telescoping of these cars was regarded as remarkable, inasmuch as they were in the train standing still. So tremendous was the shock that the engine of the stationary train was forced back against the Boston & Maine car powerfully enough to send it through the Pennsylvania car—Boston Globe.

Novel Action to Insure Marriage. In the harbor of the little village of Ploumanach, in the Cote-du-Nord, is an islet of rock which can be reached at low tide. It is surmounted by a shrine of St. Guirec, who is said to have landed here from Britain in the sixth century. There are two rude statues of the saint, one of which is of wood.

To this statue on St. Catherine's day, come the young women of the neighborhood, who, following an old tradition, stick pins into the statue in order that they may be married before the end of the year.—London Graphic.

Paragon's Sense of Duty. A friend told Francis Parkman walking along the street holding two street toys by their cork collars. In reply to his friend's request for an explanation Parkman said: "I found this boy had eaten an apple without dividing with his little brother. Now I'm going to buy one for the little boy and make the big one look on while he eats it."—St. Nicholas.

Deafness Cannot Be Cured by Local Applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are cured by a method which is not advertised, and which is not known to most of the deaf. Send for our treatise, which is free. It contains full directions for curing deafness. COL. BECKWITH SAYS:

"I Take Pleasure in Commending Pe-ru-na For Coughs and Colds."

COL. PAUL E. BECKWITH.

Colonel Paul E. Beckwith, Lt. Col., retired, 1st Reg. Minute Men, in a letter from 1203 Vermont Avenue, N. W., Washington, D. C., writes: "From the unqualified endorsement of many of my friends, I take pleasure in commending your remedies for coughs and colds."

IN FIELD OR BARRACKS PE-RU-NA IS EFFICACIOUS.

The constant exposure to the elements experienced in an outdoor life is not so apt to cause coughs and colds as sedentary habits.

Those who are brought face to face with the weather every day in active life are much less liable to catarrhal diseases than those who are housed up in ill-ventilated rooms. And yet both of these classes are more or less subject to catarrh of the throat and nasal passages.

Peruna has always been a great favorite with the military men, both in the army and navy. The strongest kind of testimonials are received from officers of high rank concerning the virtues of Peruna for all catarrhal ailments.

Only a small per cent. of these can be used for publication for want of space. Mr. Harrison L. Deam, Burnside Post No. 8, Department of the Potomac, Colonel Encampment No. 60, Union Veterans' Legion, Colonel Green Clay Smith Regiment No. 17, U. S. Department of the Potomac, Military Order of the Legion, Department of Columbia, Major 34th Indiana, Veteran Volunteer Infantry, writes:

"There is no longer any question as to the curative qualities of Peruna in all catarrhal troubles. Its successful use by many of my friends entitles it to confidence and endorsement."
