

MISS GENEVIVE MAY.

CATARRH OF STOMACH CURED BY PE-RU-NA

Miss Genevive May, 1317 S. Meridian St., Indianapolis, Ind., Member Second High School Alumni Ass'n, writes: "Peruna is the finest regulator of a disordered stownch I have ever found. It certainly deserves high praise, for it is skillfully prepared.

"I was in a terrible condition from a neglected case of catarrh of the stomach. My food had long ceased to be of any good and only distressed me after eating. I was nauseated, had heartburn and head aches, and felt run down completely. But in two weeks after I took Peruna I was a changed person. A few bottles of the medicine made a great change, and in three months my stomach was cleared of catarrh, and my entire system in a better condition."—Genevive May.

KNOW NOTHING OF SYMPATHY That Feeling Beyond Lower Animals, Says John Burrough.

An Iowa correspondent asks me to give him my opinion as to whether or not any of the dumb animals have sympathy, says John Burrough in Outing, and added that a minister at a funeral in their town had said that no animal except man was capable of sympathy. I agree with the minister. Sympathy, I think, is beyond the lower animals. When we sympathize with a person we put ourselves in his or her place; we feel sorry for him; we pity him; we would gladly alleviate his suffering-all of which implies more or less imagination and disinterested regard. Susceptibility to the

sufferings of others is one of many higher attributes. When sympathy was born the race lifted above the purely animal plane. The next step is taking the sufferings of others upon yourself, which is the highest form of altruism. Pure selfishness rules the lower animals.

and necessarily so. Sympathy is not necessary for the continuance of the species, but affection for their young Animals certainly have a feeling of comradeship for each other, and exration, yet a dog or a cat or a horse or a cow will sniff at the dead body of birds will bring every bird within hearing to the spot, and cause them to be more or less agitated, but it is only because they are alarmed for their own safety; a common enemy may be about. In the herd and the flock a sick or wounded member is destroyed.

If any animal ever experienced the emotion we call sympathy it is, of course, the dog. The dog has so long been the companion of man that he often shows in his nature a trace of the purely human.

FOR SCIENTISTS TO SOLVE

Lake in Patagonia Where Water Rises and Falls in Odd Way.

Capt. H. C. Crosthwait directs attention in an English science journal to the magnetic and meteorological observatory established by the Argentine government on New Year island, a small island about five miles off the coast of Staten island, Patagonia, says the Baltimore American. The observatory which is complete in every respect, is superintended by four Argentine naval officers. It was opened in February, 1902. The mag-netic observatory is kept at an almost constant temperature of 64 degrees F. Many interesting facts about

Tierra del Fuego are given by Capt Crosthwait in his paper. He directs attention to the astonishing number and variety of the glaciers, and to the fact that most of the larger ones show signs of shrinkage. He says that San Martin lake undoubtedly occupies what was once a strait joining the Atlantic and Pacific oceans. level of the water of the lake rises and falls in a peculiar manner. Exact measurements of these "seiches" show that the movements are irregular, but on an average they amount to about five inches, having a period of about four minutes between two successive high waters. The surface of the water to the eye is perfectly smooth.

Only Once.

"Did I understand you to say you had played poker out west?" was ask ed of the man who had been telling about prairies and mountains. Yes, I played once for about an

hour," was the reply. "Was the game interrupted by landslide or something?"

"Oh, no! We had a pot of about \$30 on the table when I got four aces in my hand. We het and raised until there was \$100 before us and then 1

"And raked in the money?" "Well, no. I was going to, but the other fellowed showed me that he held five aces, and so I wouldn't play any more. It was evident that the

western way was not my way."

Making Money by Reducing the Cost. Hoard's Dairyman mentions a Mr. Ross, of Washington State, who has a herd of sixty-one Jersey cows giving milk, and who by reading and studying his business of feeding and manage-ment, has reduced his expenses in keeping them till they are making him thirty-three per cent, more profits. The Dairyman with its strong and sensible putting of things comments on this matter as follows:

"But when you talk with farmers about increasing their profits through a reduction of the cost of production, and all through a better study and understanding of their business, they lose all interest in the subject. That is an end of the question that they take no stock in whatever. Yet, strange as

"Mr. Ross found that he did not

profitable. He could not travel and straight line with a hoe, rake or a stick, see all these men, but he could read using the garden line as a guide. It of what they were doing, and, lot and is very important to have the rows behold, thirty-three per cent, was added

"It is the same result everywhere. Where we find a reading, thinking used up and down a large number man, he is the one to whom the best without resetting the wheels,-Garden profits go. And yet, plain as is the way, there are hundreds of thousands of farmers who really believe that the less they read, the less they know, the more profitable the farm will be to them."-Indiana Farmer.

The present high price of sheep and these people are usually the ones will induce every sheep owner to sell that say their horses do not stand the off just as closely as possible, and that work well. The horse that has its

Caring For Cream To begin with, will say that we prefer Jers ys to cows of any other breed for dairying, which, with good care and feed and other things taken in consideration, will furnish the basis for profitable business. We have had experience with crocks, cans and tanks, but are now using a cream separator. with which we are well pleased. By this method our milk is not rulued, as with a water dilution separator, and our cream and milk are ready for use any time we need them without disturbing the whole setting by dipping into it before the mass is fairly raised. Then, here is another great advantage in that the milk can be taken direct from the separator to the calves and pigs while yet warm. We would not has a 'dilution" (delusion) separator en use of crocks than spoil our milk by pouring water in, and not getting all the cream either. A good centrifugal separator gets all the cream.

Eack skimming should be kept to itself until cool, when it can be put in the cream jar. When enough is ready for churning, warm to seventy-eight or eighty degrees, pour in some buttermilk and set by fire until thickened. but do not keep too long or allow it to become sour. We churn our cream from fifty-eight to sixty degrees, as there is a difference in cream. One can tell by a few churtings the proper temperature. We have a swing churn which we prefer to any other. Our outter is washed in the churn after the buttermilk is drawn off, as it is easier and better to wash the milk out than to work all the grain out of the butter with the buttermilk.

We make our butter to sult our customers. Some take their butter unsalted, while others prefer sait. Then some prefer it colored, and others do Our butter is molded in one not. pound prints in winter and wrapped in parchment paper. In summer it is packed in one and two-pound crocks for each customer. Now, here is another nice thing about having a separator. The buttermilk is not spoiled with water, can be taken in buckets or caus to our customers, and the ones who wish cream get it direct from the separator the day it is milked and

separated. To sum up the necessities of a good dairy: Good cows, good care and feed, regular milking, separator, proper churning, cleanliness from stable customer in each and every detail, Be ready to learn. Do not think you no stock in whatever. Yet, strange as it seems, it is the only end that they have any control over. "Know it all." Do not say. "My butter is as good as anybody's," but try to improve and do all to make better but-

"Mr. Ross found that he did not really know enough about his bustness. So he went to work to read and think. It struck him, no doubt, that there were many other men who know horse were many other men who know horse were than he did; whose methods, con
likes you just the same."

Iter cach time.—Former's Guide.

COMMERCIAL REVIEW.

Bradstreet's says:

"Distributive trade and crop developments, while still of an irregular character, hold and have perhaps added to the improvement manifested last week, for which warmer weather is responsi-ble. Sales of summer goods are more active and business for fall delivery ap-pears well from all sections save Texas, where impaired wheat-crop returns have a deterrent effect. Confidence in the future still continues. Export trade is future still continues. Export trade good, railway earnings are large, building is active and steel mills engaged on the heavier forms of finished material will not close down this summer. labor situation, though disturbed here and there, is, on the whole, a pleasant one. Crop prospects in general continue favorable, although corn conditions are spotted and the plant is very much bend. Prices of all products still seem favor the agricultural interests. On the other hand, new business in industrial lines is less active. Pig iron prices are receding, stocks tend to increase and it is a buyers' and consumers' market rather than one favoring the seller. Flour mills are inactive, awaiting receipts of new-crop wheat. For many scattered wholesale lines it is a period of quiet and unsettlement in some prices, as bus-iness is now of a midsummer character.

report trade rather quiet, as is usual Wheat, including flour, exports for the week ended June 15 are 688,017 bushels. as against 1,476,840 last week, 2,044,231 this week last year, 3,617,415 in 1903 and 3,860,434 in 1902. Corn exports for the week are 505,000 bushels, against 1,108,-146 last week, 208,008 a year ago, 1,089,-353 in 1903 and 110,979 in 1902

Firmness in cotton goods is a feature

calling for note. Buyers are insistent for quick deliveries. Reorder business with

fobbers has been fairly good, especially

at the West. In woolen goods trade is

seasonable, and clothing men report a

good business. Southern trade center?

TO SPLENDOR. ADDS

MEN OF BUSINESS RECOGNIZE ADVANTAGES OF AGETYLENE.

Famous Summer Holel, the Grand Union of Saratoga, Has Installed This Best of All Artificial Lights-Meaus In-creased Comfort and Health.

Saratoga, June 27 .- The very name, "Saratoga," brings to every mind health-giving springs, unsurpassed hotels and beautiful drives. It has been for many years the Meera for all who admire nature, enjoy good living, and are searching for health, or are simply taking a vacation.

The Grand Union, the largest summer hotel in the United States, set among green trees with its long wings enclosing a court with fountains and flowers, grass and trees, music and light, is throughout the season througed with guests. With the progressive spirit always shown by its management, the Grand Union has again added to its attractiveness by introducing acctylene gas to make still more brilliant the evening bours. The genial proprietors believe in furnishing their guests with the best of everything, and now, after investigating and finding that Artificial Sunlight can be had, they have installed a complete acetylene gas plant to produce it, and have connected upwards of six thousand Acctylene burners in and about the

Like many discoveries of recent years, which are coming into popular favor, acetylene, one of the most recent, is very simply produced. It is adapted for use wherever artificial light is needed and the necessary apparatus can be understood and operated by any one.

The generator in which Acetylene is produced by the automatic contact of carbide and water might be termed a gas plant, as it performs all of the functions of a city gas plant. The acetylene generator can be purchased for a few dollars and in any size, from one adapted to furnish acetylene to ten or a dozen burners for a cottage, up to the large but still simple machine such as is now furnishing Acetylene for six thousand burners in the Grand Union,

Outside of large cities the use of Acetylene is quite common. The owner of the country home now demands running water, gas and other conveniences which a few years ago were considered as luxuries, and neetylene gas has met his requirements, and gives him a better and cheaper light than is ordinarily furnished in cities.

It is well known that rooms lighted with Acetylene are more comfortable, because cooler, and more healthful because the air is not vitiated.

it Pays to Advertise.

When James Gordon Bennett the elder was editor of the Herald. Robert Bonner, publisher of the New York Ledger, was struggling to build up its circulation, and decided to try a little advertising. He wrote an announce ment consisting of eight words: "Read Mrs. Southworth's New Story in the Ledger," and sent it to the Herald marked for "one line." Mr. Bonner's handwriting was so bad that the words were read in the Herald office as "one page." Accordingly the line was set up and repeated so as to occupy one entire page. Mr. Bonner was thunderstruck the next morning. He had not to his name money enough in the bank to pay the bill. He rushed excitedly over to the Herald office but was too late to do any good.

In a short time the results of the page announcement began to be felt. Orders for the Ledger poured in until the entire edition was exhausted and another one was printed. The success of the Ledger was then established. Ever after that time Mr. Bonner was an ardent believer in advertising and a liberal purchaser of space. -Modern Advertising.

Ze Impossible Language.

Lydia E. Pinkham's Vegetable Compound is a positive cure for all those painful ailments of women. It will entirely cure the worst forms of Female Complaints, all Ovarian troubles, Inflam-mation and Ulceration, Falling and Displacements of the Womb and consequent Spinal Weakness, and is peculiarly adapted to the Change of Life. Every time it will cure

Backache.

It has cured more cases of Leucorrhoca than any other remedy the world has ever known. It is almost infallible in such cases. It dissolves and expels Tumors from the Uterus in an early atage of development. That

Bearing-down Feeling, causing pain, weight and headache, is instantly relieved and permanently cured by its use. Under all circum-stances it acts in harmony with the female system. It corrects

Irregularity,

Suppressed or Painful Menstriation, Weakness of the Stomach, Indigestion. Bloating, Flooding, Nervons Prostra-tion, Headache, General Debility. Also

Dizziness, Faintness, Extreme Lassitude, "don't-care" and "want-to-be-left-alone "feeling, excitability, irritability, nervousness, sleep

lessness, flatulency, melancholy or the "blues," and backache. These are sure indications of Female Weakness, some derangement of the Uterus. For Kidney Complaints

and Backache of either sex the Vegetable Compound is unequaled,

Truths that Strike Home

THE WALL STREET TO SERVICE THE SECOND SECOND

Your grocer is honest and-if he cares to do so-can tell you that he knows very little about the bulk coffee he sells you. How can be know, where it originally came from, how it was blended—or with what
—or when roasted? If you buy your
coffee loose by the pound, how can
you expect purity and uniform quality?

LION COFFEE, the LEADER OF ALL PACKAGE COFFEES, is of necessity uniform in quality, strength and flavor. For OVER A QUARTER OF A CENTURY, LAON COFFEE has been the standard cottee in millions of homes.

LION COFFEE is carefully packed at our tectories, and until opened in your home, has no chance of being adulterated, or of coming in contact with de dirt. germe, or unclean be

In each package of LION COFFEE you get one full pound of Pure Coffee. Insist upon getting the genuina. (Lion head on every package.)

(Save the Lion-heads for valuable premiums.)
