A western editor hits the nail on the head when he says that "too many merchants look upon advertising as a scheme to help the editor. With rural delivery and department stores sending out tons of advertising matter, the country merchant must have the goods and the prices, and he must advertise or get run over in the march of civilization. His rents are less, his help costs less and he can compete with the city retailer and pay his advertising, too, and the time has come when he absolutely has to do it. Country merchants are finding this out and taking advantage of it.—Get into the band wagon, or the automobile will butt you into the middle of next week."
