

KIDNEY TROUBLE DUE TO CATARRH.

The Curative Power of PE-RU-NA
in Kidney Disease the Talk
of the Continent.

Nicholas J. Herz, Member of Ancient Order of Workmen, Capitol Lodge, No. 140, Hotel Street Hotel, Albany, N. Y., writes:

"A few months ago I contracted a heavy cold which settled in my kidneys, and each time I was exposed to inclement weather the trouble was aggravated until finally I was unable to work."

"After trying many of the advertised remedies for kidney trouble, I finally took Peruana."

"In a week the intense pains in my back were much relieved and in four weeks I was able to take up my work again."

"I still continued to use Peruana for another month and at the end of that time I was perfectly well."

"I now take a dose or two when I have been exposed and find that it is splendid to keep me well."

Hundreds of Cures.

Dr. Hartman is constantly in receipt of testimonies from people who have been cured of chronic and complicated kidney disease by Peruana. For free catalog and price, address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

An inventor has patented a process for improving the flavor of raw coffee.

Taylor's Cherokee Remedy of Sweet Gum and Mullen is Nature's great remedy—Cures Coughs, Colds, Croup and Consumption, and all throat and lung troubles. At drug-gists, 25c., 50c. and \$1.00 per bottle.

Snuff Boxes Again in Use.

After having been on the semi-retired list for many years, the snuff box is once again in evidence in the shops. Even cigar stores had not been showing sneeze-producer holders in recent seasons. The consumption of snuff is considerably greater in winter than in summer.

Uses a Gold Pen.

The pope does his private writing with a gold pen, but his pontifical signature is always given with a white-feathered quill, which is believed to come from the wing of a dove. The same quill has been in use for many years.

UNSEEN IN A SAW
There are unseen things about this saw. You can't see them, but they're there. The steel is sharp, cutting edges, and the blade is straight, any other saw. You can't notice the toughness of these blades without a break or a kink. SILVER STEEL is the finest crucible steel in the world, made on the Atkins secret process, and used only in Atkins saws. You cannot see the fine tempered and tapered taper of the blade; runs easily, without binding.

But you can see the Atkins trade-mark and it is your protection when you buy a saw. We are the only ones who can make a saw like this, means that it is our own mark and that we are justly proud of it. We will make all types and sizes of saws for all purposes.

A. J. TOWER CO., Anti-friction Floor Scrapers, etc., are sold by all good hardware dealers. Catalogue on request.

The Farm

What the Hen Does.

Mr. T. E. Orr, Secretary of the American Poultry Association, is credited with the following statement: "My experiments have demonstrated these facts: A hen eats sixteen times her own weight in one year; her eggs in the year are six times her weight; they bring sixteen cents per pound; her food costs four cents per pound, and her yearly product is worth six times the cost of her food."

The Pigs in Clover.

Pigs should if possible be allowed the run of a clover field or have access to other leguminous plants. However, should this be impossible let them have the run of good pasture. Give them access to clear water at all times, and swill and skim milk, and as far as practical to feed them all they will eat. Crowd them and sell when say eight or nine months old. This is the most profitable plan. When later you wish to put them up so that they may not run the fat off, it is always advisable to give them, say, the run of a half acre or so.

A Stain For Brick.

To stain bricks a satisfactory red. Construction says that it is wise to melt an ounce of glue in one gallon of water, afterward adding a piece of alum the size of an egg, then one-half pound of Venetian red and one pound of Spanish brown. The color is to be tried on the bricks before using, changing light or dark with the red or brown and using a yellow mineral for the buff. For coloring black, asphaltum is to be heated to a fluid state, the surface of the bricks being moderately heated, and then they are dipped, or a hot mixture of linseed oil and asphalt may be made, and the heated bricks dipped in the same. Tar and asphalt are also used for accomplishing this purpose.

In carrying out these operations it is important that the bricks be heated to a sufficient degree, and that they be held in the mixture so as to absorb the color to the depth of one-sixteenth of an inch.

The Egg Business.

It is admitted that eggs cost less, and bring higher prices in market, than any other commodity sold off the farm, and there is, consequently, no reason why one should not enlarge in the production of eggs as a special business. It is true that a large number do not succeed, but it is not because the business is at fault, but lack of knowledge and experience. Enough money must be put into the business to place it on a safe foundation, and the attention to details is essential, as it is the minor matters, so often overlooked, that lead to increased cost and smaller production.

What we wish to impress upon readers is the fact that at this season, though eggs may be cheaper than in the winter, they cost little or nothing in the shape of food on the farm, and there is also but little labor necessary. The prices of eggs may be low, but if compared with other products of the farm and their cost, it will be found that eggs are far in the lead.—Farmer's Home Journal.

New Method With Potatoes.

In looking over the Farmer I find an exchange on potato culture telling of how to raise potatoes from little potatoes and planting them closely in the row. Now there are always people who are ready to hoot at any and every new thing under the sun and they hoot at this, but I want to state right here and now that here in Waldron we have one man who, instead of doubting, has gone to work to prove the assertion made by a potato raiser of some years' experience, and has planted small potatoes, planted them whole and about three inches apart in the row. Of course, the wiseacres laughed and jeered at him, and predicted no potatoes, or, if any, very small ones, but undaunted he went ahead, harrowing, plowing, hoeing and pulling weeds (they were too close to hoe) and by the 26th of June could show potatoes large enough for anyone at digging time, and growing rapidly. If anyone wishes any further information concerning this much talked of potato patch I will just refer him to the grower, who is none other than our townswoman, Jerome Sparks, and who I have no doubt will tell any and all just how he has managed this planting, cultivating, etc., and if they would like to know the result of the yield I have no doubt he would gladly tell it.—Observer, in Indiana Farmer.

New Farm Gate.

Serious defects to be overcome in gates are strain and leverage weight, which result in sagging. W. J. Slack, of Fort Wayne, Ind., has invented a gate which it is claimed will largely remedy these defects. A triangular

frame is hinged to the post, with two rollers attached, wherein gate panel is supported and freely operates. The cut shows gate in usual low position, closed, and so supported at front end that no leverage weight or strain can incur to either gate or post. This improvement may be used as a small single or large double sliding or swing gate.

The Farm Work Horse.

I saw in a recent number of the Tribune Farmer an article from Dr. Smead, telling some man that his mare, which weighs 650 pounds, is too small for farm work. Had this article been read by me only a few years ago it would have met with my approval, but now my views are somewhat different on this subject. Formerly I thought that a horse for all work must be from sixteen to sixteen and one-half hands high, well made and well muscled and of good weight.

COMMERCIAL REVIEW.

R. G. Dun & Co.'s Weekly Review says:

"Lower temperature stimulates retail trade, and fall openings are largely attended, but the weather is not cold enough to menace late crops that are maturing most satisfactorily."

"Certainty of a successful season on the farms contributes more than any other single factor to the confidence that is felt in all sections of the country. Comparatively little new grain has been marketed thus far, which is largely due to the planting of winter wheat and other preparations for next year that are unusually extensive."

"Manufacturing activity is fully maintained, the leading industries having contracts assuring little idle machinery during the balance of the year, and it is probable that more business will be carried over into 1906 than at the opening of any previous year."

"The growing disposition to place orders for distant delivery testify to the well-nigh universal faith that no setback will be experienced."

"Railway traffic reports suggest that more rolling stock and motive power could be used if obtainable, as is customary at this season, and gross earnings thus far reached for September surpass last year by 1.1 per cent., which in turn were 6.5 per cent. greater than those of 1905."

"Money is a little firmer, but there is no stringency and gold imports were checked by higher rates of foreign exchange."

Bradstreet's says:

"Wheat (including flour) exports for the week are 2,064,932 bushels, against 2,178,428 last week, 1,182,253 this week last year, 4,028,681 in 1903 and 6,870,78 in 1902. Corn exports for the week are 1,212,992 bushels, against 1,272,495 last week, 700,866 a year ago, 1,123,871 in 1903 and 1,412,423 in 1902."

WHOLESALE MARKETS.

Baltimore—FLOUR—Steady and unchanged; receipts, 10,478 barrels; exports, 4,454 barrels.

WHEAT—Quiet and lower. Spot contract, 82½@82½; spot No. 2, 80½@81; Western, 84; September, 82½@82½; October, 82½@82½; December, 82½@82½; steamer No. 2 red, 75@75½; receipts, 3,382 bushels; exports, 48,000 bushels; Southern, by sample, 68@68½.

CORN—Steady at 75¢. Liniment. Six drops of Sloan's Liniment on a teaspoonful of sugar will kill yellow fever and malaria germs.

Advancing the Farmers' Interest.

Traveling agents and salesmen are now sent from the home offices of the Chicago packers into all South American and Asiatic countries. They are going into every land, no matter what language may be spoken or what money be used. They will exchange their goods for cowries or elephant tusks—anything to sell the product and get something in return convertible into money. It may seem odd to some folks, but traveling men, carrying cases with samples of American meat products, can be seen in the desert of Sahara, the sands of Zanzibar or in Brazil, "where the nuts come from." Great is the enterprise of the Yankee merchant. The greater the market, the greater the price and stability of the price of the product and all that goes to make it in its various stages.

Following close upon the Virginia ruling that \$20 is the proper penalty for stealing a kiss, comes a Missouri decision in which \$300 is named as the correct figure.

GRATIFYING PRAISE.

Letter From Marcus Mayer, the Great Patron of Music and Drama.

Marcus R. Mayer, who brought to America Mme. Patti, Duse, Salvini, Coquelin and other famous singers and actors, writes:

Gentlemen: I wish as many suffering men and women as I can reach to know the excellence of Doan's Kidney Pills. I was greatly benefited by this remedy and know it cured several who had kidney trouble so badly they were agonized with pain in the back, head and loins, rheumatic attacks and urinary disorders. I am glad to recommend such a deserving remedy.

(Signed) MARCUS R. MAYER.
