GOOD AND HUMOROUS EXCUSE.

Debtor Really Deserved Grant of Extension of Time.

A prominent business house in Baltimore placed a bill in the hands of a collector, who, in response to a request for settlement, received the following in reply:

"My Dear Sir: Absence from the city prevented my writing in answer to yours of recent date.

'It will be utterly impossible for me to settle the claim you mention at present, for the very simple but good reason-I haven't got it.

"I lost every penny I had in the world, and considerable I had in the future, in a theatrical venture last September. Up to the present time I have not recovered from the shock.

"I think if you lay this fact before your clients they will not advise you to proceed harshly against me. From their past experience with my modes of procedure in days gone by I do not think they can recall any suspicious mannerisms which could lead them to suppose I am a debt dodger. I have simply been initiated into

the Lodge of Sorrow, Hard Luck Chapter, Fool Division No. 69.

"My picture, hanging crape-lades on the walls of the Hall of Fame, bears the legend, 'Sucker No. 33876493.' "My motto is briefly: 'I would if I

could; but I haven't, so I can't.' "Fortune may smile, however; up to the present writing it has given me the

laugh. I have hopes. "Directly I am in a position even remotely suggesting opulence. I assure you your balance will receive my very prompt attention."-Montreal Herald.

#### Coachman as Collector.

It is related of Dean Gilbert Stokes that once, when influenza had incapacitated his verger as well as the two churchwardens, he consigned the duty of collecting the alms to a neighbor's coachman.

"Take the what, sir?" queried that worthy.

"Take the offertory," explained the "The collection-the money from the people in the pews."

The coachman seemed satisfied and even pleased with his new dignity, But when the offertory hymn was half through a noisy altercation was heard in one of the transepts, and the Dean at once called the collector to the

"Whatever is the matter?" he in-

The coachman, red of face and wrathful of eye, then explained. He was no half-and-half individual, and when a thing was given him to do he did it, and did it thoroughly. He said:

v. sir. there's two best seats as won't pay."-London Answers.

### THE CHANGE OF LIFE

INTELLIGENTWOMEN PREPARE

Dangers and Pain of This Critical Period Avoided by the Use of Lydia E. Pinkham's Vegetable Compound.

men realize that the most critical period in a wo period in a wo-man's existence is the change of life, and that the anxiety felt by women as this time draws near is not without

reason? If her system is in a deranged condition, or she is predisposed to apoplexy or congestion of any organ, it is at this time likely to become active and, with a host of nervous irritations, make life

At this time, also, cancers and tumors are more liable to begin their destruc-tive work. Such warning symptoms as a sense of suffocation, hot flashes, dira sense of suffocation, not handle siness, headache, dread of impending evil, sounds in the ears, timidity, pal-evil, spaces before evil, sounds in the ears, timidity, pal-pitation f the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and inqui-etude are promptly heeded by intelli-gent women who are approaching the period of life when woman's great

ehange may be expected.

Lydia E. Pinicham's Vegetable Compound is the world's greatest remedy for women at this trying period, and may be relied upon to overcome all dis-tressing symptoms and carry them safely through to a healthy and happy

old age.
Lydia E. Pinkham's Vegetable Com-

by the bound invigorates and strengthens the female organism, and builds up the weakened nervous system as no other medicine can.

Mrs. A. E. G. Hyland, of Chestertown, Md., in a letter to Mrs. Pink-

ham, says:

Dear Mrs. Pinkham:—
"I had been suffering with falling of the womb for years and was passing through the change of life. My womb was badly swolles. I had a good deal of soreness, dizzy spells, headaches, and was very nervous. I wrote you for advice and commenced treatment with Lydia E. Pinkham's Vegetable Compound as you directed, and I am happy to say that all those distressing symptoms left me, and I have passed safely through the change of life a well woman."

Box executal advice regarding this two

For special advice regarding this important period women are invited to write to Mrs. Pinkham for advice. It is free and always helpful.

## bellarm

Dogs are, no doubt, excellent things to shine on the clover and the breezes to pass through, which is a great aid in their place. "A place for everything in curing hay. After the dew is off. and everything in its place," is put lift the clover off the ground and invert to scorn when a community that are it. Then after dinner, if it is well in the sheep business allow a lot of cured, begin to draw in and mow away. useless curs to run about at random. they will get rid of your sheep.

Feeders For Bees.

For heavy feeeding some kind of feeder should be used. Little wooden roughs are best, and may be made any size desired. The best kind is a two inch block guttered out by cutter heads or wabble saws, cutting slots half an give the bees a foothold, which keeps them from drowning in the syrup. When open troughs are used, some the syrup to answer this purpose.

#### Soil For Seeds.

Sowing seeds in the fall is the surest and easiest way for the amateur to have an abundance of early flowers. says J. T. Scott in the Garden Magazine. There are, however, certain simple precautions to be taken. The seedlings must be sheltered from hot (not necessarily making it rich) by forking it over and over to the depth of at least one foot. Rake off and level thoroughly; add one and one-half inches of finely sifted soil on top.

Poor Cows Some time ago I came across a few lines, of which I made a note. They were to the effect that: A poor man keeping poor cows is a sight to make one sigh at the short-sightedness of man. There is a world of truth in this remark-a poor man cannot afford to waste his money in the feeding of poor cows, and it is quite contrary to all experience to say that he cannot afford to own good cows. A man who is going to own cows had far better invest his money in the purchase of half a dozen really good animals than in a dozen inferior ones. If he wants to increase his herd he can do so by breeding from good animais, and with a far better chance of obtaining worthy members of the dairy than he would by breeding from ordinary stock .- C. G. F., in Massachuseits Ploughman,

#### Light Brahmas. A notable breed, which others have

displaced in public favor. There certainly is no more beautiful fowl than the Light Brahms, yet they have been gradually relegated to the

hear of them. They are the largest of all the pure

fifteen pounds, and the females ten and control the seed situation for themtwelve. Their plumage is beautiful selves if they will learn bow to save and they are exceedingly hardy. They good seed and in view of the impression are fairly good layers, yet they are

proving less popular each year. Why this should be is hard to undera breed should be neglected or forgotten .- Home and Farm.

Co-Operation in Cattle Breeding.

A good many farmers who have but small herds are using grade bulls because they say they cannot afford pure bred ones. Why not do as neighborhoods do in draft horse breeding, where good pure bred stallion is bought by several farmers joining in the purchase. By this kind of co-operation among farmers in purchase of a prime pure bred bull, a neighborhood could be grown and fatted for the market way: with a large saving of grain and foodcattle could be put finished on the market weighing more at two to two really be a money maker for those who are now using a grade sire. Such copurposes of stock corporations in manafacturing, where several persons join a new feature of industry, but can be extended to cattle and other live stock breeding and growing as successfully as it is in manufacturing.-Indiana are to work together. One has a steel

Sound Clover Hay.

I prefer to cut in the afternoons, for little chance to cure before the dew falls and will not be affected by it as if it were party cured.

The next day, after the dew is off, go over your clover, giving it a good short rope and as well by a loop made turning, either by hand or by a tedder, and if the clover is heavy it will be of the each two end posts. well to give two turnings or teddings. By this time the clover will begin to show signs of being partly cured, and still it isn't dry enough to break off the leaves, heads and smaller stems, which are the best parts of the hay. Then man on a coach, passing along a neighstart the rake and rake it into medium sized windrows. I prefer to do my his bugie. The call was passed along raking in the iniddle of the afternoon the lines and the battle was suspendavoid raking in the evenings. ed till the joke was discovered. Next day, if you are not sure the day is going to be such as to finish curing the clover in the windrow, take your fork and slightly tear the windrows apart, Pekin, reports the latest estimate of

in curing hay. After the dew is off, lift the clover off the ground and invert

A good way to test this matter is to Get rid of the curs, for if you don't take some stalks and twist them together, and if they show no signs of moisture generally your clover is all right. If the day has been a bad hay day I would prefer to leave it a day onger by bunching it up.

Last year I spoiled what would have been choice hay simply by drawing it in when it was too full of moisture. The weather was very threatening, and inch wide, and having stationary cen- I did not care to leave it in the field tres of an eighth of an inch thick to over Sunday, so drew it in; but next time when I have hay under similar circumstances I shall bunch it together and take my chances with the rain, floating material should be placed on and last year it didn't rain after all. The stock cut it and seem to like it as a change, but it is not choice hay .-C. F. B., in Massachusetts Ploughman.

#### Laying Away a Corn Supply.

It is a common practice among corn growers to "lay corn by." When the season is an exceptionally good one and when the soil is free from weeds seed corn may be laid by with no evil sunshine and the soil must be loose results. In a dry season or a wet and moist. Prepare the seedbed well season or where weeds and vines grow rapidly and in untold numbers, laying corn by is entirely out of the question. To lay corn by too often means to let the weeds alone, or it may mean to let the surface crust cake, crack open and through the maturing season allow the much needed moisture to leave through surface evaporation. If possible get the cornfield free of woods and vines, and after the hard rains of June and early July are over and the summer drought sets in run through the corn once or twice with a shallow working tool. It leaves the surface level, prevents surface washing and conserves the moisture. Weeds require moisture. When they grow in corn they feed upon the same plant food, take the same moisture that the corn plant feeds upon. Should there be a shortage of either plant food or moisture, the weed gets its part and lets the corn plant go hungry and thirsty.

This is a very critical period in the life of the corn plant. If it is tended well, if it is to make its largest yields, the work must be done at once. Delay means loss. Be ready for the rush when the rains cease.- W. B. Anderson, in the Indianapolis News.

#### Save Seeds or Buy Them?

One of the most prominent seedsmen in this country recently told the writer that the demand for cheap seeds was background, until we scarcely ever alarming. He said he knew, as every trained seedsman knew, that cheap seeds could only bring unsatisfactory results, but as a merchant, he could do nothing but supply the demand. Of course, there are farmers and gardeners who still buy the best seeds, but they are in the minority when the number of seed buyers is considered. The unfortunate part of this condition is that the demand for cheap seeds comes from farmers. The man with the small garden wants the best seed and pays the price; the man whose entire income depends upon his crop buys the cheap

Some of the smaller seedsmen have given up handling anything but the cheap seeds and our friend was afraid that after a time all seedsmen would be forced to a similar situation. Many of our correspondents complain that the seeds they buy are poorer each year, which bears out the statements of our seedsman friend. Farmers can that seeds as a commodity are becoming poorer, certainly farmers should begin to look into the question of obtainstand, as it is a pity that so meritorious ing the best and then selecting the best from each crop until they are independent of the commercial seed situation, at least so far as the seeds for the main crop are concerned.

### Economizing Pastures.

Farm pastures are never large enough, and some way of economizing them is very desirable. One way is to divide them into plots so that one part may be used while the other parts are recovering from the use of them. By this device it is possible to double the value of the grass so that more sheep soon grade up their common cattle till may be fed on the same space of land, they are worth nearly double what says American Sheep Breeder. This is they are now. In f. few years by such most easily done by the use of portable neighborly co-operation the cattle could fences, which may be easily moved be put finished on the market more and set up again where they are deper head, and grade beef cattle would sired. Such a fence is made in this

The panels may be made ten feet stuffs when it is remembered that such long and of pickets set upright; at equal distances apart there are three posts in each panel which project one and a half years old than common cat- foot below the bottom, and these are tie can be made to weigh at three years pointed. Each panel is ten feet long. Such a neighborhood bull would In the setting up of this fence each panel is set somewhat out of the straight line and a worm is made of operation partakes of the farm and three feet out of the straight. Each panel when set up is put on a slight worm so as to support the fence their capital because no one of them against winds, and the corners so has enough for the business. It is not made are fastened together by short ropes fastened to the end posts of the fence panels.

When setting up this fence two men bar or iron rod sharpened at the point. With this the holes are made in the row for each post to be set in. The posts are set with sufficient worm in it the reason that the clover has but very to support itself for the fence and one post goes in the middle of each panel. The posts are well set down in the ground by means of a mallet and the corners are well tied together by the of the right size to pass over the top

BOX OF WAFERS FREE-NO DRUGS -CURES BY ABSORPTION.

Cures Belching of Gas-Bad Breath and Bad Stomach - Short Breath-Bloating-Sour Eructations Irregular Heart, Etc.

Take a Mull's Wafer any time of the day or night, and note the immediate good effect on your stomsch. It absorbs the cas, disinfects the stomach, it absorbs the cas, disinfects the stomach, kills the potent germs and cures the disease. Catarrh of the head and throat unwholesome food and overeating make had stomachs. Scarcely any stomach is entirely free from taint of some kind. Mull's Anti-Belch Wafers will make your stomach healthy by absorbing foul gases which arise from the undigested food and by re-enforcing the lining of the stomach, enabling it to thoroughly mix the food with the gastric juices. This cures stomach trouble, promotes digestion, sweetens the breath, stops belching and fermentation. Heart action becomes strong and regular through this process.

Discard drugs, as you know from experi-Piscard Gruss, as you know from experience they do not cure stomach trouble.

Try a common-sense (Nature's) method that does cure. A soothing, healing sensation results instantly.

We know Mull's Anti-Belch Wafers will

We know Mull's Anti-Beich Waters will
do this, and we want you to know it.

SPECIAL OFFER—The regular price of
Mull's Anti-Belch Wafers is 50c. a box, but
to introduce it to thousands of sufferers
we will send two (2) boxes upon receipt of
75c. and this advertisement, or we will
send you a sample free for this coupon.

Send this coupon with your name and address and name of a druggist who does not sell it for a free sample box of Mull's Anti-Belch Wafers to MULL'S GRAPE TONIC Co., 328 Third Ave., Rock Island, Ill. Give Full Address and Write Plainly. Sold by all druggists, 50c. per box, or sent by mail.

Cautious Bride. Bride (in railway train)-Now, my dear, you must remember not to act as if we were just married. It would be perfectly horrible to have all these strange people know it. Sit up a little closer. I want to fix your necktie. It's all crooked. There's some dust on your coat. I'll brush it off. How white the stuff is! It must be from that One corner of your mustache points down and the other up. It looks too funny for anything. Wait; I'll fix it. I'm tired to death, dear. Sit up closer, so I can rest my head on-No, that won't do; I must pretend to read a novel and-I don't know: ner haps you'd better go into the smoking car. All the married men do.

Groom-Well, I'll go, my darling, if you think best.

Bride-Yes, you must go. Help me off with this glove, dear. You must go and stay real long-ten or fifteen minutes.-New York Weekly.

### Don't Use Slang.

"A lady used the expression 'Gee' the other night," says an exchange. It had never occurred to her that this was taking the name of the Lord in vain, and probably few of many who indulge in sugar-coated profanity realize that they are swearing. What is "Gee" though, but a euphemism for "Jesus?" "Dear me" is nothing but the Latin "Deo Meo" (My God), "For Goodness Sake" is only for "God's Sake." "Drat it" is "God rot it." "Judas Priest" is "Jesus Christ." "Golly," "Gosh," "Glory," etc., are only variations of "Damn it." In short, there is probably not an expression of this sort that cannot be tracked to an oath for its origin.

#### COFFEE NEURALGIA Leaves When You Quit and Use Postum

A lady who unconsciously drifted into nervous prostration brought on by coffee, says:

"I have been a coffee drinker all my life, and used it regularly, three times

"A year or two ago I became subject to nervous neuralgia, attacks of nervous headache and general nervous prostration which not only incapacitated me for doing my housework, but frequently made it necessary for me to remain in a dark room for two or three days at a time.

"I employed several good doctors one after the other, but none of them was able to give me permanent relief. "Eight months ago a friend suggest-

ed that perhaps coffee was the cause of my troubles and that I try Postum Food Coffee and give up the old kind. I am glad I took her advice, for my health has been entirely restored. havé no more neuralgia, nor have I had one solitary beadache in all these eight months. No more of my days are wasted in solitary confinement in a dark room. I do all my own work with ease. The fiesh that I lost during the years of my nervous prostration has come back to me during these months, and I am once more a happy, healthy woman. I enclore a list of names of friends who can vouch for the truth of the statement." Name given by Postum Co., Battle Creek, Mich.

There's a reason Ten days' trial leaving off coffee and using Postum is sufficient. All grocers.

## To make Cheap Gas-light for Country Homes

TAKE a common Clay Pipe.
Put a simple "Acetylene" Gasburner on its

Bind the two in position with a tight-fitting piece Then fill the bowl of the pipe with fine-ground Cal-

Next tie a rag over head of the bowl to keep in the rhide.

Now put the pipe into a Glass of later, as in picture.

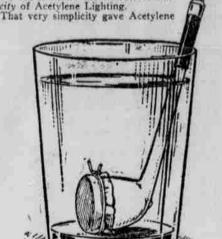

There you have a complete Gasafit for 25 cents.

Touch a match to the Burner—

Water, as in picture.

There you have a complete Gasplant for 25 cents.

Touch a match to the Burner—and you'll get a beautiful White Gas-Of course, this is only an experi-ment, but it shows the wonderful sim-plicity of Acetylene Lighting.

Light a setback, at first. It seemed so simple to turn Calcium Carbide into Gas-light that over 600 different kinds of "tanks" and "Acetylene Machines" were invented, patented, and marketed for the purpose, by about as many different

people.

Well, the thing to be expected certainly happened!

About 530 of these "Acetylene Machines" had been invented and sold by people who knew more about Timure than they did about Gas-making.

The "Calcium Carbide" was all right all the time, but 530 of the machines for turning it into Gas were

all wrong all the time.

So Acetylene Gas "got a bad name," though it is clear enough now that it never deserved it at any time.

It was like selling Wood Stoves to burn Hard Coal in, and then blaming the Coal for not burning.

Lots of things happened to grieve the Owners of these 530 makes of alleged "Acetylene Machines." But very few accidents occurred from them even in the days of rank experiment and dense ignorance, among, "Generator" Makers.

Of course, a gun will go off unexpectedly, now and then, if the trigger be gulled by a person who "didn't know it was loaded."

But, that's no fault of the Ammunition-is it? Well, finally the Insurance Companies got after these 530 odd makes of "Acetylene Machines" that wouldn't Acetylate, and the Insurance Board made an investigation of all Generators that were submitted to

Then, out of the 600 odd "Machines" patented, only about 70 were "permitted" by the Insurance Board

Oh, what a howl was there! By "permitted" I mean that the Insurance Board was willing that any building should be Insured, with-

out extra charge, which used any one of these 70 Acetylene Generators it had found safe, and effective, just as it permitted houses to be piped for City Gas, or wired for Electricity, under proper conditions.

Now, the Insurance Companies ought to know whether or not these 70 different makes of Acetylene Generators were absolutely Safe to use.

Because, they have to pay the bills, if Fire or Explosion occurs, from any one of the Acetylene Generators they authorize.

ators they authorize.

And, here's a proof of their good judgment.

Though there are now Two Million people using Acetylene Light in America, there have only been four Fires from it in one year, against 8865 Fires from Kerosene and Gasoline.

There have also here 460 Fires from Electricity

Kerosene and Gasoline.

There have also been 460t Fires from Electricity, 1707 Fires from City Gas, and 520 Fires from Candles.

Besides these there have been 26 Fires from the Sun's rays, But.—only four Fires from Acetylene.

That shows how careful the Insurance Board was in its examination of Acetylene Generators, and in "permitting" only the 70 makes that were above sus-

picion, out of the 600 experiments that were once on the market. Well,—the boom in Acetylene Lighting made lower prices possible on the material it is derived from, viz., Calcium Carbide, a material that looks like Granite but sets like Magic

but acts like Magic.

Today, Acetylene Light is a full third cheaper than
Kerosene Light, or Gasoline Light, per Candle Power.

It is not more than half the price of Electric Light,

nor three-fourths that of City Gas. If I can't prove these statements to your full satisfaction my, name is not "Acetylene Jones."

But Acetylene is more than the safest and cheapest

Light of the year 1905.

It is also the Whitest Light—the nearest to natural Sunlight in health-giving Blue and Violet rays, and because of this, with its freedom from flicker, it is the easiest of all Artificial Light on the Eyes.

It is so much like real Sunlight that it has made plants grow as hours per day in dark cellars where no

plants grow 24 hours per day in dark cellars where no ray of Sunlight could reach them. It made them grow twice as fast as similar plants that had only the Sunlight of day-time, viz., half the time.

That was proven by Cornell University in a three-

months' experiment made this very year,

Now, I've saved up for the last a point more im-portant to you than all the others about Acetylene

It consumes only one-fourth as much of the vital Oxygen from the Air of Living rooms or bed-rooms, as either Kerosene or City Gas-Light consumes.

That's a tremendous difference in a lifetime, mark you—three-fourths of a difference.

you—three-fourths of a difference.

Because,—Oxygen is Life.

And every bit of Oxygen stolen from the lungs of Women, Children and Men, through Lighting, is a loss that can never be made good again.

A 24 Candle-Power Acetylene Light costs you only two-fifths of a cent per hour.

That's about \$5.85 per year, if burned every night in the year for four steady hours.

A Kerosene Lamp of equal capacity would cost you a third more, viz.: three-fifths of a cent per hour for Kerosene alone, or \$8.75 per year.

That's exclusive of broken lamp chimneys, new wicks, and the everlasting drudgery and danger of cleaning, filling and trimming daily.

I want to prove these figures to you, Reader, if you are a house-owner or storekeeper.

are a house-owner or storekeeper.

Tell me how many rooms you've got and I'll tell you what it will cost to light them with brilliant, beautiful, Sanitary, eye-saving Acetylene.
