

MRS. EMMA FLEISSNER  
 Suffered Over Two Years—Health Was in a Precarious Condition—Cured by Pelvic Catarrh.

**HEALTH AND STRENGTH RESTORED BY PE-RU-NA.**

Mrs. Emma Fleissner, 1412 Sixth Avenue, Seattle, Wash., Florist and Treasurer Sons of Temperance, writes:  
 "I suffered over two years with irregular and painful periods. My health was in a very precarious condition and I was anxious to find something to restore my health and strength."  
 "I was very glad to try Peruna and delighted to find that it was doing me good. I continued to use it a little over three months and found my troubles removed."  
 "I consider it a splendid medicine and shall never be without it, taking a dose occasionally when I feel run-down and tired."

Our files contain thousands of testimonials which Dr. Hartman has received from grateful, happy women who have been restored to health by his remedy, Peruna.

**BACK OF THE ATKINS SAW**  
 Two centuries of patient and conscientious effort to produce the best saw in the world. Ten generations of blood and brains. The largest plant in the world exclusively devoted to saw-making, employing many hundreds of high-class, high-grade craftsmen and equipped with only the best machinery. A world-wide business aggregating many millions of dollars every year. A reputation built up through two centuries of steady growth, valued more highly than any other asset of this great institution. The guaranty of this Company, which is respected the world over. We make all types and sizes of saws, but only one grade—Atkins Saws, Corn Kutters, Perfection Floor Scrapers, etc., are sold by all good hardware dealers. Catalogue on request.

**E. C. ATKINS & CO., Inc.**  
 Largest Saw Manufacturers in the World. Factory and Executive Offices: Indianapolis, Indiana. Branches: New York, Chicago, Minneapolis, Portland, Oregon, Seattle, San Francisco, Memphis, Atlanta, Toronto, Canada. Accept no Substitute—Insist on the Atkins Brand. SOLD BY GOOD DEALERS EVERYWHERE.

**The Genuine TOWER'S POMMEL SLICKER**  
 HAS BEEN ADVERTISED AND SOLD FOR A QUARTER OF A CENTURY LIKE ALL TOWER'S WATERPROOF CLOTHING. It is made of the best materials, in black or buff, fully guaranteed, and sold by reliable dealers everywhere.

**Medicine Made for Mothers use JOHNSON'S ANAEMIC LINIMENT**  
 For Internal and External use. Cures croup, colic, cramps, coughs, sore throat, burns, bruises, bites and any soreness. 25 and 50 cts. At all druggists. I. S. JOHNSON & CO., Boston, Mass.

**Go Barched to Church.**  
 The custom of going bareheaded which New York women have extensively adopted this summer, has spread even to the churches. At services which are held week evenings a large contingent of women attend without hats. "I hope the custom will extend to the theaters this winter," said a West Side man. "Then women will not have to hold their hats in their laps. I always feel sorry for women when they take off their hats in the theater. Their hair is usually disarranged, and taking care of a hat all evening is a nuisance. A woman never looks prettier than with a scarf of lace or chiffon thrown over her head, and it is no trouble to take care of that. Women wear them in London and why shouldn't they in New York?"

**A STRONG STATEMENT**  
 By Col. J. M. Guffey, Democratic National Committee member of Pennsylvania. Col. J. M. Guffey, of Pittsburg, Democratic leader of Pennsylvania, and one of the greatest producers in the world of oil, coal and gold, writes:  
 "Gentlemen: It is a pleasure to endorse Doan's Kidney Pills. Having found them of great value I have always been glad to recommend them to my friends. They are excellent."  
 (Signed) J. M. GUFFEY, Doan's Kidney Pills, a specific for backache, bladder troubles and all kidney disorders, are sold by all dealers. Fifty cents a box. Foster-Milburn Co., Buffalo, N. Y.

**The Farm**

**The Over-Burdened Horse.**  
 Who has not seen a horse staggering with too great a load, whipped by a merciless driver? Very often this is the result of the owner of the horse placing upon the horse (and the hired man as well) more than he can do. It is often the hired man that is the driver of the overburdened horse, and the owner is the one that is primarily responsible for the cruelty to the animal. The man that sends his hired man to town over muddy roads with a load big enough for a horse drawing it over a dry road takes great chances with his horse, not only of rendering him uncomfortable, but also of injuring him permanently. Horses, as well as men, can be injured by overloading.

**Fruit For the Family.**  
 The farmer that considers first the fruit for his family is wise. There are multitudes of farmers that cannot afford to raise fruit to sell in the general market that can yet afford to raise all the fruit they and their families can use. It would seem unnecessary in this great country to call the attention of any farmer to the fact that he is not raising all the fruit he should, but we know that thousands of farmers do not raise enough fruit for home use. An abundant supply of fruit should be one of the things found always on every farm in a location where fruit will grow.

**Hens on Small Farms.**  
 The hen can be made a factor for profit on small farms, and indeed of the small farm the hen is likely to receive the attention she should. On the very large farm the poultry business is dwarfed in comparison to the larger scale of operations, and we have not learned yet to manage successfully fowls when kept by the thousands. The small farm, too, has advantages of market facilities that the large has not, on account of the little farm more often being found in the vicinity of cities or villages where the land is high in price.

**Ventilation.**  
 Every building that is used in connection with milk production should be well ventilated. The stable in which the cows are kept and are milked should be well ventilated to keep the cows healthy and should be well ventilated to keep bad smells from getting into the milk. The rooms in the house devoted to the care of milk should be perfectly ventilated, and this should be true of every creamery in which milk or cream is handled. There is now a general complaint that the ventilation of creameries is so bad that are always damp. This is one of the inevitable results of bad ventilation.

**Millet For Poultry Feed.**  
 In my experience millet seed is one of the best things we can give our poultry for a grain feed. I think it is especially good to put finish on birds being fitted for show, as it contains a good deal of oil. It is also not so rich in starch as is corn and has in it more nitrogen. Young chicks find it more to their liking than corn, as the grains are smaller. The old hens cannot fill up on this grain as quickly as they can on corn, and then go and sit down in the shade and wait for another feed. If fed in chaff the fowls will have to exercise a great deal to get a square meal. A quart of millet seed to fifteen full grown fowls is enough for a day's feed.—Nellie Dawson, in Farmer's Review.

**Curing Sucking Cows.**  
 There are many plans for breaking self-sucking cows of the habit, but some of them are complex, while with others the animal soon learns how to get the better of any device which is attached to her. There is one appliance, however, which seems to work to perfection, and it is made and applied in the following manner. The usual halter is placed on the head of the cow and a ring is fastened in it

just under her neck. Then a strap or a strong rope is placed about her body just behind her forelegs. From this strap or rope another strap is run, having at the end a crupper such as is used on horses. This is placed in the proper position under her tail. Then a pole is secured sufficiently long to reach nearly to the middle of her body to a joint just beneath the ring fastened in the halter. A hole is bored in either end of the pole and it is tied at one end to the ring in the halter and at the other end to the strap or rope about her body. The strap from the back to the tail prevents any slipping of the middle strap, and the appliance is absolutely secure, making it impossible for the cow to reach her udder with her mouth. The illustration clearly shows the idea.—Indianapolis News.

**Common Beans.**  
 All the common beans (Phaseolus vulgaris) that we have in our gardens are supposed to be natives of tropical America, and this will account for their great tenderness in the presence of frost. It has been only after many years of breeding up that we have varieties that can be made to mature in so short a time that they can be sown after the danger of frost is over and mature before danger of frost in the fall. It is a remarkable thing that a plant like the bean can have its nature so changed as to time of maturing that two or more successive crops of string beans may be produced in summer. Beans really need good soil to do their best, and above all things they must have an abundance of sunshine, as they had for untold centuries in their tropical habitations the fierce light of the tropic sun. If they are given all the sun they need their mature crop

much quicker than if they are not. It is said by experimenters that there is a difference of two weeks in the time of ripening a crop given the sunshine it needs over a crop that has only partial sunshine.

**Movable House For Turkeys.**  
 Following along the line of argument advanced in these columns many times in favor of keeping the poultry on the range as late in the fall as possible, the reader will be interested in the movable poultry house here described. The runners are formed by the fastening together of two heavy planks and the ends are trimmed so as to turn upward a trifle. Then a hole is bored through the end of each runner through which a chain may be slipped to be attached to a whiffletree so that when the house is attached the house may be drawn to any portion of

the range desired. The house may be made any dimensions desired, six by eight feet or eight by ten feet being the average size. When made for the use of turkeys, only the sides are of solid lumber, the back and ends being covered with strong wire netting to permit free ventilation. The roosts are placed as high as is possible for turkeys, so that they will not strike against the roof and to protect them from rain and storm a hood comes down from the roof projecting over the entire length of the house. The entrance is made quite large and is in one end of the house. This is arranged so that a door may be let down at night, and, if desired, locked, being held in place during the day by a wire and two eye screws. If designed for fowls the roosts may be made lower and a portion of the back side of the house boarded up to cut off a portion of the ventilation. The illustration plainly shows the plan of this house, which is so desirable.—Indiana Farmer.

**Cross Fertilize.**  
 Whatever kind of fruit we grow it is best to plant it so that if possible it may get cross fertilization. We do not know how many different kinds of fruit need to be fertilized by the pollen from another species, but we have learned enough about it to know that as a general thing the fruit is surer if cross pollinated. I could tell of pear orchards that bore little or nothing for years till they were grafted with other varieties to give them the pollen. There is the Kieffer that has so often proved fruitless till it was grafted with Garber. The same is true to a considerable extent with apples, and it is notorious that plums will sometimes not bear at all unless cross fertilized.

**Mineral Plant Food.**  
 I am convinced, writes J. T. Hudson, that mineral plant food is present in considerable quantities in most of our soils, and that it is used up but slowly by the plants. I think that if we drain our land and let in the air in summer and the frost in winter the result will be the constant formation of new plant food under the working of the forces of the air. Water is the universal solvent and believe that where it is allowed to stand in soil it dissolves much of our most valuable plant food. Where mineral plant food abounds we hear men say "the soil is strong" and naturally bears a big crop if cultural conditions are right. In our rocky hillsides there is an abundance of mineral plant food, and more food is being constantly made. Those that notice the grass on such hillsides know that it is of strong growth and that the soil is frequently deep and closely woven.

**Failure of Subway Fans.**  
 Another of the subway failures in ventilating the tube has failed to do what the engineers thought it would accomplish, and has been abandoned. That is the installation of the big revolving fans at the Brooklyn Bridge and Fourteenth street stations. After being in use for two months the four fans were removed last Sunday night from their positions at either end of the two stations, and a fresh experiment is being tried by placing one of the fans in the tunnel proper under the City Hall plaza, while the one at the north end has been moved up nearly to the Worth street station. At Fourteenth street the same thing has been tried of setting the fans above and below the station in a recess in the tunnel walls.—New York Press.

**Liveried Servants.**  
 Housemaids in livery are the latest innovation in smart London houses. The conventional costume for maids—black dress, white apron and cap—has been in several cases superseded. One lady has attired her maids in smart skirts, tight fitting bodices, with a smart, double breasted waistcoat of yellow and black stripes with tiny brass buttons on either side, relieved at the neck by a white linen collar. On her head a little French mob cap is worn, while the costume is completed with a small frilled apron.—London Dystander.

In Cheshire, England, and the adjoining counties, more than 25,000 tons of Cheshire cheese are made annually.

**WHO IS KODAMA?**

**Power Behind the Throne Says Newspaper Correspondent.**  
 If one asks who Kodama is there are two answers: one, that he is the chief of the general staff in the Japanese army, and the other that he is, besides, a poor unlettered man, who, at 52 years of age, rules Japan and guides her armies.

Richard Barry, the war correspondent, says, in "Port Arthur," that this man thinks while others sleep, and works while others eat. He is the power behind the throne, the adviser at the general's ear.

Many public men in Japan believe Kodama to be an unsafe person of second-rate capacity. He had been sent to Formosa, to "get rid of him." There he raised the place from savagery to a commercial prosperity. He could have been prime minister. "No," he said, "I would rather pull strings than be one of the strings to be pulled. Russia is peeping up over the border. Let us prepare. Give me a desk in the war office."

So the critics were glad to get the upstart out of the way. But when the war came, one man had his finger on things, and knew when and where to strike. He knew the points in the Korean coast where an army could be landed. He knew how soon it could be transported there: where all the merchant steamers were, and how long it would take to turn them into transports; and he had the audacity of going to the front.

He was not a very presentable man. He had never traveled, and spoke nothing but Japanese. He would laugh like a boy at what he liked, and frown over at displeased him. And he scorned a frock coat and stuck to a kimono. But the emperor and the wisest heads about him knew what Kodama was, and although they could not, for pride's sake, give him the command of the army, they crowned him with power.

**Obedience a Help.**  
 There is a woman down in Indiana who is hale and hearty at the age of 100, and when she was asked to what she attributed her age and health she replied, "Obedience." And this, too, at a time when the women are having the word "obey" taken out of the marriage service and in other ways manifesting the most supreme contempt for the old obligation. It is not to be believed that there are many women who will care to drag out an existence of 100 years in a state of obedience, even if a fair degree of health is assured. The holy scriptures do not tell us how long the women lived, although we know that Sarah survived until she was 127 and was so obedient that the Lord blessed her with Isaac when she was 90. And it is fair to suppose that other good Hebrew wives were equally long lived and successful. Thus we see that obedience is of the utmost importance to the human race and is the source of happiness and prosperity. Still the women of this age are extremely stiff-necked and unobedient.

**Whole Town Changed Location.**  
 We have been accustomed to hearing of the bodily removal of houses, but it has been left for Russia to provide the spectacle of a whole town of some 5,000 inhabitants changing its location. This, however, is the case of Lepinsk, a town in the district of Semretsche, in Russian Turan. Twenty-two years ago Lepinsk was founded on land provided for the purpose by the governor general of the province. This land had, however, formerly belonged to the Semretsche horde of Cossacks, who strongly objected to the transfer. For twenty-two years the dispute has continued, and now at last the inhabitants of Lepinsk, having a vote in the northwest of their present quarters, have decided to remove thither in a body, taking their possessions and as much of their habitations as possible along with them.

**Insect That Sits on Eggs.**  
 A remarkable case of an insect sitting on its eggs is recorded by F. P. Dodd in the Transaction of the Entomological Society of London. This strange departure from the normal habits of the insect race is exhibited by a species of bug. The female sits in a brooding attitude over her eggs for a period of three weeks. When the young begin to break through she retires an inch or so from the eggs and remains there for some hours until the last egg is hatched. She then departs, leaving the young ones to take care of themselves. During the whole time of brooding, and till all the young are hatched, the mother eats nothing. It is thought that this brooding habit may be a means of protection against the attacks of ichneumon flies.—London Globe.

**THE SECRET OF YOUTH**  
 De Soto looked for the secret of youth in a spring of gushing, life-giving waters, which he was sure he would find in the New World. Alchemists and sages (thousands of them), have spent their lives in quest for it, but it is only found by those happy people who can digest and assimilate the right food which keeps the physical body perfect; that peace and comfort live the sure results.

A remarkable man of 94 says: "For many long years I suffered more or less with chronic constiveness and painful indigestion. This condition made life a great burden to me, as you may well imagine."  
 Two years ago I began to use Grape-Nuts as food, and am thankful that I did. It has been a blessing to me in every way. I first noticed that it had restored my digestion. This was a great gain, but was nothing to compare in importance with the fact that in a short time my bowels were restored to free and normal action.  
 "The cure seemed to be complete; for two years I have had none of the old trouble. I use the Grape-Nuts food every morning for breakfast and frequently eat nothing else. The use has made me comfortable and happy, and although I will be 94 years old next fall, I have become strong and supple again, erect in figure and can walk with anybody and enjoy it." Name given by Postum Co., Battle Creek, Mich. "There's a reason!"  
 Read the little book, "The Road to Wellville," in every pkg.

**STOPS BELCHING BY ABSORPTION—NO DRUGS—A NEW METHOD.**

**A Box of Waters Free—Have You Acute Indigestion, Stomach Trouble, Irregular Heart, Dizzy Spells, Short Breath, Gas on the Stomach?**  
 Bitter Taste—Bad Breath—Impaired Appetite—A feeling of fullness, weight and pain over the stomach and heart, sometimes nausea and vomiting, also fever and sick headache?

What causes it? Any one or all of these: Excessive eating and drinking—abuse of spirits—anxiety and depression—mental effort—mental worry and physical fatigue—bad air—insufficient food—sedentary habits—absence of teeth—boiling of food.  
 If you suffer from this slow death and miserable existence, let us send you a sample box of Mull's Anti-Belch Waters absolutely free. No drugs. Drugs injure the stomach.  
 It stops belching and cures a diseased stomach by absorbing the foul odors from undigested food and by imparting activity to the lining of the stomach, enabling it to thoroughly mix the food with the gastric juices, which promotes digestion and cures the disease.

**SPECIAL OFFER.**—The regular price of Mull's Anti-Belch Waters is 50c. a box, but to introduce it to thousands of sufferers we will send you (2) boxes upon receipt of 75c. and this advertisement, or we will send you a sample free for this coupon.

**1023 FREE COUPON 128**  
 Send this coupon with your name and address and name of a druggist who does not sell the medicine, a sample box of Mull's Anti-Belch Waters to:  
 MULL'S GRAP-NUTS TOXIC CO., 323 Third Ave., Rock Island, Ill.  
 Give Full Address and Write Plainly.  
 Sold by all druggists, 50c. per box, or sent by mail.

**Subterfuge Get Interviews.**  
 Mme. Duse, who has a strong aversion to being interviewed, was recently beaten by the Copenhagen reporters. One acted as waiter at the hotel, another acted as shoemaker's assistant, a third drove her cab, and the fourth was assistant stage machinist, and all used bits of conversation for long interviews.

**FITsomeness cured.** No fits in persons never for first day's use of Dr. Kline's Great Nerve Restorer, 231 East 12th Street, Philadelphia, Pa.  
 In one year this country turns out 1500 books of fiction alone.

Mrs. Winslow's Soothing Syrup for Children Teething, softens the gums, reduces inflammation, allays a painful, cures wind colic, 25c. a bottle.  
 The word "banquet" formerly meant dessert.

**Pink's Cure cannot be too highly spoken of.** It cures cough, cold, croup, whooping cough, all throat and lung troubles. At druggists, 25c., 50c., and \$1.00 per bottle.

**H. H. GARDNER'S** Sons, of Atlanta, Ga., are the only successful Druggery Specialists in the world. Non their liberal offer in advertisement in another column of this paper.

**London has fewer suicides than any other great capital.**  
 How's This? We offer One Hundred Dollars Reward for anyone who can tell us the name of the man who was cured of Hall's Catarrh Cure.

**BABY'S AWFUL ECZEMA**  
 Face Like Raw Beef—Thought She Would Lose Her Ear—Healed Without a Bleeding—Mother Thanks Cuticura.  
 "My little girl had eczema very bad when she was ten months old. I thought she would lose her right ear. It had turned black, and her face was like a piece of raw meat, and very sore. I would bleed when I washed her, and I had to keep cloths on it day and night. There was not a clear spot on her face when I began using Cuticura Soap and Ointment, and now it is completely healed, without scar or blemish, which is more than I had hoped for. (Signed) Mrs. Rose Ether, 291 Eckford St., Brooklyn, N. Y."

**PENSION FOR AGE.** A new order will give pension for age to all persons over 65 years of age. For full particulars, apply to the Pension Office, Washington, D. C. Patent and Trade-Mark built.

**WANTED** High prices paid for all kinds of Live Wild Birds, Particularly Wild Turkey, Quail, and other game birds. Write to Dr. Geo. F. Parker, Washington, D. C.

**DROPSY NEW DISCOVERY.** New discovery for curing dropsy, without the use of medicine. Write to Dr. Geo. F. Parker, Washington, D. C.

**Sonnambulist's Narrow Escape.** Patrolman Jewell of Newark, N. J., noticed something white hanging from the sill of a third floor window of a house. Upon closer inspection he found that the white object was an old man in his night clothes clinging to the sill. Jewell entered the house and ran up to the third floor where he grabbed the wrists of the old man and dragged him into the room. He was George Tauwail, 92 years old. The old man had walked in his sleep and suddenly found himself going out of the window. He clutched the sill and held on. He had been hanging for fifteen minutes before his plight was discovered and his strength, which was wonderful for his age, was apparently exhausted when the policeman seized him. The old man is a somnambulist.

**Tired, Nervous Mothers**

**Make Unhappy Homes—Their Condition Irritates Both Husband and Children—How Thousands of Mothers Have Been Saved From Nervous Prostration and Made Strong and Well.**

A nervous, irritable mother often on the verge of hysterics, is unfit to care for children; it ruins a child's disposition and reacts upon herself. The trouble between children and their mothers too often is due to the fact that the mother has some female weakness, and she is entirely unfit to bear the strain upon her nerves that governing children involves; it is impossible for her to do anything calmly.  
 The ills of women act like a firebrand upon the nerves, consequently nineteenth century nervous prostration, nervous despondency, the "blues," sleeplessness, and nervous irritability of women arise from some derangement of the female organism.  
 Do you experience fits of depression with restlessness, alternating with extreme irritability? Are your spirits easily affected, so that one minute you laugh, and the next minute you feel like crying?  
 Do you feel something like a ball rising in your throat and threatening to choke you? All the senses perverted, morbidly sensitive to light and sound; pain in the ovaries, and especially between the shoulders; bearing down pains; nervous dyspepsia, and almost continually cross and snappy?  
 If so, your nerves are in a shattered condition, and you are threatened with nervous prostration.  
 Proof is monumental that nothing in the world is better for nervous prostration than Lydia E. Pinkham's Vegetable Compound, and thousands of women testify to this fact.  
 Free Advice to Women.  
 Mrs. Pinkham, Lynn, Mass., invites all sick women to write to her for advice. Mrs. Pinkham's vast experience with female troubles enables her to tell you just what is best for you, and she will charge you nothing for her advice.  
 Mrs. Chester Curry, Leader of the Ladies' Symphony Orchestra, 42 Saratoga St., East Boston, Mass., writes:  
 Dear Mrs. Pinkham—  
 "For eight years I was troubled with extreme nervousness and hysteria, brought on by irregularities. I could neither enjoy life nor sleep nights; I was very irritable, nervous and dependent."  
 "Lydia E. Pinkham's Vegetable Compound was recommended and proved to be the only remedy that helped me. I have daily improved in health until I am now strong and well, and all nervousness has disappeared."  
 Mrs. Charles F. Brown, Vice-President of the Mothers' Club, 21 Cedar Terrace, Hot Springs, Ark., writes:  
 Dear Mrs. Pinkham—  
 "I dragged through nine years of miserable existence, worn out with pain and nervousness, until it seemed as though I should die. I then received a statement of a woman troubled as I was, and the wonderful results derived from Lydia E. Pinkham's Vegetable Compound, and I took no substitute."  
 "Free Advice to Women."  
 Mrs. Pinkham, Lynn, Mass., invites all sick women to write to her for advice. Mrs. Pinkham's vast experience with female troubles enables her to tell you just what is best for you, and she will charge you nothing for her advice.

**Farmers Say SLOAN'S LINIMENT**  
 Is the Best Remedy on Earth. Kills a Spavin, Curb or Splint. Very Penetrating. Kills Pain. DR. EARL S. SLOAN, 615 ALBANY STREET, BOSTON, MASS.

**ANTI-GRIPINE**  
 IS GUARANTEED TO CURE GRIP, BAD COUG, HEADACHE AND NEURALGIA.  
 W. L. DOUGLAS \$3.50 SHOES FOR MEN  
 W. L. DOUGLAS \$4.00 GITT Edge Line cannot be equaled at any price.
