

A DESPAIRING WOMAN.

Weak, Nervous and Wretched From Wasting Kidney Troubles.

Mrs. Henry A. Reamer, Main and Garret Sts., South Bend, Ind., says:

"When I began using Doan's Kidney Pills I was so weak I could hardly drag myself across the room. I was wretched and nervous, and had headache, bearing-down pain, dizziness and weak eyes. Dropsy set in and bloating of the chest choked me and threatened the heart. I had little hope, but to my untold surprise Doan's Kidney Pills brought me relief and saved my life. I shall never forget it."

He Was Detained.

"I'd have been out ten days sooner," said the man, who had just been liberated from prison, "if it hadn't been for the chaplain."

"And what did he have to do with it?" was asked.

"It was him that had me detained up there. He comes to my cell one afternoon to see how I was getting on, and after a little he asks:

"And what crime did you commit, my man, that sent you here?"

"It was highway robbery, your reverence," says I, "and now give me your confidence and tell me what you are in for."—Cleveland Plaindealer.

DROVE EMPEROR FROM CAPITAL.

Ill-Used Peasant Almost Seized Crown of Hungary.

George Dosza was a Szekler, or peasant of Szekelyfold, a district of Hungary. He was a quiet, law-abiding man, notable only for his great strength and tall stature.

One day, however, an Austrian noble thought it to decoy away from her father's house Dosza's only daughter, a maiden of 14. The distracted parent sought the abductor far and near, but, failing to find him, journeyed to Vienna and laid his case before the emperor.

The latter only laughed. Whereupon the peasant returned to his own village and passed upon the door of his little cabin a formal declaration of war against his sovereign. A month later he was marching on Vienna at the head of a huge, but undisciplined and ill-equipped army.

At first the luck was all on his side. He defeated the regular troops in a number of pitched battles, carried by assault several large and strongly fortified towns and was actually within sight of the capital, whence the emperor had already fled, when he was betrayed into ambush through the treachery of a guide.

The misfortune constituted the beginning of the end. The bulk of his followers fell away from him and were hunted through the mountains and woods like wild beasts. Altogether, it is said, that over 150,000 of them were put to the sword.

The "Jack Cake of Hungary," having been taken prisoner, was seated on an iron throne, beneath which a huge fire had previously been kindled, crowned with a red-hot iron crown, and his flesh torn from his bones with red-hot pliers.—Exchange.

The Farm

The Pasture.

As a general rule the pasture on the average farm is hardly ever considered even worthy of a thought, and yet it is one of the most important features on a farm where stock of any kind is kept.

By reason of its poor and unproductive pastures, when if a little care and attention were put in this direction they would be so improved that they would be the means of producing as good results financially as any other part of the farm.

The Partners Must Agree.

When a man who keeps cows is obliged to walk around them when they are lying down in the pasture it is one of the best of signs that he and his cows work on the co-operative plan, working in conjunction with each other for the betterment of all concerned.

Lazy Man's Farm Gate.

Many are the changes that have been rung on the farm or entrance gate, but, judging by the persistence of the horde of inventors who make this familiar contrivance their field of activity, there is an enormous demand for a gate that is less trouble to operate than the usual swing affair.

One of the latest claimants to distinction in this particular line is an Illinois inventor, who hails from Petersburg. His idea of a perfect gate is one that can be manipulated without having to get out of a vehicle to do so.

This he accomplished by providing a lifting, instead of a swinging gate. The general bar construction of ordinary gates is followed, but the suspension is such that the gate elevates upon a pivot, being counter-balanced with a weight so that a minimum of effort is required to manipulate it.

The gate is fastened by means of a latch bar, which is operated by providing a lifting, instead of a swinging gate.

Then agree to allow each other, and perhaps a few friends, to shoot over the ground, a good game preserve could be made, in which the farmer would get the sport which is his due.—H. E. Haycock, in Tribune Farmer.

Activity broadens in commercial channels and confidence expands because of the many evidences of conservatism. Business is brisk and improving, yet there is no disposition to start a boom either in commodities or securities.

Manufacturers receive liberal orders for remote deliveries, many dealers having covered spring requirements, and shipping departments are forwarding as freely as traffic facilities will permit.

Current retail trade is not equaling expectations, but this is attributed to mild autumn weather and preparations for the future are undiminished.

Especially good news is received from the iron and steel centers, output of mills and furnaces increasing without relieving the pressure for quick delivery, particularly in structural and railway departments.

Wages were voluntarily increased at plant cloth mills, and scarcely any labor disputes are noted.

Much complaint is heard regarding freight blockades, several contracts being accepted subject to delay in transit, which is seriously retarding grain exports. Nevertheless, railway earnings for October thus far show a gain of only 1.6 per cent, compared with last year's figures.

UNCLE IKE HAD A GRIEVANCE

Couldn't Vote for a Candidate Who Wasted His Money.

When the late Melbourne H. Ford made his run for Congress he overlooked nothing that he thought would improve his chances of election. One of his moves was the taking of an orchestra to a meeting held in one of the small towns near Grand Rapids.

This generous departure may have won him several votes, but it unquestionably lost him one. Every village has its character, and the one there was "Uncle Ike."

Whenever that orchestra broke forth "Uncle Ike" fastened a fierce glance upon the bass drummer. During the ordeal the jaws of the village character worked like those of a buck rabbit eating cabbage, and his white beard of the spinach pattern waved furiously in unison. Next morning one of those who had watched the actions of "Uncle Ike" drew him out on the subject, keeping in mind that he played the bass drum in the local "sheepskin" band, and that jealousy seems an inseparable part of the musical temperament.

"I suppose that you'll vote for Ford, Uncle Ike?"

"Then you better hire some smarter feller to do your supportin'. No man kin have my support that wastes his own money like it was water."

"What do you mean, Uncle Ike?"

"Well, you hain't no musicianer, but I'd like to know what sense there was in payin' out money fur haulin' that bass drum and the man with it clean out here. He didn't hit the durned thing out more'n four times, and he was out o' tune every doggone hit!"—Detroit Free Press.

More About Shakespeare. A certain Mr. Stolzeberg, who lives in America, announces that the works attributed to Shakespeare were written by a syndicate.

"Mr. Stolzeberg must have been living a long way out of the current of affairs, or he would know that his theory is old-fashioned. Homer was a syndicate. Scott was a syndicate. Don't we all know that Dumas employed many hands on his romances? Now the really interesting discovery about the man who wrote Shakespeare is that he was a native of Bayeux, whose name was Jacques Pierre, which was easily corrupted into Shakespeare."
