CAPITOL BUILDING, SALEM, OREGON.

Peruna is known from the Atlantic to the Pacific. Letters of congratulation and commendation testifying to the merits of Peruna as a catarrh remedy are pouring in from every State in the Union. Dr. Hartman is receiving hundreds of such letters daily. All classes write these letters, from the highest to the lowest.

The outdoor laborer, the indoor artisan, the clerk, the editor, the statesman, the preacher—all agree that Peruna is the catarrh remedy of the age. The stage and rostrum, recognizing catarrh as their greatest enemy, are especially enthusiastic in their praise and testimony.

Any man who wishes perfect health must be entirely free from catarrh. Catarrh is well-nigh universal. Peruna is the best safeguard known.

Lawyers Repay Him For Using Pellow Solicitors Card.

DOWNED THE BOOK AGENT

The book agent entered the office of Weeks, Battle & Marshall in lower Broadway one day last week and presepted the card of a brother lawyer in the same building, which gained him admission to the private office. Mr. Marshall had heard of the man and

"Mr. Fuhrman advised me to see you," said the agent, "and that is the only reason why I presume to ask a few minutes of your time. I am presenting this new law work, of which you have probably heard. Mr. Fuhrman was much impressed with it and was certain you would want it."

"Ah," said Mr. Marshall, "that is very kind of Mr. Fuhrman. What is your book 5"

For half an hour the book agent re cited the merits of the volume, while Marshall listened gravely and with apparent interest. The agent was encouraged. "And the price is only \$6.50, in calf, \$4 bound in cloth," he ended triumphantly.

"Very good," said Mr. Marshall, "but I'll tell you what to do-go in and show the book to Mr. Battle. Tell him I

Mr. Battle received the book agent cordially, and was quite attentive to the description of the book, "And the price is only \$6.50 in calf, and \$4 bound in cloth," said the agent after twenty minutes' earnest talk,

Mr. Battle was doubtful, "It's a very good book," sald he, "but I'm not sure that we need it. Go in and show It to Weeks. If Weeks likes it we will

The book agent was doubtful. He looked suspiciously at Mr. Battle as he picked up his volume and went to Mr. Weeks' room,

"I have here a book-" he began. "Huh," said Mr. Weeks, looking up from his desk. "Mr. Battle sent me in to you," ex-

plained the book agent,
"Ah," said Mr. Weeks, smlding pleasantly. "I see. And Mr. Marshall sent rou in to Mr. Battle, I suppose. Well, I'll get even with them. What is your book? I see. Well, we bought it from the publishers a week ago," - New York Press.

Mosquitoes Carried by Cars.

The railroads running through the mountains of western Maryland have been the means of introducing the malarial mosquito into that section of the State, according to Professor Philip R. Uhler, president of the Maryland Academy of Sciences and provost of the Penbody Institute,

Professor Uhler said yesterday that the mosquitoes are being carried by freight cars from Spring Gardens, Baltimore, to the mountains of western Maryland, and that he is sure of this from the fact that while in the mountains he has picked mosquitoes from freight cars which had been hauled there from Baltimore. Pro fessor Uhler said he has been going to years, and though over 70, am as acthe Blue Ridge Mountains for thirty years and never saw a mosquito there until three years ago.

As each mosquito lays 500 eggs at once, the rapidity with which they multiply may be imagined, although the female dies after doing this much to propagate her species. Under favorable conditions the eggs are hatched in two weeks. Formerly the mosquitoes could not exist in the mountainous section of the State, Professor Uhler said, but since the country has become more thickly settled and the water courses polluted the pests have an excellent chance to propagate. The female selects as favorable a spot as possible for depositing her eggs, and under present conditions, the professor said, the mosquitoes will thrive and will be ready in the spring to start out on their mission of torture.-Baltimore

Lighthouse as a Bird Trap.

The night watch of the Cape May lighthouse was chatting with a visitor when something struck hard against the netting around the light. The watch went out upon the tiny circular balcony and returned with a dead bird in his hand. "A mud hen," said he. Sometimes we get five or six in a night. Often we find robins and ducks dead on the balcony."

"It's a fine life you lead here," remarked the visitor.

"Yes; if it wasn't for the oil-the six gallons of oil that the light burns nightly. The Government won't give us any machinery to hoist it up with. Consequently every day I must carry the whole six gallons up those 217 steps. That's hard on the he "!."

"It must be," agreed the vis. ". "It would be so easy to rig up a rove and pulley, too, and draw the oil up that way.

"It ain't allowed," said the watch, "In every oil-burning lighthouse the attendants must carry up the oil by hand. It does seem-

COMMERCIAL

R. G. Dun & Co.'s Weekly Review of

R. G. Dun & Co. s week,

Trade says:

"Fundamental conditions are unchanged, although higher temperature at many points again checked retail sales of heavyweight wearing apparel and other seasonable merchandise. Labor conditions in the buildings trades have not incorpored and another serious struggle improved and another serious struggle may occur, which would be most unfortunate in view of the large operations under way and contemplated. Other-wise the situation is satisfactory and the outlook bright, with mercantile collec-tions steadily improving. Holiday trade

gathers impetus as the season advances.
"Comparisons with last year's figures continue favorable, this week's gains being swelled by the holiday a year ago, but equilibrium in this respect will be restored next week. Leading industrial undertakings report little idle machiners. undertakings report little idle machinery and there is less complaint regarding car shortage, railway earnings thus far available for November exceeding last year's by 6.4 per cent. Foreign commerce at this port for the last week showed a loss of \$1.080,032 in exports and a gain of \$53,177 in imports, as compared with the same week last year.

"It is customary at this time of the year to find a general quieting down in the iron and steel business, but normal conditions do not prevail this season. Al-though the leading interests have pre-vented any sensational inflation of prices, all divisions of the market have harden-ed sufficiently to accelerate the opera-tions of consumers who believe that it is the part of wisdom to prepare for future requirements. Activity continues at textile mills, but the primary markets for cotton goods were decidedly disturbed by the violent advance in raw material.

"Quiet conditions continued in the market for packer hides, chiefly because orders cover deliveries so far into the future that sellers are indifferent regarding new business. Leather remains quiet because of the light offerings of such varieties as are wanted. New England footwear factories are hurrying contracts for delivery before the close of the year and also cutting the new season's goods,

"Failures this week numbered, 228 in the United States against 205 last year.

Killed While Examining Shell Quiescent Since Omdurman.

News of a singular fatality reminiscent of the sanguinary reconquest of the Sudan is to hand from Khartoum. A party of Sudanese, natives of Omdurman, after bathing in the Nile were resting on the desert sands to A few yards away they observed a black object half emerging from the sand. Instantly all of them ran up to upearth the mystery. It was then seen to be a bombshell. Not content with this discovery, one of the Araba proceeded to break open the projectile, which thereupon exploded with terrific force, causing instant death to two of the Arabs, who are described as baying been shattered into fragments. Another was gravely woundest. The supposition regarding the shell is that if was one fired from Kitchener's guns at the battle of Omdurman, lying quiescent from that day to the moment of its tragic explosion

only the other day.

The darkest days of husband and

wife are when they come to look forward to childless and lonely old age.

Many a wife has found herself incapable of motherhood owing to a dis-placement of the womb or lack of strength in the generative organs.

Mrs. Anna Potts

Frequent backache and distressing pains, accompanied by offensive dis-charges and generally by irregular and scanty menstruation indicate a displacement or nerve degeneration of the womb and surrounding organs.

The question that troubles women is how can a woman who has some female trouble bear healthy children? Mrs. Anna Potts, of 510 Park Avenue, Hot Springs, Ark., writes:

Hot Springs, Ark., writes:

My Dear Mrs. Pinkham:—

"During the early part of my married life I was delicate in health; both my husband and I were very anxious for a child to bless our home, but I had two miscarriages, and could not earry a child to matarity. A neighbor who had been cured by Lydia E. Pinkham's Vegotable Compound advised me to try it. I did so and seen felt that I was growing stronger, my headaches and backaches left me, I had no more bearing-down pains, and felt like a new woman. Within a year I became the mother of a strong, healthy child, the joy of our home. Lydia E. Pinkham's Vegetable Compound is certainly a splendid remedy, and I wish every woman who wants to become a mother would try it."

Actual sterility in woman is very

Actual sterility in woman is very rare. If any woman thinks she is ster-ile, let her try Lydia E. Pinkham's Vegetable Compound and write to Mrs. Pinkham, Lynn, Mass. Her advice is free to expectant or would-be mothers.
