"On the middle of the coffin a pink cushion lay carelessly thrown; at the side was a chair of modern appearance, rather in the empire style, yet with I know not what of Egyptian. Farther away was a gilded armchair with straight legs, which recalled the style of Louis XVI., and, facing it, yet another quite Egyptian. Here, too, was a charlot covered with leaf gold. complete with its wheels, pole and yoke.

"Here also a complete suite of furniture, large chests of black wood and seventy-two jars containing offerings and provisions, ducks, haunches of ventson, meat-dried or mummifiedbread, wheat, and in others traces of the wine and perfume which they had contained.

"One large vase was overturned by accident and from it came a thick. vellowish matter-honey-and strange to say, at that very moment, we saw alighting on it a bee which had entered from without! At the side were

### Southern Chivalry.

Many stories have been told of Southern chivalry, but the palm appears to go to a story told by a former governor of Kentucky while visiting in this city recently.

According to the narrator a genuine Kentucky colonel boarded a street car which was very crowded, and some how he stepped on the foot of a very pretty woman. Of course the woman expected the Colonel to apologize, just as dld everybody else who heard her give a mouselike squeal when the Colonel's foot came down.

And she looked as though she expected an apology, but the Colonel. divining her thought, doffed his hat and said: "No, madam, I'm not going to apologize. When the good Lord was so gracious as to make women so beautiful and charming and with such wonderfully small feet that a man has to tramp on them to find them, then I don't think that an apology-'

The compliment was too graceful for the woman to resist, and all that followed was a smiling acknowledgment of the Colonel's gallant speech. -Philadelphia Record.

### Novelty in Skin Disease.

A curiously novel disease has just declared itself among the public elementary schools of Basle. It is a singular affection of the scalp which begins with a kind of scurvy highly contagious in its nature. The first outward indications are little spots \_ at first scarcely visible to the naked eye. but gradually spreading. Wherever these spots appear the hair falls entirely away, and before the disease is arrested the patient becomes entirely bald. All the schools have been closed, and a compulsory course of medical treatment has been ordered for all bose affected.

It greatly helps the flow of milk in cases where coffee is inclined to dry it up, and where tea causes nervousness. "I find trouble in getting servants to make Postum properly. They most al-ways serve it before it has been boiled long enough. It should be boiled 15 or 20 minutes and served with cream, when it is certainly a delicious bever-Bare.
