Litton-Simpson Nuptials.

There took place on the 23rd inst., at the home of Mr. and Mrs. Benjamin R. Simpson, of Thompson township, the marriage of their accomplished and charming daughter, Miss Nellie Josephine, and Mr. Willard V. Litton.

There was a large number of friends at the happy event and the occasion was a most delightful one. At 5 o'clock p. m., Rev. A. G. B. Powers, the officiating minister, found himself in the parlor under an arch of evergreens and surrounded by snowball flowers. The wedding music was charmingly rendered by Miss Mary Smith, of Hancock, Md., and as Mendelssohn's wedding march began, first entered the bride's maid, Miss Lillian Pott, and best man, Mr. Edward Simpson.

The bride was dressed in white silk crepe-de-chine and carried white flowers tied with white ribbon. The bride's maid was dressed in white Persian lawn, and carried pink flowers tied with pink ribbon.

After the ceremony, we all repaired to the dining room where we partook of the good things to satisfy the appetite, at which time the bride and groom were recipients of a valuable present—each finding a gold coin under their plate.

Those present were Mac Litton and wife, Thomas Litton and wife, John Winters and wife, Raymond and Oscar Litton, Mamie Garver, William Pittman and wife, Mrs. Elizabeth Hess, Claud Pittman, Mrs. Scott Johnson, Louie Johnson, Lemuel Gordon and wife, Mrs. Harry Atkinson, Oliver Zimmerman, Hon. D. T. Humbert, Mrs. Howard Pittman, Reed Simpson, and Mrs. Powers. The bride was the recipient of many valuable presents.

Next day we went to the home of the groom's parents, where we mingled with many kind friends, a bountiful dinner was served, good music rendered and a social chat for several hours was much enjoyed by the large crowd of friends who had been invited. In the evening we said "good-bye," hoping to see a good rain and many more such joyful occasions.

A FRIEND.

Letter to W. Scott Alexander, McConnellsburg, Pa.

Dear Sir: As your business is to get people into and out of trouble, suppose you consider their paint; it makes 'em almost as much trouble as money, except; of course, matrimony.

They buy poor paint a good deal; they don't mean to; they don't know any better; they buy without thinking. Bad paint isn't good. It looks good enough for a year; then begins to get rusty; but changes so slowly, one don't notice it.

Looking isn't all. The business of paint is to keep a house dry inside, the wood and iron of it; keep it from rotting and rusting. Takes good paint to do it.

Good and bad paint are sold at one price or about that. One can't go by the price at all; as with lawyers, the price has nothing to do with goodness or badness; and costs are worse yet; the painter and she:iff come in for their share.

But the probability is that a man, who paints Devoe, will come out on top.

Yours truly
F. W. DEVOE & Co.,
New York.
S.—F. C. Bare, Fort Littleton, sells our paint.

SALUVA.

We are glad to see that our friends, D. E. Mellott and son Niel, are able to work their engine again after having had a through of typhoid fever.

William Moore is seriously ill with consumption.

Mrs. Joseph Everetts is on the sick list.

John A. Hauman has his new house completed, and expect to move into it next week.

The McDaniell sawmills are busy cutting lumber, which gives our men plenty of work.

John Hann captured a swarm of wild bees last week, from which he got forty pounds of honey, and saved the bees. Mr. Hann says he will send the editor of the News some of the honey next week, if nothing happens.

fire started by an accident is easily put out. This is not the case with either kerosene or gasoline, where water merely increases the danger by scattering the fire.

For purposes of heating and cooking, denaturated alcohol is most admirably adapted. It can compete with coal for the heating of rooms, halls, etc., and there is no waste of heat or unwholesome vapors or gases. It is far cleaner to use, there being no ashes. When the alcohol heater is shut off, that ends the expense.

The enormous increase within the past few years in the manufacture of all sorts of internal combustion engines for motor purposes, automobiles, power boats, farm engines, and many other kinds of work has caused such a demand for gasoline for fuel that the price has steadily increased, until at this time it is nearly double its former cost.

It will therefore be easily understood that denaturated alcohol is a perfectly feasible and practicable proposition and will be able to compete with gasoline and kerosene in the production of power, heat and light, and great good will thus result, especially to the 6,000,000 farmers of the United States.

The products of their farms, such as corn, wheat, rye, oats, rice, barley, and potatoes, are easily converted into alcohol, and could be so done in co-operative distilleries, which the farmers would own and operate, under government supervision. The alcohol would be returned to them in tank cars or by pipe lines, according to the circumstances of the case, and they would thus be enabled to light and heat their homes, run their farm machinery and largely do their work by this alcohol.

It will thus be seen that an enormous amount of raw material for the manufacture of alcohol exists, ready to our hand, in this country. On the contrary, petroleum, turpentine and wood alcohol are all produced from sources which are constantly diminishing, and their price must perforce rise as time passes.

The cost of denaturated alcohol, on the other hand, will tend to be always lowered on account of the great abundance of raw material from which to make it as well as the permitting America inventive genius and opportunity to exploit its manufacture and great uses. It will be seen that a new use is thus made for potatoes and many of our farm products.

It is possible to obtain relief from chronic indigestion and dyspepsia by the use of Kodol for Dyspepsia. Some of the most hopeless cases of long standing have yielded to it. It enables you to digest the food you eat and exercises a corrective influence, building up the efficiency of the digestive organ. The stomach is the boiler wherein the steam is made that keeps up your vitality, health and strength. Kodol digests what you eat. Makes the stomach sweet—puts the boiler in condition to do the work nature demands of it—gives you relief from digestive disorders, and puts you in shape to do your best, and feel your best.
