

HABITS OF THE HOUSE FLY.

Harold Rogers, M. A., Tells Whence He Comes, Whither He Goes.

The common house fly (Musca Domestica) is a creature of such secretive habits...

It remained for the eminent Boston biologist, Dr. A. S. Packard, in 1873, to make known his origin, habits and transformations from the egg through the larva state with its two changes to the pupa state, then to the perfect fly.

Near the first of August the female lays about 120 eggs of a dull gray color, selecting fresh horse manure in which to deposit her eggs...

In the pupa state when the fly is about to emerge, the end of the pupa case splits off, making a hole through which the fly pushes a portion of its head...

The whole time from the depositing of the egg to the perfect fly is not over ten days in duration. Many persons who observe small flies in midsummer suppose they are the young, but such is not the case...

In the pupa state they are often fed upon by the larvae of some of the beetles, notably that of the carpet beetle, whose pupa, the dreaded buffalo moth, will attack the young fly in the pupa case and eating it possess the case for itself.

Adult flies, like most other creatures, have parasites of minute size that prey upon them; these can often be seen as presenting small red specks over the body of the fly.

Another enemy in the form of a fungus often attacks the fly in the early autumn. This makes its appearance as a white swelling and the white spores of the disease can be seen penetrating the body of the fly, which it finally distends and ruptures.

The fly hibernates in winter, but with his usual secretive habit, it is very difficult to find him in his winter quarters. With the first chill of autumn the flies feeling the cold, seek temporary warmth in houses, and clustering together form bunches in the corners of walls and other places.

They are then sluggish and not so active as in the warm weather. However, they do not make a permanent stay indoors, but on the first mild, sunny day, seek the windows to get out and find their permanent winter hiding place, many prefer to make their homes in the roots of grass on lawns where they hide themselves so effectively that the ice and snow of winter does not destroy them in their hibernating state.

It is in the first warm days of spring when the snow is gone and the grass on the lawns becomes dry and warm, long before the yellow dandelion shows its head, a close observer may see numbers of flies crawling up on the grass to get the welcome sunshine, their wings standing out stiff and useless; but they soon acquire the power of flight in the warm rays of the sun.

A great many days, however, elapse before they appear in the homes of men, where they are such unwelcome visitors.

In recent years, the medical profession have demonstrated that while the fly itself does not propagate disease, it is one of the most industrious carriers of disease germs which by contact adhere to its feet, hairy legs and body, distributing them to innocent victims.

If every house-keeper could know all these interesting facts which have never before been brought to their attention, they would realize the importance of securing the very best fly exterminator.

W. L. Jackson, merchant, of Parkersburg, W. Va., says: "Driving about in had weather brought kidney troubles on me. I suffered for twenty years with sharp, cramping pains in the back and urinary disorders. I often had to get up a dozen times at night to urinate. Retention set in, and I was obliged to use the catheter. I took to my bed, and the doctors failing to help, began using Doan's Kidney Pills. The urine soon came freely again, and the pain gradually disappeared. I have been cured eight years, and though over 70, am as active as a boy."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

WOMAN'S REALM

Break Dinners. Let us hope the tiresome fashion will not be set among us here of "break dinners." The idea has been done to death in America.

Let us hope the tiresome fashion will not be set among us here of "break dinners." The idea has been done to death in America. There have been Japanese dinners, doll dinners, nose dinners, rose dinners, giants' and dwarfs' dinners—one knows not what else besides!

Silk Petticoat Economy. A silk petticoat may be made to serve almost twice its usual period of usefulness if it is lined as far down as the bottom ruffle with nun's veiling or some other light weight fabric.

Economy in Long Gloves. When the hands of elbow gloves, especially black or tan ones, grow shabby, cut the long wrists off carefully and turn them into the separate wrists which came out last winter.

Three Wedding Hints. Don't impoverish your family by insisting on an extravagant wedding. The show lasts but a short time; the poverty sometimes consequent upon it remains.

Fancy Work of Irish Women. In recent years the Irish women have been turning their attention largely to fancy work in the way of lace handkerchiefs, crocheting, knitting and other home work, selling their products to the many societies which in recent years have been organized to dispose of these native Irish products in England and the United States.

Popular Colors. One of the latest fashionable colors is known as "patent apple green." It is difficult to conceive a color more fascinating. It causes an Irishman to blink twice. This shade was taken from the American bird of paradise.

Home Rules for Mothers. Home life is the school in which permanent impressions are made. Don't criticize your friends kindly in the hearing of your children.

Why a Woman Nags. A doctor explains the opinion that nine times out of ten the woman who nags is tired. One time out of ten she is hateful. Times out of mind her husband is to blame.

Number of Women Employed. The census returns show that 5,000,000 and more women are employed in the nation's industrial life. There are three times as many women stenographers as there were ten years ago, while the number of women bookkeepers and accountants has doubled.

Interested in Horses. "Look at the crowds that have come to see the horses on show," said an enthusiastic lover of the noble animal as he entered Madison Square Garden in New York City.

Interested in Horses. "Look at the crowds that have come to see the horses on show," said an enthusiastic lover of the noble animal as he entered Madison Square Garden in New York City.

THE SERVANT PROBLEM.

London's Experiment With "Lady Helpers."

London has an association, the Ladies' Arachne Club, named after the skilled needlewoman whom the goddess Minerva changed into a spider out of pure jealousy of her accomplishments.

It is often the most unselfish and most affectionate of women who fall into this state, says Woman's Life. They are too much devoted to their families to give themselves enough of any healthy exercise and diversion enough of naps, perhaps, or concerts.

Gowns That "Belong." How few women understand the art of wearing their gowns well. They may have the prettiest, most expensive and latest costumes obtainable, but they might far better be hung on wax figures than on some of the living and moving possessors of them.

Daughters of Lovely Women. Every woman so inconsiderate as to have been a beauty in her youth owes her grown-up daughters big damages. The maternal reputation works as a blight.

Siberian Butter Exported. A firm of London importers of food stuffs predicts that there will be a slump in the price of dairy products the world over as soon as Siberia strikes a steady gait in butter production.

Girls in Germany. The German girl leaves school at about fifteen years of age, by which time she has learned to sew, mend and supposedly to speak English and French.

Famous Tree Gone. Lafayette's famous "Big Tree" one of the oldest and best known landmarks in Indiana, is no more. The giant oak, under whose branches Gen. William Henry Harrison slept while on his way to the battle of Tippecanoe, has been cut down.

Number of Women Employed. The census returns show that 5,000,000 and more women are employed in the nation's industrial life. There are three times as many women stenographers as there were ten years ago, while the number of women bookkeepers and accountants has doubled.

Interested in Horses. "Look at the crowds that have come to see the horses on show," said an enthusiastic lover of the noble animal as he entered Madison Square Garden in New York City.

STOPS BELCHING BY ABSORPTION.

—NO DRUGS—A NEW METHOD.

A Box of Waters Free—Have You Acute Indigestion, Stomach Trouble, Irregular Heart, Dizzy Spells, Short Breath, Gas on the Stomach?

Bitter Taste—Bad Breath—Impaired Appetite—A feeling of fullness, weight and pain over the stomach and heart, sometimes accompanied by vomiting, also fever and sick headache?

What causes it? Any one or all of these: Excessive eating and drinking—abuse of spirits—nervous and depression—mental effort—mental worry and physical fatigue—bad air—insufficient food—sedentary habits—indigestion—irregularity of food.

If you suffer from this slow death and miserable existence, let us send you a sample box of Mull's Anti-Belch Waters absolutely free. No drugs. Drugs injure the stomach.

It stops belching and cures a diseased stomach by absorbing the foul odors from indigestible food and by increasing activity to the lining of the stomach, enabling it to thoroughly mix the food with the gastric juices which promote digestion and cure the disease. This offer may not appear again.

Send this coupon with your name and address and your druggist's name and fee, in stamps or silver, and we will supply you a sample free if you will never use Mull's Anti-Belch Waters, and will also send you a certificate good for 25c toward the purchase of Mull's Anti-Belch Waters. You will find them invaluable for all stomach trouble, cured by absorption. Address: MULL'S GRAPE TONIC CO., 128 3d Ave., Rock Island, Ill.

All druggists, 50c. per box, or by mail upon receipt of price. Stamps accepted.

ARE PRIDE OF SWITZERLAND. Small Cantons Support Many Schools of Great Reputation. Geneva is only one of the universities of little Switzerland, according to Charles F. Thwing, in Harper's Magazine.

Geneva is only one of the universities of little Switzerland, according to Charles F. Thwing, in Harper's Magazine. Founded in 1540; Lausanne, founded as an academy in 1537, and as a university in 1890; Zurich, founded in 1832; Bern, founded in 1834; Freiburg, founded in 1889—have each secured a high educational place.

Although the constitution of 1848 authorized the federal government to erect and maintain a polytechnic school and university, the university has not been established. The cantons support their respective state universities. The University of Zurich is maintained by a commonwealth of only 50,000 people, and with an area of less than 700 square miles.

Children Keep City Clean. Mrs. Chamberlain of New Orleans believes in training the young citizen for a clean city. She says: "I have organized the children of this street into a civic club in which boys and girls have equal honors and responsibilities. I have found it a great factor in keeping sidewalks and lawns free from waste papers and other unsightly objects, as well as a protection to palms, flowers and trees."

W. L. Douglas's "Shoes for Children" are made of the finest material and are guaranteed to last. They are made in the United States and are sold at a price that is within the reach of all.

A WOMAN'S ORDEAL.

DREADS DOCTOR'S QUESTIONS

Thousands Write to Mrs. Pinkham, Lynn, Mass., and Receive Valuable Advice Absolutely Confidential and Free

There can be no more terrible ordeal to a delicate, sensitive, refined woman than to be obliged to answer certain questions in regard to her private life, even when those questions are asked by her family physician, and many

continue to suffer rather than submit to examinations which so many physicians propose in order to intelligently treat the disease; and this is the reason why so many physicians fail to cure female diseases.

This is also the reason why thousands upon thousands of women are corresponding with Mrs. Pinkham, daughter-in-law of Lydia E. Pinkham, at Lynn, Mass. To her they can confide every detail of their illness, and from her great knowledge, obtained from years of experience in treating female ailments, Mrs. Pinkham can advise sick women more wisely than the local physician.

Read how Mrs. Pinkham helped Mrs. T. C. Willadsen of Manning, Ia. She writes: "Dear Mrs. Pinkham: I can truly say that you have saved my life, and I cannot express my gratitude in words. Before I wrote to you telling you how I felt, I had doctored for over two years steadily, and spent lots of money in medicines, but it all failed to do me any good. I had female trouble and would daily have fainting spells, backache, bearing-down pains, and my monthly periods were very irregular and greatly painful. I wrote to you for your advice and received a bottle of your Compound, and I have been restored to perfect health. Had it not been for you I would have been in my grave to-day."

Mountains of proof establish the fact that no medicine in the world equals Lydia E. Pinkham's Vegetable Compound for restoring women's health.
