

Gen. W. H. Kelbaugh  
OF WEST VIRGINIA  
PRAISES PE-RU-NA.

Gen. W. H. Kelbaugh.

A Cold at Any Time of the Year, Especially in Hot Weather, is Very Dangerous to the System. Pe-Ru-NA is an Unparalleled Tonic For Such Cases. Read What People Say About It.

Hon. W. H. Kelbaugh, Ex-Member of the U. S. House of Representatives, writes: "You can use my name and word at all times for Pe-Ru-NA as a medicinal and tonic unqualified. I have tried it for a stubborn cold and heady run-down system. I tried all sorts of other medicines and paid several expensive doctor bills. Pe-Ru-NA cured me, strengthened me more than ever, and saved me money."

Libby's Food Products  
enable you to make good meals out of "hurry" meals.

Libby's Food Products are ready to serve when you get them, yet are cooked as carefully and as well as you could do it in your own kitchen.

On Tongue, Dried Beef, Baked Chicken, Dressed Ham, Veal Loaf—these are but a few of the many kinds your dealer keeps.

Try for luncheon or supper tomorrow, some sliced Chicken Loaf.

Libby, McNeill & Libby, Chicago.

BOTH IN THE SAME BOAT.

At a recent dinner which was attended by a number of clergymen President Buckham, of the University of Vermont, told the following of Bishop Hall, of the Episcopal Diocese of Vermont, in response to some good-natured chaff about the liberal views of the Congregational Church and the case with which almost anybody could join it.

"Well, 'Rastus, have you prayed as I told you?"

"Yes, indeed, 'sire; I done prayed 'n I done told de Lawd I wants to jine St. Paul's Church, 'n de Lawd be say to me:—

"'Good luck, 'Rastus; I been tryin' to jine dat church 'fo' 20 years maise'!"—Pittsburg Post.

GOOD GUESS.

Senator Hale, apropos of an awkward remark, said: "It reminds me of the conversation of two women at a reception. They were strangers to each other. After a moment's desultory talk, the first said, rather querulously: 'I don't know what the matter with that tall, blond man over there. He was so attentive a while ago, but he won't look at me now.' 'Perhaps,' said the other, 'he saw me come in. He's my husband, you know.'"—New York Tribune.

"NO TROUBLE"

To Change From Coffee to Postum.

"Postum has done a world of good for me," writes an illis man.

"I've had indigestion nearly all my life, but never dreamed coffee was the cause of my trouble until last spring I got so bad I was in misery all the time."

"A coffee drinker for 30 years, it irritated my stomach and nerves, yet I was just crazy for it. After drinking it with my meals, I would leave the table, go out and lose my head and the coffee, too. Then I'd be as hungry as ever."

"A friend advised me to quit coffee and use Postum—said it cured him. Since taking his advice I get out of it, and don't have those awful hungry spells."

"I changed from coffee to Postum without any trouble whatever, felt better from the first day I drank it. I am well now and give the credit to Postum." Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

# Woman's Realm

## Spanish Women.

What women more adorable than those of Spain, so proud, so simple, so radiantly feminine? As a type, the Spanish woman of the South is unique. She is small and slender, exquisitely proportioned, with tiny but beautifully shaped hands and feet. Her face is oval, finely chiselled, frank and childlike. Her eyes are the mirror of her soul, dark, lustrous, pensive and passionate. Her grace of carriage and deportment is the glory of her race.—Nineteenth Century.

## The Healthy Woman.

Is careful to spend at least half an hour every day in the open air. Never rides where she can walk the distance comfortably. Doesn't waste her vitality in superfluous and energetic talking. Eats three meals a day at regular hours. Sleeps eight hours and as often as possible, two of them before midnight. Takes fifteen quiet minutes in a darkened room after luncheon. Begins each day with a cold bath, followed by drinking a glass of hot or cold water.

## Your Property.

All you had before your marriage is still yours, and in most States you have also the sole ownership of that which you acquire after marriage. Your right minded husband will wish you to have your property stand in your name, that it may be free from the possible attachment of his creditors. If your property or part of it is real estate, remember that the law of the State in which real estate is situated governs all matters concerning it. All your property is subject to the laws of your domicile. Some States require a man to join in a deed of his wife's property, even though the property is really hers. Get legal advice on such points. It is seldom safe to be a party to the transfer of property without it.—Caroline J. Cook, in Good Housekeeping.

## Shun the Tale-Bearer.

The fault-finding woman is ill-bred and to be avoided. She is the one who, while she criticizes her breakfast, eats heartily of it. She objects to the style in which dinner is served, especially if she happens to live at a boarding house. Then she complains of the attention paid her bedroom. She is disgusted with the general appearance, and yet she is confidential with the landlady. She is usually a tale-bearer, and unless you wish to be mixed up in numerous quarrels you had better avoid her, says Woman's Life.

## Women in the Census Returns.

"I never get tired of the census," the girl was saying. "It's as inexhaustible as the Bible. One can return to it again and again, always picking up some new and interesting fact. Here, for instance, under the heading of women's occupations, I see that 1305 women earn their living as fishermen and oystermen, and—just listen to this!—1320 as guides, trappers, hunters and scouts. Aren't those astonishing trades for women? What in the world do you suppose made those 1320 women go in for trapping and hunting? Probably they are the daughters of woodsmen and help their fathers, or perhaps they are the widows of trappers, scouts, etc., who have found it necessary to do something after the death of the breadwinner, and so went on following his craft as the easiest thing possible. Anyhow, their strange employments open up interesting perspectives of conjecture, don't they?"

## Long Gloves Hurtful.

Some of the French physicians are making a disturbance over the long, tight gloves! They enumerate all sorts of dreadful things to come from the continuance of this fashion—hands as red as a kitchen maid's, crows' feet, red faces, and even varicose veins and their attendant miseries; but whether women of fashion are skeptical or indifferent it is hard to say, for there seems to have been no falling off in the number of gloves designed especially to be worn with long gloves. There is a chance of escape from such ills in having the gloves made to order. Most Parisiennes do, because they are so fastidious in the matter of their handgear, and frequently, even with the most beautifully shaped hands and arms, there is a slight difference in size between the two hands, which is sure to bring about a misfit. The right hand being used so much more than the left, it is apt to require a half-size larger glove than its idle fellow.

## "In the Sweat of Thy Face."

The other day I heard a formal matron rebuke her daughter for using the word "sweat." More than once a well-meaning friend has gently informed me that "perspiration" sounds more delectable. However, I will stick to "sweat," and I expect the Karayzee Reform Spelling Association to endorse me, declares a correspondent of the New York Press. Now that our Skibo laird has started on his campaign of education there are many lines on which he might branch out. If he is to spell by ear, why not strike out word of the false modesty, not

## strike out words of the false modesty of "perspiration."

Most of us have got past the stage of saying "limb" for the good old-fashioned "leg." Eventually we will call a spade a spade—but not yet. The greater part of society will have it that man lives "by the perspiration of his brow," or wears "a striped perspiration," yet we have got to the stage of removing the last trimmings from the peek-a-boo waist. Surely, we are an inconsistent lot!

## A Queen's Characteristics.

The new Queen of Norway is probably the slimmest woman in her dominion. Her waist measures but seventeen inches, and she is so ethereal in appearance that even in England, where the cult of thinness has as worshippers practically all the women of the kingdom and most of the men she is called rather too frail and delicate in appearance. Queen Maud was the tomboy member of King Edward's family and 's brightest member as well. It was she who first nicknamed her brother, the late Duke of Clarence, Collars and Cuffs, a name which clung to him through life. She called her eldest sister, the Duchess of Fife, now called the Princess Royal, Her Royal Shyness, on account of that retiring lady's almost morbid dislike of appearing in public.

## What is Life Without Love?

Is it worth having? Well, hardly. We may not be sentimental. We may be the most matter-of-fact person in the world. Unless we are very crabbed and very foolish, however, we must appreciate the help love gives in all walks of life. Without love would the tired mother care to sit up and work for her little one, tend on the ailing child at night? Without love would the father be always anxious to get on in the world and be helped in his daily work by looking forward to the evening at home?

## Chat About Housewifery.

A cloth dipped in boiling water, wrung out and placed over fish that has been boiled, will keep it warm for quite a while. Those who find that Welsh rabbit does not agree with them may enjoy this simple substitute: Grate some cheese and mix with it a grain of red pepper, a pinch upon slices of toasted bread or browned crackers and is melted. A tablespoonful of turpentine placed in the boiler with clothes will whiten them beautifully. If a piece of paper placed in the oven turns a dark yellow, the heat of the oven is right for the baking of bread or cake. If double layers of brown paper are placed under oilcloth on shelves or tables it will last twice as long. A small piece of wash leather wet with methylated spirits and rubbed on mirrors or picture glasses will clean them beautifully. Polish afterward with a soft cloth. An easy mode of covering jelly glasses: Brush white of egg over proper size and cover the jelly while hot. The paper will stick tightly and prove as airtight as parchment. Cover plaster of paris ornaments, that are intended to be cleaned, with a thick coating of starch and allow it to become perfectly dry; then it can be brushed off and the dirt with it.—Housekeeper.

A bit of vivid green on the Panama or other ecrú-tinted straws forms a cool color combination that is very becoming to the clear brunette type.

Tiny tots are very sweet in the Dutch-necked short-sleeved gowns, the Dutch-cut hair adding to the quaintness and beauty of their attire.

A corselet skirt that is a bit unusual is made in box pleats that are stitched quite to the knees. Between the pleats at the bottom are stitched bands running horizontally.

So general is the fashion for Empire designs that my lady is dressed in costumes that hint of those far gone days whether she is eating, sleeping, walking or motoring.

Becoming millinery is as essential, if not more so, to the appearance of a woman than becoming gowns. And yet a woman seldom takes the pains with her hats that she does with her gowns.

Unless you are straight of figure, not the least bit bent, do not wear a bolero, for the rounded back is almost sure to throw the coat outward just below the shoulders making an angle that is awkward in the extreme.

The woman who hasn't as handsomely shaped a foot as she could wish will select a very wide ribbon for her ties but not too long, for instead of a trim bow that will conceal irregularities and a low instep she will have bows and ends that will call attention to her foot.

Many people prefer to leave the fullness of the shirt waist free at the bottom to facilitate ironing. A piece of half-inch elastic cut the exact size of the waist and fastened with a hook and eye will be found a convenient way of drawing it snugly to place before putting on the skirt.

Heavy linen and Irish lace are combined in a handsome costume. The jacket is of the lace, with a border all around of linen. Small, notched revers and cuffs are also of linen, and the skirt is linen trimmed with bands of lace. A collar and girdle may be added of black or colored velvet, giving a very effective touch, but it would be prettier all in white.

## HOUSEHOLD MATTERS

### Stuffed Cabbage.

Cut out the stalk end of a large head of cabbage, leaving a hollow shell. Tie the cabbage in mosquito netting and boil carefully until tender. Make a stuffing of seasoned crumbs, and any cold cooked meat. Fill the drained cabbage with grated cheese, dot with butter, and bake in a quick oven until brown.

### Steamed Flgs.

Flgs for breakfast are very much liked in one household, where they are prepared in the following manner: Pull apart and soak overnight in a thin syrup of sugar and water. In the morning lay them in a small steamer or colander to fit over the tea kettle. They become sweet and plump prepared in this way. Of course, the best flgs do not have to be prepared at all, but this family practical economy and buys ordinary flgs, which are really as valuable for food purposes as the choicest.

### To Serve With Meats.

With roast beef, grated horseradish. Roast veal, tomato or horseradish sauce. Roast mutton, currant jelly. Roast lamb, mint sauce. Roast turkey, chestnut dressing, cranberry jelly. Roast venison, black currant jelly or grape jelly. Roast goose, tart apple sauce. Roast quail, currant jelly, celery sauce. Roast chicken, bread sauce. Fried chicken, cream gravy, corn fritters. Roast duck, orange salad.

### To Cook Beefsteak.

All beefsteaks and chops should be handled without having a fork stuck into them. Punctures allow the juice to escape. Beefsteaks and chops should be dipped for a moment into boiling water just before being cooked. This contracts and closes the surface, enabling it to retain juices.

Beefsteaks for the family should be cut one and a quarter inches at one edge and taper in thickness to half an inch at the other. This, when cooked, enables the carver to serve rare, medium or well done portions, as desired.

The round of tender beef cuts well flavored steaks; it is much cheaper than the loin and if properly cut and cooked is equally good. Before dipping it in boiling water make several incisions through and through, three inches long at regular intervals. In these insert slices of kidney fat or suet. Dip and broil over wood coals if possible; if these cannot be had heat a frying pan very hot and butter it, place the steak in it, cover and cook quickly over a hot fire.—Delimitator.

### Chat About Housewifery.

A cloth dipped in boiling water, wrung out and placed over fish that has been boiled, will keep it warm for quite a while. Those who find that Welsh rabbit does not agree with them may enjoy this simple substitute: Grate some cheese and mix with it a grain of red pepper, a pinch upon slices of toasted bread or browned crackers and is melted.

A table-spoonful of turpentine placed in the boiler with clothes will whiten them beautifully. If a piece of paper placed in the oven turns a dark yellow, the heat of the oven is right for the baking of bread or cake.

If double layers of brown paper are placed under oilcloth on shelves or tables it will last twice as long. A small piece of wash leather wet with methylated spirits and rubbed on mirrors or picture glasses will clean them beautifully.

Polish afterward with a soft cloth. An easy mode of covering jelly glasses: Brush white of egg over proper size and cover the jelly while hot. The paper will stick tightly and prove as airtight as parchment.

Cover plaster of paris ornaments, that are intended to be cleaned, with a thick coating of starch and allow it to become perfectly dry; then it can be brushed off and the dirt with it.—Housekeeper.

### White Cookies.

Two eggs, two cups sugar, one cup butter, one teaspoon soda, one teaspoon salt. Flavor to taste. One cup sour milk. Mix as soft as can be handled.

### Cornstarch Cookies.

Two cups of sugar, one cup butter, one cup sour milk, one cup corn starch, two eggs, one teaspoon soda, flour. Drop from spoon on greased tins and bake.

### Sand Dressing.

One cup sour cream. When scalding hot, add two eggs, one-half cup sugar, six in cream, add one-half cup of vinegar, salt and pepper to taste. Pour on cabbage while hot.

### Chicken Salad.

Four pounds of chicken will make salad for ten or twelve persons. Cut the light and cold meat into fine pieces. Use two-thirds of the chicken to one-third of celery. Mix the salad with the dressing, saving some to pour over the top before using.

### Apple and Cucumber Salad.

Peel equal quantities of cucumber and some sweet cooking apples, cut them into thin slices, season with salt, pepper and lemon juice. Place into a salad bowl, pour over sufficient slightly whipped cream to cover, sprinkle over a little paprika and serve.

## ALCOHOL IN GAS ENGINES.

Only Slight Changes Needed in the Mechanism.

It has been asserted that the farmers use more gasoline every year in small engines than do the owners of automobiles. We do not know whether the statement is true, but a great many people will have a chance next year to substitute alcohol for gasoline. If, as has been said, grain alcohol can be produced for ten cents a gallon in large quantities, it ought to retail for less than gasoline, which now costs from eighteen to twenty-two cents. Careful tests show that the same amount of power can be had from a given quantity of alcohol as from gasoline. One estimate makes it possible to get a horse-power from a pint of either per hour. Alcohol can usually be made to work in an engine intended for gasoline, but in building entirely new engines the designs will probably need to be modified in certain ways.

The opinion is expressed by the Iron Age that the most important change that will be required will be in the cylinder and its intermediate parts. Other things being equal, the essential factor in determining the economy and efficiency of an explosive engine is the extent of compression that is possible with the mixture of vapor and air. This is greatly in favor of alcohol, since the compression can be carried much higher than with gasoline without danger of premature explosion. The same rule obtains here as in other explosives: gunpowder is a comparatively harmless substance until closely confined. Compression in a gasoline engine ranges from forty-five to sixty pounds a square inch, varying according to the design and the rapidity of the cooling of the cylinder. A higher compression being possible with an alcohol mixture, the combustion is more perfect and the energy greater with equal volumes of gas.

In all gas engines, except those of the throttling type, the cylinder is completely filled with the mixture during the stroke just preceding ignition. If the clearance were as small as in the ordinary steam engine the heat due to compression would be so great as to cause inflammation of the gas before the piston rod had reached the end of its stroke. To overcome this, the common gasoline engine is made with a clearance equal to one-fourth to one-fifth of the volume of the cylinder. This clearance will have to be reduced to meet the requirements of an alcohol mixture and obtain a higher compression before ignition by the spark takes place. In this country engines have not been designed for the use of alcohol, neither have endeavors been made to modify the ordinary engines for that purpose.

The price of alcohol has been so excessive as to discourage and in fact prohibit its employment as a fuel for power purposes. There has been absolutely no incentive along that line. But much work has been done in this direction in Germany and France, where alcohol is cheap and engines using it are common.

### Shipping Fish Without Water.

Consul-General Richard Guenther writes that experiments made in Germany in the transportation of live fish have demonstrated that fish can live out of water for days.

The gills of fish are similar to the human lungs, and are constantly washed by water containing oxygen. The thin membrane of the gills separates the blood in them, vitiated with carbonic acid, from the water containing oxygen, and the practical result is the same as with the human lungs.

It had been noticed long ago that many kinds of fish could live out of water for some time provided that the gills remain wet. In order to keep the gills wet the evaporation of the moisture had to be prevented.

For this purpose the fish were placed in an atmosphere thoroughly saturated with water vapor. An hermetically closed wooden box was filled with water to the depth of about one-third of an inch, or the bottom was covered with wet rags, which through evaporation kept the air in the box always saturated. The fish were placed in the box, which was then shut hermetically by the lid.

Through a tube oxygen was introduced. Before entering the box the oxygen passed through several water bottles, which thoroughly saturated it with water vapor. In this way the fish are always in a pure oxygen atmosphere. The result of the experiments was surprising. Carp, tench, bleak and other fish remained in the box for from three to four days perfectly well. When they were then placed in water they swam about in a lively manner and appeared perfectly fresh.

This mode of transportation is much more economical than shipping live fish in water tanks. By the latter method the weight of every shipment was ninety-three to ninety-six per cent. water.

## Sensitive.

The pompous gentleman with the \$1000 watch fob was being plied through the food show by his beautiful daughter. Suddenly one of the demonstrators halted him and said: "I will now show you the process in which I serve."

The pompous gentleman started and looked as though he was about to run. "Please don't say anything about serving processes," cautioned the daughter. "It always makes a nervous man. You see, he is a trust magnate."

## Scotland Yard.

Scotland Yard, widely known as the headquarters of the London police, is a historical place, said to have been the site of a palace where kings of Scotland were received when they came to London. It is near the banqueting hall, Whitehall. The Scotch kings retained possession of it from 959 till the rebellion of William of Scotland. Milton, Sir Christopher Wren and other notables lived in Scotland Yard.

## WHEN IN DOUBT.

C. M. S. McEllan, author of the strong and successful drama, "Teah Kiechma," has pronounced views against

"If the men who caused war were the men who fought," he said one day, "I should admit war's logic. But this is not the case. On the contrary, the men who cause a war never fight in it—never risk their lives, or endure hardship, or suffer loss."

"It is the nation's young men who must fight. These young men, without any reason of profit or glory, die or return home with an empty trouser leg, and the profit and the glory all go to a lot of high officials—a lot of non-combatants who never struck a blow."

"The common soldier, on the whole, is treated like the culprit in a Mogador prison. 'This culprit, convicted of slandering, was sentenced to the bastinado. Twenty lashes were ordered. Two men were appointed to do the work.' 'The culprit, weeping, was bound down. The two men, rolling up their sleeves, took sticks in their hands, and with knif blades began to rain the 20 lashes on the culprit's flesh.' 'But half way through they lost count. 'This is 10,' said the first. 'No; it is 13,' said the second. 'I'm sure the last stroke made 10,' the first insisted. 'Nonsense. It made 13,' declared the second. 'They argued for some moments, the prisoner listening anxiously, and then, finding it impossible to settle the question, they agreed it would be best to start all over again.'—Chicago Inter Ocean.

## THE FATHER'S ANSWER.

An anecdote is told of Richard Sedden, the late premier of New Zealand. He was very active in sending troops to the assistance of Great Britain in the South African War. On one occasion he was taunted by the opposition member with his readiness to sacrifice the lives of the colony's unwholesome.

"You are ready enough to send our sons and brothers to be shot at, but—" was the opening of a taunt by his opponent, when the Premier broke in: "Sir, this morning I signed a commission for my own son. He will be shot at, and I have dared him to come back without a wound."—Chicago Inter Ocean.

## DAZED WITH PAIN.

The Sufferings of a Citizen of Olympia, Wash.

L. S. Gorham, of 516 East 4th St., Olympia, Wash., says: "Six years ago I got wet and took cold, and was soon flat in bed, suffering terribly with my back. Every movement caused an agonizing pain, and the persistence of it exhausted me, so that for a time I was dazed and stupid."

On the advice of a friend I began using Doan's Backache Kidney Pills, and soon noticed a change for the better. The kidney secretions had been disordered and irregular, and contained a heavy sediment, but in a week's time the urine was clear and natural again and the passages regular. Gradually the aching and soreness left my back and then the lameness. I used six boxes to make sure of a cure, and the trouble has never returned."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

## WORLDS FOR EXPLORERS.

Notwithstanding the rapid advance of exploration in various parts of the globe, recent estimates by a member of the American Geographical Society show that not less than 20,000,000 square miles of the earth's surface yet remains unexplored.

The largest unexplored area is in Africa, 6,500,000 square miles, but even North America contains 1,500,000 square miles of virgin territory. It is surprising to learn that there is three times as much land awaiting the foot of the pioneer in North America as in South America.

## To Wash Glassware.

Much of the irritation cut glassware may be made to look almost like the genuine article if washed in the following manner: Make a strong solution of Ivory Soap and immerse the piece of glassware in it. Rub vigorously with a soft brush, dip up and down in the suds and do not dry but let drain. This will give a beautiful sparkle.—Eleanor H. Parker.

## NOT MUCH THERE.

"Yes," said Mrs. Starvorn, "he is a millionaire now and they say he rose from practically nothing."

"Yes?" remarked the sarcastic boarder, "that's what I rose from—at the breakfast table this morning."—Philadelphia Press.

## FITS, St. Vitus' Dance, Nervous Diseases

permanently cured by Dr. Kline's Great Nerve Restorer, 88 cent bottle and treatise free. Dr. H. R. Kline, L. S. 351 Arch St., Phila., Pa.

A good many young men will have this summer—on front gates.

Mrs. Winlow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 35c a bottle.

Quite often the man who is swift and a good guesser distances the slow but sure chump.

## HEAD COVERED WITH HUMOR.

Bothered With Itching For a Long Time—Kentucky Lady Now Completely Well—Cured by Cuticura.

"After using Cuticura Soap, Ointment, and Pills, I am very glad to say I am entirely relieved of that itching humor of the head and scalp which I was bothered with quite a length of time. I did not use the Cuticura Remedies more than three times before I began to get better, and now I am completely well. I suffered with that humor on my head, and found no relief until I took the Cuticura Remedies. I think I used several boxes of Cuticura Soap, three boxes of Ointment, and two vials of Pills. I am doing all I can to publish the Cuticura Remedies, for they have done me good, and I know they will do others the same. Mrs. Mattie Jackson, Mortonville, Ky., June 12, 1905."

Few men believe in an everlasting fire and brimstone punishment—except for their neighbors.

## ITS MERIT IS PROVED

RECORD OF A GREAT MEDICINE

A Prominent Cincinnati Woman Tells How Lydia E. Pinkham's Vegetable Compound Completely Cured Her.

The great good Lydia E. Pinkham's Vegetable Compound is doing among the women of America is attracting the attention of many of our leading scientists, and thinking people generally.

Mrs. Sara Wilson

The following letter is only one of many thousands which are on file in the Pinkham office, and go to prove beyond question that Lydia E. Pinkham's Vegetable Compound must be a remedy of great merit, otherwise it could not produce such marvelous results among sick and ailing women. Dear Mrs. Pinkham:—

"About nine months ago I was a great sufferer with female troubles, which caused me severe pain, extreme nervousness and frequent headaches, from which this doctor failed to relieve me. I tried Lydia E. Pinkham's Vegetable Compound, and within a short time felt better, and after taking five bottles of it was entirely cured. I therefore heartily recommend your Compound as a splendid female tonic. It makes the monthly periods regular and without pain, and what a blessing it is to find such a remedy after so many doctors fail to help you. I am pleased to recommend it to all suffering women."—Mrs. Sara Wilson, 31 East 34 Street, Cincinnati, Ohio.

If you have suppressed or painful periods, weakness of the stomach, indigestion, bloating, peevish catarrh, nervous prostration, dizziness, faintness, "don't-care" and "want-to-be-left-alone" feeling, excitability, backache or the blues, these are sure indications of female weakness, or some derangement of the organs. In such cases there is one tried and true remedy—Lydia E. Pinkham's Vegetable Compound.

## YOU CANNOT CURE

all inflamed, ulcerated and catarrhal conditions of the mucous membrane such as nasal catarrh, uterine catarrh, caused by feminine ills, sore throat, sore mouth or inflamed eyes by simply dosing the stomach.

But you surely can cure these stubborn affections by local treatment with Paxtine Toilet Antiseptic which destroys the disease germs, checks discharges, stops pain, and heals the inflammation and soreness.

Paxtine represents the most successful local treatment for feminine ills ever produced. Thousands of women testify to this fact. 50 cents at druggists.

Send for Free Trial Box.

THE R. PAXTON CO., Boston, Mass.

## CALL THE ROLL.

After a number of plenary and other defers of the law of the land have studied matters in the enforced privacy of prison walls, it is probable that breaking laws will not be considered such great fun as it has been in the past.—New York Tribune.

## NO USE FOR THEM.

Canvasser—Madam, I would like to show you the beautiful Silver Forks that we are giving away with every half dozen bars of Skinfry soap.

Lady of the House—We don't never cut with forks in this house. They leak.—Woman's Home Companion.

## CAPUDINE

CURES INDIGESTION AND ACIDITY

It acts immediately. It relieves its effects in 10 minutes. It has no harmful effects. It is a safe and reliable remedy for all cases of indigestion and acidity. It is sold by all druggists.

## SHENANDOAH COLLEGE

A School for Boys and Girls, Young Men and Young Women. Academic, Collegiate, Commercial and Musical Courses. Excellent Christian Teachers. Home Comforts. Catalogue free. Address: W. R. KLINE, Pres., RELIANCE, VA.

## POWHATAN COLLEGE

FOR YOUNG CHARLES TOWN, VA. NOTED FOR ITS 15 Scholarships, Able Faculty, Magnificent Buildings, Wide Patronage, Home Comforts and Location. Catalogue free. Address: W. R. KLINE, Pres., RELIANCE, VA.

## Smithalls

Is the oldest and first business college in Va. to own its building—a fine one. No vacations. Ladies and Gentlemen. Business, shorthand, penmanship, stenography, etc. These first taught by mail also. Leading business college south of the Potomac river. Address: Smithalls, Richmond, Va.
