Duke and Duchess of Marlborough Disagree.

MR. VANDERBILT AS CONCILIATOR.

Father of the Duchess Trying to Prevent a Separation-For Sometime the Couple Have Been Living Apart, Owing, It Is Reported, to the Disagreeable Disposition of the Duke.

London (By Cable). - Disagreements between the Duke and Duchess of Marlborough, which have been prolonged over a period of 18 months br more, English society is convinced, will result in their separation unless the earnest efforts now being made by the father of the Duchess and other relatives result in a reconciliation. W. K. Vanderbilt, the father of

the Duchess, arrived in London on Fuesday and went directly to Blenteim, where his daughter is with her shildren. The Duke is not at Blea-beim, and all negotiations for a reconcillation have been conducted through Mr. Vanderbilt.

Incompatibility is the only reason assigned for the strained relations existing between the Duke and the Duchess. This has become acute during the past 18 months, and they have been apart for increasingly long periods. The Duke's relations with his wife's family have not been cordial for sometime, chiefly due, it is said, to the disappointment to his expecta-iions caused by the second marriage of W. K. Vanderbilt,

Dislikes Americans,

The Duke, according to all accounts, is not blessed with a very amiable temper, and affects an in-ionse dislike for Americans, which is most trying to the Duchess, who has many American friends of whom she is fond.

Nothing annoyed the Duke so much as the frequently printed reports of this having received magnificent pres-Ho ents from his father-in-law. aever neglected an opportunity to deride these rumors. When Sunderiand House was being built it was published that this was being done with money furnished by W. K. Vanforbilt as a Christman present to the Duke and Duchess,

The Duke, angered by the publication, gave out a sharply worded de-alal, in which he intimated that W. K. Vanderbilt had not given either self or the Duchess anything be yond the marriage actilements.

No Trouble Over Money.

Close friends of the Duke say he is one of those men who could never be contented or consistently agree ablo, and that the question of mone really need trouble them not at all if it were not for other sources of disagreement. Bellevers in the doc trine of heredity point out that the Duke's father and mother both displayed incompatibility in their mari-tal relations as proof of their theory.

The two children-the Marquis'o Blandford and Lord Iver Spences Churchilli-are, of course, a powerful deterrent to the separation of the Duke and Duchess. Their friends sincerely hope that a reconciliation Their friends may be effected, although it is said that the family of the Duchess has forescen the ultimate result for several years.

ocause of the fact that the Duke and Duchess have been so much be-fore the public since their marriage. the report of their disagreement and separation naturally spread quickly in London society
