

Dyspepsia of Women

Cased by Female Disorders and Cured by Lydia E. Pinkham's Vegetable Compound

A great many women suffer with a form of indigestion or dyspepsia which does not seem to yield to ordinary treatment.

Mrs. Pinkham claims that there is a kind of dyspepsia that is caused by a derangement of the female organism, and which, while it resembles the ordinary indigestion, cannot be relieved without a medicine which not only acts as a stomach tonic, but has a peculiar tonic effect on the female organism.

As proof of this theory we call attention to the case of Mrs. Maggie Wright, Brooklyn, N. Y., who was completely cured by Lydia E. Pinkham's Vegetable Compound after everything else had failed.

No other medicine in the world has received such widespread and unqualified endorsement as such the Government, through the Office of Experiment Stations of the Department of Agriculture, has established a system of Nutrition Investigations.

While very few people in civilized countries actually starve, many have less food than they need, and multitudes have less than they would buy if they could.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable.

The city of St. Petersburg is proceeding vigorously with the development of its urban transportation system. An order has been given for 150 British-made electric trolley cars.

The Ideal Family Laxative is one that can be used by the entire family, young and old, without any danger of harmful effects.

A Woman's Back Has many aches and pains caused by weakness and falling, or other displacement of the pelvic organs.

Every ingredient entering into 'Favorite Prescription' has the written endorsement of the most eminent medical writers of all the several schools of practice—more valuable than any amount of non-professional testimonials—though the latter are not lacking, having been contributed voluntarily by grateful patients in numbers to exceed the endorsements given to any other medicine extant for the cure of women's ills.

You cannot afford to accept any medicine of unknown composition as a substitute for this well proven remedy or know construction, even though the dealer may make a little more profit thereby.

Investigating the Nutritive Value of Meat.

By ELIZABETH C. SPRAGUE.

A billion and a half dollars are spent every year by the people of the United States for the meat they eat—about a third of the whole amount expended for raw food materials.

It has proved financially profitable to study the food of plants, to analyze the soil where they are to be grown, discover what food element is lacking, and by supplying this produce a more perfect and plentiful crop.

In cooking meats in water, it may lose from ten to fifty per cent. in weight, depending upon the conditions of cooking.

When meat is cooked in water, it may lose from ten to fifty per cent. in weight, depending upon the conditions of cooking. Most of this loss is due to the water cooked out of the meat.
