Cost of Women's Dress.

Miss Giulia Morosini's calculation of the necessities of a smart New York woman in the matter of dress, which are reproduced here, led to inquiries of fashionable West End tradesmen for the purposes of comparison. These show that the most extravagant English woman in London spends less than one-third of Miss Morosini's estimate.

The English woman is content with fifty gowns costing \$500 apiece, instead of 100 costing double that amount. Her lingerie costs just onefourth of what Miss Morosini's does, her furs one-half and her shoes onetenth, while her miscellaneous expenditure is placed at \$15,000, instead of \$45,000.

Society's Newest Fad.

London is promised an age of the blue stocking. London's society woman has a fantastic mental palate; she demands change and novelty. As one leader was overhead to say, "No one plays bridge now." Of course, everybody, i. e., the grande dame who can think for herself, must have sorrething else to fill the hours devoted to bridge for several years.

And she has decided to be intellectual; Mile. Scialtiel, a talented and very attractive French woman, has been selected as guide and Victor Hago as the subject in this intellectual flight. The first "causerie" took place the other day at Claridge's under most distinguished patronage, a countess, viscountess, baroness and baronet's lady and some of the lesser rank giving the cachet of their names Of course, the talk was in French, and it was rather noticeable that the ladies of Mayfair are a little-just a little-rusty in their French. The fashionable woman on Fifth did you do to the little boy next Avenue and Broadway this season is a sartorial paradox. You cannot tell by looking at her whether it is summer or winter, raining or fine, morn-ing or afternoon. Her head, which you might take to be reasonably warm under its natural protection of moun-tainous pompadour, she covers with a heavy fur hat or cap, a pound or so of feathers and flowers and a lot of little false curls. are left completely out in the cold. She wears her skirts quite as short as she dares, her shoes as low as her dancing pumps, and between these two points there is a stretch of bare skin showing through very openwork stockings.

About her neck she wraps several yards of lined and wadded fur; but her arms from her wrists to her elbows are bare save from a thin covering of suede kid gloves. From her waist line up she is usually incased in the tightest and warmest of fur jackets, while about her limbs blows a light-weight, much-pleated skirt, which appears to be mainly intended to let in the breezes. She carries a hugh 1830 muff, large enough for Gulliver's hands, but the of her shoes are of paper soles weight.

Autos Spread Glanders,

Odd as it seems, the rapid increase of automobiling in Great Britain is held to be answerable for the spread of glanders among horses in the country. The accusation was brought at a meeting of the Central Associated Chambers of Commerce, where the reporter of the cattle diseases committee said that glanders was form-erly almost entire confined to London. Since horse traffic in the metropo-

lis has ben largely and increasingly replaced by motor omnibuses and motor cars, however, the disease had been scrattered through the country by the sale there of London's abandoned horaca.

Meanwhile the disease is correspondingly decreasing in London .--New York Sun.
