ROAD LAW UNCONSTITUTIONAL.

Ruling of Bedford County Judge on Turnpike Act.

In an opinion and decree handed down Monday by President Judge J. M. Woodruff, in the Bedford county court, he held that the act of Assembly requiring the county through which vacated turnpikes run to keep the roads in order was unconstitutional, upon the ground that it was class legislation. Suit had been brought by East Providence township Bedford county, to compel the County Commissioners to repair the vacated Bedford-Chambersburg turnpike.

"I had tried everything for my baby, until Dr. Lyle recommended Cascasweet. I can truthfully say it is the best medicine I ever used for babies. My little baby was a mere skeleton from stomach trouble—so bad that she'd not notice anything, out is now entirely well, and we can almost see her grow."—Nannie L. Taylor, Bedford, Va. Cascasweet is sold at Trout's drug store.

NEW STYLE OF PROPHECY.

A Raw Onion Supersedes the Goose Bone Prophet.

John Hoffman, of Punxsutawney, has discovered a new method for forecasting the weather conditions which he claims, will relegate the goose-bone, ground hog, corn husk and other time honored prognosticators to the distant rear.

The Punxsutawney Spirit says that on Friday Mr. Hoffman took a common onion and peeled off 12 layers which he placed in a saucer. He then covered the layers with a heavy sprinkling of salt and set them in a dark place where they were allowed to remain four days. Tuesday he made an examination of the onions when he discovered that three layers, representing January, February and March, had been completely dissolved, while the other layers remained intact. This Mr. Hoffman interprets to mean that the weather during January, February and March will be warm and open like part of last week.

Mr. Hoffman advises his friends that he has tried the experiment for several years, and that they can rely on the integrity of the prediction implicitly.

Croup can positively be stopped in 20 minutes. No vomiting—nothing to sicken or distress your child. A sweet, pleasant and safe Syrup, called Dr. Shoop's Croup Cure, does the work and does it quickly. Dr. Shoop's Croup Cure is for Croup alone, remember. It does not claim to cure a dozen ailments. It's for Croup, that's all. Sold at Dickson's drug store.

Mid-winter Term Begins Jan. 7, 1907. Catalogue Free. The Tri State Business College Cumberland, Maryland.

POET.

Charles Hess has improved the appearance of his property by building a wagon shed and granary.

It's a pleasure to tell our readers about a Cough Cure like Dr. Shoop's. For years Dr. Shoop has fought against the use of opium, chloroform, or other unsafe ingredients commonly found in Cough remedies. Dr. Shoop, it seems, has welcomed the Pure Food and Drug Law recently enacted, for he has worked along similar lines many years. For nearly 20 years Dr. Shoop's Cough Cure containers have had a warning printed on them against opium and other narcotic poisons. He has thus made it possible for mothers to protect their children by simply insisting on having Dr. Shoop's Cough Cure. Sold at Dickson's drug store.

TALLEST IN THE WORLD.

Magnificent Forty-Six Story Structure for New York City.

Plans for the tallest building in the world have been filed with building Superintendent Murphy, and when they are carried out there will be at Madison Square and twenty-fourth street a tower which will reach far above all New York 658 feet in the air.

The tower is to be the annex to the Metropolitan Life Building, and here are some of the dimensions of the completed structure:

Height above sidewalk, 628 feet. Total height from foundation, 690 feet.

Number of stories above sidewalk, 46. Number of stories below sidewalk, 2.

Grand total floor area of new Metropolitan building, 1,035,663 square feet (about 25 acres)

The new tower is to occupy the site of Dr. Parkhurst's old church on Madison Square. It will be five stories higher than the new Singer building tower which is to be built soon. From the elaborate plans submitted by the architects, Napoleon Le Crun & Son, it is evident that the new structure is to be in many ways the most remarkable of modern buildings.

Above the eleventh story the tower is to be but seventy-four feet square, and yet it is claimed the problem of sky-scraper construction has been so thoroughly mastered that the lofty column will have all the power of resistance which belongs to the main building.

Wind braces will protect it, and the interior construction of the steel frame is of such nature that the strongest winds that blow across Manhattan cannot endanger it.

The tower will be of steel skeleton frame, filled out with ornamental brick and marble to match the main structure. Above the main portion will be peaked dome 94 feet high, with an octagonal cap rising 70 feet additional. Six passenger elevators will run from the basement through the 48 stories to the top. Three storage tanks, each 7500 gallons capacity will be installed on the 26th, 38th and 48th floors of the tower. The estimated cost of the addition is \$3,000,000.
