HOCLESS LARD The Uppermost Stand-

ard of Highest Quality

Inspected by the United States Government

Logic Is Logic.

The Irish intellect is more often associated with wit than with logic, but an Irish workman recently silenced for a moment the upbraiding tongue of his foreman by a display of something which bore just enough resemblance to logic to confuse his

The workman enjoyed leaning on his hod and making shrewd observations much more than he did stirring about, and the cry of "Mort! Mort!" fell on dull cars.

"Why don't you attend to your hod and keep that man going?" de-manded the foreman severely when Patrick was enjoying one of his fre-

quent periods of rest.
Patrick raised his hod with a leisurely movement and turned a pair of twinkling eyes on his ac-

"Sure, now," he said easily, "if I was to keep him goin' all the time a thing he'd say at all, at all; and if he didn't say anything I'd be wasn't there, sorr, what would he be marthar anyway?" Youth's Companion.

Wires Need a Rest.

"Messages," said a telegraph operator, "always alide over the wires better on Monday than on any other day. The wires, you see, have profited by their Sunday rest.
"It is a fact that inanimate as

well as animate things get tired and need a vacation occasionally. You know how true this is of razor's, of automobiles, of locomotives-and it is just as true of telegraph wires.

wire after its Sunday rest gives a quicker, a fuller and a more delicate transmission. It is like a plane that has just been tuned."— Minneanapolis Journal.

TERRIBLE TO RECALL.

Five Weeks in Bed With Intensely Painful Kidney Trouble.

Mrs. Mary Wagner, of 1367 Kossuth Ave., Bridgeport, Conn., says:

ened and generally run down with kidney disease that for a long time I could not do my work and was five weeks in bed. There was continual bearing down pain, terribie backaches,

headaches and at times dizzy spolls when everything was a blur before me. The passages of the kidn y secrotions were irregular and palaful, and there was considerable sediment and odor. I don't know what I would have done but for Doan's Kidney Pills. I could see an improvement rom the first box, and five boxes

brought a final cura."

NEW YORK DAY BY DAY.

Some of the Things Done Daily in the

"Life Is A Foolish Dream." A hunchback, painfully sensitive

A hunchback, painfully sensitive to his deformity, but talented and ambitious, found life a nightmare and ended it. He was Albert Chit-tenden, an artist. His body was found in his apartments, at 15 West Twenty-ninth Street. Life is a foolish dream. Ha, ha!

Such a funny dream. But enough, enough. I am ready to awake to omethin; less ridiculous. This valedictory, scribbled in pen

cil on a slip of paper and pinned to the wall, was the bitter adver-tisement to the world of the convic-tion which prompted the deed. Carefully planned two years ago

and developed to its minutest detail Chittenden ordered his own death in the way he had chosen. Every chance of outside interference has been eliminated.

But Chittenden plainly left the story of his heartache on the walls of his rooms; they were covered with pictures and sketches, all of beautiful women. Most of these were his own handiwork; some were simply rought, unfinished sketches. He had indulged his love of the beautiful to

seek an artificial interest in life. A faded, long-stemmed rose, pre served for years, was pinned over his heart, where he had placed it before he lay down to die. It represented what was lost out of the deformed man's life. It seemed to speak of love and companionship. But it spoke of years ago. Chit-tenden had avoided women in the latter years of his life. His sensitiveness over his deformity has ap-parently been of steady growth,

Cod Pulls Angler Overboard.

Excited at the extraordinary size of a big codfish that he found on the end of his line, while fishing from the steamboat Angler, several miles off Sandy Hook, Frank Schabolowisky fell overboard into 10 fathoms of water. Schabolowisky fished from the stern of the steamboat and had had good success, having a large pile of cod and bake heaped up beside him. Suddenly he felt a mighty tug at the line, and he pulled with all his might. There emerged from the waves the nose of cod, a colossal cod, a regular whale of a cod, the great grandfather of all the rest on the bank. Anyway, the sight so astonished him, and an inopportune lurch of the boat per-baps helped, that he fell overboard ood, line and all-into the water od, line and all—into the water. Other anglers set up a shout, the crew threw out a life-preserver which he, caught, and then hauled him aboard and he was taken to Bellevue Hospital. "Oh, Oh, such a big one he was! Never was there a codfan like him before And I a codfish like him before. And I lost him," he said.

Stole Watch In Prison.

"My watch is stolen! Police!" yelled Nathan Gleckman in the Es-sex-Market Police Court detention pen. Sergeant Post of the Court squad grabbed Albert Green, of 309 East Fourteenth Sreet, who had just been fined \$10 for fighting in the street. Green had a cheap watch in his pocket which Gleckman swore

"I had just wound the watch." said Gleckman, "then it disappear-

'I bought the watch for 98 cents on the Bowery," Green explained.
"When did you wind it?" asked

the astute sergeant.
"Yesterday." said Green. The watch was wound as tight as could be. Magistrate Moss held Green in \$1000 ball for trial.

100-Year-Old Recluse Dies. Mary Richardson, a recluse, who referred, as she neared the century mark, to linger in the home she had lived in for 35 years, at Stapleton, S. I., died there on Wednesday night. She passed the one hundredth year of her life in her home, and died there, as she had chosen to die, de spite the fact that for the last 10 years her sons and daughters have endeavored to lure her to their homes. Mrs. Richardson was born in Donegal, Ireland, in 1797. She lived on Staten Island for 76 years of her life. She left a son and two

daughters all of whom are married

Shoots 14-Year-Old Wife. William Igoe shot his wife Mary, aged 14, in the rooms of her mother at 456 West Forty-fifth Street, and also shot his young brother-in-law William Waymeyer, aged 17, in-flicting painful, if not serious, injuries in both cases. Afterward he shot himself in the left temple, causing a wound which will probably result fatally. Jealousy was the motive for the crime. Igoe met the girl at a dance last Thanksgiving night, and married her three days later. The keeping made Igoe frantle.

Ambulance For Wooden Leg.

While trying to board a car of the North Ninth Street, Brooklyn, Eugene O'Neill, of 26 Sutton Street, fell and his wooden leg was run over by two wheels of the car.
O'Neill was helpless without his wooden leg and lay on the ground. Persons who did not know that the leg was wooden called an ambula Dr. Tietze of the Eastern District Hospital said that he could not repair the leg.

FIEMS OF INTEREST.

The St. Petersburg correspondent of the London Mail says that ear drums made of thin leaves of silver are being used in the Russia military hospitals for diseases of the ear, to

replace defective organs.

A few months ago Capt. Matthew Turner, of San Francisco, owner of a schooner, rescued the crew of two Norwegian vessels that had been wrecked in the South Pacific. He has just received a handsome silver soffce set from the Norwegian gov-ernment in acknowledgment.

Near one entrance of the Cathedral of Seville hangs a patched and painted crocodile, which once served as a princely love token that failed of its mission. In 1250 it was sent by the Sultan of Egypt to a beautiful princess of Spain, who declined a sultor whose first present could scarcely be said to speak of affection.

In front of the apartment-houses in Spanish cities it is no unusual thing to see three men standing side by aids in the street, looking up and pouring out impassioned protestations each to a girl on a differ-

COMMERCIAL COLUMN

Weekly Review of Trade and Latest Market Reports.

New York .-- R. G. Dun & Co.'s weekly review of trade says:

"Trade returns are irregular, be-

cause of the erratic weather, unseasonably high temperature restricting sales of heavyweight wearing apparel at some points, while business is most satisfactory in colder sections. Freight blockades were re-Heyed to some extent, but there is still much complaint of tardy deliverles. Mercantile collections are also more prompt in some sections than others, but there is a unanimity regarding the large amount of forward business on the books of manufacturng plants and general confidence in the future. Building operations have been greatly facilitated in the East by open weather, maintaining activity in markets for materials beyond the customary date. Prices of all commodities declined almost 1

r cent. during December.
"Demand for cotton goods in the rimary markets is somewhat less orgent, but there is no prospect for ower prices in the near future, owing to the abundance of business on the books of the mills. Mills are making good profits on present bustloss, after a long period in which lividends were irregular, and the in-lustry is now in a most satisfactory woolen goods, considerable business eing accomplished in the men's wear division, but this movement is only fairly started, and it is not yet cossible to ascertain the exact status of the market.

'Higher prices have prevailed at the leading commodity exchanges. In wheat there was a natural reaction from the preceding decline as the short account took profits, and the recovery was carried still further In response to reports from winter States that a sharp fall in temperature threatened much damage from frost, because of insuffifient snow covering.

World's Largest Pump.

The biggest high-pressure pump in the world is installed in the Dry Diggings placer fields of Southern Oregon, on Rogue River, and is used to operate a battery of bydraulic monitors in the mines, writes Dennis H. Stovall ar the Technical World Magazine for January. This pump is one of the largest pieces of min-ing machinery ever manufactured, and could never have been installed but for the fact that it was dumped directly from the cars to the foundation prepared for it at the mines

The pump was built by the Byron-Jackson Machine Works, of Sar

Francisco, and was one of the last big jobs done by this company be-

fore the earthquake and fire. The pump is of the five-step centrifugal type, and its weighs, aside from bearings and gears, just 70,000 pounds. Other pumps have been built that lift as great a volume of water as does this one, but they do not deliver it under such enormous This pump is tested withstand a maximum pressure of 50 pounds to the square inch. capacity is 13,000,000 gallons per day of 24 hours, or 9,000 gallons per minute. This enormous volume is delivered through a half-mile of pipe line, the pipe being of steel, 22 inches in diameter. The water is lifted to a height of 160 feet and forced through two four-inch nozhurling streams a distance of feet. These powerful streams are played upon the mountain walls to tear down the gold-bearing gravel.

The Unique Position. "New York beats all places I ever knew in the matter of unusual oc-cupations for women." said an out "Something I heard vesterday is a good illustration of what I mean. I was lunching with a woman friend in a restaurant in shopping district when she cailed my attention to a stylish looking girl a few tables away from us. 'Guesa what she does to support herself,' demanded my friend.

"After a half dozen guesses my companion said: 'She's an adjuster.'

"'Life or fire insurance?' I asked." 'Neither,' was the reply. 'She adjusts differences between a big dry goods establishment and its most valued customers. She's what you'd call the peacemaker in genreal of the firm. When valuable things are returned with evident signs of wear and the demand is made that they be 'credited' this lady makes a trip to the customer and explains that there is evidently some mistake, etc. She has infinite tact and good humor, and seldom makes enemies for her firm. In lots of cases a fashlonable woman will lay the blame of a returned article on her mall and say that it was something she did as authorize. She is so clever about this sort of thing that she good salary and a long vacation in the summer, for when fashionable poeple are out of town her business is dull." -N. Y. Sun.

Concrete Telephone Poles.

The first concrete telephone poles ever manufactured in Indiana were made recently by the Richmond Home Telephone Company and are now being erected to test their ficiency. The post was designed by Superintendent Bailey. A skeleton framework of four corrugated iron rods is covered with ordinary concrete, the material being "slushed" about the framework while inclosed in a boxlike mold. The pole is octagonal in shape, 30 feet long and provided with mortises for crossarms, which are fastened in place by means of iron bolts, and also mortises to be used by linemen in climbing. The pole is as ornamental as pine poles and has the additional virtue of being symmetrically tapered and straight. Superintendent Bailey say that the strongest point in favor, concrete poles is their durability. Wooden poles must be replaced by new ones about every six years—the dryer the soil the longer the life of The concrete poles, it is declared, will be lasting, as soil conditions do not affect them. Balley says the cost will also be less than pine poles. The manufacture of each pole can be carried on along the line where it is to be installed or planted.

Should the experiment prove successful this telephone company, as well as many other companies, will substitute them for pine poles for all new work, as as fast as the wooden poles become unfit for service.

Fully Earned.

Miss Chatters—Old Roxley's young vidow has \$3.000,000, I hear. Miss Gidday—Yes; the idea of earning that much money in two Miss Chatters-What? She didn't

carn the money herselfMiss Gidday-Cretainly she did. Wasn't she married to him for two years?-Philadelphia Press.

WHITE BREAD Makes Trouble For People With Weak Intestinal Digestion.

A lady in a Wis. town employed a physician, who instructed her not to eat white bread for two years. She tells the details of her sickness, and she certainly was a sick woman.

"In the year 1887 I gave out from over work, and until 1901 I remained an invalid in bed a great part of the time. Had different doctors, but nothing seemed to help. I suffered from cerebro-spinal congestion, female trouble and serious stomach and bowel, trouble. My husband called a new doctor, and after having gone without any food for 10 days the doctor ordered Grape-Nuts for me. I could eat the new food from the very first mouthful. The doctor kept me on Grave-Nuts, and the only medicine was a little glycerine to heal

the alimentary canal. "Whe.' I was up again doctor told me to eat Grape-Nuts twice a day and no white bread for two years. I got well in good time, and have gained in strength so I can do my own work

"My brain has been helped so much, and I know that the Grape-Nuts food did this, too. I found I had been made ill because I was not fed right, that is, I did not properly digest white bread and some other food I tried to live on.

"I have never been without Grape-Nuts food since and eat it every day. You may publish this letter if you like, so it will help some one cise."

AWFUL EFFECT OF ECZEMA.

Covered With Yellow Sores-Grew Worse-Parents Discouraged-Cuticura Drove Sores Away.

"Our little girl, one year and a half old, was taken with eczema or that was what the doctor said it was. We called in the family doctor and he gave some tablets and said she would be all right in a few days. The eczema grew worse and we called in doctor No. 2. He said she was tecthing; as soon, as the teeth were through she would be all right. But she still grew worse. Doctor No. 3 said it was eczema. By this time she was nothing but a yellow, greenish sore. Well, he said he could help her, so we let him try it about a week. One morning we discovered a little yellow pimple on one of her eye Of course we 'phoned for doctor No. i He came over and looked her over and said that he could not do anything more for her, that we had better take her to some eye specialist, since it was an ulcer So we went to Oswego to doctor No. and he said the eyesight was gone, but that he could help it. We thought we would try doctor No. 5. Well, that proved the same, only he charged \$10 more than doctor No. 4. We were nearly discouraged. I saw one of the Cuticur discouraged. I saw one of the Cuticura advertisements in the paper and thought we would try the Cuticura Treatment, so I went and purchased a set of Cuticura Remedies, which cost me \$1, and in three Hemedies, which cost me \$1, and in three days our daughter, who had been sick about eight months showed great improvement, and in one week all sores had disappeared. Of course it could not restore the eyenglit, but if we had used Cuticura in time I am consident that it would have saved the eye. We think there is no remedy so good for any skin trouble or importing at the blood or Cuticura Mr. and purity of the blood as Cuticura. Mr. and Mrs. Frank Abbott, R. F. D. No. 9, Ful-ton, Gawego Co., N. Y., August 17, 1906."

Thoroughly Reliable.

If ever there was a reliable and safe remedy it is that old and famous porous plaster—Allcock's. It has been in use for sixty years, and is as popular to-day as ever, and we doubt it liers is a civilized community on the face of the globe where this wonderful pain reliever cannot be found. In the selection of the ingredients and in their manufacture the greatest care is taken to keep each plaster up to the highest standard of excellence, and so pure and simple are the ingredients that even a child can use them.

Allcock's are the original and genuine perous plasters and are sold by druggists in every part of the civilized world. Thoroughly Reliable. Remember the poor; the rich never orget themselves.

The Story of a Medicine. Its name-"Golden Medical Discovery" was suggested by one of its most important and valuable in odients - Golden

Seal root. Nearly forty years ago, Dr. Pierce discovered that he could, by the use of pure, triple-refined glycerine, aided by a cer-tain degree of constantly maintained heat and with the aid of apparatus and appliances designed for that purpose, extract from our most valuable native me dicinal roots their curative properties much better than by the use of alcohol, so generally employed. So the new world-famed "Golden Medical Discovery," for

so generally employed. So the now world-famed "Golden Medical Discovery," for the cure of weak stomach, indigestion, or dyspepsia, torpid liver, or billiousness and kindred derangements was first made, as it ever singe has been, without a particle of alcohol in its many-up.

A glance at the full list of its ingredients, printed on every bottle-wrapper, will show that it is hade from the most valuable medicinal roots found growing in our American forests. All these ingredients have received the attomast endorshment from the leading medical experis. Cachers and will on Malaria action who recommend them as the very best effects who recommend them as the very best remodes for the discases for which golden Arith book of these endorsements has been compiled by Dr. R. V. Pierce, of Buffalo, N. Y., and will be mailed free to any one asking same by postal card, or letter addressed to the Loctor as above. From these endorsements, copied from standard medical books of all the different schools of practice, it will be found that the ingredients composing the "Golden Medical Discovery" are advised not only for the cure of the above mentioned diseases, but also for the zure of all entarthal, bronchial and throat affections, accompained with catarrhal discharges, hoarseness, sore throat. Hagering, or hang-on-coughs, and all those wasting affections which, if not promptly and properly treated are liable to terminate in consumption. Take Dr. Pierce's Discovery in time and persevere in its use until you give it a fair trial and it is not likely to disappoolut. Too much must not be expected of it. It will not perform mirracies. It will not cure consumption in its advanced stages. No medicine will, it telli cure the affections that lead up to consumption, if taken in time.

MISS JULIE FLORENCE WALSH

WOMEN SUFFER

Many women suffer in silence and drift along from bad to worse, knowing well that they ought to have immediate assistance.

How many women do you know who are perfectly well and strong?

The cause may be easily traced to some feminine derangement which in depression of manifests itself in depression of spirits, reluciance to go anywhere or do anything, backache, dragging sensations. flatulency, nervousness, and sleeplessness.

and sleeplessness.

These symptoms are but warnings that there is danger ahead, and unless heeded, a life of suffering or a serious operation is the inevitable result. The best remedy for all these statements.

these symptoms is Lydia E. Pinkham's Vegetable Compound

made from native roots and herbs. No other medicine in the country has received such widespread and unqualified endorsement. No other medicine has such a record of cures of female ills.

Miss J. F. Walah, of 328 W. 36th St., New York City, writes:—"Lydia E. Pinkham's Vegetable Compound has been of inestimable value in restoring my health. I suffered from female illness which caused dreadful headaches, dizziness, and dull pains in my back, but your medicine soon brought about a change in my general condition, built

me up and made me perfectly well."

Lydia E. Pinkham's Vegetable Compound cures Female Complaints. such as Backache, Falling and Displacements, Inflammation and Ulcera-tion, and organic diseases. It is invaluable in preparing for child-birth and during the Change of Life. It cures Nervous Prostrution, Headache, General Debility, and invigorates the whole syste

Mrs Pinkham's Standing Invitation to Women Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Her advice is free.
