

Nothing I Ate Agreed With Me.

MRS. LENORA BODENHAMER.

Mrs. Lenora Bodenhamer, R. F. D. 1, Box 99, Kernersville, N. C., writes: "I suffered with stomach trouble and indigestion for some time, and nothing that I ate agreed with me. I was very nervous and experienced a continual feeling of uneasiness and fear. I took medicine from the doctor, but it did me no good. I found in one of your Peruna books a description of my symptoms. I then wrote to Dr. Hartman for advice. He said I had catarrh of the stomach. I took Peruna and Mannin and followed his directions and can now say that I feel as well as I ever did. I hope that all who are afflicted with the same symptoms will take Peruna, as it has certainly cured me. The above is only one of hundreds who have written similar letters to Dr. Hartman. Just one case is not the evidence of every one similarly afflicted. If this be true of the testimony of one person what thousands, of honest, sincere people? We have in our files a great many other testimonials.

Boston's Old Home Week July 28 to Aug. 3

Reduced fare on all railroads for trip to Boston and return. Family, School, College and Societies Reunions, Historical Pilgrimages, Military and Naval Demonstrations, Monster Parades, Electrical Displays, Tournaments, Races, Carnivals, Reception, Free Exhibitions, Concerts and Entertainments. A series of mid-summer festivals such as no city in the world has ever offered its guests. Write to OLD HOME WEEK COMMITTEE, BOSTON, MASS.

"Something Doing" Every Minute for 7 Days

More People, More Hunger. Making it becoming more and more dependent, as population increases, upon what scientists call bread that is, foodstuffs of a highly nitrogenous character. It is the atmosphere which furnishes this nitrogen to all foods, animal or vegetable, and it is from the air that Sir William Crookes, by means of improved chemical and electrical power, extracts the increased nitrogen to be drawn for the benefit of the crops. A man may, however, be a great chemist without knowing more of economic laws than other people, and Crookes apparently entirely ignores the operation of the inevitable laws of population as set forth by the late Rev. Mr. Malthus and adopted by all recognized authorities in political economy. It seems a paradox to say it, but it seems true, nevertheless, that the increase of food, its cheapening, or the ease with which it is secured, has never permanently relieved the chronic starvation which afflicts the surplus of the human race on this planet. The miserable lot seems to be the more food, the more stomachs; the more hunger, the more starvation. Those countries where there is most generous ultimately become the seats of the greatest want. Those in which man has to wring his necessities from the most wretched soil remain thinly populated, but rarely present scenes of famine. In the former, population more than keeps pace with the increase of food, and unless other causes, as plague and war, reduce the number of stomachs, many of them, must go empty.—Detroit News.

DR. TALKS OF FOOD Pres. of Board of Health.

"What shall I eat?" is the daily inquiry the physician is met with. I do not hesitate to say that in my judgment, a large percentage of disease is caused by poorly selected and improperly prepared food. My personal experience with the fully-cooked food, known as Grape-Nuts, enables me to speak freely of its merits. "From overwork, I suffered several years with malnutrition, palpitation of the heart, and loss of sleep. Last summer I was led to experiment personally with the new food, which I used in conjunction with good rich cow's milk. In a short time after I commenced its use, the disagreeable symptoms disappeared, my heart's action became steady and normal, the functions of the stomach were properly carried out and I again slept as soundly and as well as in my youth. I look upon Grape-Nuts as a perfect food, and no one can gain, but that it has a most prominent place in a rational, scientific system of feeding. Any one who uses this food will soon be convinced of the soundness of the principle upon which it is manufactured and may thereby know the facts as to its true worth." Read "The Road to Wellville," in pkgs. "This is a Reason."

NEW YORK DAY BY DAY.

Some of the Things Done Daily in the Metropolis.

What Jerome Has Done. A summary of 106 pages of what has been done in the last five years in the office of the District Attorney General by John A. Henneberry, Jerome's chief clerk. Since the election of Mr. Jerome, five years ago, there have been 23,111 complaints received from magistrates' courts or the Grand Jury, and \$450 from the complaint bureau of the office. From 1901 to 1906 there were 19 appeals in cases of murder in the first degree. Of these the sentence of the lower court was affirmed 13 times and only twice reversed. There were four appeals all pending on December 31, 1906. The average length of delay caused in these cases in which a definite decision was reached was 17 1/2 months. From 1902 to 1906 there were 320 appeals in less serious cases. In only 27 cases was the decision of the lower court reversed. In 114 instances it was affirmed and in 140 the appeals were either abandoned or withdrawn. The crimes which show the greatest increase in 1906 over 1905 are assault and homicide. In 1906 there were 748 cases of the former and 237 convictions, against 681 and 237 convictions, respectively, in 1905 and 234 convictions. The homicides of 1906 numbered 144 and there were 53 convictions, but in 1905 there were only 110 cases and 32 convictions.

Five Months For Murder.

Mrs. Anisia Louise de Massy, who claims the title of baroness, was sentenced by Justice Blanchard to seven years and five months' imprisonment for the murder of Gustav Simon, shirtwaist manufacturer. The prosecuting officer established by circumstantial evidence that Mme. de Massy had visited the office of Gustav Simon and demanded payment of money due her; that this was refused; that within five minutes three pistol shots were heard, and that the defendant walked down six flights of stairs instead of descending by the elevator; that she was arrested and confronted with the fatally wounded man, who, in the presence of witnesses, accused her of having shot him, and that this declaration was repeated in St. Vincent's Hospital.

Sinless Sundays For Staten Island.

Staten Island ministers have organized and they announced that there will be no more Sunday baseball and no more sacred concerts; that Staten Island will be as tight as a drumhead on Sundays and as dry as Sahara. Staten Island ministers have been at the home of the chowder party. "No more chowder parties," say the ministers, unless the celebrants observe the Sabbath scrupulously. The big steel plant of the Millikens, at Mariner's Harbor; the Proctor & Gamble Soap Works, and other big factories will be closed if the ministers win their fight.

Apprentice Boy Garrotted.

Edward Benson, a machinist's apprentice, 17 years old, of 175 Avenue A, was killed while at his work turning automobile bolts on a lathe at 614 East Eighty-third Street. In stooping to pick up a fallen bolt Benson brushed against a rapidly revolving shaft which had a screw on the end. This screw caught his shirt at the neckband so as to hold the boy in as if in a vice while the screw went cracking through a vertebra at the base of the brain.

Little Tim Will Bet \$20,000.

Little "Tim" Sullivan wants to bet \$20,000 that Mayor McClelland has nothing to fear from the passage of the recount bill. "A recount won't put McClelland out," he says. "No matter what the Hearst crowd say, the election was a straight one, and I will bet \$20,000 in cash, even, that a recount will not show a variation of 500 votes from the official returns."

Dr. Darlington Was Stricken.

At a banquet of the Episcopal Loyal Club at Sunbury, Pa., on Wednesday night Dr. Thomas H. Darlington, president of the New York Board of Health and a brother of Bishop Darlington of the Harrisburg diocese, was suddenly stricken with heart failure. Stimulants were applied and he revived. Dr. Darlington said that this attack was only a fainting spell, due to exhaustion from making speeches. He said he had entirely recovered.

Silver Spoon In Eel's Midst.

An eel dating from Revolutionary days was caught alive at Bloomfield. Laborers were cleaning the accumulated mud of ages from a stream, and there they found and killed the gigantic eel. The most interesting article in its midst was a silver spoon, the initials "S. W. S." were engraved on it, but the spoon is of recent Colonial pattern. Beside the eel contained several large old copper cents and a lead bullet, which seems to have been used as a fishing sinker and which never fitted anything but a musket of '76.

THIS AND THAT.

Three good washes are received by an Abyssinian during his career—at his birth, on his marriage morn and at his death. At all other times he shuns soap and water. Germany is the leading producer of beer, with 1,601,000,000 gallons in 1905. The United Kingdom, which brewed 1,319,000,000 gallons, has lately assigned the second place to the United States, which manufactured 1,413,000,000 gallons. There is no fourth of dramatic variety in New York City, where the books of the theaters show that there is an average of 15 new plays produced each month in the year. Both in the United Kingdom and the United States alcoholic beverages contribute more than a fourth—about 25 per cent.—of the total receipts into the treasury. For Wiles-of-the-valley a vicar in Carmarthen draws \$2,500 from a London dealer, while an old lady in Berkshire is said to make nearly \$5,000 yearly out of Mareth Niel roses.

COMMERCIAL COLUMN. Weekly Review of Trade and Latest Market Reports.

New York.—R. G. Dun & Co.'s Weekly Review of Trade says: "Further progress was made in the distribution of spring merchandise this week, but the season is still very backward and much stock will be carried over. Confidence is not generally shaken, although some evidences of caution followed the violent rise in prices of wheat and frequent rumors of crop disasters. Latest reports indicate that warm weather in some states and much-needed rains in other sections have given the tardy grain and cotton a better start. Leading manufacturing industries have not curtailed operations, several advances in wages have occurred and there are numerous encouraging indications to offset slow progress on the farms, including more prompt mercantile collections in many cities. "In the textile industries the event of most interest during the week was the increased firmness in cotton goods, on account of the sharp rise in cost of raw material, and a better demand for the finished product from many buyers, who just began to appreciate the fact that no advantage would be gained by further delay."

Wholesale Markets.

Baltimore, Md.—Wheat—Southern sold, by sample, at 88¢90¢ per bu. Western opened unsettled; spot and May, 98 1/2¢; No. 2 red Western, 99 1/2¢; July, 100 1/4¢. Corn—Western opened easier; spot and May, 59 3/4¢; July, 60 1/2¢; September, 61 1/4¢. Oats—We quote White—No. 2, 50¢50 1/2¢; No. 3, 48 1/2¢49 1/2¢; No. 4, 46¢47¢. Mixed—No. 2, 47¢; No. 3, 46¢46 1/2¢; No. 4, 44 1/2¢45¢. Rye—No. 2, 42¢42 1/2¢; No. 2 rye, do, 70¢70 1/2¢. Cheese—Steady. Jobbing prices, old, 15 1/2¢15 3/4¢; new, 15¢15 1/4¢. Eggs—Market quiet and steady. We quote as follows, per dozen: Maryland, Pennsylvania and nearby firsts, 15 1/2¢; Eastern Shore, Maryland and Virginia, 15 1/4¢; Southern (North Carolina), 14 1/2¢15¢; guinea, per dozen, 7¢8¢. Live Poultry—Chickens, old hens, per lb., 14¢; old roosters, each, 25¢30¢; winter, 2 to 2 1/2 lbs., per lb., 20¢22¢; spring, 1 1/2 to 2 lbs., per lb., 20¢22¢; spring, 1 1/2 to 2 lbs., per lb., 23¢25¢; do, spring, small, per lb., 22¢25¢. New York—Wheat—No. 2 red, \$1.05 1/2 elevator, \$1.04 afloat; No. 1 Northern Duluth, \$1.13 1/2 f. o. b. afloat; No. 2 hard winter, \$1.08 1/2 f. o. b. afloat. Corn—No. 2, 63¢ elevator, and 60 f. o. b.; No. 3, white, 63¢; No. 2 yellow, 60 f. o. b. afloat. Oats—Mixed, 26¢32 lbs., 49 1/4¢; natural white, 30¢33 lbs., 50 1/2¢; 51 1/2¢ clipped white, 30¢40 lbs., 51¢56¢. Poultry—Spring chickens, 30¢; fowls, 15¢; turkeys, 14¢. Butter—easy; Western imitation creamery, firsts, 21¢21 1/2¢. Cheese steady and unchanged; receipts, 1,471. Eggs steady; receipts, 22,472 cases; Western firsts, 16¢16 1/2¢. Philadelphia—Wheat dull and 1c lower; contract grade, May, 97 1/2¢98¢. Corn 1/2c lower; May, 57 1/4¢58¢. Oats firm but quiet; No. 2 white, natural, 50¢51¢. Butter firm and in good demand; extra Western creamery (official price), 24 1/4¢; street price, 25¢; extra nearby prints, 27¢. Eggs firm and in good demand; Pennsylvania and other nearby prints, free cartons, 17¢; Western Pennsylvania and other nearby current receipts, returnable cases, 16 1/2¢; at mark; Western firsts, free cases, 17¢, at mark. Cheese, New York full cream, choice, new, 12 1/4¢13¢; do, fair to good, 12¢12 1/2¢. Potatoes firm and in good demand; Pennsylvania, choice, per bu., 83¢85¢; New York and Western, 78¢80¢; do, fair to good, 70¢75¢. Live poultry steady and in fair demand; fowls, 14¢15¢; old roosters, 27¢32¢; ducks, old, 13¢14¢; do, spring, 15¢16¢. Live Stock. Chicago.—Cattle—Market steady; medium to good steers, \$4.50@6.50; heifers, \$3.15@5.50; cows, \$3.40@5.25; bulls, \$3.50@4.75; calves, \$3.00@5.75; stockers and feeders, \$3.00@5.25. Hogs—Market weak to 5c lower. Choice heavy shipping, \$6.40@6.45; light butchers, \$6.45@6.55; light mixed, \$6.40@6.45. New York.—Dressed beef steady and in fair demand. Sheep and Lambs—Sheep steady; lambs a shade lower; spring lambs steady. Clipped sheep (ewe) \$5.50@5.75; clipped lambs, \$7.90@8.20. Pittsburg, Pa.—Cattle—Market steady; choice, \$5.90@6.00; prime, \$5.70@5.85. Sheep—Market slow; prime wethers, \$6.15@6.25; medium and common, \$2.50@4.00; lambs, \$5.00@7.85; veal calves, \$7.00@7.25. Hogs—Market active; prime haves, \$6.60; mediums, \$6.75; heavy Yorkers, \$6.75@6.77 1/2¢; light Yorkers and pigs, \$6.85@6.90; roughs, \$5.00@5.75.

ITEMS OF INTEREST.

The theory of telegraphing by wire was practically illustrated in 1775 by Arthur Young, long before Professor Morse was born. Germany's loss in the number of sheep reached 60 per cent. in the years 1878 to 1904. Argentine competition largely accounts for it. The Society of Assurance for Widows and Orphans was the first known life insurance company and was established in London in 1699. About 3,000 pieces of crockery are broken on each trip of a first-class ocean liner. There was an uproar in class when Miss Lula Parker, of Chattanooga, Tenn., came to whip the teacher who had suspended her brother. She was arrested. The plans for the handsome building which will contain the negro exhibit at the Jamestown Exposition next summer were drawn by W. Sidney Pittman, a negro architect, who started in to learn the trade of wheelwright at Tuskegee and later became an architect.

The Common House Fly.

Whence He Comes and Whither He Goes.

By HAROLD SOMERS, M. A. The common house fly (Musca domestica) is a creature of such secretive habits that although from the very earliest times he has been with us, and the most ancient writers have mentioned and described him, still very little was known of his origin and history. It remained for the eminent Boston biologist, Dr. A. S. Packard, in 1873, to make known his origin, habits and transformations from the egg through the larva state to his two changes to the pupa state, then to the perfect fly. Near the first of August the female lays about 120 eggs of a dull gray color, selecting fresh horse manure in which to deposit her eggs, and so secretes them that they are rarely seen; it takes only twenty-four hours for them to hatch into the first form of larva, a white worm one-quarter of an inch in length and one-tenth in diameter. They feed on the decaying matter of their environment, and two changes or castings of skins occur before they turn into the pupa state; this change comes very suddenly. The entire period from the egg to the pupa state is from three to four days. If moist food is wanting when in this condition they will eat each other and thus decrease their number. Heat and humidity greatly assist their development, as upon careful computation each pound of manure around stables and outhouses develops under favorable conditions over 1000. It is no wonder that where these conditions exist we have such a veritable harvest of the fly pest. In the pupa state when the fly is about to emerge the end of the pupa case splits off, making a hole through which the fly pushes a portion of its head, but here it seems to encounter a difficulty; the pupa case is too stiff and hard to pass through, but nature comes to its assistance, and a sort of bladder like substance forms behind the head, which swells out apparently filled with air; it acts as a means of pushing away the pupa case and releases the fly. When the fly first emerges it runs around with its wings soft, small and baggy; it is pale and the colors are not set; its head rapidly expands and the bladder formation passes away—within a few hours the wings grow and harden; it is now a perfect fly. The whole time from the depositing of the egg to the perfect fly is not over ten days in duration. Many persons who observe small flies in midsummer suppose they are the young, but such is not the case; they are flies that are imperfectly nourished in the larva and pupa states, and do not attain full size; in fact, they are the dwarfs of their race. The male fly differs from the female in the front of the head between the eyes, being at least one-third narrower, though in size the female is rather smaller. Adult flies like most other creatures have parasites of minute size that prey upon them; these can often be seen as presenting small red specks over the body of the fly. Another enemy in the form of a fungus often attacks the fly in the early autumn. This makes its appearance as a white swelling and the white spores of the disease can be seen penetrating the body of the fly, which it finally distends and ruptures. The fly hibernates in winter, but with his usual secretive habit it is very difficult to catch him in his winter quarters. With the first chill of autumn the flies, feeling the cold, seek temporary warmth in houses, and clustering together form bunches in the corners of walls and other places. They are then sluggish and not so active as in the warm weather. However, they do not make a permanent stay indoors, but on the first mild, sunny day seek the windows to get out and find their permanent winter hiding place. Many prefer to make their homes in the roots of grass on lawns, where they hide themselves so effectually that the ice and snow of winter does not destroy them in their hibernating state. If in the first warm days of spring when the snow is gone and the grass on the lawns becomes dry and warm, long before the yellow dandelion shows its head, a close observer may see numbers of flies crawling up on the grass to get the welcome sunshine, their wings standing out stiff and useless, but they soon acquire the power of flight in the warm rays of the sun. A great many days, however, elapse before they appear in the homes of men. In recent years the medical profession have demonstrated that while the fly itself does not propagate disease, it is one of the most industrious carriers of disease germs, which by contact are to his feet, hairy legs and body, distributing them to innocent victims. If every housekeeper could know all these interesting facts, which have never before been brought to their attention, they would realize the importance of securing the very best fly exterminator. His Reason For Complaint. Rear Admiral Mead, at a dinner at the Portsmouth Navy Yard, illuminated with a story an interesting discourse on food inspection. "A sailor," he said, "brought a tin cup to an inspecting officer and exclaimed: "Taste this, sir. That is all I ask. Just taste it." "The officer took a sip. "Well, really, my man," he said, "this is not bad soup at all." "Yes," said the sailor bitterly, "and yet they want to persuade us, sir, that it's tea."—Washington Star.

Senators Tillman's Simile.

A reporter asked Senator Tillman rather maliciously what he thought of a certain opponent's speech. "My boy," said the senator, "it was like a fine bottle of champagne." "Yes," murmured the reporter, rather taken aback. "Yes," said Senator Tillman, "lots of froth and very dry."—Minneapolis Journal.

It's easier for a married man to stomp a runaway horse than his wife's tongue.

Men will never be enthusiastic about going to heaven until they know what the rules are there about smoking.

To improve the general health, take Garfield Tea daily for a time; it purifies the blood, cures rheumatism and many chronic ailments, and keeps the health good! Garfield Tea is made of herbs; it is guaranteed under the Pure Food and Drug Law. Garfield Tea Co., Brooklyn, N. Y.

Make the most of the present—if you are unable to exchange it.

Itch cured in 30 minutes by Woolford's Sanitary Lotion. Never fails. At drugists.

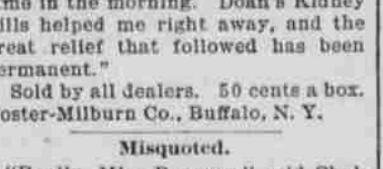

Scientists' Debt To The Frog.

Prof. S. J. Holmes, of the governmental research laboratories at Washington, opines that most of what is known in certain departments of physiology is derived from a study of frog structure and function. Perhaps no animal except man has been the subject of so many scientific investigations. One seldom picks up a volume of physiology without finding the frog the theme of some generalizations. The late Professor Huxley said that frogs seem to have been designed as a foundation for biology. With the discovery that frogs, like human beings, are attacked by mosquitoes, a whole line of new research has been recently opened, and parasite life has been much better understood since it has been known that frogs are hosts to a number of parasite forms. Not the least interesting of researches is based on the certainty that a frog may be thrown into the hypnotic state.—Chicago Tribune.

BACKACHE IS KIDNEYACHE.

Cure the Kidneys and the Pain Will Never Return.

Only one way to cure an aching back. Cure the cause the kidneys.

Thousands tell of cures made by Doan's Kidney Pills. John C. Coleman, a prominent merchant of Swainsboro, Ga., says: "For several years my kidneys were affected, and my back ached day and night. I was languid, nervous and lame in the morning. Doan's Kidney Pills helped me right away, and the great relief that followed has been permanent."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Misquoted. "Really, Miss Pepprey," said Cholby, "what you just said is not true, 'k' now."

"What was that?" demanded Miss Pepprey. "I just heard you say that Gussie Saphand and I were great chums, but really?"

"You misunderstood me, I said 'chumps.'"—Philadelphia Press.

Comforting. Artist—Turned down again! I'll never send another picture to the beastly academy. His Wife—Never mind, darling. Just think how they will appreciate your work after you are dead!—Sketch.

FITTS, St. Vitus Dance; Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. \$2 trial bottle and treatise free. Dr. H. R. Kline, Ltd., 611 Arch St., Phila., Pa.

The best language to swear in is the one that sounds the loudest.

To be well good means with human nature. Be Well! Garfield Tea purifies the blood, eradicates disease, restores the digestive organs and brings Good Health! Manufactured by Garfield Tea Co., Brooklyn, N. Y. Sold by druggists.

The average woman will go without a square meal to ride in a cab.

ECZEMA COVERED BY BORAX.

Worst Case Doctors Ever Saw—Suffered Untold Misery—Perfect Cure by Cuticura Remedies.

"My son, who is now twenty-two years of age, when four months old began to have eczema on his face, spreading quite rapidly until he was nearly covered. The eczema was something terrible, and the doctors said it was the worst case they ever saw. At times his whole body and face were covered, all but his feet. I used many kinds of patent medicines to no avail. At last I decided to try Cuticura, when my boy was three years and four months old, having had eczema all that time and suffering untold misery. I began to use all three of the Cuticura Remedies. He was better in two months; in six months he was well. Mrs. R. L. Risley, Piermont, N. H., Oct. 24, 1905."

Paying poor rent leaves the same kind of a taste in your mouth as taxes.

BORAX IS NATURE'S MINE OF PURITY FOR DAIRY UTENSILS.

Borax is first, a cleanser that removes dirt and grease with surprising ease; second, it is a sweetener that makes fragrant any surface that has grown musty or stale from neglect; third, it is an antiseptic or destroyer of germs. It prevents the development of bacteria or mouldy growths. With all this it is perfectly free from harm in its resulting effects.

The farm churn is kept free from that stale odor if it is washed with borax in the following proportions—one tablespoonful of borax to a quart of water.

The dairy room has nothing about it but the pleasant aroma of fresh milk and cream and sweet butter if it is kept clean with borax. There will be no soapy smell and no lurking hint of something gone wrong.

The cream crocks take on an extra freshness when washed with borax and water in the following proportions—one tablespoonful of borax to a quart of water. Be sure that you get pure borax. To be sure, you must get "20 Mule Team Borax." If you are unable to get "20 Mule Team" brand send us your dealer's name and we will arrange to supply you. Booklet free. Pacific Coast Borax Company, 109 William street, New York.

A girl seems to think being engaged is so as to be like people in a novel.

MISS JULIE FLORENCE WALSH

Lydia E. Pinkham's Vegetable Compound

made from native roots and herbs. No other medicine in the country has received such widespread and unqualified endorsement. No other medicine has such a record of cures of female ills. Miss J. F. Walsh, of 328 W. 36th St., New York City, writes:—"Lydia E. Pinkham's Vegetable Compound has been of inestimable value in restoring my health. I suffered from female ills, which caused dizziness, headache, and dull pains in my back, but your medicine soon brought about a change in my general condition, built me up and made me perfectly well."

Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Her advice is free.

Sunken Funds Recovered.

Some idea of the work done by submarine divers in recovering treasure from sunken ships can be gotten from the following figures, just published: From the steamship Melabar was recovered more than \$1,250,000; from the steamship Alphonso XII., \$450,000; from the steamship Hamulla Mitchell, \$250,000, and from the steamship Carnatic, \$200,000. The complete list is long, but these figures from Popular Mechanics give an idea of the enormous value of the treasures which the greedy waves have swallowed and the inducement to invest large capital, construct ingenious and expensive machinery and run great risks in raising "watered" stock.

The Origin of Livery.

The wearing of livery by male servants is a survival of the times when great lords kept huge bands of men servants, called retainers, who were bound to fight in all the quarrels of the masters, as well as perform service of one sort or another, and on special occasions of show, dressed in the livery of their lord, became in reality a miniature army.

A Lazy Liver

May be only a tired liver, or a starved liver. It would be a stupid as well as a savage thing to beat a weary or starved man because he lagged in his work. So in treating the lagging, torpid liver it is a great mistake to lash it with strong drastic drugs. A torpid liver is but an indication of an ill-nourished, enfeebled body whose organs are weary with overwork. Start with the stomach and allied organs of digestion and nutrition. Put them in working order and see how quickly your liver will become active.

The Discovery of Dr. Pierce's Golden Medical Discovery

has made many marvelous cures of "liver troubles" by its wonderful control of the organs of digestion and nutrition. It restores the normal activity of the stomach, increases the secretions of the blood-making glands, cleanses the system from poisonous accumulations, and so relieves the liver of the burdens imposed upon it by the deflection of other organs.

If you have bitter or bad taste in the morning, poor or variable appetite, coated tongue, foul breath, constipated or irregular bowels, feel weak, easily tired, dependent, frequent headaches, pain or distress "small of back," yawning or dizziness, "rising" in stomach after eating, and kindred symptoms of weak stomach and torpid liver, no medicine will relieve you more promptly or surely than this remarkable discovery. Dr. Pierce's Golden Medical Discovery is the only medicine that will do this. Do you wish to know about TRADE-MARKS? Do you wish to know about FENS-ISHES? Do you wish to know about PAY and BOUNTY? Write to W. L. Willis, Attorney-at-Law (Notary Public), 1115 Building, 312 Indiana Ave., New Washington, D. C., 28 years in Washington, Union soldiers and sailors' war medals, medals to teachers, etc. after they teach. If non-teachers desire will act as may be entitled to full his pension.

Thompson's Eye Water

Patents in your name. Do you wish to know about TRADE-MARKS? Do you wish to know about FENS-ISHES? Do you wish to know about PAY and BOUNTY? Write to W. L. Willis, Attorney-at-Law (Notary Public), 1115 Building, 312 Indiana Ave., New Washington, D. C., 28 years in Washington, Union soldiers and sailors' war medals, medals to teachers, etc. after they teach. If non-teachers desire will act as may be entitled to full his pension.

WOMEN SUFFER

Many women suffer in silence and drift along from bad to worse, knowing well that they ought to have immediate assistance.

How many women do you know who are perfectly well and strong? The cause may be easily traced to some feminine derangement which manifests itself in depression of spirits, reluctance to go anywhere or do anything, backache, dragging sensations, flatulency, nervousness, and sleeplessness.

These symptoms are but warnings that there is danger ahead, and unless heeded, a life of suffering or a serious operation is the inevitable result. The best remedy for all these symptoms is—

Lydia E. Pinkham's Vegetable Compound

made from native roots and herbs. No other medicine in the country has received such widespread and unqualified endorsement. No other medicine has such a record of cures of female ills. Miss J. F. Walsh, of 328 W. 36th St., New York City, writes:—"Lydia E. Pinkham's Vegetable Compound has been of inestimable value in restoring my health. I suffered from female ills, which caused dizziness, headache, and dull pains in my back, but your medicine soon brought about a change in my general condition, built me up and made me perfectly well."

Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Her advice is free.
