The Immigration Record.

All immigration records in the history of the United States were broken during the year ended June 30, when no less than 1,285,349 aliens were brought in at the various ports...

In this great rush of foreigners Philadelphia fared better than ever before, according to figures compiled by Immigration Commissioner Rodgers. During the year 37,960 passengers of all kinds arrived there, of whom 30,501 were aliens, the largest number in the history of the port...

Of the aliens who used Philadelphia as a gateway Russia furnished one half, or 17,728 in all. Among these were 4597 Poles, and the great bulk of the 8503 Jews who arrived also came from the Czar's country.

English immigrants numbered 4508, and there were smaller quotas from Italy, Germany and Austria. France brought up the rear with only 52 newcomers.

Of the total number of immigrants who arrived in the United States during the year 132,185 came from Russia.

Use of Coffee in England.

The use of coffee in England was first known in 1657. The first place in London where it was sold was thus advertised: "Made and sold in St. Michael's alley in Cornhill by Pasqua Rossee, at the sign of his own head."

"Spoon" comes from "spoon," meaning a small piece of wood. But metal spoons were used in Biblical times, for in Exodus the Lord tells Moses to make spoons of gold for use in the Tabernacle, and today there are to be seen in the British museum spoons which certainly were used in the early days of Christianity...

Walnut Grove Campmeeting. Although an old cake-maker, I have just learned how to test cakes, so they will not fall or be sticky. When you think the cake is done, remove from oven, hold to your ear, and if it "sings" loud put it back where you had it; if it "sings" faintly, put to cooler part of oven, or if oven is very hot, leave the door unatched or slightly open. When it does not sing at all, you could drop it and it would be all right, provided it was made correctly. I turn mine out of tin as soon as removed from the oven, either on the molding-board or on the bottom of a clean tin. Then you can pick up pan, cake and all and carry a tender cake where you want it without danger of breaking. If it sticks to the tin, run a sharp knife under it close to the pan, then place on plate or other layer of cake. From "Household Information Exchange," in The Ladies' World for August.
