

MR. C. B. FIZER, Mt. Sterling, Ky., "I have suffered with kidney and other troubte for ten years past.
"Last March I commenced using Peruna and continued for three months. I have not used it since, nor have I felt a pain.
"I believe that I am welland I therefore give my highest commendation to the curative qualities of Peruna."

Pe-ru-na For Kidney Trouble. Mrs. Geo. H. Simser, Grant, Ontario,

Can., writes:

"I had not been well for about four years. I had kidney suble, and, in fact, felt badly nearly at the time.

"This summer I got so very bad I thought I would try Peruna, so I wrote to you and began at once to take Peruna and Manalin.

"I took only two bottles of Peruna and se of Manalin, and now I feel better than

one of Manalin, and now I feel better than I have for some time.

"I feel that Peruna and Manalin cured me and made a different woman of me altogether. I bless the day I picked up the little book and read of your Peruna.

It is the business of the kidneys to remove from the blood all poisonous materials. They must be active all the time, else the system suffers. There are times when they need a little assistance.

Peruna is exactly this sort of a remedy. It has saved many people from disaster by rendering the kidners service at a time when they were not able to bear their own burdens.

Anxiety In The Army.

The commissioned personnel of the United States Army, or, at least, that part of it which is classed among the field officers of the special staff corps, is much disturbed over a dis-cussion which is rife in the War De-The question has been raised as to the extent of the application of the order issued some months ago by President Roosevelt requiring acrobatic horsemanship of all officers, especially of those of the field grades. This imposed upon colonels, lieutenant colonels and jors an activity in equestrianism which struck the military personnel as a dire visitation. It imposed upon obese as well as indolent officers a celerity and endurance which was nothing short of youthful gymnashas occurred to se that, perhaps, the order might not be relentlessly imposed upon the field officers of the special staff corpsthat is to say, the surgeons, quarter masters and judges advocate, for instance, whose lives are sedentary and whose duties keep them in the large cities, where they do not have the facilities for horsemanship without patronizing the livery stable.

It must be admitted that military horsemanship under such conditions is distracted by the trolley car gong and the rumbling truck of commerce, and it is hoped by the officers most interested that they will be able to escape this exaction. On the other hand, it must be admitted that even the army commissary or the army quartermaster or the judge advocate of exalted rank is apt in time of war be required to mount a horse and keep up with the commanding general's staff in the field. If the Presiorder meant anything, it mus have been preparedness for war, and the Army will not be prepared unless these high-ranking staff officers do their uncomfortable turn on horse-back.—Washington Her id.

House Moved By Water. Imitating the New York engineers who moved a great steel bridge two miles down the Harlem River on scows, a Boston firm has floated a seven-room house, intact, from Prison Winthrop Highlands. The house has stood for years at the Prison Point crossing of the Boston and Main Railroad and was occupied by the draw-tender. The construction of a grade crossing bridge made necessary purchased by speculators and moved by them. It will be used as a summer cottage.

PUTS THE "GINGER" IN.

The Kind of Food Used by Athletes.

A former college athlete, one of the long distance runners, began to loss his power of endurance. His experience with a change in food is inter-"While I was in training on the

track athletic team my daily 'joga' became a task, until after I was put on Grape-Nuts food for two meals a day. After using the Food for two weeks I felt like a new mun. My digestion was perfect, nerves steady and I was full of energy.

"I trained for the mile and the half-mile runs (those events which require so much endurance) and then the long daily 'jogs,' which before had been such a task, were clipped cil with ease. I won both events.

"The Grape-Nuts food put me in perfect condition and gave me my ginger.' Not only was my physical condition made perfect, and my weight increased, but my mind was made clear and vigorous so that I could get out my studies in about half the time formerly required. Now most all of the university men use Grape-Nuts, for they have learned its value, but I think my testimony will not be amies and may perhaps help some one to learn how the best results can be

obtained."

There's a reason for the effect of Grape-Nuts food on the human body and brain. The certain elements in wheat and barley are selected with special reference to their power for rebuilding the brain and nerve centres. The product is then carefully and scientifically prepared so as to make it easy of digestion. The physical and mental results are so apparent after two or three weeks' use as to produce a profound it pression. to produce a profound his Read "The Road to Wellvi phrs. "There's a reason."

UNCLE SAM LAUGHS LAST.

-Cartoon by Rogers, in the New York Herald

FARMERS REBEL AT PURE MILK RULE

Health Department Says Hair on Cow's Tail and Flank Must Be Cut and Lights Put in Troughs--Clean Suits For Milkers.

Florida, N. Y.—Farmers in New York State are receiving from the New York Department of Health letters setting forth the requirements of the department necessary to insure a ket, and they consider that the Health pure milk supply for the New York Department's demands are beyond City market. The requirements run reason. Already some are deter-City market. The requirements run reason. Already all the way from cleaning the window mined not to send all the way from cleaning the window mined not to send their milk to New panes of the cowpen to cutting the York City, and are arranging to send

of the department's requirements de-clares that if some of the rules are carried out there will be a serious shortage of milk in the market, as to obey orders would mean a great ex-pense and require so much time attending to the animals that very little profit would result to the owners. The farmer said:

While the price of milk for the coming six months by one big con-trolling concern has been advanced sixteen per cent, over last year's price, it must be taken into consider-ation that the price of the principal feeds has gone up twenty-five per cent.

The same man pointed out that to the requirements more help would be required and that all this would eat up the little profit that the cow raiser now makes. In addition it is hard to get competent help. Too Early For Cleaning.

One requirement to which local farmers make strenuous objection is that requiring that the cowshed be thoroughly cleaned before the cows are milked. As the milking is done are milked. As the milking is done a veterinarian be made and a copy of very early each morning, perhaps long before daylight, it can be seen that the cleaning process will be almost an impossibility. The farmer is not wealthy, and many of them have not the cash to make the rehave not the cash to make the required improvements about their

Where are our very small present milk. absorbent' floor and six-inch gutters with rounded corners of the non-ab-sorbent material? Are we required to put in lights, so that the feeding troughs be lighted? I am unable to see where it insures pure milk to have the cow see what she is eating. or perhaps have the window clean so that she may gaze pensively over the barnyard while she chews her cud.

"Another requirement is that all the heip be provided with clean suits when they go in to make the cows comfortable or relieve them of their milk. My wife would object to that,

it elsewhere or dispose of it locally. One farmer who had received a list Health Department's Requirements.

Some of the requirements of the New York Department of Health follow: That the floors be constructed of

concrete or some non-absorbent mate-

That the floors be made water tight That the drops or gutters be constructed of concrete, stone, or some non-absorbent period. That they be at least six metes in depth, with all corners rounded.

That the feeding troughs, plat-forms and cribs be well lighted and kept clean at all times.

That additional windows be in-

stalled in the cow barn to provide sufficient light. (Two square feet of window space for each cow to be the That the window panes be washed

and kept clean at all times. That the walls and ledges be thoroughly swept down and kept free from dust, dirt or cobwebs at all

That an inspection of the herd by

That clean, special suits be pro-vided for all the attendants engaged

in the production and handling of That the milk at all times be profits to come in?" said an owner of several head after reading the destrained at the milk house, and in an partment circular. "Where is the atmosphere free from dust or odors.

That the milk pails used be of the small-mouthed design, so constructed that they can be readily and thor-oughly cleaned, and top opening not to exceed eight inches in diameter. That racks be provided in

suitable place so as to expose the milk pails to the sun or to live steam.

That a milk house be built and located on elevated ground, with no hog pen within 100 feet.

The New York Health Depart-ment's instructions tell the farmer in when they go in to make the cows conclusion that no milk on his premcomfortable or relieve them of their ises will be permitted to be brought milk. My wife would object to that, and farmers' wives never have much ditions are remedied within a certain time.

-Cartoon from the Fittsburg Press,

COST OF DYING INCREASED.

Athol, Mass.—The cost of dying as well as of living is fast becoming prohibitive in Athol. Simultaneously with the increase in the price of milk, ment and eggs, there has been an advance of twenty-five per cent. in the price of funeral carriages. Caskets are higher, gravestones cost twice as much as formerly while the price of cemetery jots has passed beyond the means of many residents.

Some citizens are talking of adopting the method in vegue in France, waere the cost of funerals is regulated according to the family income.

A NICE YOUNG MAN.

Oklahoma's Constitution is strictly prohibition.-News Item.

JEKYLL-HYDE IN REAL LIFE.

Dublin, Ind.—After witnessing a production of "Dr. Jekyll and Mr. Hyde" some time ago, Albert Deaver, of Newcastle, attempted to imitate the ravings of Mr. Hyde. He became so adept that his impersonation amazed his friends, and in a few works he began to experience the same difficulty that Dr. Jekyll did in returning to his normal self. A few days ago he seemed to lague involuntarily into the character of Mr. Hyde, which now apparently has complete control of him. He was taken to the insane heapital.

AWFULLY_

BAW JOYE

YOU KNOW

A TREE KNOWS ITS PLACE. ... It Refuses to Flourish in Unaccus-

tomed Soil and Temperature. Trees are fixed, almost inflexible, in their habits. For centuries, in-deed, as long as we have record, each species has kept in its beaten ways, insisting on the same average of tem-

perature and refusing to grow where this could not be found, seeking and occupying certain kinds of soil and demanding certain amounts of moisture, and avoiding situations where were wanting. The latest authorities go so far as to declare that trees cannot be accil-

matized; that is, that even the ingenuity and perseverance of man are unable to induce trees to change their habits far enough to adopt a country not closely like their native habitat. For a time the forester may use various devices to surround a tree with artificial conditions by which, so to speak, the tree is deluded into feeling at home. But as soon as the forester's care is withdrawn in such cases the tree is seized with home sickness and dies of it.

This fastidiousness in the habits of trees has its good and its bad sides. It absolutely limits the forester's choice of trees to grow in a given region. "o seek to force tree growth in uncongenial conditions is entirely fruitless. But, on the other hand, there is practical certainty of results. If beech or spruce thrives where the average warmth and moisture of the growing season from year to year ranges between certain degrees, then wherever else, in the Northern Hem-Isphere at least, the same average is found, the forester may plant beech or spruce, whether or not they be already there, with confidence that they will flourish.

The same lay works both ways. If the forester finds beech or spruce or any other tree growing in a region of which the climatic conditions are not recorded, he knows within very narrow limits what the climate is, simply because he knows that at home this tree grows in such a climate. In other words trees, especially of course those which are particularly fastidious, are very satisfactory substitutes for thermometers and barometers so far as the average temperature and moisture conditions during the vegetative season are concerned.

There is a close relation between a tree's demands upon temperature and its demands upon soil. Given the proper temperature, it will grow where the soil is unfriendly; and given the most congenial soil, it will grow where the temperature is not ideal. The colder and wetter the soll, the better will it grow with a relatively high temperature; the drier and warmer the soil, the better will it grow with a relatively low temperature. Thus, on a northern slope the forester will often find it safe to plant trees which would not thrive on the southern slope of the same mountain, because northern slopes are cooler and moister than southern ones, and this difference may suffice to offset a slight disadvantage in the general temperature of the region,

There is a wide variation among trees as to the range of temperature which they endure. Some, such as the Douglas fir, yellow pine, Eastern spruce or aspen, grow over wide areas from north to south; others, such as Mexican white pine, eucalyptus or redwood, are more narrowly confined. But it should not be inferred that only geographic lines can be drawn for the distribution of any species. The right temperature conditions may be found outside of the geographic tudes. A Southern species whose home is in the mountains may possess a second home in the Northern latitudes of a level country, and a Northern lowland species may thrive also on mountains in the South.

Frequently trees are distributed over a country not continuously but in isolated groups, like black hemlock, which occurs in the Sierras, in the Cascades and at sea level in Alaska, but not in the lower country between. This is simply because the required temperature, though prevalent in the northern part of a region, is found only in the higher altitudes as one goes further and further to the south.

The forester, following these broad first principles of sylviculture, may work in harmony with nature and so acheve in every locality the best results with the lowest percentage of failure.-Forest Service. United States Department of Agriculture.

Immigration Restrictions in Africa. As is generally known, quite an effort was made in Cape Colony to secure indentured labor, but the present liberal government resisted all overtures in that direction and it is comparatively difficult for any immigrant to get into Cape Colony. All immigrants are required to be in possession of come visible means of support, and the officers inspecting them hold that it is positively necessary that they shall bring with them about \$100 in money and, in fact, claim that the motive of the law is to have the immigrants bring money into the country. Recently an American citizen had been sent for by his father to come to Cape Colony, and when he arrived he did not have the necessary \$100 and could not produce documentary evidence of any contract with his father. As he was more than twentyone years of age, under the strict construction of the act, he was a prohibited immigrant. His fellow passengers contributed some \$70 with which to pay his return passage in the event that the case should finally go against him. No matter what the father may do with the man, even furnishing him the entire \$100, would not be satis-factory, as the money must be brought into the country by the immigrant. From this it is evident that other countries have their immigration ibles as well as we.-Louisiar

"We have had three cases appendicitis in the last three days," says a rural exchange, "and that shows how the town is improving. Time was all we could boast was ordinary measles. Resides this, we recently got big damages from being run down by two automobiles."

No Paper Money For The Indians. "There are two traits about the American Indian that civilization and contact with his white brothers can-not overcome," said Frank L. Campbell, who has spent several years as a school teacher among the Sloux

and has learned to know them well. "Those peculiarities are his aversion to paper money and his appe-tite for dog. An Indian will never take paper money if he can avoid it. He wants it, in the language of the Sioux, 'muzza ska,' which translated means white Iron. The red man can-not bring himself to believe that a small piece of printed paper can be worth as much or more than the metal itself. Strange to say, an Indian would also rather have 10 silver dollars than one 10-dollar gold plece. I do not know whether it is because the 10 pieces of money appear to be more or whether it is simply because he likes to jingle the coins .- Washington Post.

He Had Waited A Long Time. Bill Nye, when a young man, once made an engagement with a lady to take her driving. The appointed day came, but at the livery stable all the horses were taken save one old, shaky, exceedingly gaunt beast. Mr. Nye hired it and drove to the friend's residence.

The lady kept him waiting nearly

an hour before she was ready, and then, on viewing the shabby outfit, flatly refused to accompany Mr. Nye.

"Why," she exclaimed, "that horse may die of old age any moment!" "Madam," Mr. Nye replied, "when I arrived that horse was a prancing young colt."-Exchange.

A MISSOURI WOMAN

Tells a Story of Awful Suffering and Wonderful Relief. Mrs. J. D Johnson, of 603 West

Hickman St., Columbia, Mo., says: "Following an operation two years ago, dropsy set in. and my left side was so swollen the doctor said he would have to

tap out the water. There was constant pain and a gurgling sensation around my heart, and I could not raise my arm above my head. The kidney action was disor-

dered and passages of the secretions too frequent. On the advice of my husband I began using Doan's Kidney Pills. Since using two boxes my trouble has not reappeared. This is wonderful, after suffering two years." Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

The Harvest Of The Wtaers. One of the problems of the times

which come close to the average famlly's comfort and well-being is the price of food. It is safe to say that in millions of American homes there is more concern over the cost of meat and other staples than there is on secount of the relations between the national government and the rati-roads, or even the recent attacks up-on the trusts. In the nature of things the outlook is not encourag-As the country fills up and the population increases, relatively to the land area which can be utilized, the need of making the most effective use of the fields will tend to cut down the number of domestic animals raised for food, in proportion to the number of inhabitants. The cattle and sheep ranges of the West will grow more valuable, and hence the beef and mutton they yield will become more costly in the retail mar-

These inevitable changes point to a gradual rise in the price of flesh tions but the general course will be life as a poor bricklayer, There will be many fluctuaupward. It will put an increasing premium upon poultry and eggs and fish. It directs attention now to the great possibilities of the seas, the lakes, the rivers and even the ponds as sources of food. The water spaces large enough for food fishes will not be widened. There will not he more takes or oceans. But it is certain that those which exist al-ready can be made far more productive than they are now. It is be-yond question that science can show how the food harvest of the waters may be increased perhaps tenfold. It is only necessary for the govern-ments interested to use their powers wisely.-Cleveland Leader.

A Variation,
"Your husband frequently misses his dinner," said one woman.
"Yes," answered the other.
"Whenever there is a bail game in town devotes himself to finding fault with the umpire instead of with the cook."—Washington Star.

Mistress—I want a girl for general housework; some one who is strong and willing and will do everything.

Bridget—Do yez take me for a Taft?—The Wasp.

William Ap and English critic, was advocating spelling reform at a dinner in New York.

TUMORS CONQUERED Overwhelming Proof that Lydia E. Pinkham's Vegetable Compound Succeeds.

So called "wandering pains" may come from its early stages or the presence of danger may be made manifest by excessive monthly periods accompanied by unusual pain, from the abdomen through the groin and

thigh.

If you have mysterious pains, if there are indications of inflammation or displacements, secure a bottle of or displacements, secure a solute of Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, right away and begin its use. The following letters should convince every suffering woman of its virtue, and that it actually does

conquer tumora. Mrs. May Fry. of 836 W. Colfax Ave , South Bend, Ind., writes:

Dear Mrs. Pinkham :-"I take great pleasure in writing to thank you for what Lydia E. Pinkham's Vegetable Compound has done for me I also took the Blood Purifier in alternate doses with the Purifier in alternate doses with the Compound. Your medicine removed a cyst tumor of four years' growth, which three of the best physicians declared I had. They had said that only an operation could help me. I am very thankful that I followed a friend's advice and took your medicine. It has made me a strong and well woman and I shall recommend it as long as I live."

Mrs. E. F. Hayes, of 26 Ruggles St., Dear Mrs. Pinkham :-

"I have been under different doctors treatment for a long time without relief. They told me I had a fibroid

I tumor, my abdomen was swollen and I suffered with great pain, I wrote to you for advice, you replied and I followed your directions carefully and today I am a well women. Lydia E. Pinkham's Vegetable Compound expelled the tumor and strengthened my whole system."

One of the greatest triumphs of Lydia E. Pinkham's Vegetable Compound is the conquering of woman's dread enemy Tumor,

The growth of a tumor is so insideous that frequently its presence is wholly unsuspected until it is well advanced.

Dear Mrs. Pinkham:—
"I was told by my ph had a fibroid tumor and have to be operated up you for advice, which I fully and took Lydia Vegetable Compound. "I was told by my physician that I had a fibroid tumor and that I would have to be operated upon. I wrote to you for advice, which I followed carefully and took Lydia E. Pinkham's Vegetable Compound. I am not only cured of the tumor but other female troubles and can do all my own work after eight years of suffering." after eight years of suffering.

Mrs. S. J. Barber, of Scott, N. Y.

Dear Mrs. Pinkham:

"Sometime ago I wrote you for advice about a tumor which the doctors thought would have to be removed. Instead I took Lydia E. Pinkham's Vegetable Compound and to-day am a well woman" well woman.

Mrs. M. M. Funk, Vandergrift, Pa.,

Dear Mrs. Pinkham :-

"I had a tumor and Lydia E. Pinkham's Vegetable Compound removed it for me after two doctors had given me up. I was sick four years before I began to take the Compound. I now recommend Lydia E. Pinkham's Vegetable Compound. able Compound far and near.

Such testimony as above is convincing evidence that Lydia E. Pinkham's Vegetable Compound stands without a peer as a remedy for Tumor Growths as well as other distressing ills of women, and such symptoms as Bearing down Sensations, Displace-Bearing-down Sensations, Displacements, Irregularities and Backache, etc. Women should remember that it is Lydia E. Pinkham's Vegetable Compound that is curing so many women Don't forget to insist upon it when some druggist asks you to accept something else which he calls "just as good."

Mrs. Pinkham's Invitation to Women.

women suffering from any form of female weakness are invited to you for advice, you replied and I collowed your direction carefully and oday I am a well women. Lydia E. Pinkham's Vegetable Compound expelled the tumor and strengthened my whole system."

Mrs. Perry Byers, of Mt. Pleasant, Iowa. writes:

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, Lynn. Mass., for advice. She is the Mrs. Pinkham who has been advising sick women free of charge for more than twenty years, and before that she assisted her mother-in-law, Lydia E. Pinkham in advising. Thus she is especially well qualified to guide sick women back to health.

FIFTEEN YEARS OF ECZEMA.

Terrible Itching Prevented Sleep-Hands, Arms, and Legs Affected —Cured in 6 Days by Cuticura.

"I had eczema nearly fifteen years. The affected parts were my hands, arms and legs. They were the worst in the winter time and were always itchy, and I could not keep from scratching them. I had to keep both hands bandaged all the time, and at night I would have to scratch through the bandages as the itching was so severe, and at times I would have to tear everything off my hands to scratch the skin. I could not rest or sleep. I had several physicians treat me, but they could not give me a permanent cure, nor even could they stop the itching. After using the Cuticura Soap, one hox Cuticura Ointment and two bottles Cuticura Resolvent for about six days the itching had ceased, and now the sores have disappeared, and I never felt better in my life than I de now. Edward Worell, Band 30th, U. S. Infantry, Fort Crook, Nebreska."
