Weak Hearts

Are due to indigestion. Ninety-nine of every one hundred people who have heart trouble can remember when it was simple indigen-tion. It is a scientific fact that all cases of heart disease, not organic, are not only traceable to, but are the direct result of indi-gestion. All food taken into the stomach which falls of perfect digestion ferments and swells the stornach, puffing it up against the heart. This interferes with the action of the heart, and in the course of time that delicate but vital organ becomes diseased.
