Almost The Same

In Chicago is a woman who combines the functions of caterer and trance medium, serving her customers with refreshments psychical or physical, according to their wishes. Either she or the sign painter whom she employed must be the humorist, for her sign reads thus: "Madame Blank, enterer and trance medium, Groceries and Previsions."—Youth's Companion.

New Answers To Old Questions

"Is this a good ten-cent cigar?"
"No, sir. That cigar is Connecticut filled and Wisconsin wrapped.
It's worse than a second. We don't sell a decent cigar for ten cents, be-cause our trade is mostly transient and isn't worth holding. We have a fair ten-cent cigar at thirty-five cents or three for a dollar."—Exchange.

Sarcastic.

They had been discussing the baby's ears, eyes and nose. "And I think it's got its father's hair," said the joyful young mother.
"Oh, is that who's got it? I noticed it was missing." And as the tall girl with a suave manner said this, the mother looked dubiously at her.- Eau Claire Leader.

Plaint Of A Player.

"An actor should be devoted to his art, should he not?" "Yes," answered Mr. Storming-ton Barnes, "he should be. But too many of us are prone to regard the practice of our profession merely as a series of disagreeable interrupa pinochle game."-Washington Star.

PURE FOOD

No Food Commissioner of any State has ever attacked the absolute purity of Grape-Nuts.

Every analysis undertaken shows this food to be made strictly of Wheat and Barley, treated by our processes to partially transform the starch parts into a form of Sugar, and therefore much easier to digest

Our claim that it is a "Food for Brain and Nerve Centres" is based upon the fact that certain parts of Wheat and Barley (which we use) contain Nature's brain- and nervebuilding ingredients, viz., Phosphate of Potash, and the way we prepare the food makes it easy to digest and assimilate.

Dr. Geo. W. Carey in his book on "The Biochemic System of Medicine"

When the medical profession fully understands the nature and range of the phosphate of potassium, insane asylums will no longer be needed. "The gray matter of the brain is controlled entirely by the inorganic

cell-salt, potassium phosphate. This salt unites with albumen, and by the addition of oxygen creates nerve-fluid, or the gray matter of the

brain. "Of course, there is a trace of other salts and other organic matter in nerve-fluid, but potassium phosphate is the chief factor, and has the power within itself to attract, by its own law of affinity, all things needed to manufacture the elixir of life. Therefore, when nervous symptoms arise, due to the fact that the nerve-fluid has been exhausted from any cause, the phosphate of potassium is the only true remedy, because nothing else can possibly supply the de-

"The ills arising from too rapidly consuming the gray matter of the

brain cannot be overestimated. "Phosphate of Potash, is to my mind, the most wonderful curative nt ever discovered by man, and the blessings it has already conferred on the race are many. But 'what shall the barvest be' when physicians everywhere fully understand the part this wonderful salt plays in the processes of life? It will do as much as can be done through physiology to make a heaven on earth.

"Let the overworked business man take it and go home good-tempered. Let the weary wife, nerves unstrung from attending to sick children or entertaining company, take it and note how quickly the equilibrium will be restored and calm and reason assert her throne. No 'provings' are required here. We find this potassium salt largely predominates in nervefluid, and that a deficiency produces well-defined symptoms. The beginning and end of the matter is to supply the lacking principle, and in molecular form, exactly as nature furnishes it in vegetables, fruits and grain. To supply deficiencies—this is the only law of cure."

Please observe that Phosphate of Potash is not properly of the drugshop variety but is best prepared by "Old Mother Nature" and stored in the grains ready for use by mankind. Those who have been helped to better health by the use of Grape-Nuts are "There's a Reason."

BRAIN POWER

Increased by Proper Feeding.

A lady writer who not only has done good literary work, but reared a family, found in Grape-Nuts the ideal food for brain work and to develop healthy children. She writes:

"I am an enthusiastic proclaimer of Grape-Nuts as a regular diet. I formerly had no appetite in the morning and for 8 years while nursing my four children, had insufficient nourishment

Unable to eat breakfast I felt frint later, and would go to the pantry and eat cold chops, sausage, cookies, doughnuts or anything I happened to Being a writer, at times my head felt heavy and my brain asleep.
"When I read of Grape-Nuta I be-

gan eating it every morning, also gave it to the children, including my 10 months old baby, who soon grew as fat as a little pig, good natured

"I wrote eyenings and feeling the feed of sustained brain power, began eating a small saucer of Grape-Nuts with milk, instead of my usual indiscutible hot pudding, ple, or cake for descert at night."

"I srew plump, nerves strong, and when I wrote my brain was active and clear; indeed, the dull head pain never returned."

minutes through the auditorium thieves, greeted this sentiment, and they were "After followed by thunderous outbursts when Mr. Bryan attacked the monop-

olists who "reap rewards by cornering the necessities of life."

"It is time," he said, "that the masks of respectability be torn from these monopolies, and they be revealed in all their ugliness and ghast-

talked on the topic for two hours.

Mr. Bryan's Address. Mr. Bryan said in part:

modern times to divide grand larceny into two-classes, so that now we are inclined to think of larceny as petit larceny, grand larceny and glorious larceny. By glorious larceny I do not refer to the policy which nations have indulged in of taking the property of other nations by force—an act, that is sometimes described as not only innocent, but even patrictic; I refer, rather, to that tendency, quite discernible at the present day, to regard stealing upon a large scale as less reprehensible than stealing upon a small scale. If a man picks your pocket, or enters your house in the dark, or accosts you upon the highway and takes from you a few dollars, you regard him as a vulgar thief. No one can have respect for such a person, and the punishments of the law are in such cases swift and sure, if the offender is caught.

"Even in the case of grand larceny, if the amount taken is not very great, the thief finds it difficult to escape, for he has no influential friends and he cannot hire skillful lawyers to present technicalities in his defense. If, however, he steals a large sum, it becomes quite a different matter.

Ket by those who are on the inside, the stock market becomes worse than an honestly conducted gambling resort. If a man takes a chance upon a wheel of fortune, he knows just what his chance is, and he knows that the owner of the wheel has a percentage of chances in his favor, but when a stranger gambles upon to the stock or grain market he is at the mercy of those who, by obtaining control of the visible supply, can destroy every natural law or business rule which the outsider knows. I beg the spiritual advisers of our great cities to consider whether they cannot advance religion as well as morality by pointing out that the commandment, 'Thou shalt not steal,' is openly and notoriously violated in the stock market becomes worse than an honestly conducted gambling resort. If a man takes a chance upon the thest of the wheel has a percentage of chances in his favor, that the owner of the wheel has a percen

present technicalities in his defense. If, however, he steals a large sum, it becomes quite a different matter, and the sum may be so large that we it becomes quite a direction of the potent from asking to and the sum may be so large that we overlook the man's rascality in our amazement at the genius which he has displayed. As a rule, the man who steals a million dollars has a better chance of escape than the man who steals a thousand. So true is this that it has been suggested that the steal it is so construed as to bring the feeling of guilt and shame to those who draw from the common store we amend the commandment to read.

We amend the sum may be so large that we the potent from asking to the potent fair advantages. we amend the commandment to read. 'Thou shait not steal on a small scale.' We should attempt to cultivate a public opinion which will remove the distinction between grand larceny and glorious larceny and insure the enforcement of the symptom

To Join the Army New York City — The army recruiting officers have had all they could do enlisting or rejecting members of the "army of the unemployed" who showed up at the various recruiting offices to enlist. It is said that at least \$000 of them have offered their services within the last two months. There has been an increase of nearly 300 per cent, in the average of applicants. At no time since the Spanish War have recruiting officers had so many applications.

The eight-hour day is now legal-ized for all the mines in France.

A Farm Laborers' Union is making rapid strides in New Zealand.

One of the surjustities in labor circles is the formation of a Palibeurers' Union in Alexandria, Va.

In England upward of \$525,000 was awarded to injured workmen under the Workmen's Compensation act during 1907.

during 1907.

In 1907 there were 13,257 old age pensioners in New Zenland, 10,053 of whom received the full pension of \$130 a year.

New York City.—William J. Bryan brought all his invective into play York," said he, "the Stock Exchange to tell what he thinks of the New is regarded with a certain amount of veneration and that many who ve-hemently denounce gambling in a backroom where winnings and losses are small, remain strangely silent in the presence of the enormous games that are played upon the stock mar-ket, often with loaded dice. Gambling is one of the worst of vices, and gambling in stocks and farm products is the most destructive form in which the vice appears. Measured by the number of suicides caused by the New York Stock Exchange, Monte tice every form of gambling and swindling known. He asserted that the Exchange turned out more embers use loaded dice and practice every form of gambling and Carlo is an innocent pleasure resort by comparison. Measured by the amount of money changing hands, the bezzlers than Fagin's school turned contrast is still greater in favor of Monte Carlo; and measured by the ciation by the utterance:

"It is a mystery to me why the eighty million people of this country do not rise in their indignation and drive these gamblers into honesty or out of the country."

Chears that reverberated for two

"After a crusade which convulsed

a State and at least impressed the thought of the Nation, we got rid of the Louisiana lottery and then we congratulated ourselves upon our virtue. The men in charge of the lottery never did a tithe of the harm that the tue. grain gamblers and the stock gam-blers of New York do every day, nor did they ever exercise anything like The subject assigned to Mr. Bryan the corrupting influences over poli-as "Thou Shalt Not Steal," and he tics. It has been asserted without denial that ninety-nine per cent. of the New York purchases and sales of stock and of produce are merely bets upon the market value, with no inmay be defined as the wrongful taking of another's property. Law writers have divided larceny into two classes—petit larceny and grand larceny—the former term being used when the property stolen is of little value, and the latter when the value is greater. There is a tendency in modern times to divide grand larceny into two-classes, so that now we are inclined to think of lasterny and property and larceny into two-classes, so that now we are inclined to think of lasterny and larceny into two-classes, so that now we are inclined to think of lasterny and the market value, with no intention upon the part of the vendor to deliver, or on the part of the vendor to deliver, or on the part of the purchaser to receive. This is not business; it is not commerce; it is not speculation; it is common, vulgar gambling, and when to the ordinary chances that the gambler takes are added the extraordinary chances due to the secret manipulation of the market value, with no intention upon the part of the vendor to deliver, or on the part of the purchaser to receive. This is not business; it is not commerce; it is not speculation; it is common, vulgar gambling, and when to the ordinary chances that the gambler takes are added the extraordinary chances due to the common to the intention upon the part of the vendor to deliver, or on the part of the purchaser to receive. This is not speculation; it is common, vulgar gambling, and when to the ordinary chances that the gambler takes are added the extraordinary chances due to the ordinary chances that the part of the vendor to receive. humble members of society complain, but it is strange that conscience does

scale. We should attempt to cultivate a public opinion which will remove the distinction between grand larceny and glorious larceny and insure the enforcement of the criminal law against all effenders alike, regardless of the amount stolen and regardless of the social, business, or political position of the thief."

Mr. Bryan's peroration was devoted to the Stock Exchange.

Women Claim Right to

Jury Duty in France Paris.—Jurymen have ever been the subject of criticism, but the serv-ice has always been considered a bur-den. The French law forbids wage den. The French law forbids wage earners to serve on a jury, and an attempt is being made to extend the panel to them, the authorities stating that the regulations were framed with the view to excluding domestic servants and retainers in social conditions no longer existing. Women are now claiming the right to sit on juries. Cynics hope it will be granted.

Halls of Congress.

Senator Tiliman made a speech on the financial situation.

A bill providing for a new immi-grant station at Philadelphia was passed by the Senate.

Nearly 1000 bills were introduced in the Beuate, including Federal in-corporation, ratiroad rate, shipping, anti-trust and many other measures. In his annual report Secretary of the Treasury Cortelyou urges upor Congress the need of prompt legisla-tion to prevent financial disturbances.

Foxes.

By W. J. WHITWOOD.

Quite a few years ago, when a lad, working in the sugar bush in April, a few inches of snow fell one night, and the next morning the sun came out warm and pleasant, and after gathering the sap that had accumulated in the buckets the day before, I took my double-barreled shotgun and started for a piece of woods a mile away on the top of a hill to hunt pigeons that were feeding on the As I neared the woods I crossed

a fox track, and knowing it was the season for the young to be out, I

moved with cantion and concealed

myself in a thick clump of young

hemlock and looked the woods over

carefully. After a little while I saw young fox near an old log heap, playing like a puppy; I remained quiet and soon three more young foxes joined him. I was within easy gun shot of them but did not wish to kill them. They soon seemed to become tired of play and all went into the end of a hollow log. I hastened to the log and stopped up the hole in the end, and then went to the other end, but found no opening, Assuring myself that I had the foxes stopped in the log, I placed large stones at the entrance so as to prevent the old fox from releasing them and hastened back to the sugar bush for help. One man and three boys accompanied me back. And with an are we cut holes in the log until we came to the foxes, when we reached in with our hands and took them out of the log. They were about the size of a half-grown cat at this time. We took them home and each boy raised one. We put straps around their necks and fastened a light chain to it to hitch them by. They soon grew tame and playful as puppies. We often took them to the brook to bathe, and they always enjoyed playing in the water and hunting for crawfish and frogs. By hitching the ends of tow chains together we would let them run and play as long as the chains were on them; they seemed to understand that they could not get away. They seemed to prefer mice, crawfish, frogs, squirrels, grasshoppers and small birds, to chickens or other meat. They would sometimes eat sweet applea and green corn and were also fond of milk. The four varied in color; the two females were nearly gray. One of the males were red, the other quite dark, its ears, sides and legs nearly black. The ends of all their tails were white, while their bellies were whitish gray. We kept them until cool weather in the fall, when we took them back to the woods and released them. As soon as they found they were free they became as sly and apparently as wild as if they had never been handled by us. We could not find one of them minutes after they regained their liberty. I hunted for them many times that winter but never saw them again.-From Recreation.

How Indians Poison Arrows.

An old Cherokee Indian recently gave away the secret how the Indians of olden times used to poison their arrowheads for war purposes or for killing bears. They took a fresh deer liver, fastened it to a long pole, and then went to certain places where they knew they would find rattlesnakes in abundance. About midday the rattlers were all out of their dens, coiled up in the cooking sun. The bucks would poke the first rattler they found with the liver on the long pole. A rattler, unlike common snakes, always shows fight in prefera ence to escaping. The snake would thus repeatedly strike at the liver with its fangs until its poison was all used up, whereupon it would quit striking and try slowly to move on. The bucks would then hunt up another rattler and repeat the performance, keeping at the work until the liver was well soaked with snake poi-Then the pole was carried home and fastened somewhere in an upright position until the liver became as dry as a bone. The liver was then pounded to a fine powder and placed in a buckskin bag, to be used as needed for their arrows. This powder would stick like glue to any moistened surface and was death to any creature which it entered on arrows. -Denver Field and Farm.

Quality and Quantity.

Clarke Williams, New York's new Superintendent of Banks, said the other day of a bankrupt:

"It is no wonder the poor fellow went under. When it became necessary for him to borrow, the securities that he offered were quite worthless. This fact was pointed out to him, and he produced other bundles of securi-ties less valuable, if possible, than the first lot."

Mr. Williams laughed. "He reminded me," he said, "of a waiter whom I heard about the other day. This waiter was summoned angrily by a guest.

'Lookehere, waiter,' the guest grumbled, 'these oysters that you have brought me are bad."

" 'I know that, sir,' the waiter answered, but we have given you three more than you ordered to make up for it.' "-Washington Star.

Great Conversationalists

There have been many great conversationalists, but perhaps the most famous of all talkers were the "great quartet," Johnson, Coloridge, Macaulay and Carlisle. Boswell tells us all about Johnson, and of Coleus all about Johnson, and of Cole-ridge, Dibden, who was privileged to hear him, says: "The auditors seemed to be wrapt in wonder and delight as one observation after another fell from his tongue." De Quincy de-clared that Coleridge was "the larg-est and most spacious intellect, the subtlest and most comprehensive, that has as yet existed among men."

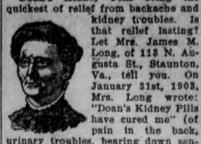

Of the power and charm of Macan-Of the power and charm of Macau-lay's conversation the evidence is to be found everywhere, and Car-lyle, when not in the throes of his dyspentic pains, was a talker of ex-traordinary attractiveness. — New York American.

What the Country Needs.

Since 1899 the cut of white pine has fallen off more than 40 per cent., while that of white oak has fallen off more than 36 per cent. To-day yellow pine leads all other woods in amount cut, while Douglas fir-and this will be surprise to many-comes seco Since 1899 the cut of Douglas fir has increased 186 per cent. Louiriana is the foremost yellow pine State, with Texas, Mississippi, and Arkansas following in order. Washington produces by far the geatest amount of Douglas fir .- Forest Service Cir-

You won't tell your family doctor the whole story about your private illness - you are too modest. ham, at Lynn, Mass., the things you could not explain to the doctor. Your letter will be held in the strictest confidence. From her vast correspondence with sick women during the past thirty years she may have gained the very knowledge that will help your case. Such letters as the following, from grateful women, es-tablish beyond a doubt the power of

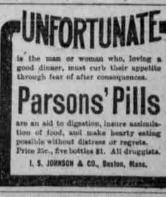

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

to conquer all female diseases. Mrs. Norman R. Barndt, of Allentown, Pa., writes:

"Ever since I was sixteen years of age I had suffered from an organic de-rangement and female weakness; in consequence I had dreadful headaches and was extremely nervous. My physician said I must go through an operation to get well. A friend told me about Lydia E. Pinkham's Vegetable Compound, and I took it and wrote you for advice, following your directions carefully, and thanks to you I am to-day a well woman, and I am telling all my friends of my experience."

FACTS FOR SICK WOMEN.

For thirty years Lydia E. Pink-ham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills, and has positively cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bear-ing-down feeling, flatulency, indigestion, dizziness, ornervous prostration
