

# The General Demand

of the Well-Informed of the World has always been for a simple, pleasant and efficient liquid laxative remedy of known value; a laxative which physicians could sanction for family use because its component parts are known to them to be wholesome and truly beneficial in effect, acceptable to the system and gentle, yet prompt, in action.

In supplying that demand with its excellent combination of Syrup of Figs and Elixir of Senna, the California Fig Syrup Co. proceeds along ethical lines and relies on the merits of the laxative for its remarkable success.

That is one of many reasons why Syrup of Figs and Elixir of Senna is given the preference by the Well-Informed. To get its beneficial effects always buy the genuine—manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists. Price fifty cents per bottle.

## \$60,000 Value Given Away

**Worried Long Over Dishonest Dollar.**  
As the result of a woman's conscience bothering her over a dollar obtained dishonestly twenty years ago, a Newark church has been enriched by five times that amount.

The woman, whose name is withheld, worked in the tailoring establishment of William Kraft, in Newark. She, with others, accepted a proposition made by a woman who held a position of trust in the factory to "stand in" on the padding of the pay roll. By the scheme she received \$1 a week more than she was entitled to, but half of that amount had to go to the chief conspirator. She left the factory two weeks later.

The pastor of her church advised that she return the dollar to Kraft's widow. It was refused. Mrs. Kraft suggested the dollar and the four more offered with it be donated to the church.—N. Y. American.

## To To Hatpins.

Hatpins are now regarded as trimming accessories and, accordingly, are greatly prized as gifts, as they are usually presented in pairs and deemed quite enough to decorate one hat. Among the most effective, as well as the most serviceable, are the great globes of rhinestones or crystal, which do not tarnish after being subjected to the rain and are greatly liked because they harmonize with any color and serve to brighten a dark hair. Dresden china pins do not discolor and are undeniable works of art, but they must be carefully handled, while the pins simulate jewels set in gold and silver, although wonderfully fascinating, are not substantial. In fact, so readily do these mock jewels separate from their bases that more than one person has been momentarily dazzled by the sight of a precious stone being trodden under foot.

## Family of Criminals.

A grim epitaph, perhaps unexampled, is to be found in the cemetery of Debresein, Eastern Hungary. It reads as follows: "Here rest in the Lord Joseph Moritz, sr., who died in his sixty-second year. He was shot by his son. Frau Joseph Moritz, who died in her forty-seventh year. She was shot by her daughter. Elizabeth Moritz, who died by her own hand, in her seventeenth year, after shooting her mother. Joseph Moritz, who died in prison, aged twenty-seven. He had shot his father. May eternal mercy have pity on their poor, sinful souls."

## FRIENDS HELP

St. Paul Park Incident.

"After drinking coffee for breakfast I always felt languid and dull, having no ambition to get to my morning duties. Then in about an hour or so a weak, nervous derangement of the heart and stomach would come over me with such force I would frequently have to lie down."

"At other times I had severe headaches; stomach finally became affected and digestion so impaired that I had serious chronic dyspepsia and constipation. A lady, for many years, State President of the W. C. T. U., told me she had been greatly benefited by getting coffee and using Postum Food Coffee; she was troubled for years with asthma. She said it was no cross to quit coffee when she found she could have as delicious an article as Postum."

"Another lady, who had been troubled with chronic dyspepsia for years, found immediate relief on ceasing coffee and beginning Postum twice a day. She was wholly cured. Still another friend told me that Postum Food Coffee was a godsend to her, her heart trouble having been relieved after leaving off coffee and taking on Postum."

"So many such cases came to my notice that I concluded coffee was the cause of my trouble and I quit and took up Postum. I am more than pleased to say that my days of trouble have disappeared. I am well and happy."—"There's a Reason." Read "The Road to Wellville," in pkgs.

## SEX IS DECIDED BY THE WEAKER PARENT, A SCIENTIST SAYS

**Dr. Romme Supports His Discovery of Nature's Law With Statistics That Seemingly Prove His Theory.**

## 100 BOYS ARE BORN TO EVERY 105 GIRLS

**Proportion Found Identical in All Countries Except After a Great War.**

London.—Dr. Romme, the eminent physiologist, has compiled statistics which prove, he maintains, that a boy is born when the father is the weaker of the two parents and a girl when the mother is the weaker parent.

Dr. Romme has been investigating the question of sex for many years, and his announcement of the law as he has discovered it and his statistics have caused widespread interest and discussion. He declares it to be a universal law of nature that the child resembles the weaker and not the stronger of its parents.

In all countries the proportion is found to be almost identical, namely, 105 or 106 girls to 100 boys. The only exception is found after a great war. This is because the best and strongest men are sent to the front, while the weakest remain behind.

The physiologist declares that nature's purpose is to replace the weaker individual with another of the same sex before he or she disappears.

**More Boys When War Rages.**  
Among barbarous nations, continually at war, there is always a preponderance of boys over girls. When an old man marries a young wife it is a proof of the fact that more boys than girls are born, the opposite being the case when the wife is much older than the husband.

To every 1000 girls born, Dr. Romme says, there are 865 boys when the father is younger than the mother; 848 boys when both parents are of the same age; 1037 boys when the father is from one to six years older than the mother; 1267 boys when the father is from six to eleven years older than the mother; 1474 boys when the father is from eleven to sixteen years older than the mother, and 1632 boys when the father is more than sixteen years older than the mother.

**Worry May Turn the Scale.**  
Dr. Romme asserts that there are practically no instances where the strength of both parents is equal. Worry, illness, or slight trouble, is sufficient to turn the scale.

Kaiser Wilhelm, he points out, had five sons in succession, while the Czarina had four daughters in succession. Dr. Romme avers that he is unable to find a single instance in which his rule has been transgressed.

It is, in fact, a repetition in another form of Professor Schenck's famous sex theory under which he proposed to increase the stamina and the reproductive power in a parent when the sex desired was to be a child of the opposite sex. Thus the Czarina, wanting a male successor to the Russian throne, was subjected to Professor Schenck's nourishing treatment, with an ultimately successful result.

**Typesetting Next by Wireless Waves**  
Wireless Photography Demonstrated, Wireless Type Setting Soon to Be—To Operate Linotype Machines in Paris by Wireless Waves From London.

London.—That he has already perfected an invention by which he can set type in an ordinary linotype machine in Paris by wireless waves thrown from London was the surprising statement made at the Hotel Cecil by Hans Knudsen, the Danish inventor, famous for his achievements with liquid air, after giving the first public demonstration of long-distance wireless photography.

"I shall publicly demonstrate my new wireless reproducing invention within few weeks," said Mr. Knudsen. "I have already had the first machine constructed, and it has proved successful, setting 3000 words an hour, at a distance, just as if the operator were working the machine. From this time on, the Danish inventor, with my invention, the London correspondents of the New York newspapers will be able to send their news straight to the printing press through the Marconi operator."

In the course of his demonstration of wireless photography Mr. Knudsen sent photographs of the King, Queen and Kaiser from one room in the hotel through the wall into another, without wires, the pictures proving recognizable.

He had constructed in the first room a transmitter with a needle point passing over a picture prepared on a glass plate from a photograph. The needle continually vibrates over the plate, according to the roughness or smoothness of the surface. A succession of electric waves was accurately recorded by a plate of zinc on the wall. These waves were in turn caught by another receiving plate in the adjoining room after passing through the wall, the picture being accurately recorded by the receiving instrument on a smoked glass plate.

From this plate recognizable photographs were printed on sensitized paper.

"I claim I can send pictures where ever Marconi can send messages," said Mr. Knudsen. "Within a short time I shall be sending pictures of criminals and finger prints from England to New York."

**Women Will Farm It in an Admired Eden.**  
Chicago.—Twenty self-supporting women formed an organization to be known as the Art Craft Colony, their object being to take up and settle upon Government irrigation lands in the West.

### Weekly Review of Trade and Latest Market Reports.

**Bradstreet's says:**  
Improved weather conditions and excellent crop reports throughout the greater part of the country, coupled with the favorable construction put upon recent financial developments, have made for the growth of a better feeling as regards the outlook, but the actual effect upon distribution of the slightest. Some gain is reported in a few sections, notably the South and Central West, in retail trade, but at the South retail business since Easter is rather quiet, and Easter trade as a whole was not up to expectations. Some enlargements in filling-in orders by jobbers is noted, and a few Western points report slightly more buying for fall delivery, but hesitancy and conservatism rule operations to an extent not approached in recent years. At the moment demand for iron and steel, copper, coal, coke and kindred lines is at a very low ebb, price cutting is more apparent and trade sentiment is mixed. In other lines of industry quiet rule.

The shoe trade reports more orders, especially at leading Western markets, but business is hardly up to expectations, and Eastern shipments are 28 per cent. behind. There is a slightly better tone in the lumber trade in the West, and in the Pacific Northwest some logging camps have resumed. Business failures in the United States for the week ending April 25, 1918, 254, against 263 last week, 187 in the corresponding week of 1917, 197 in 1916, 193 in 1915 and 197 in 1914.

Raised Up When Science Said There Was No Hope.

G. W. L. Nesbitt, Depot Street, Marion, Ky., writes: "I was a chronic invalid with kidney troubles and often wished death might end my awful sufferings. The secretions were thick with sediment, my limbs swollen and my right side so nearly paralyzed I could not raise my hand above my head. The doctor held out no hope of my recovery and I had given up, but at last started using Doan's Kidney Pills and made a rapid gain. After three months' use I was well and at work again."

## BUYING PAINT BLINDLY.

Many people look upon paint buying as a lottery and so it is, the way they buy it. It is not necessarily so, however. Pure White Lead and linseed oil are the essential elements of good paint. Adulterants in white lead can be easily found by the use of a blowpipe. Adulterants in linseed oil can be detected with a fair degree of certainty. See that these two elements are pure and properly put on and the paint will stay put.

National Lead Company, Woodbridge Building, New York City, will send a blowpipe outfit and instructions for testing both white lead and linseed oil, on request.

## Preparing For The Future

Mrs. Jenkins had missed Mrs. Brady from her accustomed haunts, and hearing several startling rumors concerning her, went in search of her old friend.

"They tell me you're workin' 'ard night an' day, Sarah Ann?" she queried.

"Yes," returned Mrs. Brady. "I'm under bonds to keep the peace for pullin' the whiskers out of that old scoundrel of a husband of mine, and the Magistrate said that if I come afore 'im ag'in, or laid me 'ands on the old man, he'd fine me 40 shillin'."

"And so you're workin' 'ard to keep out of mischief?"

"I'm what? not much! I'm workin' 'ard to save up the fine."—Penny Pictorial.

## Measuring Moonlight.

A novel means of measuring moonlight is furnished by the selenium cell, through its well-known variations of electric resistance in light of different intensity. By this method the light of the full moon has been lately determined to be a little more than one-fifth (1/5) of a standard candlepower and about nine times the light of the half-moon. The gibbous disc proves to be brighter before than after full moon. The selenium cell is not perfectly reliable as a test for light of varying color, but it has been found sufficiently accurate and sensitive to indicate the central phase of a lunar eclipse within one minute of the computed time.

## A Loquacious Swain.

Mr. Backwoods had called for the first time to escort Miss Bumpkin to the weekly prayer meeting. An excess of timidity and self-consciousness reduced both to the point of absolute silence until at last, and with visible effort, at the "meeting house" is nearest, the gallant summons all his courage:

"Do you like stewed rabbit?" he hazarded.

"Yes," returns the maiden, coyly. Again silence, until on the return journey the home lights are sighted, when, with another mighty effort, the resourceful swain asks feelingly: "Ain't the gravy nice?"

And yet there are those that maintain that country folk sometimes seem at a loss for conversational topics.—From The Bohemian.

## FIFTEEN YEARS OF SUFFERING.

Burning, Painful Sores on Legs—Tortured Day and Night—Tried Many Remedies to No Avail—Used Cuticura; Is Well Again.

"After an attack of rheumatism, running sores broke out on my husband's legs, from below the knees to the ankles. There are no words to tell all the discomfort and great suffering he had to endure night and day. He used every kind of remedy and three physicians treated him, one after the other, without any good results whatever. One day I ordered some Cuticura Soap, Cuticura Ointment, and Cuticura Resolvent. He began to use them and in three weeks all his sores were healed up. The burning fire stopped, and the pains became bearable. After three months he was quite well. I can prove this testimonial at any time. Mrs. V. V. Albert, Upper Frenchville, Me., July 21, 1907."

## NATURE AND A WOMAN'S WORK

LYDIA E. PINKHAM  
Nature and a woman's work combined have produced the grandest remedy for woman's ills that the world has ever known.

In the good old-fashioned days of our grandmothers they relied upon the roots and herbs of the field to cure disease and mitigate suffering.

The Indians on our Western Plains to-day can produce roots and herbs for every ailment, and cure diseases that baffle the most skilled physicians who have spent years in the study of drugs.

From the roots and herbs of the field Lydia E. Pinkham more than thirty years ago gave to the women of the world a remedy for their peculiar ills, more potent and efficacious than any combination of drugs.

Lydia E. Pinkham's Vegetable Compound is now recognized as the standard remedy for woman's ills.

Mrs. Bertha Muff, of 515 N.C. St., Louisiana, Mo., writes: "Complete restoration to health means so much to me that for the sake of other suffering women I am willing to make my troubles public."

"For twelve years I had been suffering with the worst forms of female ills. During that time I had eleven different physicians without help. No tongue can tell what I suffered, and at times I could hardly walk. About two years ago I wrote Mrs. Pinkham for advice. I followed it, and can truly say that Lydia E. Pinkham's Vegetable Compound and Mrs. Pinkham's advice restored health and strength. It is worth mountains of gold to suffering women."

What Lydia E. Pinkham's Vegetable Compound did for Mrs. Muff, it will do for other suffering women.
