Sweeping the Field What The New 1908 De Laval Cream Separators are Doing.

Reports are arriving in every mail from Maine to California and Canada to Florida, telling of how the New Improved De Laval Cream Separators are sweeping all would-be competition aside. Cow owners and separator users everywhere cannot say enough in praise of the new De Laval. Even competitors are admitting its vastly increas-

ed superiority and marvelling at its many conveniences, perfect skimming qualities, ease of running, great simplicity, durability and beauty of design. The new Da Laval is ten years in advance of any other separator made to-day. Nothing like it has ever been produced before and to have done so now is only possible after three years of constant experimenting by the world's best engineers and mechanical experts backed up by our thirty years of experience in the manufacture and sale of nearly a million separators. Improvements have been made in every feature and several brand new styles and capacities introduced. There is a machine for every size dairy from the smallest to the largest and at a price that will fit every pocket, while you may buy for each or on terms so liberal that the machine will actually pay for inself.

If you own one or more cows you can make no more profitable investment than to purchase a De Laval machine at once. It will save its cost in less than a year and after a week's use you will prize it as the most valuable implement on your arm. Ask for a free demon stration at your own home and send for our handsome new catalogue illustrating and describing De Laval machine in detail. Your cn'yregret will be that you didn't do so sooner.
