

# NEWS OF PENNSYLVANIA

### TORTURE FARMERS.

Great Bond (Special).—Tortured by robbers who sought \$1,000 which they knew he had received, William Hartley, an old farmer of Glenwood, Pa., is in a serious condition. The burglars beat their victim until he was almost unconscious, and then placed his bare feet on a red-hot plowshare.

Hartley is one of the best-known men in the vicinity of Glenwood, and is comfortably well off.

A few days ago he received \$1,000 for a large flock of sheep. Not wishing to keep such a large amount of money in his home, and being aware that many persons had known of his sale, he sent his daughter to Monroeville with instructions to deposit the cash in bank and return to the farm the following day.

That evening three masked men knocked at the door of the Hartley farmhouse. When the door was opened they rushed in, leveled revolvers at the head of the old man and demanded the \$1,000.

"I sent it to bank," replied Hartley.

"That's a lie. Show us where it is concealed or we will kill you," came the retort.

In vain Hartley protested that he was telling the truth. A blow on the head convinced the farmer that the robbers were desperate, and he cried that he was telling the truth. While one of the men guarded him the other two ransacked the house, but failed to find the money.

"We'll burn you alive unless you give us that money," shouted one of his assailants.

Then one man went outside and got the plowshare. It was placed in the fire and heated. The screaming farmer was dragged to the hearth and his bare feet pressed to the red-hot surface. He cried for mercy, but the thieves did not heed him.

Finally, in his agony he fainted, and the hot iron was removed. Several more efforts were made to compel the farmer to produce the money, and finally, convinced that Hartley was telling the truth, his assailants left him. They took with them \$8.50 which they found in a bureau.

### MAY PAY CREDITORS IN FULL.

Pittsburg (Special).—That the affairs of the Cosmopolitan National Bank are in excellent condition was made plain, when State Treasurer Sheatz came here from Harrisburg, spent several hours in the bank and afterward announced that he had nothing to fear regarding the \$500,000 State deposit. The deposit, he declared, was amply secured, but he was satisfied, in addition, that the bank will be able to pay dollar for dollar.

After a long meeting of the directors of the bank, Vice President E. A. Kitzmiller issued a statement in which he declared that the bank is approximating almost \$1,000,000 and has been pledged to secure the depositors. There is now in cash about 50 per cent. of the deposits, and, according to Mr. Kitzmiller, "there can be no reasonable doubt that every depositor will be paid in full."

### STATE ITEMS.

Ambrose H. Bauch, band director business man, member of a pioneer Moravian family and a gifted musician, being the last surviving member of the original Moravian troupe here, died at his home in Bethlehem, aged 81 years, from the effects of an attack of pneumonia.

### DEATH OF CAPTAIN EISENBLER.

Chester (Special).—Captain Henry A. Eisenblar, veteran of the Civil War and business man of this city, died after an illness of three months. He went out with the First Pennsylvania, and afterward enlisted in Company A. Forty-sixth Pennsylvania Volunteers, and became its captain, and with the Fifty-fifth Pennsylvania Volunteers. He was a member of the White Post, No. 25, G. A. R. The deceased was 76 years of age.

### NEW COLLEGE PROFESSOR.

State College (Special).—Frank D. Gardner, who resigned his position in the Department of Agriculture at Washington to fill the chair of agronomy in State College, has arrived here to take up his new duties.

Prof. Gardner has been soil expert in the Agricultural Department for many years. He was graduated from the University of Illinois in 1890 and for four years thereafter held the chair of assistant professor of agriculture.

### PREFERS DEATH TO SCHOOL.

Lancaster (Special).—"I'd rather die than go to school," had been the oft repeated declaration of 14-year-old William Sheetz, a son of Leander Sheetz, a hotel keeper of Elizabethtown. The boy's parents laughed at his threats, not believing him to be in earnest.

Shortly before 7 o'clock A. M., the family heard a shot coming from the boy's room and followed the lad dead on the floor. A rifle lying by his side and a pile of cartridges behind the right ear told plainly that the boy had made good his threat.

### FISH HEAD SAVES CAT'S LIFE.

Darby (Special).—A cat imprisoned in a sewer here four days was eddily rescued by Henry Johnson, colored.

No one could get down through the sewer inlet to reach the mewling cat, and all sorts of efforts to lure her into a lowered basket only resulted in her leaping out with fear as the basket was hoisted. Behind the right ear told plainly that the boy had made good his threat.

Descending into a pit fifty feet deep to adjust a dynamite blast at the Bethlehem Steel Works, Oliver E. Wick, the father of nine children, was blown to pieces when the blast prematurely exploded.

### GUARDING THE MINES.

Harrisburg (Special).—The future annual coal production in Pennsylvania will continue for many years at probably 200,000,000 tons, says Chief of Mines James E. Roderick in his report on the mining industry of the Keystone State which has just been issued. "It is estimated that 7,000,000,000 tons still remain unmined in the anthracite region and in the bituminous region. While no estimate has been made, the supply at the present rate of consumption will no doubt last several hundred years."

"The Pennsylvania mining industry is in most excellent condition," continues Chief Roderick. "The equipment and management of most of the mines are up to date, and great effort has been made in recent years to render the mines safe. The record of 1907 in the coal trade was especially remarkable. The production in Pennsylvania reached the unusual volume of 235,515,459 net tons of which the bituminous region produced 149,559,047 tons and the anthracite region 86,956,412. The production is five times as great as that of any State in the Union and over 83 per cent. of the tonnage of Great Britain. The tonnage of the world is estimated at 1,700,000,000 tons for 1907. The United States produced 469,866,266 tons."

### COMPLAINTS ADJUSTED.

Harrisburg (Special).—The State Railroad Commission has adjusted three complaints which included overcharges by railroad companies, and in each instance the settlement was made to the satisfaction of everyone, no necessity for actions arising.

In one instance, that of Alvin Jones, of Newport, Perry County, who protested against the rates between that place and Wycombe, Bucks County, the railroad companies revised their tariffs. In another instance, involving the charges for transportation of some scrap iron from the vicinity of Pittsburg, the overcharge was refunded.

### INSTINCT GUIDES CHILD HOME.

Altoona (Special).—Wandering over the mountain bewildered, lost for 22 hours, little five-year-old Isabelle Tackett, of Bear Wallow, near Phillipsburg, reached home in safety, picking her way through intricate paths.

The child disappeared and was supposed to have been kidnapped, as family and friends searched for her in vain. It seems that while on her way home she took the wrong path and followed it into the woods.

Her bare feet and legs were badly bruised and scratched by the stones and briars over and through which she passed.

### THE WARSHIP OF THE FUTURE.

Prediction of an Engineer of the Geological Survey.—He Believes Gas Engines Will Be Installed in Naval Vessels in the Next Few Years, Which Will Make Them Smokeless.

Washington, D. C.—The war vessel of the future will be a swift, smokeless, noiseless craft, lying low in the water, with every vulnerable part below the water line, the entire deck being for the work of the guns. There will be no smokestacks. In the night, time there will be nothing to betray the presence of this invincible fighting demon to the enemy.

This prediction was made by Robert Heywood Fernald, mechanical engineer, who has for several years been connected with the Geological Survey of the United States. Mr. Fernald believes that the gas engine, or internal combustion motor, as it is called by engineers, will be installed in naval vessels of the United States within the next few years.

"I expect to see the United States ahead of every other nation in this innovation," said Mr. Fernald. "The gas engine, in my opinion, is feasible on any vessel because of its economy over the steam engine, but it is especially desirable on the fighting ship for the reason that it makes no smoke. The gas is generated in a producer which has no chimney and needs none. The coal is turned directly into gas, which goes straight to the engine.

"The elimination of the smoke is sufficient to call for the installation of the gas engine, yet there are many other features in its favor. The vessel would have a free deck for the play of its big guns. There would be no towering stacks to be punctured or destroyed, thus crippling the boat. Then it would be unnecessary to carry as much coal, for the same power can be developed with one-third less than the steam engine."

### Sub Ends of News.

Mexico is having guns of a new and powerful type built in France for her coast defense.

Twenty thousand German troops began the great military maneuvers in Alsace-Lorraine.

Because she refused to marry him, Roo Hinkle shot his boarding mistress, Mrs. Anderson, seriously, at Seneca, S. C.

The National Birds—Ah! Ha! We Have a Rival!—Minneapolis Journal.

## AMERICA HAS PLENTY OF MONEY

### Treasury Vaults at Washington, D. C., Are Too Small to Hold Government Cash.

Washington, D. C.—Uncle Sam, enriched \$500,000,000 by the provisions of the Aldrich-Vreeland currency bill, now has so much money on hand that he cannot wait for the construction of new vaults in the Treasury Building, but has rented rooms in a storage building and placed relays of guards on the inside and outside. This vast amount of money may never be used, but so large a sum is necessary to supply the 624 national banking institutions in the United States in case of a financial stringency.

Deputy Treasurer Bentz reported that the available cash reserve in the Treasury was \$190,000,000, the highest figure it has reached this year. He is of the opinion that the possibility of a stringency this year is over, and that the crops can be moved without the slightest difficulty. "Conditions are vastly different this year," he said, "not only in New York, but throughout the country. New York banks have millions and millions of surplus on hand, while a year ago they were struggling with scarcely the legal requirements. Money, instead of being in great demand at high prices, is very easy on call at from three-fourths to one per cent. In the West the banks are all well supplied with currency, and are able to do more than their usual share toward moving the crops. From every direction signs of increased prosperity are seen. Small bills are in great demand, which is always a good sign."

## VILAS PLANS A \$30,000,000 GIFT

### Leaves Estate in Trust to Multiply For Wisconsin University.

Madison, Wis.—An eventual endowment of \$30,000,000 for the Wisconsin University is provided for in the will of Colonel William F. Vilas, former member of the Cleveland Cabinet and United States Senator, who died here recently.

The will was filed for probate and provides that the estate, valued at \$2,000,000 to \$3,000,000, be placed in the hands of four trustees to be held in trust as long as Mrs. Vilas shall live. During her life she is to receive the net income from the estate, and upon her death the entire property is to be turned over to the university, subject only to a charge of \$3,000 a year to his daughter, Mrs. L. M. Hanks, and some minor charges. The bequest to Mrs. Hanks is to continue during her life time. After the property is turned over to the university one-half of the net income is to be expended until the principal with increment shall reach \$20,000,000; then one-fourth of net income will be laid aside and added to the principal until the property shall reach the sum of \$30,000,000, when the entire income can be used by the university as provided in the will. The purpose of Colonel Vilas in leaving his wealth to the university is to create a fund which will eventually create an enormous fund to accomplish a permanent source of revenue for the advancement of knowledge and place the university in the foremost ranks of the great educational institutions of the world.

## THE WARSHIP OF THE FUTURE.

### Prediction of an Engineer of the Geological Survey.—He Believes Gas Engines Will Be Installed in Naval Vessels in the Next Few Years, Which Will Make Them Smokeless.

Washington, D. C.—The war vessel of the future will be a swift, smokeless, noiseless craft, lying low in the water, with every vulnerable part below the water line, the entire deck being for the work of the guns. There will be no smokestacks. In the night, time there will be nothing to betray the presence of this invincible fighting demon to the enemy.

This prediction was made by Robert Heywood Fernald, mechanical engineer, who has for several years been connected with the Geological Survey of the United States. Mr. Fernald believes that the gas engine, or internal combustion motor, as it is called by engineers, will be installed in naval vessels of the United States within the next few years.

"I expect to see the United States ahead of every other nation in this innovation," said Mr. Fernald. "The gas engine, in my opinion, is feasible on any vessel because of its economy over the steam engine, but it is especially desirable on the fighting ship for the reason that it makes no smoke. The gas is generated in a producer which has no chimney and needs none. The coal is turned directly into gas, which goes straight to the engine.

"The elimination of the smoke is sufficient to call for the installation of the gas engine, yet there are many other features in its favor. The vessel would have a free deck for the play of its big guns. There would be no towering stacks to be punctured or destroyed, thus crippling the boat. Then it would be unnecessary to carry as much coal, for the same power can be developed with one-third less than the steam engine."

### Boy Gets Bubonic Plague From Bite of Squirrel.

Los Angeles, Cal.—A case of bubonic plague has been discovered. The patient is a boy named Mulholland and is convalescent. Three weeks ago the lad found a sick squirrel in the park and picked it up. The squirrel bit Mulholland on the hand. Sickness followed, and the attending physician declared it to be bubonic plague. Other physicians were called in consultation, and discovered that squirrels in the park are afflicted with the disease.

### Feminine Notes.

Evelyn Thaw denied that she had spent more than half of \$4,000 in the last two years.

Italia Garibaldi, a granddaughter of the Italian patriot and a Methodist, is at the head of the Methodist Girls' School at Rome.

## Happy On 10 Cents a Day.

"We have all we need, thank God, for our daily bread, and are happy," say John and Marianna Szarmbeck, who live on 10 cents a day. Both are close to the century mark and have been married 50 years. They live in a tenement house in the Polish colony of St. Louis, and while neither knows the exact ages of either, they are old enough to remember the later days of the first Napoleon's reign.

John worked as a stonemason until he lost an eye eight years ago. Since then their little reserve fund has been spent, and John does odd jobs of mending for his neighbors, which nets a scant dollar a week.

They could have as much more as they needed, for none of the kindred folk that have lived with the old couple in the tenement house would see them suffer. The single dollar, however, satisfies all their wants.—New York Times.

## THE SAFE WAY TO BUY PAINT.

Property owners will save a deal of trouble and expense in keeping their buildings properly painted, if they know how to protect themselves against misrepresentation and adulteration in paint materials. There's one sure and safe guide to a pure and thoroughly dependable White Lead—that's the "Dutch Boy Painter" trade mark which the National Lead Company, the largest makers of genuine White Lead, places on every package of their product. This company sends a simple and sure little outfit for testing white lead, and a valuable paint book, free, to all who write for it. Their address is Woodbridge Bldg., New York City.

## Guided To Treasure By Spirit.

"I shall give all my money to charity if the owner does not come to claim it," announced Mrs. Frank W. Guilford at her home, where she had returned after her successful hunt for buried treasure in Chattanooga, Tenn.

Voices from the spirit world indicated to Mrs. Guilford where the treasure was hidden, according to the explanation she gives. "Martha, the spirit of a child, told her three years ago that a large sum of money was buried at Chattanooga. The vision returned again and again, she said, and she was forced to believe that she had a second sight.

Finally she went to Chattanooga, and discovered a large sum, how large she will not say, under a great stone in a pasture.

"I hope to return the money to its owner," she said, "but thus far I have had no applications from people who have lost anything. When some one does come I shall know if he is the correct person, for Martha, the spirit, will tell me what to believe."—Chicago Journal.

## Just "Handstruck" Him.

The other night before Magistrate Joseph Corrigan in the night court two young negroes appeared to make a complaint against a very barefaced mulatto. The man bore marks of a lively fray. A long gash under the right ear attracted Judge Corrigan's attention.

"Did you beat that man?" asked the judge sternly, turning to one of the women.

"Why, yo' honah, co'se Ah didn't. Ah 'uz beat n' man," she said, indignantly. "Ah jist handstruck that nigh'ah!"

"Discharged!" said the judge, hiding a smile.—New York Sun.

## Hicks' Capidine Cures Nervousness.

Whether tired out, worried, overworked, or what not, it refreshes the brain and nerves. It's liquid and pleasant to take. 10c, 25c, and 50c. at drug stores.

## To Drive Out Malaria and Build Up the System.

Take the Old Standard GROWER'S TASTELESS CHILL TONIC. You know what you are taking. The formula is plainly printed on every bottle, showing it is simply quinine and iron in a tasteful form, and safe for grown people and children.

## Don't bet on your popularity until the back townships are heard from.

## EYESIGHT WAS IN DANGER

From Terrible Eczema—Itchy's Head a Mass of Itching Rash and Sores—Disease Cured by CUTICURA.

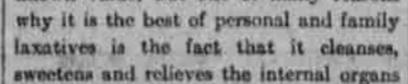

"Our little girl was two months old when she got a rash on her face and within five days her face and head were all one sore. We used different remedies but it got worse instead of better and we thought she would turn blind and that her ears would fall off. She suffered terribly, and would scratch until the blood came. This went on until she was five months old, then I had her under one family doctor's care, but she continued to grow worse. He said it was eczema. When she was seven months old I started to use the Cuticura Remedies in two months our baby was a different girl. You could not see a sign of a sore and she was as fair as a new-born baby. She has not had a sign of eczema since. Mrs. E. F. Burke, LeSueur, Minn., Apr. 15 and May 2, 1907."

appeal to the Well-Informed in every walk of life and are essential to permanent success and creditable standing. Accordingly, it is not claimed that Syrup of Figs and Elixir of Senna is the only remedy of known value, but one of many reasons why it is the best of personal and family laxatives is the fact that it cleanses, sweetens and relieves the internal organs on which it acts without any debilitating after effects and without having to increase the quantity from time to time.

It acts pleasantly and naturally and truly as a laxative, and its component parts are known to and approved by physicians, as it is free from all objectionable substances. To get its beneficial effects always purchase the genuine—manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists.

## TEN YEARS OF BACKACHE.

Thousands of Women Suffer in the Same Way.

Mrs. Thomas Dunn, 153 Vine St., Columbus, Ohio, says: "For more than ten years I was in misery with backache. The simplest housework completely exhausted me. I had no strength or ambition, was nervous and suffered headache and dizzy spells. After these years of pain I was despairing of ever being cured when Doan's Kidney Pills came to my notice and their use brought quick relief and a permanent cure. I am very grateful."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

## Pays For Woman Already His Wife.

Chin Chan, a young Chinese market gardener here, has yielded to the custom of his fathers and paid \$500 for his bride, in spite of the fact that he has been married to the girl for three weeks and that legally she was already his. The money was paid by the father of the groom to the father of the bride, together with \$5 extra for Chin Chan's new mother-in-law.

The love affairs of Chin Chan and Tina James, both members of the First Baptist Church, of North Yakima, have been followed with interest since the groom announced his determination not to violate his views of Christianity and his faith in American liberty by purchasing a maid whose heart was already his.—Seattle Post-Intelligencer.

## BORAX IN THE DAIRY.

### A Matter of Profitable Interest to the Farmer and Dairyman.

The problem of keeping sweet all the utensils used in connection with milk and cream selling, and butter making, has been a serious one with the farmer.

He has come to realize fully that the slightest taint or hint of staleness left in a can, tin or churn may ruin a whole output; that the taint which is left in the form of bacteria which grow and multiply in milk or butter, producing disastrous results.

The farmer has learned that hot water won't rinse away the greasy residue in dairy utensils.

He has learned that soap leaves a residue of its own which is, if anything, worse than the milk or cream residue, and it is little wonder that there has been a constant clamor for a dairy cleanser and sweetener that will meet modern requirements.

A few of the largest creamery establishments have called experts into consultation on this problem and have with this scientific aid hit upon a product of nature which exactly fills the bill—borax.

Scientists have long known borax as a cleanser, a sweetener and an antiseptic destroyer of bacteria and germ growths. Destroys all that is harmful and promotes and preserves freshness, sweetness and purity, relieving the dairyman and dairy housewife of drudgery and of needless work and worry.

Its cheapness and value should give it first place in the necessities of every dairy.

The cow's udder is kept in a clean, healthy and smooth condition by washing it with borax and water, a tablespoonful of borax to two quarts of water.

This prevents roughness and soreness or cracking teats, which make milking time a dread to the cow and a worry to the milker.

The modern cleanser of all dairy utensils consists of one tablespoonful of borax to every quart of water needed. Remember—a tablespoonful equals four teaspoonfuls.

Be sure that you get pure borax. To be sure, you must get "20 Mule Team Borax."

All dealers. A dainty book in colors, called "Jingle Book," sent free to any Mother sending name and address of her baby, and tops from two pound cartons of "20 Mule Team" Package Borax, with 5c. in stamps. Address Pacific Coast Borax Co., New York.

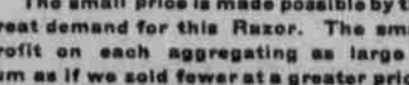

No matter how loudly a woman dresses she imagines she is dressed artistically.

## SAFETY RAZOR

### AT LOW PRICE.

### SUPERIOR TO BEST SOLD AT ANY PRICE.

Its all in our blades

Truth and Quality

The small price is made possible by the great demand for this Razor. The small profit on each aggregating as large a sum as if we sold fewer at a greater price. The benefit is the consumer's.

The Blade is of the finest steel, scientifically made and tempered by a secret process—and the blade, of course, is the important part of any Razor. The frame is of satin finish, silver plated, and "angled" correctly for safe, quick and clean shaving. The tough bearded man finds this Razor a boon; the soft bearded man finds it a delight. These blades can be stopped. Buy one and you will recommend it to all your friends. That is the best test of any article.

in postage stamps or cash brings it prepaid by mail in a special box. Write name and full address very plainly.

BOOK PUBLISHING HOUSE, 134 Leonard Street, N. Y. City.

## Power From The Mines.

A central plant of 8,000-horsepower is about to be erected in the midst of the bituminous coal fields of Indiana. It is believed that a large saving of expense, especially for transportation of coal, can thus be effected. It is intended to distribute the power over a wide territory direct from the mouth of the mines. The distance from the plant to Indianapolis will be about 100 miles. This will involve a small loss of power in transmission, repairing, according to the calculation, an increase of about 10 per cent. in the amount of coal consumed above what it would be if the coal were burned at the points where the power is used. But the saving in other respects is expected to much more than counter-balance this slight disadvantage.

### More proof that Lydia E. Pinkham's Vegetable Compound saves woman from surgical operations.

Mrs. S. A. Williams, of Gardiner, Maine, writes:

"I was a great sufferer from female troubles, and Lydia E. Pinkham's Vegetable Compound restored me to health in three months, after my physician declared that an operation was absolutely necessary."

Mrs. Alvina Spurling, of 154 Cleybourne Ave., Chicago, Ill., writes:

"I suffered from female troubles, a tumor and much inflammation. Two of the best doctors in Chicago decided that an operation was necessary to save my life. Lydia E. Pinkham's Vegetable Compound entirely cured me without an operation."

## FACTS FOR SICK WOMEN.
