PREVENT SPREAD OF DISEASE. State Medical Society

Health of School Children. Cambridge Springs (Special) .-Closing meetings were held here at the Hotel Rider of the fifty-eighth annual convention of the Medical

Society of the State of Pennsylvania. At 9 o'clock A. M., the medical met for the final section . At the same hour the sec surgery assembled in the ballroom, the section on gynecology in the lecture room, and the section on eye, ear, nose and throat disease gathered in the bowling alley.

These final meetings occupied the greater part of the forenoon, and were noted for the animated discus-sions that followed the reading of the various papers

A paper of especial interest, entitled "How to Prevent the Spread of Diseases in Schools," was read by Dr. Brooks of He maintained that this important problem could be solved by the appointment of special medical inspec

He detailed the duties of such offi cerst saying that when the inspectors had been appointed and their rela tionship with both the parents and the teachers had been established the result would be an improved state of the general health and a greatly decreased mortality among school

Dr. D. Arthur Dillinger, of Pittsburg, read a paper on "Nasal Com-plications Following Grip," which caused considerable discussion. Dr. Dillinger demonstrated the value o the X-ray in making a proper diag-Dr. Chevalier Jackson, of Pitts-

discussed "Foreign Bodies in the Esophagus and Air Passages.'

ORDERS BRISK IN STEEL TRADE

Pittsburg (Special),-With the advent of Fall, orders of considerable magnitude are being taken by the iron and steel mills of the Pittsburg district. The principal contract announced was that for 6000 tons of plate, required for water at Springfield, which goes to the Carnegie Steel Company. The A. Gillespie Company, of Pittsburg, will lay the twelve miles of

The Pittsburg Bridge & Iron Co. a steel building for Spang, Chalfant & Co., at Etna, which will require about 300 tons of structural material, while the McClintic Marshall Construction Company will fill an order for 500 tons of structural material for the Standard Oil Company.

The Carnegle Steel Company has secured the contract from an Idaho railway to supply 2700 tons of sixty-pound rails. In light rails the Carnegle Company has secured orders for about 1000 tons.

The American Sheet & Tinplate Co, has received an order for 430 tons of galvanized plates for ship ment to Canada for box car roofs. The company is also doing quite an export business, making regular shipments to Africa, Australia, Russia and South America

BOY ROBS MAIL BOX.

Checks By The Score Were Torn Up. But No Money Secured.

Lebanon (Special) .- Deputy United States Marshal Laurish, of Harrisburg, arrested James Allwein, aged 16 years, of this city. Allwein is aged 60 years. He was proprietor charged with robbing a renter's mail of the Johnstown House for many box at the Lebanon postoffice. He admitted having found the key

in the box more than eight months ago and said that at various times took letters which contained checks for large amounts, but was afraid to cash them. United States Commissioner Graeff held the ac cused for court.

It is thought that A lwein did not get a cent by his thefts, but the business of the man he robbed was great ly inconvenienced.

AUTO RILLS CONSTABLE.

Scranton Official Run Down By Millionaire's Son.

Scranton (Special),-F. L. Belin son of Henry Belin, Jr., the millionsire powder manufacturer, ran down and killed Constable Patrick Nolan while returning home from the tenals tournament. The accident occurred on West

Market Street and is supposed to can quit early. The men demand ex-tave been caused by clouds of dust tra pay for reporting earlier and the obscuring the roadway. The deceased was 25 years old. Mr. Belin is a prominent society

He was running at a high rate of speed.

Big Zine Plant To Resume.

South Bethlehem (Special) .-A sign of the return of the industrial activity hereabouts was the notice posted at the New Jersey Zinc Works, which have been closed down for several months, that the plant would start up full blast on October 1. Employment will be given to about 600 men,

Important Tax Decision.

Harrisburg (Special). - Deputy Attorney General Cuningham rendered an opinion to Deputy State Highway Commissioner Beman to the effect that the annual tax of \$1 which the road supervisors of each townthip are authorized by the act of April 12, 1905, to assess against each laxable," applies to the residents of heir respective townships, but not Okla

Suicide Was Tired Of Life.

West Chester (Special) .- Rutherat his home here. He was found than 1,400 couples. tiddressed to his mother he said he awed no one a cent, was tired of life and was about to take his life because it belonged to him and he left that he had a right to take it.

The receipt was tired of life because it belonged to him and he left that he had a right to take it.

ing a warrant on Patrick Kennedy, County Detective Charles E. McCracken was shot through the left breas by Kennedy, and Dr. D. Leonard Pratt, former mayor, who came to the officer's assistance, was wounded

Dr. Pratt will recover, but Mc-Cracken, who is in the Packer Hos-pital at Sayre is in a serious condition and probably will die Kennedy is half-witted, but was

regarded as harmless until a few days ago. Dr. Pratt swore out a warrant for his arrest, intending to ask for commission on the man's sanity

QUAY STATUE LOCATION. Troublesome Question To Be Left To Legislature to Decide.

Harrisburg (Special) .- The Legis lature is to be allowed to deal with the troublesome problem of the location of the Quay statue. The me-morial to the Senator has been completed for several months, but the Board of Public Grounds and Buildings has declined to take action on matter thus far, although two letters have been sent to the Govern-or by Colonel Samuel Moody, secre-

tary of the commission.

The letters have been laid before the Commissioners of Grounds, but each time have been allowed to remain on the table.

HALTS WEDDING FOR FIRE. Minister Makes Bridal Couple Wait

While He Joins Firemen, Gettysburg (Special) - Leaving a couple waiting to be married in his parlor, Rev. C. L. Ritter, of Fairfield, ust aside his clerical garments. donned old clothes and hurried to the scene of a fire nearby and joined a bucket brigade.

As soon as the fire was over he returned, dressed in suitable attire and united in marriage Miss Emma McSherry and J. Lawrence Reaver, both of Adams County. Both bride and groom declared that they admired the parson's pluck.

STATE ITEMS.

COMMERCIAL COLUMN

Weekly Raview of Trade and Latest Market Reports.

Bradstreet's says:

"The advance of the fall season and the notable enlargement of the movement of ceresis and cotton to market at good prices have made a further moderate expansion in jobbing and retail trade and collections. This is especially marked at West-ern, Pacific Coast and Southern centers, but the point is made that agricultural sections have done better relatively than large industrial cities in the matter of retail trade, possi bly because of warm weather, or the reduced purchasing power of city workers and the high prices paid for farm products. Industries, too, shown some improvement table in this respect being coal and lumber interests. There is an in-crease also reported in blast furnace apacity and there is more doing at the paper mills. In the textile trades little change is noted, and while the fall demand for dry goods, millinery and kindred lines has improved, the consensus of reports is that buying is frequent rather than heavy, and onservatism rules purchasing.
"Business failures in the United

States for the week ended September 10 number 191, against 210 las week, 172 in the like week of 1997 164 in 1906, 188 in 1905 and 167 The total reported this week is the smallest noted since last

TELEPHONE USED FOR WRITING, TOO.

> German Invention is Shown in London With Results That Are Wanderful -- Sketches by Wire.

Simultaneous writing and speaking by telephone is made possible by the wonderful invention of Gustave Grzanna, of Germany, who has been demonstrating his instrument in London. With the Grzanna telephone, handwriting, sketching, etc. can be transmitted over an ordinary telephone wire for very considerable distances in a few seconds. This means a great improvement on the old system of electric writing at a dis-

ance, which was slow and clumsy. Messages on the Grzanna system are passed through as fast as they are written. One can actually speak and write or draw at the same time through the same wires, the telephone being connected with the apparatus (to use the technical term) through a condenser of two micro

farads. By this system an artist reporter can telephone to his office a description and sketch of any event simultaneously. In military operations, maps and sketches illustrating the enemy's movements can be wired back by scouts as they unfold themseives, together with a verbal dispatch, or an engineer can order material by telephone from a manufac turer, accompany his message with drawings of the goods he requires.

The wonderful system of telautography is accomplished by means of a light ray traveling over sensitized paper. The graphite pencil at the transmitter end has two electrical contacts, one for horizontal and the other for vertical movement, a curve being made up of the component parts of one or the other. On taking the pencil from off its rest a tiny electric glow lamp in the receiver box is illuminated. The light from this lamp is conducted to a prism, from which it is reflected on to two little pivoted mirrors, one of which corresponds with the circuit of horizontal movement and the other with that of

The light ray produced by the mirrors is absolutely identical with the movements of the point of the pencil. and it is thrown upon the section of a spool of sensitized paper set to receive it. By unhinging the attachment to the receiver bor containing the photographic film, and substituting a focusing glass, the evolutions of the light ray can be watched. It appears as a tiny pinhead of light traveling in all directions over the glass - really imitating exactly the handwriting or drawing of the transmitter.

On laying the pencil down the lamp is extinguished, and a little electromotor pushes forward the sensitized paper, on which the message has just been photographed, passes it through a chemical bath, in which it is developed, and in ten seconds the writing or sketch becomes visible, while an other film is unwound from the spoo! and placed in position to receive the next message. All these processes are automatic. The receiver has now but to cut off the film bearing the massage, and "fix" it in the photographic sense.

HORSE'S SENSE OF DANGER.

Animal Carried Owner Against His Will Away From Cloudburst.

That a horse has the instincts of impending danger was demonstrated didn't struggle at all; he fell in love the other afternoon when an animal with me at first sight."—Houston Cheese—Higher; New York, full the other afternoon when an animal to good, 12 @ 12 \\ Poultre All 10. bit, ran up the mountainside and saved its rider from death in a cloud burst.

Swisher was riding along Box Canon, a narrow gulch, when the horse turned from the road, and paying no attention to the rider ran up the mountainside and stopped on a ledge twenty feet above. Swisher was mys tified until he saw water about eight feet deep rushing down the canon tearing up bushes and upending everything movable. The water was from a cloudburst about half a mile further up the guich, and the horse had heard the noise of the rushing water before the rider.

Half a mile of the Box Canon road leading to Florissant was washed out and bridges carried away. Swisher remained on the mountainside for at hour before he considered it safe to re-enter the canon -- Cripple Creek Correspondence Denver News.

Children's Answers.

Tommy is rather mischievous, and the other night before going to bed he locked the back door and hid thi key. His mother reproved him nex morning; then she said: "Where did you hide it? Daddy looked every where for it before we went to bed. "But, mother," protested Tommy "if he looked everywhere, why didn' he find it under the hat stand?"

Dollie had been away with her par ents, and being very keen on oil china, they had gone into many shop to look at pieces, and she had heard much talk about the various marki and the consequent value of the china. Some time after, a sailor friend was visiting them, and showe:

One Appreciative Reader. Pasted on the cover of one library opy of a certain 1907 novel is circulation record that causes pro-found wonderment. The book has been taken out of the library fourteen times in all; twelve times on the

same card.

That remarkable record is a matter for serious speculation. How could a book of that caliber convey to any soul a message so tremen dous that a dozen readings were de sired? By the average reader and by critics it would be considered a ommonplace book. When published it created no discussion, made no impression; it deserved to make none, yet, notwithstanding its apparent mediocrity, some scene theresome character, some human note, went straight to the heart of at least one reader. There has been skipping in reading that book, It has been read carefully from cover to cover; not a page that shows no sign of usage. This very evidences of absorption bear eloquent testimony to the interest the story evoked in its one devoted reader. If i were another kind of book, a scien tific treatise or a text book of some kind, it would be conceivable that a student might wish to take it home twelve different times and pore over it for a month at a stretch, but how a trite, threadbare little novel can so stir a human soul. Verily, here is mother mystery past finding out. -New York, Press.

Superstition.

PUTNAM FADELESS

Malaria Causes Loss of Appetite

The Old Standard GROVE'S TASTRIESS CHILL TONIC, drives out Malaria and builds up the system. You know what you are taking. The formula is platfily printed on every bottle, showing it is simply Quipipe and Iron in a tasteless, and the most effectual form. For adults and children, 50c.
