In cases of cold or overfatigue there is nothing that so quickly acts as a stimulant as a cup of hot milk. Heat it just to the boiling point and sip slowly. A little salt may be added to make it more palatable.

Do not overlook the fact as you are about to do the advertising of your public sale this fall that the NEWS office is the place to go for your sale bills—not that the NEWS office will print them cheaper than anywhere else, but the fact that everybody reads the NEWS—Democrats, Republicans, Prohibitionists, Populists and Presbyterians—all read the NEWS, and thus everybody will find out about your sale. Two dozen people will see it in the NEWS to one that will see the bill in some blacksmith shop, or a store where the other fellow's bill hangs over yours.

It is up to the farmers living along the proposed route, whether or not a trolley shall be built from Chambersburg to St. Thomas. A meeting of the Chambersburg & Western trolley company was held at St. Thomas Monday afternoon. Report of the promoters on the estimated cost of the road was presented, and received with much satisfaction by the Company. Three routes have been suggested: One, north of the pike; one, on the pike, and the other south of the pike. Many of the farmers along the proposed routes have signified their willingness to grant, without cost to the company, the right of way through their respective farms, and feel that by so doing they would greatly enhance the value of their property. There are others, however, who see a chance to hold up the enterprise for a little cash, and it now depends which route has the greatest number of that kind of "public spirited" farmers.

Good Judgment Needed.

Educators for all time have disagreed regarding the methods of discipline within the school room. Some well known authorities have argued that the rod is a necessity; that better results are secured when discipline is enforced through fear. Other notable educators have ventured an assertion that seems well reinforced to the effect that bodily fear should be an unknown quantity in the school room. The nature of the child is not radically different from that of the adult. Some can be driven successfully, while others must be led along paths of persuasion and kindness. The successful teacher must be thoroughly grounded in psychology and make a study of the best way to handle each case.

CURED HAY FEVER AND SUMMER COLD

A. S. Nusbaum, Batesville Indiana, writes: "Last year I suffered for three months with a summer cold so distressing that it interfered with my business. Fortunately I insisted upon having Foley's Honey and Tar. It quickly cured me. My wife has since used Foley's Honey and Tar with the same success." Trout's drug store.

It goes without saying that accurate information of all the important moves in the campaign chess-board will be indispensable to every wide-awake voter.
