## Piece Of Valuable Carpet. "There is a small piece of carpet in the mint in San Francisco that a good many people would doubtless like to get possession of." remarked R. H. Smith, of the California city. "It is in the adjusting room, where surplus gold is trimmed from the coins after they have been stamped. Of course, these little trimmings often drop on the floor and are imbed-ded in the carpet, which is soon to be burned in order that the precious fillings may be recovered. Sometimes after a piece of carpet like this has been burned \$5,000 worth of gold dust is taken from the ashes. The sweeping from the floor each day are carefully treasured."-Baltimore American.

The new method depends for its success largely upon speedily finding out the cause of the accident, placing the blame where it belongs and let-ting the public know all the news-papers care to tell about it.
