The Union Sunday School at Needmore will hold graduating exercises in the P. O. S. of A. Hall at that place next Sunday morning at 10 o'clock in honor of the teachers' training graduated class, who will at that time receive their diplomas.

After nine months of the most severe drought conditions that the Schuylkill region has ever experienced, reservoirs are again full, the thaw which has been on with but a few days' break since the first of the month having replenished springs and streams.

A great many people have kidney and bladder trouble, mainly due to neglect of the occasional pains in the back, slight rheumatic pains, urinary disorders, etc. Delay in such cases is dangerous. Take DeWitt's Kidney and Bladder Pills. They are for weak back, backache, rheumatic pains and all kidney and bladder trouble. Soothing and antiseptic, and act promptly. Don't fail to get DeWitt's Kidney and Bladder Pills. Accept no substitute. Regular size 50c. Sold by Trout's drug store.

On Saturday the 16th inst while Mr. and Mrs. Charles Driest, of near Imbertown, Bedford county, were in Bedford, their two sons, Ralph and Lloyd, aged 16 and 13 years, respectively, got hold of a shot gun and while playing with the firearm it was accidentally discharged. The younger boy had one of his ears and the side of his face cut off and was so badly injured that he died that night. It is supposed that the boys did not know that the gun was loaded.

A bold holdup occurred near the White Pine sanatorium Friday evening shortly after dark. Harry Verdier, driver of the bus from Mont Alto to the camp, had almost reached his destination when a man suddenly sprang from the bushes and grabbed the reins of the team. The bus came to a stop and before any demand could be made upon the driver or occupants of the wagon Verdier opened fire on the would be robber. After several shots were exchanged he made good his escape in the underbrush.

**Ohms, Amperes and Volts.**

When an electric current is flowing in the trolley wire or electric lighting circuit there are three factors involved. One of these is the pressure expressed in volts which causes the current to flow; another is the resistance or opposition offered by the circuit of the flow which is expressed in ohms; the last is the current strength or volume, expressed in amperes, which is maintained in the circuit as a result of the pressure overcoming the resistance. The ohm is named in honor of George Simon Ohm, a distinguished German electrician. The volt is named after the Italian scientist, Volta. The ampere is named after the French scientist, Ampere.

The unit of current is called the ampere. The unit of electrical pressure or electromotive force is called the volt. The unit of resistance is called the ohm. The unit of electric power is the volt-ampere, and this is called the watt. Seven hundred and forty-six watts per hour equal one horse-power. The unit of energy—the product of electric power and time—is called the joule, but this unit is too small for practical purposes and the kilowatt-hour is used instead. The kilowatt-hour is the work done by a thousand watts working for one hour.

These electrical terms are as familiar to electrical engineers as feet and inches are to the average boy; the layman does not understand because he has never been taught, has never had to use the terms, has never read about them.

It is easier to understand these terms if we consider electricity as a fluid and liken it to a current of water flowing through a pipe. The rate of flow of water in the pipe depends upon gravitation and the height of the reservoir or source above the outlet. The greater the height of the reservoir or source above the outlet, the greater will be the pressure of the water and the greater the flow in gallons per minute. It is just the same with electricity. A current flows from a high potential to a low potential whenever the two are joined by a conducting wire. It is merely a difference of level. Watch a stream of water from the nozzle of a garden hose striking a bank of soft earth. Considering it as a stream of electricity, which unfortunately cannot be seen, the force of the stream or flow is the amperage; the wattage the amount of work done in washing away the dirt. Suppose the interior of the nozzle and hose is rough, which offers a resistance to the ready flow of the stream; this friction and resistance is represented by ohms in an electric circuit.

Many Delaware county farmers are in love with the black snakes on their places, and believe the reptiles are better than any cats or dogs in removing the rats and mice from their premises. It is a well known fact that the snakes destroy hundreds of pests in a season, and for this reason they are liked by many of the farmers.

As Rheumatism is not only the most painful and torturous disease, but dangerous to life, this simple recipe will no doubt be greatly valued by many sufferers here at home, who should at once prepare the mixture to get this relief.

It is said that a person who would take this prescription regularly, a dose or two daily, or even a few times a week, would never have serious Kidney or Urinary disorders or Rheumatism.

Cut this out and preserve it. Good Rheumatism prescriptions which really relieve are scarce, indeed, and when you need it, you want it badly.

**LACK OF MANNERS.**

While it is true, shamefully true, that the average American boy and girl are sadly lacking in manners, it is notoriously true that there are men and women in the same boat.

Of course, they were brought up without manners, therefore, not born and reared to the manner of polite society so-called, but really polite and well refined.

The fact of the matter is that those who have shut up into the social world like mushrooms, without either social culture or refined sense, are the boorishness of the boors, and the most offensive, for their offending is made all the more distasteful because of their self-importance.

Do our numerous woman's clubs ever discuss ill-manners as a social defect? They can find no better subject for discussion, nor a more inviting field of labor.

Culture is something that cannot be outlived, nor worn out, nor even forgotten if once well-grounded in the life of the boy and girl, and it is one of the best legacies that can be left to them.

**Simple Recipe for Home-Made Rheumatism and Kidney Cure.**

To relieve the worst forms of Rheumatism, take a teaspoonful of the following mixture after each meal and at bedtime:

Fluid Extract Dandelion, one half ounce; Compound Kargon, one ounce; Compound Syrup Sarsaparilla, three ounces.

These harmless ingredients can be obtained from our home druggists, and are easily mixed by shaking them well in a bottle. Relief is generally felt from the first few doses.

This prescription forces the clogged-up, inactive kidneys to filter and strain from the blood the poisonous waste matter and uric acid, which causes Rheumatism.

As Rheumatism is not only the most painful and torturous disease, but dangerous to life, this simple recipe will no doubt be greatly valued by many sufferers here at home, who should at once prepare the mixture to get this relief.

It is said that a person who would take this prescription regularly, a dose or two daily, or even a few times a week, would never have serious Kidney or Urinary disorders or Rheumatism.

Cut this out and preserve it. Good Rheumatism prescriptions which really relieve are scarce, indeed, and when you need it, you want it badly.

**MIDWINTER Clearance Sale**  
AT  
**John S. Wilson's Store,**  
Three Springs.

While there is practically three months of winter weather to be expected yet, the wide-awake merchant begins early to clear his stock to make room for Spring purchases.

The old way of merchandising was to carry over from one season to another all unsold goods, and never parting with an article unless the full retail price was received. That day is gone by. Goods bought for the winter trade must go in the winter, and it is much better in the end that the stock should be closed out at profit or no profit, than to be at the trouble of storing it away and beginning next winter's business with old out-of-date stuff.

**During the Month of February**  
we shall sell at way-down prices,  
**Men's, Women's and Children's Clothing**

Blankets, Arctics, Rubbers, Carpets, and with these goods will go at Special Prices. Dry Goods, Groceries, Hardware and Housefurnishing Goods.

We want it distinctly understood that when it comes to quality of goods we will not be undersold by anybody.

are to-day to this country what electric street cars are in comparison to the old-time horse-cars; or the water works of to-day to the old well and the windlass. Who would want to exchange the advantages of the water works of the modern city, and go back to the old well for his water.

Where is the man or the woman that would prefer to ride in the old style stage coach in preference to an automobile bus? We are safe in saying without fear of contradiction, that there is not one.

In ourselves our fortune lies, and life is just what we make it.

Just so with any town or city, it is just what its citizens care to make it. McConnellsburg, situated in a beautiful valley and surrounded by fertile farms, farmed by a class of farmers second to none in the world, must work out its own destiny if the people living in this beautiful little city in this beautiful valley—richer in dollars and cents than any other city of its size in the world—decide that the old stage coach is good enough for them, why, then stage coach it will be forever. But if they will say the best means of transportation procurable is not quite good enough for us then it will be
