FARMHAND WANTED.—Single man, start with \$20 a month with chance of better wages if suited; 15 minutes walk from Johnstown, good locality, and desirable job. Address ADAM KEPPLER, R. F. D. 5. Johnstown, Pa.

J. A. Pearce, a farmer in Cooper township, Clearfield county, last fall had a yield of 580 bushels of potatoes from one and one eighth acres of land, and received 90 cents per bushel for the crop—quite a nice bunch of money for the product of so small a plot.

You should not delay under any circumstances in cases of Kidney and Bladder trouble. You should take something promptly that you know is reliable, something like DeWitt's Kidney and Bladder Pills. They are unequalled for weak back, backache, inflammation of the bladder, rheumatic pains, etc. When you ask for DeWitt's Kidney and Bladder Pills, be sure you get them. They are antiseptic. Accept no substitutes; insist upon getting the right kind. Sold by Trout's drug store.

At a Congregational meeting held in the Presbyterian church last Saturday, a call was unanimously extended to Rev. John M. Diehl to become the pastor of the church composed of the church here and that at Greenhill, giving three fourth of his time here, and one fourth to Greenhill. Mr. Diehl is now in Dakota, but is expected to take charge of this work at once.

Pennsylvania Apples.

According to a compilation made by Van Norden's Magazine, Pennsylvania ranks sixth in the list of apple growing States. There is no good reason in climate or soil, why we should not hold first place in producing this most profitable crop.

The States that are ahead of us in this respect are New York, Ohio, Illinois, Missouri and Kansas.

We probably come still further down the list, according to the returns from apples sent to market, because the failure of farmers to plant young trees and their neglect of those they own, have made, generally speaking, Pennsylvania apples less desirable than those from other States.

The awakened interest in orchard planting which has been evidenced in Pennsylvania within the last few years, it is to be hoped, will soon place us where we ought to be, in the front rank.

Readers Should Mix This For Kidney or Bladder Trouble.

Mix the following by shaking well in a bottle, and take in teaspoonful doses after meals and at bedtime:

Fluid Extract Dandelion, one-half ounce; Compound Kargon, one ounce; Compound Syrup Sarsaparilla, three ounces. A local druggist is the authority that these simple, harmless ingredients can be obtained at nominal cost from our home druggist.

The mixture is said to cleanse and strengthen the clogged and inactive kidneys, overcoming backache, Bladder weakness and Urinary trouble of all kinds, if taken before the stage of Bright's disease.

Those who have tried this say it positively overcomes pain in the back, clears the urine of sediment and regulates urination, especially at night, curing even the worst forms of bladder weakness.

Every man or woman here who feels that the kidneys are not strong or acting in a healthy manner should mix this prescription at home and give it a trial, as it is said to do wonders for many persons.

Why Big Navies Have Come.

The reign of big navies has brought Germany to an annual national treasury deficit of \$100,000,000. It is more responsible than any other cause for England's deficit of \$65,000,000. Our own deficit of about \$100,000,000 is part depression and part Panama Canal, but it is also part navy.

But it is not the English Dreadnought which started this naval expansion, as Mr. Carnegie and others have charged. The German naval act, nine years ago, began the mad race in navies.

Up to that act each land had built for its needs alone. England, with an empire spread over the seas and half the world's shipping, had a navy as big as any other two navies. Our own was small, but equal to any Power likely to attack us.

Germany out of a clear sky in 1900 laid down a program for twenty years to come. It provided for thirty-eight battleships—the biggest single naval order in history. The German Empire has a tenth of the world's steam and sail tonnage—half as much as this country—few colonies and none any threat. Its coasts are safe from attack. It has not two continents to defend, as has the United States.

The German battle-ships cannot be for defense. They are for attack. They are, as Mr. Frederick Harrison has just said, "the spearhead of the strongest army on earth."

With this program alarms spread over the world. England began building Dreadnoughts. The United States followed. France turned to a long-neglected navy. Italy and Austria entered anew on battleship building.

If the Reichstag were to stop Germany's battleship program naval expansion would cease everywhere else.—Philadelphia Press.
