Market Reports.

R. G. Dun & Co.'s weekly review of trade says; GRIP

The stimulating effect of fine spring weather is shown in the re-ports from nearly all the principal cities. Some progress is making to-ward better things in iron and steel, although conditions as a whole re-main very unsettled. The continued uncertainty as to prices in some fluished lines is the chief drawback, widely circulated reports of further price cutting have a depressing effect. The best feature is in the structural division, the low prices named re-sulting in a heavy movement, while orders pending aggregate a substantial volume.

#### Bradstreet's says:

Trade and crop reports are irregnlar and bus'ness the country over is still quiet as a whole. There are, however, evidences of growth in optimistic feeling, partly due, no doubt, to more springlike weather conditions. Current demand at wholesale is of a between - season character and jobbing distribution is confined to filling in orders, but there is reported in several markets a disposition to take hold more freely for next fall.
