According to statistics, Pennsylvania farmers raised last year \$170,415,840 worth of staple crops. Excepting buckwheat, it is claimed they received for each product a higher market price than the average selling rate in the United States. The yield per acre was greater than the country's average in every crop except hay, buckwheat and potatoes. With favorable conditions, the coming year's crops promise of a better record than this.

If you expect to get the original Carbolized Witch Hazel Salve, you must be sure it is DeWitt's Carbolized Witch Hazel Salve. It is good for cuts, burns and bruises, and is especially good for piles. Refuse substitutes. Sold by Trout's drug store.

It has reached the point now that the large brewing companies in this State are purchasing all the hotels they can themselves. Where they have not bought them outright they have furnished money to other parties to do so. This carries with it its own significance, and it begins to look as though the average citizen is just a little bit timid about putting his money in the hotel business, and well he might be, when the situation is well considered.

During 1908, The Philadelphia Record printed nearly a million lines of display advertising in excess of that published by any other Philadelphia newspaper. This supremacy is due to the fact that The Record has a larger morning circulation than any other Philadelphia newspaper. The same qualities of "Record" circulation that make the exploitation of merchandise pay, make "The Record" the ideal medium for summer resort advertising. The proprietors of resort hotels and summer boarding houses seeking patronage from Philadelphia and vicinity, should be represented in its advertising columns.

As we were not able to get all the facts concerning the death of little June, the daughter of Edward Mellott and wife last week, we desire to add the following: The name of the little girl is Lenora June, and her age at the time of her death was 7 years, 10 months, and 27 days. After she had eaten her supper she complained of feeling so sleepy, and seemed sick. Her mother put the child to bed, and, although everything was done for her that loving parents could do, the spirit of the child was in a few minutes wafted back to the God who gave it. She was a lovely child and will be greatly missed—not only by her immediate family, but by her little classmates in the Sunday school.

Birthday Surprise.

Tuesday, May 11th marked an other mile-stone in the pathway of the life of Mrs. Chas. W. Hess, of near Andover. About 6 o'clock in the evening, her neighbors and friends—about thirty in number—gathered at the foot of the lane leading to the Hess homestead, while several others were hiding in the woods opposite the house ready, at the sound of the bugle, to march to the conflict. As the crowd slowly wended its way up the hill, Mr. Hess, by some accident or other, got a splinter in his finger—just at the right time. Mrs. Hess, who was busy trying to relieve him of his suffering by picking the splinter out, did not see the procession until it was within a short distance of the house.
After the usual congratulations attending such a meeting the women repaired to the dining room and soon the table was laden with the many good things of the season to which all did ample justice—especially with cake. It was pretty hard to tell by some plates, which was the real cake-plate.

After supper the young people enjoyed themselves playing different games until day-break began showing itself in the eastern sky, when all left for their homes wishing Mrs. Hess many more such occasions.
Those present were: Mr. and Mrs. Charles Hess, A. W. Dishong and wife, Goldia Sipe, Gilbert and Elbert Lake, Scott and Mabel Mellott, Harry Divalbiss, Frank Gracy, and Harry Dishong, John Lake and wife, Mrs. J. F. One Who Was There.

One Accident Every Minute.
More than 500,000 men and women are injured or killed in the industries annually in the United States, or one person every minute.
This industrial carnage costs the people of the country, directly and indirectly, over two and a half billions of dollars—a sum larger than the national debt.
Such are the death tolls of industrial progress, which shows such a smiling face to those whose occupations involve no danger, but turns a ghastly countenance on those who work in peril of their lives.
Whoever doubts these figures, need only read the grim statistics to be convinced that modern industry is more fateful than war.
In the Japanese-Russian war a total of 338,796 men were killed and wounded on both sides, not counting the losses in naval battles.
In the same period in the United States alone the great army of American laborers, engaged in manufacturing and building operations, suffered a loss of 425,000 killed and injured; 92,000 more lives were sacrificed to industrial progress in one year than during the greatest conflict of recent times.—Exchange.
