BURDENS LIFTED FROM BENT BACKS.

A bad back is a heavy handicap to those of us who work every day. Nine times out of ten it is due to sick kidneys. The only way to find

relief is to cure the kidneys. Doan's Kidney Pills have given sound, strong backs to thousands of men and women. Mrs. James Cooper, 118 W. Germain St., Winchester,

Va., "I had such terrible pains through my back and kidneys that I could not turn over in bed. I was threatened with Bright's disease, and at the worst stage began taking Doan's Kidney Pills. They cured my trouble, and doctors who have since examined me say my kidneys are all

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Most Work Done In Best Spirit. The amount of work which each man accomplishes during the day depends upon other factors than the mere hours of labor, and the most important of these factors is the spirit in which the work is done. The spirit of the day's work will depend upon the personal relation which exists between the office and the workshop. If the employer is known to be interested in the welfare of his men, they will be more truly than otherwise, his retainers, more zealous for the prosperity of his business; but if his relation to them is that of a task master, they will be his slaves, merely, and quite capable of any treachery. The effort of the employer who would gain the loyal service of his men must be to preserve in every possible way the individuality of the employe, to em-phasize his manhood, and thus to ncrease his self-respect.—Atlantic Monthly.

Records Of Snowfall Valuable. The United States Weather Bureau has established snow gaging stations in the Rocky the Rocky Mountains. The mount of snowfall in the Rocky Mountains determines the amount of water in many of the principal rivers of the West, and therefore bears a direct relation on the floods that devastate the Middle West at times. Moreover, many vast irrigation enterprises depend for their success upon the amount of snowfall in the mountains. In order to keep accurate and dependable records of the amount of snowfall, and therefore to forecast in measure the amount of water that may be expected from the mountains, these stations have been established.

#### MAKING SUNSHINE It Is Often Found in Pure Food.

The improper selection of food drives many a healthy person into the depths of despairing illness. Indeed, most sickness comes from wrong food, and just so surely as that is the case, right food will make

the sun shine once more. An old veteran of Newburyport, Mass., says: "In October, I was taken sick and went to bed, losing 47 pounds in about 60 days. I had doctor after doctor, food hurt me and I had to live almost entirely on mag-nesia and soda. All solid food distressed me so that water would run

out of my mouth in little streams. "I had terrible night sweats and my doctor finally said I had consumption and must die. My good wife gave up all hope. We were at Old Orchard, Me., at that time, and my wife saw Grape-Nuts in a grocery She bought some and per-

suaded me to try it. "I had no faith in it, but took it to please her. To my surprise it did not distress me, as all other food had done, and before I had taken the fifth package I was well on the mend. The

pains left my head, my mind became clearer and I gained weight rapidly.

"I went back to my work again and now after six weeks' use of the food I am better and stronger than ever before in my life. Gerne Nurs. ever before in my life. Grape-Nuts surely saved my life and made me a

strong, hearty man, 15 pounds heav-ier than before I was taken sick.

Both my good wife and I are will-ing to make affidavit to the truth of this."

EXPERT ON FRUIT ROT.

Prof. Surface Issues Bulletin In An-

swer To Inquiries From Farm-

received by the division of zoology,

venting fruit from rotting on the tree. Prof. H. A. Surface gave out the following statement in answer to all the various questions:

the ripening fruit of peach, plum and cherry trees, and is to be pre-

vented by spraying before or about the time the fruit is half grown with the self-boiled lime-sulphur

of fresh lime or quicklime and eight

pounds of sulphur, and into this pour four or five gallons of hot wa-

ter, and cover it with a cloth to keep in the heat. Stir occasionally with a hoe or something to keep it from burning to the bottom and to keep

able, although it will not be poison-

ous, and will not be unfit for use.

"This self-boiled lime-sulphur wash is not recommended for scale

insects, and it is not to be replaced by the concentrated lime-sulphurs

solutions now on the market, nor by the home-boiled wash which we re-

commend as the best and cheapest material for treating scale insects. It

is a different preparation, made by a different formula and method, and

COMMERCIAL

Weekly Review of Trade and Market Reports.

Bradstreet's says:

this week, but irregularities in weather and crop conditions and ebb flow movements in trade and industry prevent definite general characterization of the situation as a w),ole. House trade with jobbers and wholesalers is not usually active at this season and efforts to attract business by clearance sales and liberal advertising have not been altogether successful. There is a further apparent gain in the optimism with which the outlook for the more distant future is viewed, contrasting rather sharply with some of the re ports indicating backwardness of demand for immediate consumption. In the leading industries the strength of demand for iron and steel in most finished forms is notable, and the rallways seem to be buying more freely. The shoe and leather trades are in better shape, due partly to the great strength of hides and the fin-ished products of sole and upper leather. Higher prices for shoes are being paid. There are reports of further gains in demand for woolen and worsted goods. Yarn mills cater-ing to this demand are said to be running full, and raw wool is very strong. High prices of raw cotton are said to curtail profits on goods.

Ginger and chowchow, the latter Ginger and chowchow, the latter composed of melon rind, small oranges and berries of different kinds, are the chief articles preserved by the Chinese. These two articles are preserved in a primitive manner, first being pickled in the brine tubs and then boiled and immersed in sugar syrup made of the common raw Java sugar.

The Tuilieres hydro-electric works, the largest of the kind in France, is nearly completed. It is built on the River Dordogne, where nine 2.700-horsepower turbines produce 23,000 electrical horsepower.

Poultry for Profit

A CHEAP TURKEY SHED.

Improvement is more in evidence It Costs Only \$3.85, But Mrs. Portis

Would Not Take \$100 For It. I built my turkey shed and the pen for them myself. My shed is 4 feet high at back and 6 feet at front, 12 feet long and 6 feet wide. I only used six studdings, one at each corner and one in middle, which took three pieces of 2x4, one foot long, and one piece 2x4, eighteen feet long, made the three rafters. Four pieces 12x12 made the back and it took seven pieces 12x12 to cover and six pieces 12x12 to cover the ends. I put the number on back and top straight so it could be easily taken off and used. I lapped the roof just enough to keep it from leaking, left no cracks for the wind to come through in back and ends. The high and south side I left open, except one

I bought my lumber delivered at \$1.25 a hundred and the whole thing cost me \$3.85. I would not do without it for a hundred dollars.

piece at top to which I fastened a

drop door of net wire. I began at

each end of the house and ran five-

foot wire fence with a twelve-inch

base plank and made a little yard

made a gate and a little slide door

for the little chicks to go in and out

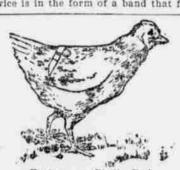

about twenty-four feet square.

I raise as many chickens in winter as I do in summer. I make small coops, air tight on three sides to keep out the cold and slatted on one side to let in the sun. I place these under the shed and when a hen hatches I put her in one of the coops and keep her there for several days. If it is bright and warm I let her out in the pen. When they are old enough I let out of pen each day, but put them in coops at night; when it is cold and rainy I keep the hen in coop all the time and the little chicks have the whole shed and pen to run under.

Later in the season I use the pen for setting my turkeys in. I fix nest, put turkey on, put plenty of water and feed, and there is always a dust bath ready for her under the dry shed, so I am never afraid of her going back to her old nest or a stray dog getting to her. After she hatches I just let her come off in the pen when she gets ready. When the little ones are stout enough I let the hen out every pretty day after the dew dries off, but make them roost under shed every night until they are large

Counts Eggs as Laid.

The dishonest hen with cannibalistic tendencies can no longer defraud her employer with impunity and if she likes eggs for her meals she is in danger of decapitation. Two Wisconsin men have put their heads together and have perfected a registering device which keeps a record of light in proper position. every egg laid and enables chicken owners to detect any loss through theft or any other agency. This device is in the form of a band that fits

Fastens on Bird's Body. over the hen's body. The expansion of the body caused by the emission of the egg causes the band to spread and register a number. If the indicator shows that a hen is laying more eggs than are collected and if the owner finds no evidence of theft, he can then be sure that the bird is eating the eggs herself and either put her in the stewpan and replace her with a more honest fowl or keep such a close watch over her that she will not have an opportunity to indulge her cannibalistic taste. It is impossible to cure a hen of this habit once it is contracted .- Washington Star.

Nest Boxes.

There should be several nest boxes provided for each pen, to avoid hens crowding into one nest and breaking eggs. Boxes should be eighteen inches square and ten to twelve inches deep, supplied with clean next material, and a few moth balls kept in them. Across middle of pens hoards should be placed to the height of fifteen inches, and to the front, litter placed to scatter small grain to induce plenty of exercise. Shucks and a little fodder make the best litter, as fowls eat the fodder if not provided plenty of green food, and the shucks do not crumble so much like straw or hay, and can be thrown to one side when the pen is cleaned, and then used again .- Progressive Farmer.

What Hens Eat.

Experiments have proved that a hen in good condition will eat, on an average, three ounces of mash in the morning, two ounces of grain at noon and four ounces of grain at night.

Let shipped eggs rest twenty-four hours before placing to hatch. ordering eggs to hatch, place orders early in season and have here ready to receive ergs before you notify breeders to ship them.

THOSE WOMEN. "Why do you have a full length mirror in your room?"

"Well, I'm a woman, and I want to see everything that's going on." Cleveland Leader.

QUITE SO.

"Some say it's a mistake to mar-TY. "Well," commented Mrs. Sixthhub to err is human."-Washington Her-

Brimful of American Humor.

Any bookseller will tell you that the constant quest of his customers is for "a book which will make me lough." The bookman is compelled to raply that the race of American humorists has run out and comic literature is scarcer than funny plays. A wide sale is therefore predicted for the "Memoirs of Dan Rice," the Clown of Our Daddles, written by Maria Ward Brown, a book guaranteed to make you roar with laughter. The author presents to the public a volume of the great jester's most pungent jokes, comic harangues, caustic hits upon men and manners. lectures, anecdotes, sketches of adventure, original songs and poetical effusions; wise and witty, serious, satirical, and sentimental sayings of the sawdust arena of other days. These "Memoirs" also contain a series of adventures and incidents alternating from grave to gay; descriptive scenes and thrilling events; the record of half a century of a remarkable life, in the course of which the subject was brought into contact with most of the national celebrities of the day. The book abounds in anecdotes, humorous and otherwise; and it affords a clearer view of the inside mysteries of show life than any account heretofore published. Old Dan Rice, as the proprietor of the famous "One Horse Show," was more of a national character than Artemus Ward, and this volume contains the humor which made the nation laugh even while the great Civil War raged. This fascinating book of 500 pages, beautifully illustrated, will be postpaid to you for \$1.50. Address Book Publishing House, 124 Leonard street, New York City.

Difference Explained.

Baby Boy Had Intense Itching Humor -Scratched Till Blood Rau-Found a Care in Cuticura.

"Our son, two years old, was afflicted with a rash. After he suffered with the trouble several weeks I took him to the dictor, but it got worse. The rash ran to-gether and made large blisters. The little fellow didn't want to do anything but scratch and we had to wrap his hands up to keep bim from tearing the flesh open till the blood would run. The itching was intense. The skin on his back became bard and rough like the bark on a tree, suffered intensely for about three mont But I found a remedy in Cutionra Soup at magical. That was more than two year symptom of it since he was cured. J. Lauck, Yukon, Okla., Aug. 23 and Sept. 17, 1938. Potter Drug & Chem. Corn. Sole 17, 1938. Props, of Cuticura Remedie , P . in, Mass.

The world's yearly record of earthquakes is 30,000. B. N. U. 24.

It's nothing more or less than extravagance topay a big price for a safety. 134 Leonard St., New York

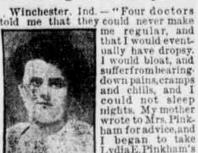

The only part that counts for anything is the blade. But good blades—even he best of bl des—d at warrant the price usual y demanded for the razor.

The biggest part of what you pay for the regular safety-razor is for the trame and the box—detail—that doe't figure at all in the razor's value.

Prove this for yourself.
