Sometimes you may be told that there are other things just as good as DeWitt's Kidney and Bladder Pills. That isn't so. Nothing made is as good as DeWitt's Kidney and Bladder Pills for any ailments of the kidney or bladder, which always result in weak back, backache, rheumatic pains, rheumatism and urinary disorders. A trial of DeWitt's Kidney and Bladder Pills is sufficient to convince you how good they are. Send your name to E. C. DeWitt & Co., Chicago, for a free trial box. They are sold here by Trout's drug store.

Installation services will be held in the Greenhill Presbyterian church, Friday afternoon at 2 o'clock, at which time Rev. John Diehl will be installed pastor of that church. Rev. Dr. West, and Rev. Dr. Rose, and Rev. Fred Diehl, are expected to be present. The installation services in the Presbyterian church in this place will take place Friday evening. Preparatory services will be held in the Presbyterian church Saturday evening and communion services Sunday morning.

George F. Mellott, who owns the "Jimmy Johnston" farm back of Webster Mills, and owns and lives on a big farm between Le-master and Upton, Franklin county, spent a few days this week on this side of the mountain. In addition to what he needed to bread his family and for seed, he had nineteen hundred bushels of wheat to spare for the market this year, and when it reached the dollar mark, he let it go. George says he can raise wheat for a dollar a bushel and make a little money at it, and is not worrying because he did not wait for the May market and get a dollar and a half—and perhaps more for it. He says he has known farmers to throw away a fair market, and afterward be glad to sell at a much lower figure. Mr. Mellott usually has for the market each year from twenty to forty thousand pounds of fat cattle to sell.

News Item.

Beginning June 28, a Summer Term of six weeks will be held at Juniata College, Huntingdon, Pa. The purpose of the management of the institution is to offer instruction in the College, Preparatory and Teachers' Schools. The teaching will be done by the regular College Faculty. This will offer a splendid opportunity to teachers in central Pennsylvania, who desire to take advanced work; to high school graduates not having completed their college entrance requirements; and to College students who are back in their work. Credit will be given for all work satisfactorily completed.

Cherries Rotting on the Trees.

A number of inquiries were received lately by the Division of Zoology of the Pennsylvania Department of Agriculture for a formula for a spraying mixture to be used on peach, plum and cherry trees to keep the fruit from rotting. The answer of Prof. H. A. Surface, the State Zoologist, is as follows:

"The ripe rot or brown rot is due to a fungous disease, which attacks the ripening fruit of peach, plum and cherry trees, and is to be prevented by spraying before or about the time the fruit is half grown with the self-boiled lime sulfur wash. Into a barrel put eight pounds of fresh lime or quick lime and eight pounds of sulfur, and into this pour four or five gallons of hot water, and cover it with a cloth to keep in the heat. Stir occasionally with a hoe or something to keep it from burning to the bottom and to keep it from settling too much. Let it remain an hour. Then dilute it to fifty gallons, and spray it over the trees. Cold water should be used for diluting. Repeat this after a hard rain, or if it does not rain repeat in a week or two, and continue until just before the fruit commences to ripen, when there is no need to continue the spraying, because to spray it on ripening fruit means to discolor the fruit and thus render it unmarketable, although it will not be poisonous, and will not be unfit for use, even though it should be stained by the spray liquid.

This self-boiled lime sulfur wash is not recommended for scale insects, and it is not to be replaced by the concentrated lime sulfur solutions now on the market, nor by the home boiled wash which we recommend as the best and cheapest material for treating scale insects. It is a different preparation, made by a different formula and method, and these materials should not be confused.

Will Open June 28th.

Juniata College Summer Term will open June 28, 1909 and continue six weeks. Normal, Preparatory and College Courses will be given. Beautiful surroundings. Rates reasonable. For booklet and full information address,
