When a woman burns her hand, she says "Oh, dear!" and then forgets it until her husband comes home and she can show the blister. When a man burns his hand the whole neighborhood knows it.

There will be an eclipse of the sun this evening, of an unusually unique character. For a few seconds it will be annular, then change to a total eclipse, then back to an annular eclipse for the second time.

Stevens, was married to Mr. Harry Warren White. Miss Stevens is a native of this county, and a former successful teacher. Fortunately he fell on soft earth, else the result of his fall would be more serious.

The world has use for the young men who can bring things to pass. It has important and remunerative vacancies every month. They are for the right persons. In these places personal influence is not to be despised. It may do much toward securing one a good place. But once he has obtained the position the young man must hold it by showing himself worthy. It is very seldom that an unfit person continues in a position of responsibility for any length of time. Our friends may be able to open the way before us so they can do little more. Do not most of us recall the names of some who had fine opportunities in early life but who failed miserably in the end simply because they were not able to measure up to the responsibilities of the places they assumed.

Incubator History.

May be news to you, but the snapping turtles ran the first incubator.

Just dug a hole, laid their eggs covered them with sand, and sunshine did the rest.

Perhaps Pharaoh saw this stunt on the Nile, and Confucius on the Yangtsekiang.

Anyhow, Egypt and China hatched eggs artificially before the rest of the world cut its first tooth.

Why in 1831 Egypt hatched 25,000,000 eggs a season.

Pretty hard on Yankee horn tooters who think we're it.

The first incubators were heated with manure, like a hotbed, a sure case of "a bad beginning makes a good ending," for today they are parlor ornaments, heated with oil, gas and electricity.

Hatching ovens are dug out of ancient ruins built before the Christian era.

Great ovens 50 by 150 feet composed of vaults with a season's capacity of 150,000 eggs, are in operation in Egypt to-day.

Cakes of excrement are burned in troughs over the eggs, and the majority hatch. No thermometers are used, as the attendants become such experts as to tell the degree of heat with their bodies.

No, dear, the Yankee didn't originate the incubator, and he didn't get the first patent on the multiplication table and the alphabet.

They, with a multitude of other wonders, came from lands afar, with mystery enshrouded.

A number of our citizens were engaged in fixing bridges and working on the road near Akersville last week.

A very large blacksnake was killed in Akersville one day last week.

Miss Lulu Siehng is employed by Mrs. Ernest Hixson.

Mrs. M. A. Barkman and son Troy, visited in the home of John N. Hixson one day last week.

Miss Essie Williams and Miss Ada Hixson were unable to attend the Children's service at Akersville on Sunday and take their part in the exercises on account of their slow recovery from severe attacks of measles.

A birthday Postal Card show was given Miss Nora Schenck last Saturday. She received more than 70 birthday post cards.

The Children's service at Akersville was well rendered and well attended owing to the inclement weather. It truly was a Children's service as only one married person took any interest in the service, that being the Superintendent, Arthur Duvall.

Sunday-School at 9 o'clock A. M., and Prayer meeting at 8 o'clock P. M., at Akersville M. E. church June 20th. All are cordially invited to attend.

An \$8,000,000 Crop.

If there is the same increase this year in the values of farm products as there has been every year in a decade they will exceed \$8,000,000,000. That is over four times the value of all the products of American farms in the Philadelphia Centennial year.

Output of the farms is doubling every fifteen years. Only so short a time ago as when Cleveland was President and in his second term, farm mortgages were the burden of almost every political speech made in the West. Poverty of the farmers sent men like Jere Simpson from Medicine Lodge to Congress.

But tens of millions of farm mortgages held by Eastern banks have been paid off in the last decade. It is no longer "bleeding" or "starving" Kansas, but opulent, thriving Kansas.

Irrigation is bringing annually vast tracts of erstwhile barren land to a state of high cultivation. Improved methods in agriculture generally are adding to the yield per acre. Colleges for scientific instruction are sending to the fields an army of bright young men who are literally making two blades of grass grow where one grew before.

It is enough to make other nations regard America in awe when they see coming from our farms this year a sum sufficient to build nearly 1000 Dreadnoughts!—Philadelphia Press.

SPORTS! SPORTS! SPORTS!

The scores of the major and minor baseball leagues are published in full, as well as the many other games. "The Philadelphia Press" employs a large staff of skilled writers, and with specially leased wire service, gives you the news of all the games and sporting events, completely, accurately, fairly and first. Be a real fan and read "The Philadelphia Press," daily and Sunday.

Airship Budgets of the Great Powers.

A note addressed to Parliament by the British War Office contains a comparative statement of the sums expended in 1908 by the governments of the principal nations of Europe in the construction of airships and the prosecution of experiments in aerial navigation. The approximate amounts, in American money, are: Germany, \$1,900,000; France \$225,000; Austria-Hungary, \$20,000; Great Britain, \$25,000.

The German government contributed \$1,250,000 to the Zeppelin fund, expended \$510,000 in the purchase of Zeppelin airships, and \$125,000 for the pay and maintenance of the balloon corps. France spent \$34,000 on aeronautical schools, pay, and experiments, \$57,000 for material and construction, and \$135,000 for the maintenance of existing airships. Austria-Hungary spent \$14,000 for schools, pay, etc., and \$12,000 for airships. Great Britain spent \$9,500 for dirigible balloons and \$2,500 for aeroplanes. These figures are official and therefore not open to question. London newspapers comment bitterly on the fact that Germany spends nearly eighty times as much as Great Britain for the creation of an aerial navy.
