

**Pimples, Blackheads, Eczema, &c.**  
QUICKLY CURED.

"It is astonishing," remarked a well known authority on Diseases of the skin, how such a large number of people, especially ladies, are by attractively written advertisements, induced to purchase some one of the many so-called Beauty Creams now on the market, not knowing, of course, that they mostly contain oily or greasy substances that clog the pores of the skin and are, for that reason, the very worst thing that they could possibly use. My treatment of Pimples, Blackheads, Blisters and all eruptions of the skin, are as follows, and has invariably proved very successful: Wash

the face carefully every night before retiring with warm water and a little oat meal tied up in a small cloth bag, then, after drying well, use the following inexpensive and perfectly harmless prescription, which can be filled at any Drug Store: Clearola 4 oz., Ether 1 oz., Alcohol 7 ounces. Use this mixture on the face as often as possible during the day, but use night and morning anyway, allowing it to remain on the face at least ten minutes, then the powdery film may be wiped off. Do not wash the face for some little time after using. By following this simple treatment, you will soon have a clear Brilliant Complexion.

**Send for this Free Bulletin.**

The Pennsylvania State College has issued a bulletin giving full information about the courses of study offered in the School of Agriculture and Experiment Station. It describes the work required in the seven four years' courses and the two years' course and makes interesting reading for any one who wishes to know the kind of training that is given young men who want to become expert farmers, or teachers, or experimenters. A study of the pages of this bulletin is convincing that the instruction is most practical. A young man fitted for entrance to college usually selects one of the four years' courses. The two years' course is designed for those who want instruction in agriculture but have not time or opportunity to fit themselves for a full college course, or else do not see their way clear to spend four years in college. The two years' course can be taken without any entrance examinations.

Last year the School of Agriculture enrolled 108 men in the freshman class, 55 men in the sophomore, 25 in the junior, and 16 in the senior. The enrollment in the two years' course was 40. Ninety persons entered the winter courses of twelve weeks.

The bulletin is free. It gives the dates for the beginning of all courses, including the winter courses and "farmers' week." Ask for the "May Bulletin," addressing the School of Agriculture and Experiment Station, State College, Pa.

**Is She Working Herself to Death**

Does your wife complain of too much dairy work? Do you ever hear her say she'll never get through washing milk things? How often does she say, "Oh, if I only had fewer pans, crocks and cans to wash, I could read, write or sew more, or even take a little rest each day."

**AN EASIER TIME**

Ask her about it. Arrange to make the dairy work one half easier, one half neater, one half more pleasant, and 25 to 100 per cent. more profitable by using a Sharples Tubular Cream Separator. Until you try the Tubular, you can't imagine the difference it makes. It skims the milk immediately after milking—there's no milk standing around—no cans or pans to wash. The Tubular is entirely different from all others, so much more simple and convenient. Bring your wife and let me take a Tubular apart for you.
