"About fifteen or eighteen years ago ec-sema developed on top of my hand. It burned and itched so much that I was compelled to show it to a doctor. He pro-nounced it ringworm. After trying his different remedies the disease increased and went up my arms and to my legs and finally on my face. The burning was some-thing terrible. I went to another doctor who had the reputation of being the best in town. He told me it was eczema. His medicine checked the advance of the disease but no further. I finally concluded to try the Cuticura Remedies and found relief n the first trial. I continued until I was completely free from the disease and I have not been troubled since. C. Burkhart, 236
