OVERPLANTING NOT OVERPRODUCTION.

But to Succeed as Fruit Grower, a Man Must be in Love with the Business.

Owing to the public statement of Prof. H. A. Surface, State Zoologist, at Harrisburg, that he feared an overplanting of fruit trees in Pennsylvania at the pres ent time, some persons have construed his remark to mean that this would result in overproduction and profitless orcharding. The Zoologist explains the difference by saying that while overplanting is easily possible, owing to the planting of many trees dominated by mercenary motives only, and which will surely be neglected, overproduction will not be possible for the reason that every tree that is of the right variety, and is given proper care, will produce fruit that can be marketed for a better price than

The Art of Elsie Janis.

Dainty, charming Elsie Janis, the only actress, it is said, who was advised by a President of the United States to go on the stage, is the subject of a delightful story in Human Life for January.

That wonderful gift of mimicry, of which she is the very incarnation, developed early in childhood, and the story follows her career from the time when she "spoke a piece" in Sunday school and so naughtily and truth fully imitated the pompous superintendent that the shocked committee advised her mother to "spank that dreadful child within an inch of her life."

It seemed a far cry from this performance to a vaudeville engagement at \$3,000 per week, but the article tells how she had vaulted it before her twentieth birthday.

Miss Janis's own story of how she studies is unique, and shows how spontaneous is this gift with which the gods have dowered

The article is splendidly illustrated, including hitherto unpublished photographs of the actress as a beautiful child, and also showing El-Jan, her much loved home.-Human Life Publishing

Those who spent last Sunday at Jesse Carmack's were J. H. ing, Gilbert Cook, Theodore Appleby, Lester Mellott, S. C. Henry, Raymond Appleby, Miss Belle Theodore Appleby, Misses Lillian and Zelpha Fleming; Cleve Fields, Clyde Grove.

MECHANICAL INGENUITY.

A Full Rigged Ship That a Fly's Wing

Would Cover. Many instances of mechanical ingenuity really remarkable to us in these days, when we are supposed to have advanced in learning, are related by various ancient authors. The silver sphere, "a most poble and ingenious performance," which was presented to Sultan Solyman the Magnificent by his imperial majesty Ferdinaud, is mentioned by Paulus Jovius as showing and keeping time with the motions of the celestial bodies in various config urations. It was carried to Constantinople by twelve men and there put together by the artist that made it.

Mymecides, an ancient carver, was so proficient in microscopic mechanism that he made an ivory ship, with all its decks, masts, yards, rigging and sails, in so small a compass that it might have been hidden under the wing of a fly. He also made a charlot with four wheels and as many harnessed horses, which took up scarcely more room than the ship.

George Whitehead, an Englishman, made a ship, with all things pertaining to it, to move as if it sailed, upon s "All hands were aloft, a woman made good music on a lute, and a little puppy cried in the midship, all of which variety," says the old writer, "was pleasant and diverting."

The Vulnerable Point.

Mrs. Holt could be depended upon at almost any time to say the wrong thing with the best intentions in the "Nobody minds what poor dear Fanny Holt says," her friends told each other when repeating her remarks. "We know she means all

"Isn't it queer how differently things affect people?" one of Mrs. Holt's neighbors said to her the day after a beach picnic. "We both got tired to death, you and I. You say you've had just a little bit of indigestion, while I have this fearful blind head-

The Word Silhouette.

The little black pictures called "silbouettes" derive their name from Etienne de Silhouette, who was the French minister of finance in 1759. His extreme economy in matters of finance was caricatured by all classes, and any cheap mode or fashion was sarcastically called by his name. About that time these profiles were produced by casting the shadow of a face on the paper by the light of a candle and tracing about it. Because they were cheap they were called in ridicule at the minister "silhouettes," and the name has ever since been retained.-Boston Globe.

All the Printer's Fault. "What became of that paper you were going to start in the interest of uplifting the poor tramp?" asked the interviewer.

"Ah. it fell through," confessed the great reformer, with much agitation, and all on account of the blooming carelessness of the printer." "Did be make a grave error?"

"I should say so. You know the pa-per was to be named the Bar of Hope. Well, that idiot of a printer changed it to the Bar of Soap, and as soon as my constituents heard the name they started running, and they are running yet."—Chicago News.
