What it costs a young man to go through college is always interesting to the fathers who have to pay the bills and to the boys who have to earn their own education if they have any. The record made by the senior class of Princeton University is typical. The smallest amount spent by any student in the class during the four years of his residence at the university is eight hundred dollars. The largest amount is ten thousand dollars. The average is a little more than thirty-six hundred dollars, or about nine hundred dollars a year. Taking the whole country, it is probable that more boys go through college at a total cost of fifteen hundred or two thousand than thirty-five hundred dollars.

Restoring of Color of Teeth.
Dissolve two ounces of borax in three pints of water. Before quite cold add thereto one teaspoonful of tincture of myrrh and one tablespoonful of spirits of camphor. Bottle and mix for use. One wineglass of the solution added to half a pint of tepid water is sufficient for each application. This solution applied daily preserves and beautifies the teeth, extricates tartarous adhesion, produces a pearl-like whiteness, arrests decay and induces a healthy action in the gums.

Make War on The Flies.

Now, that the "fly-season" is here again, too much attention cannot be given to the freeing of your premises from that dangerous and disagreeable pest.

It would be just as sanitary to permit a chicken to scratch in a manure pile and then fly upon your table and walk over your bread and cakes, or alight in the butter.

The following rules will assist in dealing with the nuisance:

Keep the flies away from the sick, especially those ill with contagious diseases. Kill every fly that strays into the sick-room. His body is covered with disease germs.

Do not allow decaying material of any sort to accumulate on or near your premises.

All refuse which tends in any way to fermentation, such as bedding straw, paper waste, and vegetable matter, should be disposed of or covered with lime or kerosene oil.

Screen all food.

Keep all receptacles for garbage carefully covered and the cans cleaned or sprinkled with oil or lime.

Keep all stable manure, in vault or pit, screened or sprinkled with lime, oil, or other cheap preparation.

See that your sewage system is in good order; that it does not leak, is up to date, and not exposed to flies.

Pour kerosene into the drains. Cover food after a meal; burn or bury all table refuse.

Screen all food exposed for sale.

Screen all windows and doors, especially the kitchen and dining room.

Burn pyrethrum powder in the house to kill the flies.

Don't forget if you see flies, their breeding places is in nearby filth. It may be behind the door, under the table, or in the cuspidor.

If there is no dirt and filth, there will be no flies.

If there is a nuisance in the neighborhood, write at once to the Health Department.
