The Fluttering Puffer.
The physician says that the most hopeless type of woman he has to deal with is the one who fritters her vitality on everything that comes under her nose; who does not reserve her strength for the important things of life.
Everyone knows this kind of woman, and at times everyone is this kind of woman. It takes a good deal of self-investigation to call a halt and see if you are not working overtime.
No life is so secluded that it does not have important things to be done. Usually the woman who uses good judgment in a trivial life is the one who works her way out into the bigger world and learns how to handle great things out there.
But in both spheres is the woman who gets excited over the thing that is not worth while; then when she must bring all her energies to bear on the big things worth accomplishing, she finds herself bankrupt.
You can put your finger on this lack of balance everywhere. From the woman who wants to appear at her best at an important social function and who defeats this purpose by shopping all day for a certain ribbon to wear in her hair, to the woman who stays in the kitchen all day over a trivial task when she needs her strength for a trip the next day; the evidence of frittering is everywhere.

One of our citizens who is of a philosophical turn of mind, was heard giving vent to the following: "As a general thing, I believe in letting a woman have whatever she wants, but when I see one around with a spring hat on her head that looks like an old-fashioned beehive that has been tarred and feathered and struck by lightning, by George, I begin to wonder if it would be safe to trust her with a ballot."

Least Gallons

That's the thing to go-by in paint--least gallons --Devoe.

The strongest takes least gallons, of course; and, of course, wears longest.

Costs half to three-quarters; more likely half. Depends on what you compare it with.

Compared with average paint, Doveo costs half and wears two or three times as long.

Compared with the worst, Doveo costs a third—the worse your paint, the more it costs. You'll find it out when you pay for putting it on.

You pay by the gallon. No matter how you pay, you pay by the gallon.

You pay for putting it on by the day; but the painter paints a gallon a day; a day is a gallon; you pay by the gallon.

If you don't know it, better look-out.

If you want to know what a gallon costs you, put-on; add together the gallon price and the day's-work price.

You pay that for every gallon you have put-on; no matter what paint; no matter what price; no matter who paints it; no matter what bargain you make.

An extra gallon means weak paint, a little more money for paint, more money for painters' wages (about \$5 a gallon for both), and painting again too soon.

The cheap paint is Devoe; the others are dear; there are 8 not-adulterated in the United States; 200 adulterated; 100 short-measure; one Devoe. Take your choice.

If anyone doubts any statement above, here's the proof:

He may paint half his job Devoe, the other half any paint he likes. If Devoe doesn't take less gallons and cost less money (1) for the gallons (2) for putting it on, no pay. If it does, Devoe is the paint that makes least first cost.
