Weekly Review of Trade and Market Reports.

Bradstreet's says:—
Unseasonably cool weather still arrests retail trade and retards crop progress in the northern half of the country, and trade is quiet in the southern districts, though cotton and fruit crops there are making progress. Jobbing trade reports reflect quiet in consumptive demand in a moderate volume of reorders, which are classed as fairly frequent, but small in the aggregate. Fall trade as a whole still hesitates, pending clearer views of crop and price outcome. Industrial reports point to considerable curtailment of output proceeding from uncertainty as to the latter. The week's price movement is toward a slightly higher range reflecting largely crop uncertainty as regards the cereals and bullish operations in the remaining old crop cotton months, but the monthly returns of price movement point to a continu-ance of the readjustment of commodity values on a lower level, where high cost will not, as in the past, automatically check consump-
