Epidemic of Itch in Welsh Village. "In Dowlais, South Wales, about fifteen years ago, families were stricken wholesale by a disease known as the itch. Believe me, it is, the most terrible disease of its kind that I know of, as it itches all through your body and makes your life an inferno. Sleep is out of the question and you feel as if a million mosquitoes were

affected. The doctors did their best, but their remedies were of no avail whatever. Then the families tried a druggist who was noted far and wide for his remarkable cures. People came to him from all parts of the country for treatment, but his medicine made matters still worse; as a last resort they were advised by a friend to use the Cuticura Remedies. I am glad to tell you that after a few days' treatment with Cuticura Sosp, Cintment and Resolvent, the effect was wonderful and the result was a perfect cure

Incredulity Of Man.

Mr. Henry C. Weeks, the New York architect, who years ago moved the mirth of his Lang Island neighbors by pouring oil into swamps to keep down mosquitoes, lived long enough to have the laugh on his side, dying Friday at the age of 60. He is not the only instance, by thousands, of the pioneer being called crazy by those whom he was seeking to benefit by an operation that justifies itself. Fulton was "crazy" in the opinion of those who leered him as he went on his way to the yard as he went on his way to the yard where the Clermont was building. Their incredulity was different in expression only from that of Laplace who assured Napoleon that there was nothing in Fulton's idea, and that steam had about enough power to propel a child's plaything. - Boston

Curiosities Of Smell.

No substance that refuses to dis-solve in water has an odor. It is the actual substance itself, floating in particles in the air, that appeals to the nose, and not simply a vibra-tion of the sir, as in the case of light and sound. The damper a thing is the more powerful the odor it gives off. A pleasant proof of the fact can be had by walking in a garden after rain. There is no end to the curiosities of smell. It is, for instance, the vapor of a liquid that smells, and not the liquid in the nass itself. If can de cologne be fuses to recognize any odor there at all - London Globe.
