Church Notices.

Announcements for Sunday, July 31, 1910. HUSTONTOWN, U. B. CHARGE, S. B. Hoffman, pastor. Hustontown—Preaching 10:30. Bethlehem—Sunday school 9:00. Preaching 2:30. Knobsville—Preaching 7:45. Dublin Mills Grove, Saturday evening, July 30th, at 7:45. Rev. H. S. Heber, of Middleburg, a former pastor will fill the pulpit on this day.

Napoleon's Gift

was of the unconquerable, never say die kind, the kind that you need most when you have a bad cold, cough or lung disease. Sup-pose troches, cough syrups, cod liver oil or doctors, have all failed, don't lose heart or hope. Take Dr. King's New Discovery. Satis-faction is guaranteed when used for any throat or lung trouble. It has saved thousands of hope-less sufferers. It masters stub-born colds, obstinate coughs, hemorrhages, lagrippe, croup, asthma, hay fever, and whooping cough and is the most safe and certain remedy for all bronchial affections. 50c. \$1.00. Trial bot-tle free at Trout's drug store.

Big Money in Milch Cows.

It pays to patronize the Cream-ery. One customer with one cow is receiving an average of \$5.00 a month for butter made and sold by the creamery. The cow is worth about \$30.00. Do some figuring. In five years the cow will be worth \$45 or \$50 and the net income in that time amounts to \$300, making a profit of 1,066 2/3 per cent. What can you do to beat that? The family also used what milk was needed each day from this same cow. Cereal farm-ing pays only about 15 per cent. net, and feeding stock pays only about 50 per cent. gross. Nothing pays like a milch cow.

WAVERLY 30 Years Experience in the manu-facture of Gasoline means much to the motorist. In the use of Waverly Brands 76-Motor-Stove you are guaranteed the greatest possible efficiency— instantaneous power, full, clean explosion—freedom from carbon deposits—no spark plugs or in-cylinder—ready ignition. Your dealer will supply you. Waverly Oil Works Co. Independent Sellers Pittsburgh, Pa. GASOLINE

Railroad History.

Are you not led to wonder what the next century will unfold when you consider the marvelous devel-opment in industrial enterprise of the past hundred years? It is hard to realize that there are per-sons living right here in McCon-nellsburg who came into this world before a single mile of rail-road had been built in the United States.

The oldest railroad in this coun-try is the Baltimore & Ohio, hav-ing been continuously in exist-ence since 1827, the year it receiv-ed its charter. The first rail of this road was laid on July 24, 1828, by Charles Carroll, the last surviving signer of the Declara-tion of Independence.

Several short railroads were in existence previous to this time, but they were small private enter-prises. What may be consider-ed the first railway build in the United States was from the gran-ite quarries of Quincy, Mass., to tidewater, a length of five miles, which was completed in 1827. It was built to supply the granite for the Bunker Hill monument, and was made of wooden rails laid on granite sills, with a strap rail of rolled iron.

The second railroad was begun in January, 1827, and completed in May of the same year, and ex-tended from the coal mines to the Lehigh River at Mauch Chaunk, Pa., a distance of nine miles. The loaded cars passed down the incline by gravity, and the empty cars were drawn up by mules. The rails were of tim-ber, covered with a strap of iron.

In 1828 the Delaware & Hud-son Canal Company constructed a rail way sixteen miles long from its coal mines at Honesdale, Pa., the termination of the canal, to trans-port the anthracite coal to tidea-ter.

These private roads were fol-lowed rapidly by the Baltimore & Ohio, the Mohawk & Hudson, the South Carolina, the Camden & Amboy, the Ithaca & Oswego, and the Lexington & Ohio, which, at the close of the year 1830, had ninety-two miles built and 463 miles projected or under construc-tion. All of these roads were built for and operated by horse power.

Ten years after this, in 1840, there were 2816 miles of railroads in the United States, since which time railroad building advanced rapidly, and in 1909 there was in operation in the United States 230,084 miles of railroad, with second tracks and sidings amount-ing to 103,691 miles additional.

The original design of the Bal-timore & Ohio Railroad was as a road from tidewater to the Ohio river. The road originally con-sisted of iron-plated wooden rails and a speed of nine miles an hour was considered very wonderful in those days. To-day the ninety miles between New York and Philadelphia is covered in ninety minutes. The journey to Chic-ago from New York, 911 miles, takes less than twenty-four hours; from Chicago to San Fran-cisco, eighty-nine hours, and to cross the entire continent from New York, four days and eight hours.

The speed of American expres-ses was, fifteen years ago, from thirty to forty miles an hour. It has now been raised to consider-ably over forty. Less than forty years ago Jules Verne wrote his entertaining romance, "Around the World in Eighty Days." He was thought to have exceeded all bounds of possibility; at that time the circumnavigation of the globe never had been accomplished in less than 121 days. In 1873 it was done in 109 days. Eventual-ly, an American performed the feat in ninety days, and in 1891 a Miss Bisiand (Nelly By) lowered the time to seventy-two days. Since then the record has stood at sixty-nine days, the main ob-stacle being to travel speedily the mighty tract of Asia.

The first locomotives used were brought from England, and the first locomotive built in the United States was made by the West Point Foundry for the South Caro-lina Railroad Company, after plans by the chief engineer, Horat-ion Allen, and was first put up-on the road on November 2, 1830. Thus was began an industry that has grown to be one of the most important in the United States.

Rules in Banking.

Do not make memoranda of any kind in your pass book. Never destroy a certified check. If you lose one, the bank im-med-iately requires you to give bond for the amount of the last check before it can issue a duplicate.

Never introduce any person to a bank to open an account unless you know the person well and know him to be thoroughly reli-able.

Never draw your balance down to such a small amount as to cause the teller to make inquiries of the book keeper.

If you offer a note for discount and the bank should refuse, don't ask why it did not discount same, as it need not give reasons for so doing.

Never cash checks for stran-gers. It is dangerous. Banks are not required to re-ceive deposits from everyone, and may refuse to do so without giving reasons.

If you should lose a signed check, stop payment at once by giving the bank notice of the check number, date, to whom payable and the amount; espe-cially should this be done if the check is payable to bearer.

THOSE PIES OF BOYHOOD.

How delicious were the pies of boyhood. No pies now ever taste so good. What's changed, the pies? No. It's you. You've lost the strong, healthy stomach, the vigorous liver, the active kid-neys, the regular bowels of boy hood. Your digestion is poor and you "blame the food. What's needed? A complete toning up by Electric Bitters of all organs of digestion—stomach, liver, kid-neys, bowels. Try them. They'll restore your boyhood appetite and appreciation of food and fair-ly saturate your body with new health, strength and vigor. 50c at Trout's drug store.

All Boys Should Learn

To run; to swim and to carve. To be neat; to make a fire and to be punctual.

To do any errand; to cut kind-ling and to sing if they can.

To help their mother; to hang up their hats and to respect their teachers.

To hold their heads erect; to sew on their own buttons and to read aloud when requested.

To wipe their shoes on the mat; to cultivate a cheerful temper, and to speak pleasantly to an old person.

To put every garment in its proper place; to remove their hats upon entering a house and to laugh. A good laugh is better than a medicine.

To attend strictly to their own business, a very important point. And finally to be as kind and as helpful to their sisters as to other boys' sisters.—Sel.

Fishing for Fisher.

There was an old fisher called Fisher.

Went fishing for fish in a fissure.

When a fish with a grin

Pulled poor Fisher in,

Now they're fishing the fissure for Fisher.

Don't Cut It!

—the ATLAS E-Z Seal Jar Will Hold It Whole

That's one strong feature in favor of the "ATLAS E-Z SEAL"—it has a wide mouth for large fruits. Another is its uniform thickness—no thin spots or weak places in an ATLAS E-Z SEAL Jar. Still a third good point is its smooth top, which can't cut the hand when sealing. Be sure to ask your dealer for the ATLAS E-Z SEAL Jar and take no other.

HAZEL-ATLAS GLASS CO., Wheeling, W. Va.

WELLS TANNERY.

Many of our people attended the funeral of W. H. Sweet at Saxton, last Sunday. Mr. Sweet was one of Saxton's best citizens—a very liberal supporter of the gospel, both at home and abroad, and always kind to the poor and needy. He married Sarah Bar-nett, sister of James W. Barnett, Mrs. A. F. Baker, and Mrs. Catherine Spangler, of this place.

Mrs. Peters, of Cumberland, O., is visiting her parents, Mr. and Mrs. Alfred F. Baker, near Wells Tannery.

Willie Reeder, of Pittsburg, is visiting his aunt, Mrs. Will Har-mon.

Mrs. Howard Wisbart and daughter Mildred are visiting in the home of Mr. and Mrs. Harvey Wisbart.

Miss Mary Salkeld, of Breeze-wood, is a guest of Mrs. George Sprowl.

Prof. Geo. W. Alloway, who left this community thirty six years ago, and is now a resident of Ohio, visited Mr. and Mrs. J. B. Horton and attended the picnic last Saturday at which place he met many of his old time friends. Prof. Alloway has been principal of one and the same school in Ohio for thirty years, and is a wide awake, up to date, and en-thusiastic educator.

Miss Mary McMeans, of Johns-town, is a guest in the home of Mr. and Mrs. George W. Swope.

The picnic held last Saturday under the auspices of the Ladies Temple was a great success in every way from early morning until almost the advent of the Sabbath. The fantastic parade excelled anything ever attempted along that line in this valley. The speakers in the forenoon were Mrs. George Sprowl, who in a carefully prepared and well delivered address of welcome, held the interested attention of her hearers. The response was given by Mr. G. M. Sipes, of Saxton, who is so earnest in his labors against the strong drink traffic, that after a well directed reply to the address of welcome, he switched off on to the temper-ance track, and gave such an earnest talk, that if the seed fell upon good ground—as we hope it did it should bring forth a bounti-ful harvest.

Mr. Sipes was followed by Mr. J. W. Gibson, who very ably and interestingly discussed the "First Crusade, and the Principles of the Knights of the Golden Eagle." This, with instrumental and vocal music completed the morning program.

Then came the regulation picnic dinner, and every Fulton Coun-tain knows what that means—an abundance of the best things to eat and drink—and you know that things never taste so good, and one's appetite never so keener, as at a picnic.

In the afternoon interesting addresses were delivered by Prof. Alloway, whose name has already been mentioned, and by Rev. Flegal, of Three Springs, pastor of the Pine Grove Church.

The ladies wish, through the Fulton County News, which is found in nearly every home in the Valley, to express their gratitude to the large crowd, composed not only of our home people, but of many persons from across the mountains, for their presence and lavish financial support.

Work 24 Hours A Day.

The busiest little things ever made are Dr. King's New Life Pills. Every pill is a sugar-coated globule of health, that chang-es weakness into strength, langu-or into energy, brain-fog into mental power; curing constipa-tion, headache, chills, dyspepsia, malaria. 25c at Trout's drug store.

Arrangements have been com-pleted for two speaking tours to be made by former President Roosevelt, one to the West and the other Southward, by special train. The first will begin on August 25th, and the principal points will be Cheyenne, Denver, Osawatomie, Kansas, Omaha, Sioux Falls, South Dakota, Fargo, St. Paul, Milwaukee, Freeport, Illinois, Chicago, and Pittsburgh, returning to New York on Sep-tember 10. The other will leave on October 6, and will take in At-lanta, Hot Springs, Peoria, Illi-nois, and some point in Indiana, returning on October 14. Many brief speeches will be delivered on the car platform at points where the train will stop for a short time.

A Storekeeper Says:

"A lady came into my store lately and said: "I have been using a New Perfection Oil Cook-Stove all winter in my apartment. I want one now for my summer home. I think these oil stoves are wonderful. If only women knew what a comfort they are, they would all have one. I spoke about my stove to a lot of my friends, and they were aston-ished. They thought that there was smell and smoke from an oil stove, and that it heated a room just like any other stove. I told them of my experience, and one after another they got one, and now, not one of them would give hers up for five times its cost!"

The lady who said this had thought an oil stove was all right for quickly heating milk for a baby, or boiling a kettle of water, or to make coffee quickly in the morning, but she never dreamed of using it for difficult or heavy cooking. Now—she knows. Do you really appreciate what a New Perfection Oil Cook-Stove means to you? No more coal to carry, no more coming to the dinner table so tired that you can't eat. Just light a Perfection Stove and immediately the heat from the intense blue flame shoots up to the bottom of pot, kettle or oven. But the room isn't heated. There is no smoke, no smell, no outside heat, no drudgery in the kitchen where one of these stoves is used.

New Perfection WICK BLUE FLAME Oil Cook-stove

It has a Cabinet Top with a shelf for keeping plates and food hot. The nickel finish, with the bright blue of the chimneys, makes the stove ornamental and attractive. Made with 1, 2 and 3 burners; the 2 and 3-burner stoves can be had with or without Cabinet.

CAST OF A DEATH STRUGGLE.

Obtained by Placing a Martyr in a Mass of Soft Concrete.

In the museum of Algiers there is one object which is unique in the world's list of curiosities. It is a plaster cast of the martyr Gerontimo in the agony of death. The Algerians put Gerontimo alive into a soft mass of concrete which presently hardened into a block and was built into a fort. This was in 1659 and about forty years later a Spanish writer described the event and told exactly how that particular block could be located. The fort stood for nearly three hundred years. Then in 1863 it was torn down, the block was identified and broken open and an almost perfect mould of the dead martyr was found within.

They filled the mould with plaster and the result, a wonderful cast, lies there in the museum to-day, face down as he died, hands and feet bound and straining, head twisted to one side in the supreme torture of that terrible martyrdom.

"It is a gruesome, fascinating thing," writes Albert Bigelow Paine in "Outing," "and you go back to look at it more than once and you slip but between times for a breath of fresh air. If I lived in Algiers and at any time should sprout a little bud of dis-con-tempt with the present state of af-fairs—a little sympathy with the sub-jugated population—I would go and take a look at Gerontimo and forthwith all the discontent and the sympathy would pass away and I would come out glowing in the fact that France can crack the whip and that we of the West can ride them down."

The Ways of Treating "Stars."

The English actor, Macready, ac-cording to Sir Squire and Lady Bancroft's recent book, "The Bancrofts' Recollections of Sixty Years," was once playing "Hamlet" in the United States. During rehearsals he had found fault so severely with the local favor-ite, who took the part of the king, that his majesty determined to re-venge himself upon the great traged-ian at the performance by reeling, when stabbed by Hamlet, to the center of the stage, instead of remaining at the back, and falling dead upon the very spot which Macready had re-served for his own end.

The plan was carried out. Macready, on his part, groaned and prompted: "Die farther up the stage, sir! What are you doing down here, sir? Get up and die elsewhere, sir!"

To the amazement of the audience, the king sat bolt upright on the stage. "Mr. Macready," he said, "you have had your way at rehearsal, but I am king now, and I guess I shall die where I please."

William Terriss accommodated him-self to similar conditions with super-ior grace and humor. In rehearsing the duel in "The Corsican Brothers," he said to Irving:

"Don't you think, governor, a few rays of the moon might fall on me? Nature, at least, is impartial."

Descendants of David.

The history of the Sassoons is one of the most dramatic in the very dramatic story of the Hebrew race. The original Sassoon was a Bombay mer-chant, but the family is descended from a group known as Ibn Shoshan, who at one time held the position of nassi of Toledo. The name Shoshan, which signifies "lily," in Hebrew, was gradually transformed into Sassoon, signifying "gladiolus." The family claim Davide descent, and Abraham Sassoon, who flourished in the sev-enth century, stated that he was a direct descendant of Shephathiah, the fifth son of David. Not only are there many references to the name in He-brew medieval literature, but men-tion of it is made in the Talmud—London M. A. P.

Worse Than Noah.

Mamma (to Willie, who has been playing with Noah's Ark).—Don't be rude, Willie. I'm sure that Noah wasn't whining and complaining when he put the animals into his ark.

Willie.—No; but I'll bet Noah didn't have any baby brother to lick the paint off his animals.

The Man in Need.

The director of a matrimonial agency says the young girls ask only: "Who is he?" The young widows: "What is his position?" The old widows: "Where is he?"

GENERAL DIRECTORY.
