

NATURE'S SIGNALS.

The first indication of kidney disorder is often backache. Then comes pain in the hips and sides, lameness, soreness and urinary troubles. These are the warnings — nature's signals for help. Doan's Kidney Pills should be used at the first sign.

A. Treitel, 84 Rosset St., New Haven, Conn., says: "I was propped up in a chair for 23 weeks. So intense was the pain when I moved that I thought I would pass away. The kidney action was irregular and the secretions scalded. Three doctors gave me no relief. Doan's Kidney Pills cured me, and for ten years the cure has been permanent."

Remember the name—Doan's. For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

THEIR IDEAS.

First Woman—A smart woman can fool a man all his life.

Second Woman—And a smart man can only fool a woman until she finds it out.

A Bernhardt Trick.

Mrs. Sarah Bernhardt, who is supposed to be something of an artist as well as an actress, was recently called upon in one of her marvelous creations to enact the role of a sculptor, and to model a certain bust in view of the critics. This fairly electrified the critics, but when going into rhapsodies over the technical skill in handling the clay which Mrs. Bernhardt exhibited they showed that they knew little of the artistic tricks of actors and actresses; as a matter of fact, she does nothing of the kind. The bust is modeled and baked, and over it is placed damp clay of the same color. This the talented actress merely pulls off, exposing the beautifully modeled head underneath.

One Side Enough.

Senator William Alden Smith tells of an Irish justice of the peace out in Michigan. In a trial the evidence was all in and the plaintiff's attorney had made a long and very eloquent argument, when the lawyer acting for the defense arose.

"What are you doing?" asked the justice, as the lawyer began.

"Going to present our side of the case."

"I don't want to hear both sides argued. It has a tendency to confuse the court."—Washingtonian.

Less Lavish.

"I saw 'Uncle Tom's Cabin' played recently."

"So?"

"I think I'll read the book."

"You may be disappointed. The book mentions only one little Eva and one Lawyer Marks."—Louisville Courier-Journal.

WINNERS OF ROWING HONORS IN ENGLISH REGATTA

THE WINNIPEG CLUB FOUR AT HENLEY

Winnipeg, Man.—The people of this city are proud of its oarsmen, and with reason, for the Winnipeg club four won great honors at the recent regatta at Henley, England. The fact that oarsmen from other lands do not often succeed in defeating the Englishmen on their own waters adds to the glory of the Canadians' achievement.

ELECTRICITY IN WAR

Japanese Use Novel Expedient in Subduing Savage Tribes.

Most Curious Duel Being Waged Against Bloodthirsty Aiyu Tribes in Island of Formosa—Soldiers Unable to Check Outrages.

Philadelphia.—The most ferocious instinct of primitive savagery, head hunting, Japan is to fight with the most modern of military agencies, electricity. It is a most curious duel that is now being waged in the island of Formosa between the Japanese and the bloodthirsty Aiyu tribes.

It is the proudest achievement of the head hunter to increase his collection of skulls. He who has most of these sanguinary relics is esteemed the great man of the tribe and the gruesome skulls are exhibited with the utmost pride not only to residents but to visitors who may chance under proper guard to penetrate to the fastnesses of the interior.

It has not taken long for Japan to find that her soldiers can not avail to stop the depredations and outrages committed by the head hunters. There are some hundred thousands of these savages, who became a problem to the Tokio government when the outcome of the war with China in 1895 brought Formosa under Japanese dominion.

The gallant little brown men who had been able to overwhelm the Chinese and who later were to strike such a frightful blow at the prestige of Russia, were unable to deal with the head hunters.

In the guerrilla warfare that ensued as soon as the Japanese soldiers came into the country the modern sons of Jupiter were constantly worsted.

It was a private trick of the head hunters to perform their deadliest outrages right under the noses, so to speak, of the new rulers of the island.

Then a tactician in the army struck on a great idea.

A wall was built across the country, a wall four hundred miles in length, not a wall of stone, but a far more deadly and treacherous wall, one made of wire and charged constantly with a current that carried death just as certainly as the bullet of a dead shot.

Only it needed no soldier to fire this death message. All that the head hunter needed to do was to come into contact with it just for the briefest space of time and with any portion of his body. Death was then the sure outcome.

The deadly obstruction with secret entanglements most cleverly contrived extends across the land from the coast of Giran, in the east, to the shore at Nanke, on the west side, where it takes a turn north and circles about in such a way that the savages, once within its lines, would find escape

difficult without fatal contact with the wire.

The fences are connected with powerful electric plants and the wires are constantly kept charged with the death-dealing fluid.

Already it has been found that the new system is the most efficacious that the government has yet contrived.

The savages are baffled and mystified. They cannot understand what it is that has the power of striking down their comrades so suddenly. They are afraid to move about in the night on their horrible head-hunting expeditions, for the wire has been placed with such cleverness that they never can tell when they are likely to come into contact with it.

The plan of campaign at present is to drive the savages into the mountains, prevent them from coming into the low countries or near the towns, and so hem them in eventually by the wire barriers that they will be cut off from supplies and forced either to surrender or die.

Hardly will this be regarded as cruel, when the atrocities of the head hunters are taken into account. Japan could hardly be expected to view with indifference such things as have happened. In one case a rebel raid on a Jap outpost resulted in the killing

and decapitation of thirteen soldiers, and so clever and crafty was the enemy and so skilled at taking advantage of a knowledge of the country that the peril was persistent and unremitting.

The Japanese call the head hunters the "Selbans." They are said to number more than one hundred thousand, divided into seven hundred tribes. Each tribe occupies its own territory and they are all independent of each other, each seeming concerned alone in preventing encroachment on its land.

This lack of unity, instead of being a handicap to the head hunters, has really made their subjection harder. Jap generals say that if they were united in some sort of bond to protect them all it would be possible to get them together in a big enough force where they would dare a pitched battle with the invader. The outcome of such a contest would, of course, be victory for the trained soldier of Japan and would eventually be the obliteration of the Selbans.

But the head hunters steadily decline any such issue. They fight in roving little bands, they move over the country with amazing rapidity and until the deadly electric fence limited their operations to one little section of the island there was no extreme of daring not possible to them.

A Fijian's creed forbids him to eat save when seated upon a triangle made of three fish bones.

MAN IS MARRIED TO SISTER

Wife's Son Falls in Love With Husband's Daughter and Blessings Are Bestowed.

New York.—Romance set out to prove in Corona, that a woman may be a sister to a man and a man may continue as a brother to a woman, and still they may marry with every prospect of happiness. Such is the situation in which Frank Gannon, a post office clerk, and Anna Padran, an operator in the Flushing telephone exchange, find themselves.

Gannon's mother was persuaded to abandon her widowhood a few months ago by John Padran, who is in the pay bureau of the Long Island city fire department. They decided that it would be nice to have her son and his daughter live with them, and hired a house at No. 42 De Witt street, Corona. That arrangement pleased the young people so well that in a little while there was no doubt that the house held two pairs of lovers.

While pleased that their children looked on well together, the elders looked with dismay on love-making between them and took them to task for it, protesting that they were brother and sister and had no right to fall in love. This view of the case struck the young people as one not to be argued and they seemed to acquiesce in the proposition as laid down by the parents. All the same they had their own opinion and, having obtained a marriage li-

cence, they slipped around the other night to St. Leo's church where Father John O'Toole married them.

As Frank is thirty-one and Anna twenty-one, there was no going behind the returns and the elders cheerfully bestowed upon them their blessing.

NEW RECORD FOR DIAMONDS

Imports at New York Port for Last Fiscal Year Will Be Above \$45,000,000.

New York.—Imports of diamonds and other precious stones, as reported by the customs officials this month, have sent the total valuation for the fiscal year, which ended June 30, above \$45,000,000. The highest prior record was \$43,692,476 for the year 1907, as shown in a report recently prepared by Douglas R. Sterrett for the bureau of statistics. More than 95 per cent. of these imports now come through the port of New York.

Importers have been predicting for some time that the present fiscal year's imports would break all records, but this month has sent the total even higher than they expected.

About 85 per cent. of the imports have been diamonds. Of the total imports of diamonds, about one-third have been in the rough and the other two-thirds were cut and polished in Europe.

Bathing Tramp Freed.

New Castle, Pa.—Martin Walter, who admitted he was a "hobo," was surprised the other morning while taking a bath. As the bath was in a public drinking fountain on Moravia street Walter was arrested. He had soap and towel and was scrubbing his face when arrested. Because of the unusual circumstance and Walter's confession that he liked to wash, even if a tramp, he was released by Mayor Lusk.

COMMERCIAL

Weekly Review of Trade and Market Reports.

New York.—Bradstreet's says: Trade reports are still quiet in fall demand, though the advance of the season and the force of crops toward harvest has aided in enlarging jobbing demand at some important Western centers. Chicago and St. Louis report the first of the fall jobbing exursions helping to expand trade at those cities while the rather better results of spring wheat harvest are evoking more optimistic reports from Northwestern centers. Buying is still conservative, however. Retail trade is still confined largely to clearance sales of summer goods at concessions. At the East there is slightly more doing in some lines for fall. Cotton goods feel the effects of mill curtailment in increased steadiness of prices and raw wool of better grades is still active despite the rather sharp advances noted last week. Collections as yet show little improvement and are slow as a whole. In leading industries there are few new features. Building returns for July show a heavy decrease from a year ago, much of which is, however, accounted for by the reduction at the metropolis, and there are still more gains than losses at the country's cities as compared with the midsummer month a year ago. Iron and steel are quiet.

A New Version.

Lawyers have a peculiar system of abbreviation, such words as trustees, executors being cut down to trees, exors, and admors. This practice led to an amusing slip on the part of a solicitor, who, somewhat late in life, abandoned his profession and entered the church. A few Sundays after his ordination he startled his congregation while reading the lesson by delivering one of the passages as follows: "I see men as trustees walking."

LEG A MASS OF HUMOR

"About seven years ago a small abrasion appeared on my right leg just above my ankle. It irritated me so that I began to scratch it, and it began to spread until my leg from my ankle to the knee was one solid scale like a scab. The irritation was always worse at night and would not allow me to sleep, or my wife either, and it was completely undermining our health. I lost fifty pounds in weight and was almost out of my mind with pain and chagrin as no matter where the irritation came, at work, on the street or in the presence of company, I would have to scratch it until I had the blood running down into my shoe. I simply cannot describe my suffering during those seven years. The pain, mortification, loss of sleep, both to myself and wife is simply indescribable on paper and one has to experience it to know what it is.

"I tried all kinds of doctors and remedies but I might as well have thrown my money down a sewer. They would dry up for a little while and fill me with hope only to break out again just as bad if not worse. I had given up hope of ever being cured when I was induced by my wife to give the Cuticura Remedies a trial. After taking the Cuticura Remedies for a little while I began to see a change, and after taking a dozen bottles of Cuticura Resolvent in conjunction with the Cuticura Soap and Cuticura Ointment, the trouble had entirely disappeared and my leg was as fine as the day I was born. Now after a lapse of six months with no signs of a recurrence I feel perfectly safe in extending to you my heartfelt thanks for the good the Cuticura Remedies have done for me. I shall always recommend them to my friends. W. H. White, 312 E. Cabot St., Philadelphia, Pa., Feb. 4 and April 13, 1909."

Woman's Power Over Man

Woman's most glorious endowment is the power to awaken and hold the pure and honest love of a worthy man. When she loses it and still loves on, no one in the wide world can know the heart agony she endures. The woman who suffers from weakness and derangement of her special womanly organism soon loses the power to sway the heart of a man. Her general health suffers and she loses her good looks, her attractiveness, her amiability and her power and prestige as a woman. Dr. R. V. Pierce, of Buffalo, N. Y., with the assistance of his staff of able physicians, has prescribed for and cured many thousands of women. He has devised a successful remedy for women's ailments. It is known as Dr. Pierce's Favorite Prescription. It is a positive specific for the weaknesses and disorders peculiar to women. It purifies, regulates, strengthens and heals. Medicine dealers sell it. No honest dealer will advise you to accept a substitute in order to make a little larger profit.
